Correction. I have fumble fingers! Should read 6 AA batteries for the 9 volts
required for memory backup.

Sorry for the confusion.

I think maybe you had a couple too many CC's in the subject of your
message. Nothing is a new 'DXCC' country until the ARRL says it is....

Anyway, interesting place to read about. We have a lot of your
shipping containers over here in the port, they say SEALAND on the
side of them....

Hmmm, apparently you don't subscribe to the same interpretation
of the _law_ that I do. I have this curious tendency to look
at what the law says, and not simply make things up to meet
whatever outcome I desire.

Look, if you disgree with me here, then please explain on
what basis you think a perjury charge (18 U.S.C. 1621) -- or
if you think another law applies, that one -- can be sustanined
on the facts of the case.

Cheers,

-- Arne Langsetmo

still
> for sale!

To you maybe the item is for sale as your are after all selling it, *but*
for the buyer it makes a big difference.
In the FS case they can look at the item, find the price (or make an offer)
and then either buy or not.
In the FA, they have to go to a different site and bid. Bidding may take
many days and they'll not know if they have the item until the last couple
of seconds.

>Is the News groups for selling items or what???

Actually...No.
At least not the group in which I'm reading this "rec.radio.amateur".

There are groups such as where the FS and FA are appropriate such as
rec.radio.amateur.swap and rec.ham-radio.swap, but none of the groups I see
listed in the groups to which this was posted.

The FS and FA by convention let those who are not interested filter those
posts out and they serve as a guide for those interested in them.

> You guys or what;;;Don't jump on your high horses to tell us we can't do
> this or that.I think I talk for a lot of people on these News groups that

That's why I use filters.
You made reference as to whether specific newsgroups were for selling and
there are specific groups where FS and FA are welcome. On the other
discussion groups they are not usually greated with a great deal of
entheusiasm.

Me.? I could care less what your post, where.

>Also

here's what the democRATS believe

I, as a good democrat, believe

a. that Margaret Sanger & Gloria Steinmen are more important to American history than Thomas Jefferson, Robert E. Lee or Thomas Edison.

b. that standardized tests are racist, but racial quotas and set-asides aren't.

c. that homosexual parades displaying drag queens, transvestites and bestiality should be constitutionally protected while manger scenes at Christmas and the 10 Commandments in your classroom should be illegal.

d. that AIDS virus is spread by lack of federal funding and not lifestyle.

e. that global temperatures are less effected by cyclical, documented changed in the earth's climate and more effected by yuppies driving SUVs.

f. that the NRA is bad because it supports certain parts of the Constitution, while the ACLU is good because it supports certain parts of the Constitution.

g. that taxes are too low, but ATM fees are too high.

h. that the military, not corrupt politicians, start wars.

i. that self-esteem is a gift to students from teachers and not something that is individually earned.

j. that hunters don't care about nature, but activist "greens" do.

k. that businesses create oppression and government creates prosperity & jobs.

l. that capital punishment is evil while abortion on demand at any point in pregnancy is good.

m. that gender roles are artificial but being homosexual is natural.

n. that guns in the hands of law-abiding citizens are more of a threat to your safety than nuclear weapon technology in the hands of Chinese communists.

o. that government knows how to raise your children better than you do.

p. that Al Gore invented the internet.

~Virtually anyone can be a democrat. Just quit thinking; and then, vote that way~

Al Gore Reasons.

Hi all,

My name is Alex Wiecek VE3GOP, and I'm a member of the Polish Amateur Radio Club VE3XPL here in Toronto. We are currently trying to establish a listing of all polish speaking Canadian Ham Radio Operators living either in Canada or abroad. The purpose of this activity is to present a petition to the Industry Canada to obtain a temporary special event callsign to commemorate the 75th aniversary of the Polish Ham Radio Society in Poland. We tried contacting the IC office in Ottawa but they don't seem to be responsive and as such, we have decided that the next approach would be to present them with as many e-mail petitions as possible to make our voices heard.

We need your help, if you are a polish speaking amateur or know someone who is, we would like to hear from you.

Please contact me at alexwiecek@home.com, and if you'd like to learn more about our club, please visit
http://web.ionsys.com/~magnum/ve3xpl/index.htm

your help would be greatly appreciated.

Thank you.

Let me see if I have this right. According to your (il)logic:

> a. that Margaret Sanger & Gloria Steinmen are more important to
> American history than Thomas Jefferson, Robert E. Lee or Thomas
> Edison.

Who makes that claim? Besides being a pretty fair military man, what did Robert E. Lee do besides turn his back on his country and the military institution that educated him? What did Thomas Edison do besides lie and cheat Nikolas Tesla out of his correct view of commercial electrical distribution?

> b. that standardized tests are racist, but racial quotas and
set-asides aren't.

So, you're saying that standardized tests aren't racist, but racial quotas and set-asides are? There's a lot to be said against both points of view, none of them unique to one political persuasion or another.

> c. that homosexual parades displaying drag queens, transvestites and
> bestiality should be constitutionally protected while manger scenes at
> Christmas and the 10 Commandments in your classroom should be illegal.

What a load of, well, apples and oranges that is. Can't you see that however distasteful a homosexual (or nazi, for that matter) parade might be, that it is protected speech under the Constitution you claim to honor and love?

Can't you see that manger scenes ON TAXPAYER PROPERTY (you left that part out; it's a significant point) and religious preferences in PUBLIC schools is specifically prohibited by the same document?

Actually, having read your stuff before, I know the answer to those 2 questions; no, you can't.

> d. that AIDS virus is spread by lack of federal funding and not
> lifestyle.

And your solution is...?

> e. that global temperatures are less effected by cyclical, documented
> changed in the earth's climate and more effected by yuppies driving
> SUVs.

It's "affected" not "effected." Your source for this bit of scientific data would be...?

> f. that the NRA is bad because it supports certain parts of the
> Constitution, while the ACLU is good because it supports certain parts
> of the Constitution.

But you're saying that the ACLU is bad and the NRA is good. Which is it? You can't have it both ways. Either the Constitution is worth defending or it isn't.

> g. that taxes are too low, but ATM fees are too high.

I have never even heard of a Democrat saying taxes are too low.

I have, however, heard a republican say there ought to be limits on freedom (dubya himself).

> h. that the military, not corrupt politicians, start wars.

You just made that up, right?

> i. that self-esteem is a gift to students from teachers and not
> something that is individually earned.

But I know you didn't make this up. It's more sophistic than even you're capable of.

> j. that hunters don't care about nature, but activist "greens" do.

This is that NRA thing again, right? I've told you before, I still don't understand how conservatives can be so right about gun control and so wrong about everything else. Just so you know that there are liberals who like to shoot, too.

But, mixing your fruit crate again, may I point out that the "greens" don't campaign against the hunter (well there are some fruitcakes like Steve Hindi in Illinois that want all hunting abolished, but that's a PETA thing, not green), they campaign against commercial interests raping the wilderness. Say, isn't that one of the things hunters are against, too?

> k. that businesses create oppression and government creates prosperity
> & jobs.

I hear dubya talking all about the creating of jobs he's going to do. And apparently you've never watched your very own working peers wonder what happened as their jobs went south (to Mexico) and then west (to Asia).

> l. that capital punishment is evil while abortion on demand at any
> point in pregnancy is good.

I defy you to find one Democrat to say that "abortion on demand at any point in pregnancy is good." I think most people would prefer alternatives to abortion, but the matter, finally, is not up to the

government you want so much out of your life.

> m. that gender roles are artificial but being homosexual is natural.

Psychobabble. There are a lot of sexist people that teach their children to be sexist. However, try as I might to raise my son and daughter as non-sexist as I could, my son likes football, baseball, and soccer, and my daughter likes cooking, homemaking, and decorating. So I certainly don't think they're artificial.

So you're saying homosexuality is a choice? Well, first of all, that flies in the face of most of the respected current medical and pyschological opinion. Second, explain to me why someone would "choose" a life that would subject them to such ridicule, pain, and even death, the same way they would "choose" a Chevy or a Ford.

> n. that guns in the hands of law-abiding citizens are more of a threat
> to your safety than nuclear weapon technology in the hands of Chinese
> communists.

Name one person who believes that non-sequitir. By the way, the Chinese can't even take care of business on a little island not much different in distance from their coast as Cuba is from ours; how do you think they're going to be able to commit much mischief in our hemisphere?

> o. that government knows how to raise your children better than you
> do.

Let me point something out to you, oh wizard of fatherhood. There is no manual on raising children. There is no magic elixir. There is no arbiter of bad parenting. It's all a crap shoot. You can try and instill values in your kids, and if you're lucky (and have the right values), they might turn out pretty good.

If they are predisposed to violence or sloth, or they are exposed to a bad element that you can't afford to voucher them away from, they might not.

At the end of the day, there's not a lot you can do to guarantee success. You might be able to make a bad kid a little happier, or a good kid a little more successful, but no one can tell whether it was you or them.

It does stand to reason, however, that a collective body of experience might be able to provide some assistance that you should welcome.

In any event, where did you get that crackpot statement, anyway?

> p. that Al Gore invented the internet.

That's a stupid mis-representation of what actually happened that has been so fully explained that your repetition of it indicates you are incapable of independent thought. Frankly, your list pretty much confirms it as well.

Supreme Court Ends KV4FZ Renewal Saga (Oct 31, 2000) -- The US Supreme Court has put an end to the high-profile license renewal case of Herbert Schoenbohm, KV4FZ, by denying his petition for certiorari. The petition was Schoenbohm's last legal avenue of appeal in the case, which stretches back to 1994. The Supreme Court's decision means KV4FZ is off the air, and Schoenbohm's legal efforts to get the FCC to renew his Amateur Radio license are over.

Of course it would. It would still give me the same operating previleges, and authority to operate, as I had before, so how could it be "worth" less just because the requirements changed for someone else? All my friends would still on the radio, so a change in the license requirements would not lesson that. My enjoyment of radio would still be there, so a change in the license requirements would not lesson that. I simply don't see how the value of my license to me could be reduced by a change in the requirements for someone else.

Poor fat slob KB5PX, now he's Jody. Before he was Dave. But we all know him as the 450 pound lard eater Richard Dodson, who together with his pal Captain Truth (since busted) has jammed 14.313 and 3901 for years. Now he is defending his homo buddy. How sweet and touching. I guess when you weigh 450 you take it anyway you can.

Good idea!

Vince will, without looking at a question pool (that would be cheating by
his own rules) take a new battery of tests, from Tech to Extra, and post
the results to all the newsgroups (Which he does anyways).

This will give credibility to him, or perhaps take it away.

======
Hi Jim -- just an idea. You can print your own on Avery products. They make
them in many colors -- including transparent. I affixed them to a 35mm photo I
took and it becomes a QSL card. For a sample of transparent use see URL:
http://www.qrz.com/database?callsign=ac6v
The AC6V is a transparent label printed on my trusty HP 812C printer. The
reverse side is a large Avery label with the QSl info printed on it.

And Mail box etc can make decals for you as well

According to him, all hams who forget to renew their licenses
and take the exams over will be *dumbed down*. Just think how
dumbed down a ham would be if he forgot to renew his license
four times in a row.

Yep. That domain name isn't far off the mark.

Just another bunch of crackpots like the Republic of Texas idiots that
tried to shoot it out with the cops a couple of years ago.

Or locally, the Republic of Florida idiots who refused to file tax
returns for several years and are now not only not employed as
firefighters for the village of Hallandale, but are going to get the
opportunity to make some new friends in the big house.

HOW TO TURN SIX DOLLARS INTO SIX THOUSAND DOLLARS: : READING THIS =
COULD CHANGE YOUR LIFE! IT DOES WORK! : I found this on a bulletin board =
and decided to try it. A little : while back, I was browsing through =
newsgroups, just like you are now, : and came across an article similar =
to this that said you could make : thousands of dollars within weeks =
with only an initial investment of : $6.00! So I thought, "Yeah right, =
this must be a scam", but : like most of us, I was curious, so I kept =
reading. Anyway, it said : that you send $1.00 to each of the 6 names =
and address stated in the : article. You then place your own name and =
address in the bottom of : the list at #6, and post the article in at =
least 200 newsgroups. : (There are thousands) No catch, that was it. So =
after thinking it : over, and talking to a few people first, I thought =
about trying it. I : figured: "what have I got to lose except 6 stamps =
and $6.00, : right?" Then I invested the measly $6.00. Well GUESS =
WHAT!?... : within 7 days, I started getting money in the mail! I was =
shocked! I : figured it would end soon, but the money just kept coming =
in. In my : first week, I made about $25.00. By the end of the second =
week I had : made a total of over $1,000.00! In the third week I had =
over : $10,000.00 and it's still growing. This is now my fourth week and =
I : have made a total of just over $42,000.00 and it's still coming in : =
rapidly. It's certainly worth $6.00, and 6 stamps, I have spent more : =
than that on the lottery!! Let me tell you how this works and most : =
importantly, WHY it works... Also, make sure you print a copy of this : =
article NOW, so you can get the information off of it as you need it. : =
I promise you that if you follow the directions exactly, that you : will =
start making more money than you thought possible by doing : something =
so easy! : Suggestion: Read this entire message carefully! (print it out =
or : download it.) Follow the simple directions and watch the money come =
: in! : It's easy. It's legal. And, your investment is only $6.00 (Plus =
: postage) : IMPORTANT: This is not a rip-off; it is not indecent; it is =
not : illegal; and it is 99% no risk - it really works! : If all of the =
following instructions are adhered to, you will receive : extraordinary =
dividends. : PLEASE NOTE: : Please follow these directions EXACTLY, and =
$50,000 or more can be : yours in 20 to 60 days. This program remains =
successful because of : the honesty and integrity of the participants. =
```

Please continue its : success by carefully adhering to the instructions. =
: You will now become part of the Mail Order business. In this business =
: your product is not solid and tangible, it's a service. You are in : =
the business of developing Mailing Lists. Many large corporations are : =
happy to pay big bucks for quality lists. However, the money made : from =
the mailing lists is secondary to the income which is made from : people =
like you and me asking to be included in that list. : Here are the 4 =
easy steps to success: : STEP 1: Get 6 separate pieces of paper and =
write the following on : each piece of paper "PLEASE PUT ME ON YOUR =
MAILING LIST." Now : get 6 US $1.00 bills and place ONE inside EACH of =
the 6 pieces of : paper so the bill will not be seen through the =
envelope (to prevent : thievery). Next, place one paper in each of the 6 =
envelopes and seal : them. You should now have 6 sealed envelopes, each =
with a piece of : paper stating the above phrase, your name and address, =
and a $1.00 : bill. What you are doing is creating a service. THIS IS =
ABSOLUTELY : LEGAL! You are requesting a legitimate service and you are =
paying for : it! Like most of us I was a little skeptical and a little =
worried : about the legal aspects of it all. So I checked it out with =
the U.S. : Post Office (1-800-725-2161) and they confirmed that it is =
indeed : legal. Mail the 6 envelopes to the following addresses: : #1)=20

E. Benford : 6656 Mableton Pwky APT.#D4 : Mableton, GA.. 30126 : =
#2) Kim Williams : 3334 Kingsland Avenue : Bronx, NY 10469 : #3) Yury =
Konev : 823 Pavonia Avenue : Jersey City, NJ 07306 : #4 A. Campbell : =
P.O. Box 432 : Nellysford, VA.. 22958 : #5B. Page. PO Box 5024 Kendall =
Park NJ 08824 #6 Ewald Kerkhoff site 41 comp. 30 Penticton, B.C. V2A =
7K8 Canada : STEP 2: Now take the #1 name off the list that you see =
above, move : the other names up (6 becomes 5, 5 becomes 4, etc...) and =
add YOUR : Name as number 6 on the list. : STEP 3: Change anything you =
need to, but try to keep this article as : close to original as =
possible. Now, post your amended article to at : least 200 newsgroups. =
(I think there are close to 24,000 groups) All : you need is 200, but =
remember, the more you post, the more money you : make! You won't get =
very much unless you post like crazy. :) : This is perfectly legal! If =
you have any doubts, refer to Title 18 : Sec. 1302 & 1341 of the Postal =
lottery laws. : Keep a copy of these steps for yourself and, whenever =
you need money, : you can use it again, and again. : PLEASE REMEMBER =
that this program remains successful because of the : honesty and =
integrity of the participants and by their carefully : adhering to the =
directions. Look at it this way. If you are of : integrity, the program =
will continue and the money that so many : others have received will =
come your way. : NOTE: You may want to retain every name and address =
sent to you, : either on a computer or hard copy and keep the notes =
people send you. : This VERIFIES that you are truly providing a service. =
(Also, it might : be a good idea to wrap the $1 bill in dark paper to =
reduce the risk : of mail theft.) : So, as each post is downloaded and =
the directions carefully followed, : six members will be reimbursed for =
their participation as a List : Developer with one dollar each. Your =
name will move up the list : geometrically so that when your name =
reaches the #1 position you will : be receiving thousands of dollars in =

CASH!!! What an opportunity for : only $6.00 ($1.00 for each of the =
first six people listed above) Send : it now, add your own name to the =
list and you're in business! : ---DIRECTIONS ----- FOR HOW TO POST TO =
NEWSGROUPS---------- : Step 1) You do not need to re-type this entire =
letter to do your own : posting. Simply put your cursor at the beginning =
of this letter and : drag your cursor to the bottom of this document, =
and select 'copy' : from the edit menu. This will copy the entire letter =
into the : computer's memory. : Step 2) Open a blank 'notepad' file and =
place your cursor at the top : of the blank page. From the 'edit' menu =
select 'paste'. This will : paste a copy of the letter into notepad so =
that you can add your name : to the list. Step 3) Save your new notepad =
file as a .txt file. If : you want to do your postings in different =
settings, you'll always : have this file to go back to. : Step 4) Use =
Netscape or Internet explorer and try searching for : various newsgroups =
(on-line forums, message boards, chat sites, : discussions.) : Step 5) =
Visit these message boards and post this article as a new : message by =
highlighting the text of this letter and selecting paste : from the edit =
menu. Fill in the Subject, this will be the header that : everyone sees =
as they scroll through the list of postings in a : particular group, =
click the post message button. You're done with : your first one! =
Congratulations...THAT'S IT! All you have to do is : jump to different =
newsgroups and post away, after you get the hang of : it, it will take =
about 30 seconds for each newsgroup! **REMEMBER, THE : MORE NEWSGROUPS =
YOU POST IN, THE MORE MONEY YOU WILL MAKE! BUT : YOU HAVE TO POST A =
MINIMUM OF 200** That's it! You will begin receiving : money from around =
the world within days! You may eventually want to : rent a P.O.Box due =
to the large amount of mail you will receive. If : you wish to stay =
anonymous, you can invent a name to use, as long as : the postman will =
deliver it. **JUST MAKE SURE ALL THE ADDRESSES ARE : CORRECT.** : Now, : =
each of the 5 persons who just sent me $1.00 make the MINIMUM 200 : =
postings, each with my name at #5 and only 5 persons respond to each : =
of the original 5, that is another $25.00 for me, now those 25 each : =
make 200 MINIMUM posts with my name at #4 and only 5 replies each, I : =
will bring in an additional $125.00! Now, those 125 persons turn : =
around and post the MINIMUM 200 with my name at #3 and only receive 5 : =
replies each, I will make an additional $625.00! OK, now here is the : =
fun part, each of those 625 persons post a MINIMUM 200 letters with : my =
name at #2 and they each only receive 5 replies, that just made me : =
$3,125.00!!! Those 3,125 persons will all deliver this message to 200 : =
newsgroups with my name at #1 and if still 5 persons per 200 : =
newsgroups react I will receive $15,625,00! With an original : =
investment of only $6.00! AMAZING! When your name is no longer on the : =
list, you just take the latest posting in the newsgroups, and send : out =
another $6.00 to names on the list, putting your name at number 6 : =
again. And start posting again. The thing to remember is: do you : =
realize that thousands of people all over the world are joining the : =
internet and reading these articles everyday?, JUST LIKE YOU are : now!! =
So, can you afford $6.00 and see if it really works?? I think : so... =
People have said, "what if the plan is played out and no : one sends you =
the money? So what! What are the chances of that : happening when there =

are tons of new honest users and new honest : people who are joining the =
internet and newsgroups everyday and are : willing to give it a try? =
Estimates are at 20,000 to 50,000 new : users, every day, with thousands =
of those joining the actual : internet. Remember, play FAIRLY and =
HONESTLY and this will really : work.=20

With the above scenario (no exams required), yes, the worth I
would feel towards that piece of paper would be less.

Your turn: Suppose your degree had been given to you without you
having taken any classes at all -- none; would it be worth less to
you than the actual diploma you hold?

Here's another one: Suppose that while you were at Intel, a newly
hired engineer with a degree *purchased* by him from an off-shore
non-accredited Caribbean "university" was brought in at the same
salary you were earning. Would you feel that his degree was worth
less than yours?

You never answered my other query: Does a GROL carry the same worth
as the old First Class R/T Certificate?

I want to connect a SEA automatic antenna tuner
to my Icom706IIg. The tuner returns a "tuned"
logic level. The Icom has a four pin jack (gnd,
+12V,?,?). Can I connect the "tuned" line to one
of the Icom pins to control the Icom tuner button
LED?

Hi, all, got a radio shack sale flyer in the mail today, and they are advertising a HF/6m mobile/base rig for sale. Nice rig, looks like it might be a clone of the Alinco DX-70, sale price of 499.99, 100W ssb/cw, 40 watt AM, 100 W FM on 10 meters FM (!!!), 10 W fm on 6m and 4 w AM on 6m. Also, a detachable faceplate....looks like a pretty good deal, to me at least, for $600.00.....any experiences out there with this rig?

73,
Rick N9GSU

56. Bye Bye Herbie!

The US Supreme Court has put an end to the license renewal case of
Herbert Schoenbohm, KV4FZ, by denying his petition.
Bye Bye Herbie.

That is a good price. But bear in mind that it is only 10 watts on 6 meters. This radio was replaced by the 70TH which has 100 watts on 6 meters but it is selling for $749. RS has been previously selling the 70TD for $699. This Alinco model has always gotten good reviews.

I checked the RS web site. Are you sure it is on sale for $499? The web site says $599.

One important thing to keep in mind is that you can only order this through the mail. They are going to charge you about $30 in shipping and another $25 in sales tax.

HAMFEST/COMPUTERFEST CALENDAR 2000 - ILLINOIS
last updated August 15, 2000

o Please report additions or changes to Bob Parnass, AJ9S, office phone: (630)979-5414, electronic mail: parnass@bell-labs.com. Thanks to Dennis Dale, Rick D. Wilson, John Wass KA9QJX, Tom Harker, and ARRL for providing some of the information.

NOVEMBER 2000

Nov 5 (Sun): Davenport, IA - Davenport Radio Club. Iowa National Guard Hanger, Mt. Joy Airport. Talk-in 146.88 MHz repeater. http://www.gwltd.com/hamfest

Nov 11 (Sat): Wheaton, IL - Giant Computer Show & Sale (see below). DuPage County Fairgrounds, County Farm Rd. & Manchester Rd. 9:30 AM - 3 PM. Adults $6, children $2.

Nov 12 (Sun): Orland Park, IL - Giant Computer Show & Sale (see below). Orland Park Civic Center, 147th St. & Lagrange Rd. 9:30 AM - 3 PM. Adults $6, children $2.

Nov 18 (Sat): Grayslake, IL - Computer Country Expo (see below). Lake County Fairgrounds Exhibit Hall, Rt. 120 (Belvidere Rd.) & Rt. 45. 4 miles west of I94. Admission $6, or $5 with discount coupon available at WebSite.

Nov 18, 19 (Sat, Sun): Ft. Wayne, IN Fort Wayne Hamfest & Computer Expo. Allen County Amateur Radio Technical Society. 2000 Indiana ARRL State Convention. Allen County War Memorial Coliseum Exposition Center. Hours 9 AM - 4 PM EST Sat, 9 AM - 3 PM EST Sun. Admission $5 plus $2 parking. http://www.acarts.com

Nov 26 (Sun): Glen Ellyn, IL - Computer Central Show (see below). College of Dupage. Corner of Park Blvd. & College Rd. 9:30 AM - 3 PM. Admission $6, children $2.

DECEMBER 2000

Dec 3 (Sun): Wheaton, IL - Giant Computer Show & Sale (see below). DuPage County Fairgrounds, County Farm Rd. & Manchester Rd. 9:30 AM - 3 PM. Adults $6, children $2.

Dec 16 (Sat): Grayslake, IL - Computer Country Expo (see below). Lake County Fairgrounds Exhibit Hall, Rt. 120 (Belvidere Rd.) & Rt. 45. 4 miles west of I94. Admission $6, or $5 with discount coupon available at WebSite.

Dec 17 (Sun): Orland Park, IL - Giant Computer Show & Sale (see below). Orland Park Civic Center, 147th St. & Lagrange Rd. 9:30 AM - 3 PM. Adults $6, children $2.

COMPUTER SHOW NOTES

Computer Central computer shows are held at the College of DuPage, Main Arena of the Physical Education Building Park Blvd & College Road, Glen Ellyn, Il. 847-940-7547. $5 admission with card, normal admission $6.00. Opens 9:30 am - 3:00 pm. See http://www.computercentralshows.com web site.

Giant Computer shows are held by Micro Media, Inc. Shows are usually held at the Orland Park Civic Center, 147th St. & LaGrange Rd., Orland Park, IL or at the DuPage County Fairgrounds, County Farm & Manchester Rds., Wheaton, IL. Admission is $6. Show hours are 9:30 AM - 3 PM. To get on the mailing list or get more information, call (708)974-3123. See http://www.giantcomputershow.com

Computer Country Expo is Lake County's largest computer expo. The event is held on designated Saturdays from 9:30 AM to 3:00 PM. This show features computers, supplies, games, parts, software, accessories, CD-ROM, monitors, diskettes, printers, keyboards, modems, disk drives, cables, expansion boards, services, etc. Lake County Fairgrounds, Route 120 (Belvidere Rd.) & Route 45, in Main Exhibit Hall Building #1=9720,000 sq. feet. For a show map, exhibitor info, and discount coupon, visit the web site at http://www.ccxpo.com.

Just took mine back to RS for a refund. Had it two weeks. Terrible distortion on receive, right out of the box. They charged me $32 for shipping, but were kind enough to also refund that. I decided not to go for a second rig since a friend of mine has one just like this, and his rig has spent much of its life in the shop trying to have a distortion problem on transmit corrected.

We're talking about the present, not about some impossible future situation. You let your license expire and take all the exams to get it back. You have the same license, the same call sign, and the same privileges. You have had to expend additional work/effort/time to get your license back. Exactly why is your new license worth less than your old one? Absolutely nothing has changed. Conditions are identical whether you renewed your license or let it expire and got another one.

> Your turn: Suppose your degree had been given to you without you

It's obvious the news group pest is back again. His high fat high cholesterol diet, combined with alcohol & drug abuse, lack of any exercise and his excessive intake of carbonated beverages make him a coronary candidate before he ever sees 40. Gross obesity, a sallow complexion, sunken eyes, and premature greying are additional indications of failing health.

A friend recently purchased this radio and we spent about a week trying to solve the transmit distortion. The radio worked perfectly at my house, but sounded terrible at his. In the end, we finally realised the problem was the ground sytem at his house. While my system is grounded exactly the same as his, my ground system is only about ten feet from a natural creek that runs by my house (nice, wet, soil - with the bottom half of my ground rods in water soaked soil), whereas the soil at his house is fairly dry and rocky. Once we added another ground rod at his house, and ran better ground wire, the problem disappeared completely - the radio is as clear as a bell.

Dear "Out",

I understand your frustration at not being able to legally eavesdrop on private conversations, but there is a balance that has to be struck between the need for privacy in personal, business and police communications and the desire for voyeuristic radio monitoring. There is no Constitutional right for citizens to be privy to all communications going on within various agencies of the government either. Granted, there are some legitimate applications of scanning equipment, but I suspect that much of the use is in the area of personal entertainment.

Successful implementation of the new era of pervasive wireless communication devices, both voice and data, require that users feel comfortable about providing sensitive financial data through these links without fear of interception by third parties with potentially malicious intentions. It's clear that within five years, much of the web commerce traffic is going to be going through wireless devices such as web-enabled phones and Bluetooth technology, and this is not compatible with requiring that these data streams be vulnerable to monintoring by the general public.

I know that I don't feel comfortable ordering anything requiring credit card information over a cell phone at this point - either analog or digital - mostly due to people who get their kicks by capturing this kind of information. Wireless data and voice communication methods need to become at least as secure as land-lines before I (and many others) will commit private information to this medium.

Luckily, the trend is going in the direction of more secure wireless links, rather than toward the open access model that you support.

If you want to monitor unencrypted conversations, just listen to your local VHF or UHF ham repeater, CB, FRS or your HF radio. There is no expectation of privacy for such communications in contrast to the wireless technology described earlier.

Our institution has recently undertaken a massive research effort (>$100M) in Information Technology with an emphasis on pervasive computing and wide-area wireless technology, with a major thrust toward the development of even more secure (encrypted) communications protocols for the next generation of consumer and governmental mobile devices.

This is not about "Openness" - this is about the reasonable need for privacy in many kinds of communications.

Any ham who "forgets" to renew his license is dumb "by definition". And
I've know a couple who did.

BUT

That doesn't wipe out the fact that he passed all the tests when tests
were tests instead of reciting the answers from the question pool with
entry-level code only. I see that you are still in denial over the fact
that you just couldn't cut the mustard before the Great Dumb Down.

Vince has said that anyone who gets a license after April 2000 is not a real ham. That would include hams who accidentally allowed their license to expire and took the exams in order to get their license back. So don't dare let your license expire, Dick, 'cause Vince says you will no longer be a real ham. If you let your license expire and go to the trouble of taking the exams to get it back, you will be dumbed-down and branded an Extra Lite.

These morons who have items for sale or for auction don't care about (or too dumb to understand) Usenet convention as to what is/is not appropriate on a newsgroup. They spam any newsgroup they think might help bring in a buck. Discussion groups should not be cluttered with FA or FS ads and FA and FS are two different things. FS is an item that is For Sale at a stated price, FA is an item that is For Auction up for bid to the highest bidder.

Nope. You did a follow-up to the scenario I presented to Dwight
("No exams necessary to receive a license after 01/04/10"). By
jumping into the query that was addressed to Dwight, you entered
into this possible future situation. Now you're backing out, refusing
to answer. This is so typical of you, Cecil.

If you can't see the parallel between an earned/unearned degree and
and an earned/unearned license, you shouldn't enter into these licensing
discussions.

Yea, but that wasn't the first thing we thought of (you know how that goes). We spent almost the entire week checking antennas, coax, power supplies, microphones, and anything else, before we finally got around to the ground system (remember he has virtually the same ground setup as mine - just different soil).

We would have just taken it back if it had not worked so well when hooked up in my house. Instead, it became a quest to discover why it worked fine at one location, but not at the other.

> you as the one you currently hold?

Of course it would. It would still give me the same operating privileges, and authority to operate, as I had before, so how could it be "worth" less just because the requirements changed for someone else? All my friends would still on the radio, so a change in the license requirements would not lesson that. My enjoyment of radio would still be there, so a change in the license requirements would not lesson that. I simply don't see how the value of my license to me could be reduced by a change in the requirements for someone else.

By the way, I posted this a couple of days ago, but someone set follow-ups to just rec.radio.amateur.misc and I didn't notice it until today. So I'm reposting it so it will appear back in rec.radio.amateur.policy.

It has been 90 years since 01/04/10 and the short length of time
between the no exam stage and the exam stage is simply irrelevant
anymore. We can never return to those times when there were too
few hams to worry about. Why do I not have the right to bring the
thread back to the real world?

> If you can't see the parallel between an earned/unearned degree and
> and an earned/unearned license, you shouldn't enter into these licensing

This is NOT a real world licensing discussion because there are NO
unearned ham licenses. Why do you want to fantasize about something
that doesn't exist?

> >I have no idea what a "GROL" is. Anything to do with the GRE?
>

Neither has any intrinsic worth, in and of themself. The value of
the license is measured by how much value lies in the activity that
the license enables.

My Amateur Extra class license was granted in 1963. It enables me
to exactly the same activity as the Amateur Extra license which was
granted just yesterday to AD5AX.

Therefor both licenses, granted 37 years apart, have *exactly* the same
value, regardless of how fast we each beeped to become qualified for
the grant.

Geez, I don't know the rating of the alternator (2000 Chevy Silverado, 5.3L V8). I am going to run the Ameritron ALS-500M as well. How many amps does this thing pull at full tilt? I didn't give much thought to this, a few people I asked said the stock DC system would handle this amp.

Scott.

Hi Ed,
In a moment of weakness I broke down and bought a qst at the news stand. I saw a few pictures of you with your latest projects. That's one thing the I miss about being a league member are the qst construction articles.

I think Mary spends about twenty seconds per post. Her philosophy is,"Why should I waste time understanding the post I'm posting a following up to?"

In article <ZBBM5.126$WN.921147@news.ntplx.net>, "Ed Hare, W1RFI" <w1rfi@arrl.net> wrote:

>> to answer. This is so typical of you, Cecil.

>It has been 90 years since 01/04/10

01/04/10 will occur in 9.5 years.

The article you posted a follow-up to concerned the scenario of the
personal worth of an exam-free license being created in 2010, not
1910. You've forgotten so soon? Are you hitting the bottle again,
Cecil? =:o

>> If you can't see the parallel between an earned/unearned degree and
>> and an earned/unearned license, you shouldn't enter into these licensing
>> discussions.

>This is NOT a real world licensing discussion because there are NO
>unearned ham licenses. Why do you want to fantasize about something
>that doesn't exist?

Like you "fantasizing" that everyone is going to let their license
lapse?

This is no fantasy; I'm just a pushing the lowering-of-standards to
the eventual no-standards restructuring: The no-exam license.

>>>I have no idea what a "GROL" is. Anything to do with the GRE?

>>Hint: Does the First Class R/T have anything to do with the GRE?

>What's a "First Class R/T"? Some sort of Radio/Television license?

And you've been in communications since 1954? =:o

Nope, just speed reading. I thought you were talking about the past
when you said "10".

> Like you "fantasizing" that everyone is going to let their license
> lapse?

Not "everyone". It only takes one ham allowing his license to lapse
to make my scenario valid. Are you saying that absolutely NO ham
allows his license to lapse and retakes the exams to get it back?
Proof please.

> This is no fantasy; I'm just a pushing the lowering-of-standards to
> the eventual no-standards restructuring: The no-exam license.

The standards have not been lowered. An obsolete exam has been
eliminated and the requirements streamlined. The entry exam has
not changed. The general written Q&A has not changed. The extra
written Q&A is more difficult than it was before because it now
contains the advanced Q&A.

Let me ask you this. Who would you say knows the most? An extra
licensed in 1950 who hasn't learned anything new in 50 years or
a recently licensed extra? I think if you stack the old extras,
one on one, against the new extras, the new extras would win
hands down. Heck, I'll stack you up against Dr. Williamson, PhD
in EE and a no-code tech, any day of the week.

> And you've been in communications since 1954? =:o

Amateur communications since 1951. My career was in digital
engineering. I have no knowledge nor need of any knowledge of
professional RF communications requirements. You still haven't
told me what GROL stands for.

Well, I am sure you would be welcome back, Vince. In the meantime, if you
would like to see some of the construction projects you missed, see:

http://www.arrl.org/tis/

and go to "Construction Projects/Techniques." Just an example of what ARRL
does with those membership dues... I have my disagreements with ARRL, too,
but feel that they are doing enough important things that I can be a member.
That also, IMHO, better positions me to effect changes that I want to see
within ARRL.

I think maybe you got some unwise advice. Zeners aren't really the stuff full wave bridges are made of...

You could use a single zener on the output of the 200 volt supply to drag it down to 150. It's not a pretty solution, but it would work. You'll have to make sure the zener can dissipate the kind of power you're handling.

You say it's a regulated supply, so we can assume it's creating a higher voltage internally and regulating it down to 200V. Many power supplies have some adjustable components inside them to fine-tune the regulation. I think that's where I'd really attack the problem and regulate it down to 150.

Is it a switcher or a transformer power supply? If it's a transformer, then you probably have a scenario where line voltage goes into the transformer and comes out in the mid-200V range, thence to your full-wave bridge and on to the regulator. In that area there may be an adjustable resistor that will be setting the bias on whatever is regulating the voltage. There's a small chance that the adjustment range is 0 to something over 200, in which case you're home free. If not, you may want to add a 150V stage of regulation after the 200V one. That is, build it in a separate box and attach it to the power supply.

I read about twenty newsgroups, subscribe to three e-mail lists, and have four different web mail accounts in addition to my regular ISP. I average about five to ten posts per day, and not all are from my deja.com account. All of this takes anywhere from 45 minutes to an hour each day, tops.

So tell me, Mr. anonymous poster, do *I* have a life outside of usenet?

Hmmm...Should that make us skeptical of science?

Bob Wex

I note with sadness the passing of Steve Allen.
He was a skeptic in the true sense. He was
scientifically and intellectually far above
most of the present day TV talk show hosts....
but alas, me thinks, that he was too intelligent
for the gullible audiences that media sponsors
are always seeking. Biographers and obituary
writters have it all wrong. Steve was not the

first late night TV host (Jerry Lester, a clown,
was) but IMHO Steve was the best. Better than
Paar, Carson or Leno can ever be, because he
spoke truths and used humor.. not used truths to
make humor. Steve Allen was a humanist who
was not afraid to expess his religious skeptism.

gore is no friend of the Second Amendment

"[T]here should be no doubt that the Second Amendment does not grant a right to bear arms apart from militia service."
— Clinton-Gore Justice Department, Jan. 27, 2000
To hear Vice President Gore describe it, hunters haven't had such a friend in the White House since Teddy Roosevelt called the place home. Mr. Gore has been wearing his enthusiasm for the sporting life like a blaze-orange vest ever since he discovered that real live people out there in fly-over country — including potential supporters in key Midwestern states — happen to enjoy it themselves. What he has neglected to mention is that the administration of which he is a part is now in court trying to undermine Second Amendment rights that make hunting or, more seriously, self-defense, possible.
At issue is a court case now before the 5th U.S. Circuit Court of Appeals. It started with allegations that a West Texas doctor had threatened the man with whom his wife was said to be having an affair. She had filed for divorce from the doctor, and a state judge issued a temporary restraining order after she complained about the reported threat. The court itself made no findings as to the guilt or innocence of the doctor, Timothy Joe Emerson. Under a 1994 federal law, it is illegal to have a firearm while under a restraining order. When Mrs. Emerson subsequently accused him of threatening her and their child with his gun (a jury of nine women and two men later found him not guilty), Mr. Emerson was indicted for violating the 1994 law.
Mr. Emerson filed suit in federal court partly on grounds that the law violated his Second Amendment rights. To the surprise of the Justice Department, but not perhaps to legal scholars, the judge sided with Mr. Emerson. Historical examination of the Second Amendment as well as examination of its text, Federal District Judge Sam Cummings wrote, "bears proof that the right to bear arms has consistently been, and should still be, construed as an individual right."
The Justice Department appealed the ruling to the 5th Circuit. In a brief to the appeals court using the quote above, Justice defended its interpretation. In an Aug. 20 letter, U.S. Solicitor General Seth Waxman confirmed that in oral arguments before the appeals court, counsel for the United States "did indeed take the position that the Second Amendment does not extend an individual right to keep and bear arms."
In other words, individuals can keep and bear arms because government officials kindly permit them to do so. For now. But they have no constitutional right to do so. Mr. Gore is free to dispute the department's interpretation. Until he does so, however, gun owners should assume he agrees with it — his professed allegiance to hunters notwithstanding

He's not a doctor until he takes the exams. I would go to a doctor
who took his battery of medical exams after April 15, 2000.

I know some older hams who have forgotten everything technical that
they ever knew. They talk about grid drive for solid state amps.

Go to Radio Shack. Ask for a Colon Cat. When the droid asks for your name, tell 'em you are Jeffery Jovan Philyaw* of McKinney TX. Scan to your heart's content, but don't use the disk they supply. That gives them the right to take back their 'Free" colon cat.

*CEO and Flouder of Colon Cat parent company Digital Convergence.

That's what I thought too. Like the person didn't have to take home
the CueCat if they didn't want to use it. I'm not real excited about
the evil corportions knowing everything I scan with it, but I'm not
paranoid either. I can't really see that they will gain back what it
cost to make this cuecat thing learning my scanning habits.

I might just go to radio shack and get myself one of these things
to play with. It could actually be useful to associate a product to
a web site.

Also I guess a combination of electronics being abused coupled
with the andromorphation(sp) (meaning the connection my brain
makes between real cats and objects shaped like cats, like it's
almost a real cat) really bugged me.

Boy, I'll say. The post that started this thread was pretty stupid, too.

> Also, this material
> is off- topic for this newsgroup and reflects ignorance on the part of the
> poster with respect to his/her knowledge of usenet netiquette.
>
> KR4AJ
>

Off topic for this group? Let's enumerate the ridiculously low standard the
poster has failed to uphold:

"Jewish Court Excommunicates Lieberman"
"JAY LENO ON AL GORE"
" Flaming Homo K1TP Jams 3898 last night"
"Corky is truly the century's idiot - 75 POSTS FROM CORKY - NOT 1 ON TOPIC"
"Alert! Corruption and Elections and Openness!"

I think for a two-line post that at least had something to do with
electronics, it's really more of a shining example than something to be
denounced.

Book',
An intermediate frequency is a frequency that when
mixed with the incoming signal frequency, produces a
third frequency which would be in a frequency range
that you wish. The third frequency being easier to
manipulate (for what ever reason) than the original
one.
Tuning resolution means how small of a change in
frequency can be made by moving the tuning knob. The
lowest frequency division that the radio is capable of
making. It is not the same as bandwidth.
'Doc

Every receiver -- very few exceptions -- takes whatever frequency you want to listen to and converts it to another one. This is because it is easier to build in features like filters and for that matter the 10 billion or so gain or amplification factor you need to do radio right if the frequency it has to work at is known. So your AM radio converts to 455 khz, your FM uses 10.7 MHz, and whatever TV channel you are watching ends up with the picture at 45.75 MHz and the sound at 41.75 in the US at least (I note the au). Because of manufacturing and cost considerations, these i.f. freqs are fairly universal. Think of it as a single freq radio with a variable tuner hung on the front end that handles different frequencies by converting them to whatever the real radio behind it wants, the intermediate frequency.

Tuners these days do things in steps rather than the continuous tuning of yesteryear. So tuning resolution is really the size of the steps it takes. For AM, nine or ten KHz depending on where you live is great, FM is in 100 or 200 kHz steps, TV can be in six, seven, or eight MHz steps. Shortwave can be done in 5 KHz steps and get most of what is on but it is better done in .5 or 1 kHz steps. Where the pilot method of frequency assignment is used (pile it here, pile it there) as on the ham bands, 0.1kHz steps are needed. If you want to do SSB, there is a continuously variable thingee in there somewhere.

Don't get the idea that a smaller resolution is necessarily better for all purposes. Tuning across the entire 25 meter band .1kHz at a time will give you carpel tunnel holding the knob and cause you to forget why you turned the knob to begin with. Most amateur gear depending on your touch on the knob can do .1 but kicks it up to get across the band sometime while you are still alive.

Hope all of this makes some kind of sense.

160. Advice wanted on testing microwave oven High Voltage diodes.

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-03 11:49:17 UTC
From: Terry Sanford <tsanford@roadrunner.nf.net>
Message-ID: <3A02A63D.CF258DC9@roadrunner.nf.net>
Source record: 100728

Hope this question appropriate?
Trying to test HV (15 Kv.) microwave oven diode with a standard VOM.
Diode reads 'open' on all 'Resistance scales of the ohmeter. In both
directions.
But works OK in the voltage doubling circuit of the microwave.
With these HV diodes is a higher voltage than the 1.5, 3, 9 or 15 volt
internal battery, depending on the type of VOM, required to get a
reading at all?.
Comments/advice appreciated. Thanks.
Terry S.
PS. Sometimes the diode is a separate component and sometimes is built
into the same 'can' as the HV capacitor, all in the secondary circuit of
the transformer which supplies the magnetron.

IF - Intermediate Frequency -- Intermediate frequency, resultant
frequency from heterodyning the carrier
frequency with an oscillator, mixing incoming signals to an
intermediate frequency enhances amplification,
filtering and the processing signals. It is desirable to have more
than one IF. (Dual conversion, triple conversion etc)
For example in an AM radio when you tune to 1600kHz -- this is beat
against a local oscillator to yield an intermediate frequency of 455kHz,
this is fed to a detector which strips off the audio frequency.

This scheme is termed A "Superheterodyne Receiver"

For more on "How a Radio Works -- see URL:
http://www.ezlink.com/~crash/parks/hetbasic.html#suphetblk
AND
http://www.electronics-tutorials.com/receivers/receivers.htm

In modern radios, rather than analog (continuos tuning), synthesized
tuning is used and it tunes in steps (5kHz, 2kHz, 1kHz, etc.) --- this
is tuning resolution -- has nothing to do with bandwidth.

Bandpass or bandwidth is the range of frequencies permitted to pass
through a filter or receiver circuit. AM requires about 5kHz, SSB
requires about 2.5 kHz and FM needs about 15 kHz.

164. George W.-The NEW teflon President!

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-03 14:45:24 UTC
From: No User <no.user@anon.xg.nu>
Message-ID: <d388aba693c5b4862d56a9a6ddc6414a@anon.xg.nu>
Source record: 100732

Polls this morning are showing a HUGE backlash to the Democrats dirty trick last night of trying to demonize George W. for something 90% of us have done, or should have been caught at. Many undecideds are now choosing Bush for two reasons: 1) It shows he's human and *one of us*, 2) People ARE tired of the politics of personal destruction. And the spin that the media is trying to make about Bush *hiding* this incident is also not working, as Bush has explained that he didn't want his daughters to know about this. I can relate to that since I have had embarassing and careless incidents in my younger days that I wish my children not know about for fear they might think its OK to try, because Dad did it when he was younger.

Are you offering that Kim is spending 4 hours generating each post? That is the amount of time it would take to consume her entire life. I typically spend a minute or two on my shorter posts (most of Kim's appear to be relatively short). That would mean that she is spending about 12 minutes a day posting -- not exactly taking up her entire life, either.

You might start by getting a license first.

Please visit my World Wide Web Site, you have never seen a page like it. You
will see:

1. Access to oldies mp3 (albeit on an irregular basis)
2. Really interesting answering machine messages
3. A blond naked chick with really big knockers
4. A guide to the best ham pages ever.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in". 7. The writings of me
and others on ham radio, hear a typical ham contact. 8. The warm side of
K1OIK, hear me speak, see me with famous people. 9. An amazing card game
that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.
13. How to pass the A+ Certification

Burt Fisher
A Plus Certified
Net Plus Certified
Amateur call South Dennis, Ma. (Cape Cod)

Do you REALLY want a president with NO Experience in politics and is not even aware of the issues ? "Dubya" is a perfect candidate for big business- a spoiled little rich-kid that will be a puppet for them and allow them free-reign over the ENTIRE nation so they can destroy it like they did Texas. Even Nadar supports Gore. Wake up America - The (allegedly ex) crackhead and alcoholic has no place in our nation's government. He has YET TO TAKE A STAND ON A SINGLE ISSUE!!!! He is an empty suit - All smoke and mirrors- (Hmmm I wonder what king of smoke ? Could it be crack cocaine?? - you figure it out) There is no substance to the man. He just might approve the abolishment of all amateur licensing and grandfather CB'ers into our hobby if one of his handlers (excuse me - advisors) tells him to do it.

Nah, I have already advised him to give 11 meters back to the hams with
authority to terminate with extreme prejudice any one violating ham freqs.

However, Gore might eliminate radio to remove RF pollution.

How can you get so silly? You have to be a Gore supporter with all your
nonsense.

Billionaire Buffett takes a swipe at trust-fund kids (he supports
Hillary and high taxes)

Politics/Elections News
Source: AP via Newsday.com
Published: September 27, 2000 Author: by BETH J. HARPAZ Associated
Press Writer
Posted on 09/27/2000 12:33:07 PDT by JeanS

NEW YORK (AP) - When billionaire Warren Buffett hears his friends
complain about poor people dependent on government handouts, he starts
complaining about rich kids dependent on their parents' trust funds.

''I hear friends talk about the debilitating effects of food stamps
and the self-perpetuating nature of welfare and how terrible that
is,'' Buffett said Wednesday at Columbia University.

''These same people are leaving tons of money to their kids, whose
main achievement in life had been to emerge from the right womb. And
when they emerge from that womb, instead of a welfare officer, they
have a trust fund officer. Instead of foodstamps, they get dividends
and interest.''

He acknowledged that his own kids ''started out way ahead in the race
of life.'' But ''I don't believe in accentuating that by passing along

the chips that would enable them to command the resources of society without contributing to society. I believe in leaving them enough so they can do anything - but not enough so they can do nothing.''

Buffett, who heads the Nebraska-based Berkshire Hathaway investment company and was recently estimated by Forbes magazine to have a personal worth of $28 billion, has three children. His daughter, Susan, who once worked at U.S. News & World Report but is now living in Omaha raising her own children, was in the audience as he spoke.

Buffett, a Democratic Party supporter, appeared at Columbia alongside New York Senate candidate Hillary Rodham Clinton and gave her his personal endorsement.

He also said that he considers himself ''very undertaxed. I hear this Republican message that we're rich as hell and we're not going to take it any more. That doesn't make a lot of sense to me. I'm paying taxes at a LOWER RATE THAN MY SECRETARY ... and frankly I think that's CRAZY.''

So - The fact that "dubya" lied on national television that he had never been convicted of DUI, and has been repeatedly quoted as denying it to the press makes him a good guy and Gore a liar. What "Dubya" is lying about it that he would make a good president - He PROVED himself to be the WORST governor ever elected in the state of Texas, and now, he wants to be president. He has NO EXPERIENCE, and Absolutely NO stand (or even a clue) on ANY ISSUE. His Tax cuts will NEVER PASS Congress (and his camp is counting on it) It is just a ploy for the SIMPLE-MINDED folks to vote for him. The ONLY stand he has ever made was that he is a bought and paid for big-business supporter. A Vote for Bush is saying "I want the rich to get richer and the poor to get poorer" Remember the "trickle - down" Theory ?? Yup - He's just a good ole boy - "I didn't mean nuthin by it, I just wanted to be the prezedent - sorry about the country" - Then we'll have to listen to your whining about paying $5 for a gallon of gas and $3 for a loaf of bread, and about how your taxes are eating you alive. "Dubya" won't have to worry - He's rich, so he will get the tax cuts - but you won't be because someone had to pay for the country - it might as well be the little people..

Al Gore's 21 Lies

FICTION: Al Gore recently claimed that his mother-in-law pays more than $100.00 for the arthritis medicine Lodine; and he claims that his dog takes the same medicine for $37.00, claiming "This is wrong!"

FACT: Gore's aides were quick to apologize for Gore's lie, saying the information was from a Democratic study. Washington newspapers also reported that Al Gore wasn't even sure his mother-in-law was taking any medication and wasn't even sure she had arthritis. And, he doesn't know anything about his dog's "arthritis".

FICTION: Al Gore said his father, a senator, was a champion of civil rights during the 1960's.

FACT: Gore's father voted against the landmark Civil Rights Act of 1964 and was a racist who was fond of using the "N" word.

FICTION: Al Gore said that his sister was the very first person to join the Peace Corps.

FACT: By the time Gore's sister joined the Peace Corps, there were already over 100 members.

FICTION: The same sister died of lung cancer years later and Gore vowed to never accept tobacco money as campaign contributions.

FACT: Just four years later, while campaigning for office, Gore spoke to the tobacco industry and said he was one of them because "I've planted it, raised it, cut it, and dried it." He raised over $100,000 in "reported" contributions.

FICTION: While running for office, Gore's campaign literature claimed he was a "Brilliant Student".

FACT: Washington newspapers said he barely passed Harvard and consistently earned D's and C's.

FICTION: Gore claims an extensive knowledge of law as a result of his extensive study at law school.

FACT: Al Gore dropped out of law school.

FICTION: Gore claimed that his knowledge of God and spirituality came to complete fruition while "finishing" divinity school.

FACT: Al Gore dropped out of divinity school.

FICTION: Al Gore claimed responsibility for inventing the Internet in the 1990's.

FACT : Shocked scientists were quick to speak out, explaining that the Internet had been in widespread use by government and educational institutions since the early 1970's.

FICTION: Al Gore claimed the book "Love Story" was based on his life and Tipper's.

FACT: Author Erich Segal called a press conference to deny his claim. (Couldn't he at least lie about a love story where his sweetheart doesn't die?)

FICTION : Gore claimed that as a reporter for a Nashville newspaper, his stories led to the arrests of numerous corrupt criminals.

FACT: He later apologized for his claim and actually said it was untrue (also known as lying).

FICTION: Gore claims to increase diversity in the staff that follows him daily, especially among blacks.

FACT: Black members of the Secret Service are suing because they claim they are not being promoted to positions guarding the Vice-President.

FICTION: Al Gore said he was the first to discover the Love Canal nuclear accident.

FACT: The incident was already discovered, being investigated, and covered widely in the press for many months before Gore was aware of it.

FICTION: Gore said just recently that if elected president, he would put harsh sanctions on the sleazy producers of Hollywood's extreme sex and violence.

FACT: Just six days later, Gore attended a fundraiser by Hollywood producers and radical gay activists where he told them that he would only pretend to "nudge them" if elected. He raised over $4 million.

FICTION: Al Gore said he built his Tennessee home with his bare hands.

FACT : Totally false.

FICTION: Al Gore says parents should not have a choice between private and public schools because public schools are far better.

TRUTH : Al Gore attended private school and he has sent his children to private schools.

FICTION: Al Gore remembers his mother lulling him to sleep as a baby by singing the popular ditty, "Wear The Union Label".

FACT: The popular ditty was created by the unions when Gore was 27 years old.

FICTION: Al Gore claimed to co-sponsor the McCain-Feingold Campaign Reform Act.

FACT: The Act was not sponsored until he had been out of office for over a year.

FICTION: Al Gore claims to be instrumental in keeping gas prices low.

FACT: Gore has voted on numerous occasions to raise the tax on gasoline. In his book "Earth In The Balance" Gore claims that the nation's Number One enemy is the internal combustion engine. (That's the motor in your vehicle that gets you to work and takes your kids to school)

FICTION: Gore pretends to champion the rights of poor women to be tested regularly for breast cancer with the most modern technology.

FACT: While giving a speech on the subject in September, Gore didn't know what a mammogram was.

FICTION: AL Gore promised Florida's senior citizens that they would finally have low-cost drugs with no interference from government.

FACT: Gore's plan calls for the creation of a huge federal agency that would tell you which doctor you are allowed to see in order to get the "special rates".

FACT: Al Gore told NBC's Lisa Meyers that he had never told a lie. When Meyers pressed harder, "You've never told a lie?!" Gore said, "Not that I know of."

What lie? He was honest and forthright with his admission as soon as he was asked, but it's really amazing how something 24 years ago, which GW readily admits, is so much more important than the 8 years of constant lies, corruption, lawsuits, coverups, scandals, etc. from Clinton/Gore, which the liberals conveniently choose to ignore.

While on the subject of the liberal double standard, just listen to all the democrats whining and crying because Ralph Nader won't drop out of the race. They sure didn't mind back when Ross Perot played "spoiler" for Clinton. Where was all their concern then ?

>What "Dubya" is lying about it that he would make a good president - He
PROVED >himself to be the WORST
> governor ever elected in the state of Texas, and now, he wants to be
> president.

If that were even remotely close to the truth, then explain how he was re-elected as governor by close to a 70% margin - and did it in a state which very rarely re-elects any governor!.

>He has NO EXPERIENCE, and Absolutely NO stand (or even a clue)
> on ANY ISSUE.

Then why are you liberals crapping you pants right now, and Algore is packing his bags ?

>His Tax cuts will NEVER PASS Congress (and his camp is
> counting on it) It is just a ploy for the SIMPLE-MINDED folks to vote for
> him. The ONLY stand he has ever made was that he is a bought and paid for
> big-business supporter. A Vote for Bush is saying "I want the rich to get
> richer and the poor to get poorer" Remember the "trickle - down" Theory ??
> Yup - He's just a good ole boy - "I didn't mean nuthin by it, I just
wanted
> to be the prezedent - sorry about the country" - <<< SNIP >>>

Do you have any original thoughts, or are you going to continue to just repeat the same old crap as all the other democrat spin control "talking heads" ?

Never mind, it's all but over now. Liberation day is right around the corner-

Go GW, Go !

Greetings,
I drive a semi, and am looking for a dual band 2M/440 radio with a remote head and large display, any such animal out there? It would also be nice if I could change the display color ie: amber to blue or green for readability.
Any suggestions, recommendations or experience with such a radio?
Thanks,
Gerry

I have just purchase a multiband HT and am looking for some beginners info on how to use its functions and what all the functions might mean. I am getting ready to take my test and was just wanting to get a head start. How do you connect to repeaters? What is VFO? What is CTCSS and DCS and what is it for. ETC..... Is there any online info on how to get started in HAM? The info I have found seems to be for more advanced users or is to vague for a beginnger like me.

I took part in the contest last weekend and i am in the process of locating some software to enter my log,any advise there welcome.

Also have several odd callsigns that i can not locate the qth of,any advise there would also be helpfull,

the calls i need help with are;

UT7L
M6T
UU7J
H2G
B7K
B4R
ZX5J
VC5C
K5K

Any help welcome thanks in advance,
Paul

>vague for a beginnger like me.

Start by going here:

http://www.arrl.org/hamradio.html

The HT manual should explain how to set up the radio and what the
functions mean. Repeaters use 2 freqencies, an input and an output
freqency. They are typically (but not always) 600Khz up or down from
each other. Some repeaters use a tone to access it as well. Repeaters
expand your range considerably. The first thing you really have to do
is LISTEN nad then listen some more, etc.,etc. Learn the protocols of
how things are done, this way you'll sound more like an old pro when
you finally get that ticket and get on the air. NEVER be afraid to ask
questions. You will find most hams will be more than happy to answer
any questions you may have.

Good luck on your test and I hope we'll be welcoming you on the air
soon!

If you're talking about contest logging software I'd recommend K1EA's CT log, it's pretty much a matter of a standard today. But it cost a lot of money ! Way too much, in my opinion.

On the other hand if you're looking for logging software for general use try Logger, it's free (download at http://www.ve9dx.com/logger.html) it works on the windows 9x/ME machines and I like it very much.

On the same site above you'll find a link to Writelog, windows based contest log, which apparently is a bloody good thing but I haven't seen it "live" yet so I can't tell you how good/bad it is. And it cost about US$ 75- which is not cheap either.

The best log however (for me) is LogPlus of N7XR (ex KD7P) it's a DOS based program, works on any 486 and higher computer and cost about US$ 50- or so. The problem is that Bob (N7XR) has some problems in his life and he's giving up on it (for the time being ?) so the future / support / rights are all questionable.

215. GORE WILL WIN due to non-White vote.

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-05 00:00:00 UTC
From: nomonkeys@aol.commotion
Message-ID: <20001105161200.20311.00000785@ng-fh1.aol.com>
Source record: 100588

GORE WILL WIN. NON-WHITES WILL VOTE FOR HIM IN DROVES.

Those who think Bush can win need a good kick in the ass by reality. Whites must stop this fantasy of having a Republican president. There will NEVER be another Republican president. Due to the ongoing invasion of the United States by massive non-White immigration, the point of no return has been reached in American politics. Almost ALL non-Whites, without exception, are very loyal Democrats. They have tasted the blood of the wounded White conservatives in the last 2 presidential elections, and they want even more blood. They are intensely motivated by revenge against White America, and they will turn out in droves. Mexicans will win California for Gore. Jews and Blacks will win New York and Florida for Gore. Case closed. Gore wins.

You may say "but America is still about 70% White". True, but unlike every other race, Whites are too stupid to stick together as a solid voting block. Instead, half of the White voters will gleefully go to the polls Tuesday and pull the lever for the most dangerous political enemy of the White Race ... the Democratic Party. They will pull the lever and empower those (such as Blacks, Mexicans, Jews, Homosexuals, etc.), who are just itching to destroy the dwindling remnant of White Christian America.

So, as half of the White Race votes for guaranteed social security, free prescription drugs, gun confiscation, hate crime laws, preferred status for homosexuals and non-Whites, murder on demand (abortion), and criminalization of free religious expression by Christians; they unwittingly vote for the coming persecution and extermination of their descendants.

Which liar are you referring to ? Al Gore, R. Nader, or G. Bush ??? I am sure that "Dubya" and Ralphie boy have many. many more than 21 lies to their credit . How come Bush was quoted as not being aware that social security was even a federal program ?? Good thing you think he's in touch with reality. I for one cannot afford to have a crackhead in the white house.

221. Book on history of ham radio

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-05 00:00:00 UTC
From: ROSE KUHN <travelnut@mindspring.com>
Message-ID: <8u4mhu$i9k$1@slb3.atl.mindspring.net>
Source record: 100594

I am completely ignorant of ham / amateur radio, but I would like to find a book for my brother-in-law who is an enthusiast.

I would appreciate any information on a book that relays anecdotes about how ham radio was used in historic circumstances, or civil emergencies. In other words, ham radio put to practical use during emergency situations.

Any guidance you can give is appreciated.... I'm trying to surf the net and various bookstore sites, but nothing seems to fit the bill...

Thank you.

1SL1A, SEALAND (More on this interesting upcoming operation. DX IS...). Jon "JT" Utley, K7CO (1SL1J), has informed OPDX that the 1SL1A operation will take place between December 9-12th. Activity will be on 80-10 meters. The WARC bands and 160 meters are being considered. The 1SL1A operation will be active during the ARRL 10 Meter Contest. Jon mentions that the license from the government has been issued. He also states the following: "For those that are wondering about using the prefix 1SL... As some of you know in the past 1S has been used for Spratly. This prefix bloc is not reserved for Spratly but used because the area is in dispute over who owns the area. Sealand is also in dispute. I will list links below that touch on the international debate over Sealand's claim. Any comments regarding your research of Sealand are welcome. We have created the Radio Amateur Association of the Principality of Sealand and our goals are to become a member of the IARU and eventually the ITU." Again, for more information and details, check the following Web sites:
http://www.sealandgov.com/
http://www.fruitsofthesea.demon.co.uk/sealand/index.html
http://www.nielsen.net/1sl
Here is an ABC News article on Sealand.. Click on the picture for a video news story using realplayer video.
http://more.abcnews.go.com/sections/tech/dailynews/sealand000606.html

ADDED NOTE: OPDX has learned that an operation took place from Sealand in 1982 by four German ham operators (DF8AO, DK8KW, DL6PE and DL2NO). They used the callsigns S1AH, S1AB, S1AS and S1AD.

3B8, MAURITIUS. Sigi, DL7DF, will be active as 3B8/DL7DF between now through November 16th. Please note that this is only a vacation, NOT a DXpedition! Expect only some occasional activity. Sigi will have a TS-50, a linear as well as Titanex V80 low band vertical. QSL via the bureau to DL7DF or direct to: Sigi Presch, DL7DF, Wilhelmsmuehlenweg 123, D-12621 Berlin, Germany. The DL7DF homepage is at: http://www.qsl.net/dl7df

3W, VIETNAM. The Uruguay DX Group/Cram will make a new joint DXpedition this year. This time they will operate from Southern Vietnam. Activity will be from November 22nd through November 26th, from Kimdo Hotel in downtown Ho Chi Minh (formerly Saigon). The station will be able to use 500 watts into a 3 element yagi. The lisence has been issued, but the callsign will not be announced until their arrival due to the possibility of a pirate operation. A well know operator who will be there is, Bert, CX3AN (formerly: CX0XY, VP8BUH, C91BV, P40AN, HR6XX, VP5/CX3AN, ZK1AAN, ZK1CRR, 3D2HA and FO0ALE). QSL Manager is Antoine, F6FNU.

4J, AZERBAIJAN. "The 59(9) DX Report" reports that Bob, N3NGC (ex-EL2RF, A92GD), has left Liberia and is on his way to Baku and hopes to obtain a license.

4W6GH QSLS AND MORE. Antonio, CT1EGH/4W6GH, reportedly is very busy processing the thousands of QSL cards that he has received and continues to receive. Some have received their QSL, but please be patient. He currently is unsure when he will go back to 4W, but he does state everything indicates that it should be in February of 2001. Antonoi hopes to be active from Guinea-Bissau (J5) during November sometime. His Web page is at: http://www.qsl.net/ct1egh

4S, SRI LANKA. Just a quick reminder that Phil, G3SWH, and his XYL will be in Sri Lanka (IOTA AS-003) from November 9-22nd. Phil has received the licence and callsign 4S7WHG. They will be travelling extensively during their stay, and Phil hopes to be active on CW only, all bands from 40-10 meters for a few hours at least on most days, circumstances permitting. This will be a holiday type operation with limited activity, although they will spend the last few days relaxing on the beach at Unawatuna in the south of the island where Phil hopes to be a little more active. He will have his IC-706 and R-7000 antenna with him. QSLs will be via G3SWH, either direct or via the RSGB bureau.

9M6, EAST MALAYNSIA. Timo, OH1NOA, will operate as 9M6AAC from the Hillview Gardens, Keningau, Sabah, during the CQWW CW Contest as a Single Op/All Band/High Power entry on November 25-26th. QSL via N2OO. Before and after the contest he will try to monitor 6 meters and work some WARC band QSOs. For more details, check the Web site: http://www.qsl.net/oh1noa/9m6/9m6aac.htm

A5, BHUTAN. The JA group that was active this past week is now QRT. However, there has been some confusion on the QSL routes. The original annoncement stated to QSL all contacts to JH1NBN. However, this seems to have changed. Before leaving Yuki, JH1NBN, sent out a report and stated that each operator will receive their own callsign and be their own QSL Manager. QSL to the following A5 callsigns and operators:
A52B via JR7TEQ A52JA via JK1AFI A52XX via JA1PCY
A52DX via JF1PJK A52W via JH1NBN

AT0, INDIA. In connection with the Ham Radio 2000 Convention to be held at Hyderabad, India, in December 2000, the special event station AT0JH will be active during some CW and Phone contests. This station was heard this past weekend and is expected to be active again (on SSB) from 1830z November 10th to 1830z November 12th. QSL via Box 15, Secunderabad 500003, India.

CONVENTION PHOTOS. Jean Michel, F6AJA, reports that he has put some photos from the IOTA/RSGB Convention in Windsor last October on the Yves, F6CYV's, web site at: http://home.nordnet.fr/~yverbeke/iotaconv.shtml

DXCC NEWS (GOOD AND BAD NEWS).....
7O1YGF QSL STATUS. There was a report that came out this week from Bill Moore, NC1L, DXCC Manager, stating, "I wish I had better news but we still have not received documentation so it is on hold right now."

DXCC APPLICATIONS. It was announced this past week that DXCC applicants no longer have to wonder if their cards and applications made it to the DXCC Desk at ARRL HQ for processing. You can now visit the ARRL Web and look under the "List of DXCC Applications Received" page at: http://www.arrl.org/awards/dxcc/appstatus.html This page lists the pending DXCC applications by callsign. OPDX InterNet Subscribers will receive a press release by Wayne Mills, N7NG/1, of Membership Services, on the details about this new Web feature.

DXCC FAQ #8. Bill Moore, NC1L, DXCC Manager, has released another informative FAQ which also deals with the new "DXCC Applications Received" Web page as well as TX0 and 4W cards submissions, DXCC backlog, DXCC Card Checking Program, DXCC Annual List and the status of the DXCC's computer upgrade. This press release will be sent to all OPDX InterNet Subscribers as an additional bulletin.

E3, ERITREA (Operation QRT). Chris/DL5NAM (E30NA) and Dieter/DF4RD (E30TA) arrived back home on Saturday, November 4th. According to Dieter's press release, they closed the operation down on October 31st, making close to 25,000 QSOs. The complete press release will be sent to all OPDX InterNet Subscribers as an additional bulletin. Suggested Web sites for more information on this operation are:
http://www.qsl.net/e30ta
http://www.bavarian-contest-club.de
http://www.uni-erlangen.de/~unrz45/BCC/act/2000/e30

IOTA NEWS.....
AS-047. Takeshi, JI3DST, will be active as JI3DST/6 from Daitou Island (Minamidaitou Mura [Minamidaitoujima], Okinawa-ken) December 30th through January 7th. Activity will be on 40/17/15/12/10/6 meters SSB. QSL via the JARL (Bureau is Best) or direct to JI3DST: Takeshi "TAKE" Funaki, 2-18-26 Hannan-cho Abeno-ku Osaka-city, OSAKA 545-0021 JAPAN

AS-049. Takeshi, JI3DST, will be active as JI3DST/6 from Tokara Archipelago (Kuchinoshima, Kogashima-ken) November 23-25th. Activity will be on 40/17/15/12/10/6 meters SSB. He states that he will use two stations: one for NA and SA on 15/10 meters only; one for EU, AS, AF and OC. QSL via the JARL (Bureau is Best) or direct to JI3DST: Takeshi "TAKE" Funaki, 2-18-26 Hannan-cho Abeno-ku Osaka-city, OSAKA 545-0021 JAPAN

OC-169. By the time you read this, the following operation will be over. However, you may have missed the location that Babs/A35YL and Lot/A35ZG were active from. They were expected to be active from Haapai-Island until November 4th.

KH5K, KINGMAN REEF. The K5K operation ended on October 31st at 1700z. QSL via K4TSJ. For further details and information, and also look for online logs, check the Web site at: http://www.qsl.net/krpdxg

PC50, THE NETHERLANDS (Attention Prefix Hunters - Special Event). The following is an excerpt from a press release (the complete release will be sent to all OPDX InterNet Subscribers as an additional bulletin): On December 15th, the Radio Agency of The Netherlands will celebrate the 50th anniversary of former intercontinental radio reception station "NERA". During the celebrations, amateur radio will be part of it. Besides, the weekend before the official celebrations, on Saturday/Sunday December 9th and 10th, a special event station will be operated by employees of the Radio Agency. The callsign PC-50-N has been applied for. The callblock PC has not been issued to radio amateurs before. Activity will be around the clock, propagation permitting, on CW, SSB or PSK31 on 70cm, 2, 10, 15, 20, 40, 80 and 160 meters. A special QSL card will be awarded to all contacting stations and will be sent by the bureau automatically. SWL reports will be answered too. Please send your reports via bureau, direct or via Email (please keep message size small). Send direct to: Ben Witvliet, PA5BW c/o NERA, Radioweg 3, Nederhorst-den-Berg, The Netherlands Send E-mail to: ben.witvliet@rdr.nl

QSL INFO AND NEWS.....
There is a correction to OPDX.482.1 on a QSL route. Joe, W3HNK, states that he is NOT the QSL Manager for KH7R and ALL cards should go direct via his (KH7R) callbook address.

The QSL route for HB0/DK7ZL is via HB0/DK7ZL Bureau or Direct. He is NOT the QSL Manager of any other HB0/callsign.

QSL II3A via IV3RAV: Michele Corvino, via San Giacomo, 20, 33034 Fagagna - Udine - Italy.

QSL IQ7J via IK7JWX to the bureau or direct (CBA on qrz.com):
P.O. Box 218, 73100 Lecce Italy.

Jara, DL1YD, states his operation during the CQWW SSB Contest as OK8YD should be QSLed to DL1YD (his home callsign). All the QSLs will be QSLed via the bureau anyway. Sending QSLs via the OK bureau is "OK" too, but it will take a little bit more time to receive them.

QSL PW7Z via PY7BEL: Jolibel Alves Andrade, rua. Martinho Fransisco 67, Carpina - Pernambuco - Brasil, cep.55813-541.

The CWSP - Grupo de CW de Sao Paulo (Sao Paulo CW Group) now hosts the Brazilian ham address search engine. It can be found on the Web page at: http://www.cwsp.org.br/indexen.htm

Tom, SP5UAF, informs OPDX that there has been some delay with printing the QSL cards for their last special event operation as SP0ZCC (March/ April 2000) by the Scouts Radio Club (SP5ZCC - http://www.sp5zcc.waw.pl). However, all QSLs were sent out at the beginning of October. QSL via SP5ZCC (OK via the bureau).

Marcel, SP9XWD, informs OPDX that QSL cards for their last special event station operation SN600UJ (Sierra November Six Zero Zero United Juliett) have all been sent out via the bureau. QSL via SP9PKZ.

QSL T88QG via JA1QGT. The QSL Manager/Operator for T88QG is Toku, JA1QGT, and he states that he operated from Palau Island. Cards are currently being printed, so please QRX!

Nilay/TA3YJ and Berkin/TA3J report that on November 3rd the QSL cards for TA3J, TA3YJ and YM3LZ were sent to the following QSL bureaus: Bulgaria, Russia, Spain, Poland, France, Czech Rebuplic, Switzerland, Greece, Austria, Netherlands, Belgium, United Kingdom, Lithuania, Romania, Portugal, Estonia, Israel, Croatia, Belarus, Luxembourg, Slovakia, Finland, Sweden, Slovenia, Hungary, Ukraine, Norway, Monaco, Andorra, Argentina, Uzbekistan, U.S.A,, Canada, Turkey, New Zealand, Brazil, South Korea, Kazakhstan, Japan, Latvia, Colombia, Lebanon, Denmark, Germany and Italy to be given to their radio amateurs.

Dave, VA3RJ, informs OPDX that the following Web site now contains links to 1700+ on-line logs, and is still growing. Most are searchable logs, while others are text (also searchable with CTRL-F), and a few downloadable logs. It is updated daily. Check out:
http://www.qsl.net/va3rj/frame_logs.html
Also, check the following Web page for a list (by date) of present, and upcoming, Island (IOTA & NonIOTA), Lighthouse, Castle, and other portable operations. This list is updated daily. Check out:
http://www.qsl.net/va3rj/icpo.html

SIX METER BEACON UPDATE. Tex, 9M6TO, reports that the 9M2TO/B has been improved (QRO). The frequency: 50.005 MHz. Power is: 50 watts (as of November 1st at 0000z). The antenna is a GP. All equipment donated by: TX - TS660 by JA1PCM, KEY - AEA MM3 by JA1PCM, AMP - HL66V Tokyo HiPower 50w by 9M2/JI1ETU, ANT - 5/8 GP by 9M2TO, POWER SUPPLY by 9M2KT and COOLING

SYSTEM by 9M2KT. It was the MARTS Penang group who made the decision for improvements to the system.

SPECIAL EVENT FROM PLOAND.................
Look for SN2000C (Sugar-November-Two-Zero-Zero-Zero-Charlie) to be active from now until December 31st. This millenium station hopes to attract activity and will be interesting, especially for prefix hunters. Look for them on all bands (160-2 meters) on CW, SSB, FM, RTTY, PSK31 and SSTV. QSL via SP9PKZ.

Look for SP2000S (Sugar-Papa-Two-Zero-Zero-Zero-Sugar) to be active from November 10th to December 31st. This operation will be held to celebrate the 82nd anniversary of regaining independencce by Poland. This is also called the millenium station. They hope their activity will be interesting especially for prefix hunters. Look for them on all bands (160-6 meters) on CW, SSB, FM, RTTY, PSK31, MFSK and SSTV. QSL via SP5ZCC (OK via the bureau).

ZL8, KERMADEC ISLAND. Jacky, ZL3CW (aka F2CW), is now active and is operating as ZM8CW from Raoul Island (OC-039) now through November 12th or possibly until November 23rd. Mostly his activity is on CW 20/17/15/ 12/10 meters. However, he has also been heard on 15/12 meters SSB.

Hi. I'm looking to talk to a couple of hams in St. Pete about local 2 meter repeaters in use there.

If anyone from St. Pete reads this, please email me; I have some questions about local coverage.

Thanks & 73's..

I have already voted for Harry Browne but I watched Bush say that.
Within the context of what he was saying, I think he meant to say
Social Security is not a federal *welfare* program, i.e. people
are getting back the money that they already paid into the system.

Oh, come on Phil, you didn't really expect a message relating to anything electronic in a radio newsgroup, did you? Since this is a radio newsgroup, the message had to be about United Parcal. Gee, you need to get these newsgroups figured out. Electronics related stuff is discussed in the child birth newsgroup, and I haven't found where amateur radio related topics are discussed yet. If you come across it, let me know.

> http://www.snopes.com/inboxer/outrage/gorelies.htm

You need to read the references you give beforehand. It can save you considerable embarrassment. Example: The snopes pages state that the list is mostly true, and that the parts with which they disagree are a matter of interpretation. Consider the following direct quote from snopes

Gore claimed while stumping that as president he'd give the entertainment industry six months to stop its insidious marketing of violent films, video games and the like to young kids and seek Federal Trade Commission regulation if they didn't act. A few days, while speaking to three hundred stars and entertainment industry executives in Beverly Hills, Gore back-pedalled on his tough talk of the previous week. However, Gore didn't say he would only "pretend to 'nudge them' if elected." It was his Vice-Presidential candidate, Joseph Lieberman, who said, "We'll nudge you, but we will never censor you."

Gore DID back pedal and then left it to his lap dog to finish the job. I'm not going to go over the snopes pages myself, but instead invite anyone who thinks that the list is fictitious to go to the snopes site and read their comments. You'll find that the list is disturbingly correct.

Even Ross Perot has publicly called Gore a liar. Is everybody out of step but a few Gore supporters?

Funny- My experience has been quite the contrary- My biggest problems
have been Fedex (gets lost when not in the city) and RPS (sends Semi on
country roads with 2lb package)

Another problem is people posting stuff like this on multi-NG addresses,
not on subject- and probably just to get revenge after a dissagreement.

Strange. Over about 5 yrs or so, I've had at least 60 or 70 pkgs delivered
and sent through UPS and only two problems. One was delivered two days late
and the other was a minor damage problem . They had me fill out some forms
and sent me a check for the insurance money within one week. They told me
to keep the goods and they didn't even want to look at it. Couldn't ask for
better service. Unfortunately, it is inconvenient for me to use UPS and I
end up using USPS and with them, have never had a problem.

I've posted this message to two newsgroups, although I
should have posted it to many more.

I would like to thank all of you for responding to the
many questions of both beginners and others.

I am new to HAM and as such, have gleaned the information
from these newsgroups regarding coaxial cable, connectors,
my new IC746 radio, and my new Cushcraft R8 and
124WB antennas.

I have used your responses on grounding and RF problems
to do the best possible job of installing my mast and antenna
to provide the best safety for myself and others near my radio.

Believe it or not, the mast is one 1-1/2 galv water pipe with caps
on both ends, held up by 3 microwave dish brackets using
threaded rod (12ea) through 9 inches of brick wall with 5x16x 1/4
inch back plates - 4 stories up. It is capable of supporting a full
dress harley.

I drilled the bottom of the water pipe and bolted two high end
grounding brackets and ran #4AWG stranded wire straight
down to the ground to 2ea 8 foot copper rods. The location
was determined by the info from these groups. It is an area
that never sees the sun due to trees and the building itself
and is permanently wet with moss. Nice continuity.

Again, I will continue to read these newsgroups for more info
on radio equipment and safety and will soon join ARRL and
will order many books to advance my knowledge of this hobby.

I made the decision to start this in Sept and passed the Tech
exam yesterday and am now putting the time in to learn the
code. When I'm ready for the code test, I will also be ready
for the General exam.

A few persons from a local RACES group will soon stop by
and go over my system to make sure I have not overlooked
anything. They are both Extra (VECs) with one being an
electrical engineer.

Again, thank you all for taking the time to answer the questions
as have. You have motivated a person in upstate NY to become
a dedicated, safe and ethical HAM operator for life.

Big Time 73's to all.

Not only did I read it, but long since suggested corrections to it.
("Snopes" took some items as true and hadn't seen the rebuttals.)
Nevertheless, it refutes some items. "UrbanLegends" refutes others
(all but one, and I suggested that be corrected too). Between the
two, they manage to show up the "Lies" list as being lies itself.

I wanted to keep the list short, but there *are* other rebuttals online:

I agree. UPS' delivery time has been ridiculous lately. I have been
shipping with the Post Office Priority Mail for items less than 5 pounds
because it is a lot cheaper and quicker. Although, I believe UPS is
cheaper on the heavier stuff than the post office but it takes longer
for UPS to deliver.

Richard Miner wrote:

The ideal American presidential candidate -- he ran four times -- died on Oct 13 at the age of 90.

Not only was he actually born in a log cabin, lived simply all his life but he was absolutely faithful to his wife in 65 years of marriage. He volunteered for the Navy in WW2 and was an avid golfer and fisherman. For all of his life, he was absolutely consistent in his political ideas. At various times he was a lumberjack and a steel mill worker.

This paragon was Gus Hall, candidate and honcho of the Communist Party USA.

> Any suggestions?

Yes, I suggest you read ARRL Radio Amateurs handbook on how zener diodes
work.

You can use the zener to regulate the EXISTING 200 volts down to 150 volts.
This is done with a resistor and a zener. Wattage is a concern.

Hi,

What's the best way to re-tune (fix) my 2m/440 dual band antenna. It worked perfectly just a few days ago, for some reason it's "out of tune"? I can't barely hit the nearest repeater using my 50W mobile. There are no physical damage to the antenna. The mobile radio works fine when I put up someone else's antenna using the same base and cable.

Will it be cheaper to simply buy another mobile antenna or invest in a antenna tuner?

Please advise.

Jackie

265. liberal judge leaked DUI to hide naked truth

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-05 00:00:00 UTC
From: kk7ho@aol.communicate

Judge leaked DUI to hide naked truth
Revealed Bush indiscretion secretly to conceal own streaking incident
by Paul Sperry

WASHINGTON -- Long before he was William Childs the Portland, Maine, probate judge who anonymously leaked George W. Bush's DUI conviction, he was Billy Childs the streaker who ran "bare-assed naked" through a Catholic girls' school.

In 1974 -- two years before Bush was pulled over for drunk driving in Kennebunkport, Maine -- Childs was involved in his own youthful indiscretion just up the coast. He and another young Portland man donned ski masks, sneakers and ties -- and nothing else -- and streaked through the Catherine McAuley High School cafeteria during lunch hour.

A Portland Press Herald photographer got an anonymous tip about the prank and snapped an award-winning shot of Childs and buddy Paul Doughty in the act. The photo, which even hit the London papers -- sans names -- before finding a home in a Chicago museum photo display, shows Childs running past a shocked schoolgirl, face buried in hands.

Last week, Childs, a Democrat elected two years ago to the Portland bench, tipped off local Democrat gadfly Tom Connolly to the story of Bush's misdemeanor. Connolly, in turn, tipped off the press.

Childs didn't alert the press himself because he didn't want to relive his indecent-exposure incident, a former classmate says. Locals back then identified Childs as one of the streakers and he's been trying to put the incident, well, behind him ever since.

"I'm quite sure that's why he passed it along to someone else to reveal to the press," Mark Norton told WorldNetDaily in an exclusive interview. He and Childs were seniors at Cheverus High School, an all-boys Jesuit school in Portland, at the time of Childs' streaking incident.

When Childs ran for probate judge, he made oblique reference to the incident when asked by local press about embarrassing things in his past. "He said he wasn't proud of something he did years ago," Norton said.

Childs also runs a law practice specializing in drunk-driving cases, or OUIs (operating under the influence) as they say in Maine.

"A lot of people around town don't know about it (his streaking)," Norton said. "It's not something he really wants to advertise to new clients."

Another long-time local, Mike Solomon, who hosts an area radio talk show, remembers Childs "running bare-assed naked through the school with just a tie on." He agrees that Childs didn't want to thrust himself -- and his own embarrassing past -- in the national spotlight.

"That's why he passed the story off to Connolly," Solomon said. "He couldn't chance being exposed all over again."

Childs replaced his late father, Dana Childs, on the Portland probate bench.

"Childs comes from a long line of Democrats. His politics date back to the (Sen. Edmund) Muskie era," Solomon said. "He and Connolly are part of the Democrat machine in Maine."

Connolly, a liberal lawyer-activist recognized by his beat-up cap, is considered by many locals to be more than just idiosyncratic.

"He's ready for one of those coats with the long sleeves -- you know, the kind that wrap all the way around," Norton said.

Perot Endorses Little Bush
NewsMax.com
Friday, Nov. 3, 2000
Ross Perot told CNN's Larry King yesterday that he plans to vote for George Bush, and he strongly endorsed Bush.
Perot, the founder of the Reform Party who opposed Bush's father in 1992, said Bush has more integrity than Gore.

Why Perot Is Endorsing Bush

The most important job in the world is president of the United States. Now, we have to have a person with the maturity, with the character, the integrity, the judgment, and the discipline to do that job. We are down to two. We are going to have – in the real world, one or the other will get this job.

Now, tonight, I would like to talk to all of the young people in this country, because your lives are in front of you, and it's very important for you to understand that we need to have people who reflect honor and integrity on that office. We need to have people who are going to tell the truth when they're in the office, that will take responsibility. And we need to have somebody that you would be willing to send – have you go into combat when he gave the order. All of you that are eligible to vote that are young have an enormous obligation to cast an informed vote. ...

I want the parents and grandparents who are dedicated to leaving a better world for their children to look very carefully and objectively – forget all the propaganda, all the stuff that goes on, and focus on the real issues of what we have to do. And the most important thing our president has to do as commander in chief is protect and defend this great country, and to be a responsible force for balance and avoiding wars throughout the world.

Bush Is the Better Man

Now, when I did all of that studying and analysis, I concluded that Governor George Bush, based on his record in Texas – here is a man that I have never heard anybody criticize once for improper conduct as governor, for improper taking of political funds, for payoffs, for impropriety in the governor's mansion or at any time. And that is a big state. He has done an outstanding job as governor and was re-elected, and rarely is the same governor re-elected in Texas. So, that was a tremendous compliment to him in Texas.

Looking at both of the candidates, I have concluded, because he has demonstrated the ability to be a person who knows how to administer and govern and have the responsibilities at the state level that the president has at the national level.

On the DUI

Well, it occurred in – he – you know, at this point, I hope he won't – unlike the person in the White House tonight, that person would give a thousand glib excuses and everybody would think it was a wonderful experience that they had when he finished. And the kind of person I'd like to see in the White House, said it was a mistake.

... Thirty-four years ago! Now, let's look at what happened as the Gulf War was starting. And Senator Gore was deciding which way to vote, of whether or not to send men into combat.

... This is a story that is on the wires. The press doesn't talk about it. And I want to know why. Because Gore went to the Republicans and said, I can't decide which way I'm going to vote, to send men or not send men into war. But I want to know is how much time you will give me. And will you give me prime time on the floor to express my view? And he negotiated again and again. And Alan Simpson and Bob Dole are the ones that have told this story. And he finally got exactly what he wanted, and he voted to send men into combat.

On Gore's Military Record

Oh, I'm sorry you brought that up. Wait, no, we are staying on it. Because you all won't print it. Gore was not in combat. Gore was a reporter, quote, Gore was never on the front lines.

... Stay with me. He claims he was on the front lines but he wasn't. He had a bodyguard. How's that for a private? And after five months, less than five months, he came back home. Wow, you'd normally do 12 to 13 months on a tour in Vietnam. But this was a senator's boy. And guess how he got out? He came back home to be a minister and started in Vanderbilt and then a few months later dropped out. Is this what you want in the White House, Larry? If that is what the American people want ...

Oh, but there's a huge difference. A streaker in a high school cafeteria
hasn't NEAR the potential of causing a fatal accident as does a DUI driving a
several thousand pound vehicle on a road.......

All diodes will break down if too much voltage is applied to them. Zeners are designed for use in this region and are not intended for rectification. Put the original rectifiers back in the supply. From this 200 volt DC output, you will need to run a resistor to your zener. The exact value will depend upon what the zener diode is rated for. You will be dropping around 50 volts across the resistor and you will need to figure out what current is desired for the proper operation of the zener. At this point, the zener will have 150 volts of DC across it. This will have to be fed to the base of an NPN series pass transistor (properly rated for the voltage and current, of course). The series pass is essentially an emitter follower and you will have about 150 VDC out of it. Of course, you can use big FETs also (I used an FET converting a Leslie speaker from one type to another - it was rated at 10 amps and 500 volts!)

Better amend your answer to he was honest and forthright with his admission after the proof was submitted to the public - until then even in his own words he "covered it up to save his daughter from the truth". Read ALL the facts before spouting off - check out the AP wire release this morning citing numerous examples of his ducking the truth about his conviction. BTW Nader has spoken on national TV that he wants everyone to vote for Gore after he gets his 5% of the vote so that he can receive his 12.5 Million Dollar federal contribution. He is in it for the money too.

Anonymous <anonymous@anonymous.anonymous> posted the anonymous smear:

> Al Gore's 21 Lies

This collection of misquotes and outright lies has been debunked on
two separate websites devoted to exposing "urban legends":

http://www.urbanlegends.com/ulz/gore2.html
http://www.snopes.com/inboxer/outrage/gorelies.htm

also see http://www.deja.com/=dnc/getdoc.xp?AN=683232116 (many URLs)

But this item deserves special comment:

> FICTION: Al Gore said his father, a senator, was a champion of civil
> rights during the 1960's.
> FACT: Gore's father voted against the landmark Civil Rights Act
> of 1964 and was a racist who was fond of using the "N" word.

Albert Gore Sr was *not* a racist. That is a contemptible smear.

It is one of the oldest political dirty tricks to insert bad provisions
("poison pills", or even just blatant pork) in a popular or necessary
bill, knowing that politicians will feel pressured to accept it anyway.

If they refuse to accept those bad provisions, and cannot remove them
by amendment, their only option is to vote against the bill, and hope
the next version is done right.

But then you can accuse them of opposing the popular-or-necessary part -
"My opponents voted against the SAVE THE WORLD FROM CERTAIN DESTRUCTION
Act!" - and never mention WHY they did so.

This is what's being done to accuse - as a "racist" - Al Gore's father,
one of the most noted ANTI-racist members of Congress from the South.

Albert Gore Sr had a 32-year-long Congressional career (1948-1970) as
a prominent advocate of civil rights, against bitter opposition.

http://janus.mtsu.edu/gore/gore_bio.htm
http://www.cnn.com/US/9812/06/gore.senior.obit.01/
http://spider.georgetowncollege.edu/htallant/border/bs10/mitchell.htm

When the 1964 Civil Rights Act was proposed, Gore objected to the
less-prominent provisions that allowed withholding federal funds
for schools and hospitals from non-complying states. He offered an
amendment to delete these provisions, saying that children and the
sick should not be penalized for the actions of healthy (but bigoted)

adults. He was willing to vote for the Act if it would be so amended.

His amendment was defeated, so he voted against the Act. He went on to vote for the the 1965 Voting Rights Act and the 1968 Open Housing Act, opposed Strom Thurmond's segregationist "Southern Manifesto", spoke out against the conduct of the Vietnam War. He was an inspiration and role model to the socially conscious youth of the South.

Gore was targeted for defeat by Nixon, part of the "Southern Strategy" to recruit Southern racists to the Republican Party - targeted, not for being a "racist", but for *not* being one - and lost re-election.

So the claim that he was a "racist" is false, and utterly insupportable.

It is not only a lie, but a foul and damnable lie, against a decent man.

"Character, honor, integrity" were qualities Albert Gore Sr had.

Despite Bush and his faction mouthing these words, this lie of theirs shows how completely they lack these qualities.

- - - - -

See what Al Gore Jr said at a memorial service for his father:

As a VE I once tested an OT who had first been licensed in 1926 and had worked several years as a Maritime radio operator. When he hobbled with his cane into the VE session at age 80, I knew him because I had known him when I was a kid. He was the ham who had Elmered my Elmer in 1928 - **60 years** ago, at that time. He had long ago allowed his ticket to expire, and decided to get back on the air again in his declining years. He took the 20wpm code test right off, and turned in a perfect copy. He quickly completed all the elements for Novice, General and Advanced. I then asked him if he wanted to try the Extra. There had been no Extra when he last held a license. He took the test back to his seat, spent a few minutes looking it over, then brought it back with the comment that he thought he'd better study a little before taking that one, it had some new stuff on it. Next session he was back, and aced the Extra written. He spent the next several years working CW on 20 meters, and sadly, became SK a few months ago.

That's the sort of ham you say won't be any more qualified than a post-April 2000 Extra lite. As usual you're full of stinky stuff.

But Dick, that *very same OT* would be condemned by you if he
took all the exams now. That makes you a rather despicable
character, IMO. How could that very same person be less qualified
because he took his exams now instead of whenever it was. Why
would you admire one 80 year old OT and despise another just
because they took their exams at a different time?

Hi,

I change couple week ago Transistors of the TS-930S, I use 2SC1969 from Mitsubishi, they not are match pair, but work very well. Its just copy of the Motorolas device, but much cheaper. MRF-485 abt. $50-100/pcs, 2SC abt $10 /pcs.

I made same time one other modifications on PS-unit, I set 0.1ohm resistor to 2n5885 collector (both), after that base current is abt. same on both transistor.

I have two pcs of 2sc1969!

If Gore Wins We are all Screwed!!! Why? Because he will rase our
Taxes, Take our Cars and Guns away, Chase manufacturing right out of
the country, Dumb down our kids further and put them on drugs if they
misbehave, and socialize are great medical system.

And one more thing, our tax system discriminates against those who
succeed. Since when if it fair to tax one person at 15% and another at
33% just because one is making more money then the other one? It's
Discrimination, plain and simple.

No i Was not. He could have taken the time to be thankful to those that
happened. So you think it is OK to physically threaten someone over a
difference of opinion. So if you posted the message you posted, calling
me
a prick I should threaten to kill you?

> And the comment and subject line about his extra class license making
> him at
> the level of your eight year old?

He does not have an extra class license. He was bragging about a Tech
license which is nothing to brag about.

> What the heck did you expect?

Not a physical threat. I do not agree with your comments, you used
profanity against me BUT you are not threatening me.

Burt

>Would you at your wedding, if you were the groom, get up at the
>end of the reception and yell out, "Gee, Thanks everyone for the
>gifts?"

Your comparison is questionable. An actor who receives an Oscar thanks everyone in the same fashion as the groom in your example, yet it is entirely appropriate.

Tom - N8ECW

Your comparison fails, the person I responded to received individual HELP. An actor received an award from a group.

Hi Ed,

Sri it took me so long to get back to this thread.. been quite busy here!

The MKII does better with a good audio chain into the radio, ie- pro microphone, compressor/limiter, eq, etc. The frequency response that the radio can pass through is not terribly impressive, but the narrower the audio going in, the thinner it will be coming out the other end. Surprising that the Sadelta gives good reports, but I have to say that it really isn't that bad a microphone for voice. It doesn't, however, have any highs or lows that would typically be more welcome on AM. The MKII will fall off with lows outside the range of the Sadelta, so the only way to sneak them in is to have a studio microphone with some eq to fatten up the bottom a bit and bring up a bit of the highs.

The MKIIG is more problematic, as the modulator appears to have been redesigned a bit for more "punch" in the audio, but with a narrower audio bandwidth. The ALC on the newer radio is less forgiving of low end audio and kicks in heavily on any beefed up low end audio below 800hz, especially at reduced power output for driving an amplifier. Barefoot, however, it can be driven at full power AM with nice forward swing with a constant audio level into the radio... it really needs compressor/limiter finagling to do this reliably, but it can be done without it. This is much easier to do on the MKII.

An interesting point that differs between the service manual checkpoints on MKII and the MKIIG is that the carrier insertion to the balanced modulator on the MKII is 200mV-pp on the MKII, and 100mV-pp on the MKIIG. Input levels for audio generator tones are 10mV on the MKII, and 3mV on the MKIIG. So I guess that ICOM considers this an improvement in the design to make the audio hotter... well it is on sideband, and it's nice and "punchy" on AM with the hand microphone they give you. But it's much less conducive to handling the lower end of the audio that voices have in the range below 800hz.

I was not impressed with this "improvement".

Well, I'm glad that I got the MK II & not the "G" Model...
I have a forward swing on AM . 26W dead key & 88 W peak w/ normal audio & stock mic.

I have a line level Stereo type EQ that I am planning on using w/ an Electrovoice 636 SLIMAIR mic. I wish I had some of my old ARRL Handbooks that I lent out, as I know that they have the preamp circut that I need to interface the Mic to the EQ. Do I have to Pad the output of the EQ for the 706 MK II?

Also, THe EQ has a "Fader" knob (front to rear). Can I use that to attenuate the output enough?

Now, for the hardest question of all...
I have a Very DEEP voice. THe EQ also has a "Subwoofer" output & level control. Can I interface the normal line level w/ the Subwoofer output (maybe a comparitor amp?) to really boost the low freq. response?

Thankyou for all of your help... I LOVE GREAT AUDIO !!!

Face it, Burp. You live for the day when someone rises to your childish taunting and says something you can post on newsgroups. I've seen you reply to messages posted on the packet bbs's and here on usenet, you're obviously in need of a severe ass "whoopin" as they say in the south. One day you'll threaten to "show up" at someone's door and they'll not reply, they'll just show up at your house and mop the street with you. You must like living dangerously.

When I lived up north it was easy to find a ground for my rigs through the plumbing pipes, etc. Here in Florida however, almost everything is PVC. Here's my plan: I intend to run transmission line into the house through the wall near the station location. There will be a lightening arrestor in the line from the mast mounted vertical. (ten meter vertical, about twenty feet high, I'm starting slow.) It will be adjacent to the transmission line entrance point, connected to an 8 or 9 ft. ground rod. From the ground buss in the shack, I intend to run a bare ground wire through the line access point out to be connected to the same ground rod used for the lightening arrestor.Any comments or suggestions will be appreciated.

With the manning of the International Space Station has come new activity on the Russian Space Programs VHF downlink frequency, 143.625. NASA has tracking stations on both coasts to talk with the ISS when they pass over these sites. Keep track of the station via a tracking program with the latest kep elements for ISS or the NASA channel and monitor 143.625. You will hear russian language downlink when they pass over. I was able to monitor a horizon to horizon pass at my QTH in the northwest with a discone antenna and my BC230XLT handheld scanner. If you monitor and watch the NASA channel you can get a translation of the conversation. Also listen for Amateur Radio activity starting in the near future on 145.800. Have fun monitoring, Scott, KA7FVV

Being in Florida, the best advice I can add is to set things
up where you can readily DISCONNECT the antenna and and PULL
the ac power physically. Having a good ground is a mixed
blessing if a lightning surge comes in via the power. It'll
jump right thru your gear to get to that nice ground.
Oh, and pull ur telco/modem connection too when a storm is
in the area.

Unlikely that amateur radio activity will start very soon, given the fact
that they complain about the high workload setting up essential systems
right now. Wait until after the next cargo shipment and shuttle visit,
I think.

Thanks Bill,
I intend to house the arrestor fitting in an outside enclosure for access to disconnect when a storm is emminent, which is often enough here. Also, we have a drill to pull telephone lines, TV and other power cords at such times.
Vieques, eh? Keep your head down.
Thanks again and 73. Jim

Lots to see and do.....here are a few features

1. Live DX cluster telnet links - Try them out! - on The DX Page
2. Online DX Logbook - on The DX Page
3. Many station and equipment photos
4. Several photos of Prescott,Arizona USA
5. Post a public link to your site on the Free-For-All Links Page

Plus lots more....including Guestbook,Station Description,3D Art Gallery and
Music Page with free downloads....

Once the station has been set up, such days off are a good moment to
listen. I just doubt that they will spend their time off doing exactly the
same thing (locating cables, finding the place to plug them in) they have
been doing all week long...

I have heard the 2m will NOT be up before the 14th at the earliest, one would imagine it has very much less priority than the mission itself :-).

Welcome to Amateur radio Steve, I have been licensed since 1956, so have seen my share of the old curmudgeons through the years. Ignore them, the only thing they ever accomplished in there life is getting a ticket and want the whole world to bow down to them.

We are glad to have you on the bands and look forward to many enjoyable years of hamming for you.

When I started, we usually ran into them on the air. There was an old fart W2OY that used to call "CQ no kids, no lids no space cadets, no drugstore cowboys, no K calls..."

The only thing changed is that the internet allows those same folks to irritate a larger audience.

After last year's introduction of a masturbation toy by George Lucas (see http://www.landoverbaptist.org/news0899/jar.html), coupled with the introduction of sex candy by Mr. Lucas (see http://www.landoverbaptist.org/news0899/toy.html), no candidate except for George W. Bush would even take a stand on the issue.

Therefore, Ms. Betty Bowers, a member of our chruch and the sister of one of the people who posts here, has endorsed Mr. Bush for president. Before you vote, you owe it to yourself to read her full endorsement at http://www.bettybowers.com/bush.html.

Ranhefer recite your lines before you go to the polls on Wednesday...LOL

I, as a good democrat, believe

a. that Margaret Sanger & Gloria Steinmen are more important to American history than Thomas Jefferson, Robert E. Lee or Thomas Edison.

b. that standardized tests are racist, but racial quotas and set-asides aren't.

c. that homosexual parades displaying drag queens, transvestites and bestiality should be constitutionally protected while manger scenes at Christmas and the 10 Commandments in your classroom should be illegal.

d. that AIDS virus is spread by lack of federal funding and not lifestyle.

e. that global temperatures are less effected by cyclical, documented changed in the earth's climate and more effected by yubbies driving SUVs.

f. that the NRA is bad because it supports certain parts of the Constitution, while the ACLU is good because it supports certain parts of the Constitution.

g. that taxed are too low, but ATM fees are too high.

h. that the military, not corrupt politicians, start wars.

i. that self-esteem is a gift to students from teachers and not something that is individually earned.

j. that hunters don't care about nature, but activist "greens" do.

k. that businesses create oppression and government creates prosperity & jobs.

l. that capital punishment is evil while abortion on demand at any point in pregnancy is good.

m. that gender roles are artificial but being homosexual is natural.

n. that guns in the hands of law-abiding citizens are more of a threat to your safety than nuclear weapon technology in the hands of Chinese communists.

o. that government knows how to raise your children better than you do.

p. that Al Gore invented the internet.

Virtually anyone can be a democrat. Just quit thinking; and then, vote that way.

Al Gore Reasons.

How many times do I have to read messages from hams that send a
"Thank You" addressed to ALL. When one seeks help and
someone takes the time to respond, the least the receiver of
help can do is send a simple individual reply for thanks. After
all-the respondents to this call for help responded one by one.
I have received up to 75 messages in a call for help and sent
individual thanks to each. It was very time consuming, but it
was the right thing to do.

Would you at your wedding, if you were the groom, get up at the
end of the reception and yell out, "Gee, Thanks everyone for the
gifts?"
If you are a T Y P I C A L ham--absolutely.

It is unlikely you will respond to this if you did not even bother to
respond to someone who H E L P E D you.

> I made the decision to start this in Sept and passed the Tech
> exam yesterday and am now putting the time in to learn the
> code

My daughter passed the Tech WITH code when she was 8 years old.
Congratulations, you reached the level of an 8 year old.

Please visit my World Wide Web Site, you have never seen a page like it. You
will see:

1. Access to oldies mp3 (albeit on an irregular basis)
2. Really interesting answering machine messages
3. A blond naked chick with really big knockers
4. A guide to the best ham pages ever.
5. Hear Ted Kennedy really screw up in front of Clinton
6. Actually sounds of Bill Clinton "after the lov'in". 7. The writings of me
and others on ham radio, hear a typical ham contact. 8. The warm side of
K1OIK, hear me speak, see me with famous people. 9. An amazing card game

that will shock others
10. Pictures of me and my family.
11. Did common German's enable the holocaust?
12. See now the future of ham radio.
13. How to pass the A+ Certification

Burt Fisher
A Plus Certified Teacher of video, broadcasting and electronics
Net Plus Certified
Amateur call South Dennis, Ma. (Cape Cod)
K1OIK Bacteria-the only culture most hams have

Your comparison is questionable. An actor who receives an Oscar thanks everyone in the same fashion as the groom in your example, yet it is entirely appropriate.

Recite your liberal lines (below) before going to the polls on Wednesday

I, as a good democrat, believe

a. that Margaret Sanger & Gloria Steinmen are more important to American history than Thomas Jefferson, Robert E. Lee or Thomas Edison.

b. that standardized tests are racist, but racial quotas and set-asides aren't.

c. that homosexual parades displaying drag queens, transvestites and bestiality should be constitutionally protected while manger scenes at Christmas and the 10 Commandments in your classroom should be illegal.

d. that AIDS virus is spread by lack of federal funding and not lifestyle.

e. that global temperatures are less effected by cyclical, documented changed in the earth's climate and more effected by yubbies driving SUVs.

f. that the NRA is bad because it supports certain parts of the Constitution, while the ACLU is good because it supports certain parts of the Constitution.

g. that taxed are too low, but ATM fees are too high.

h. that the military, not corrupt politicians, start wars.

i. that self-esteem is a gift to students from teachers and not something that is individually earned.

j. that hunters don't care about nature, but activist "greens" do.

k. that businesses create oppression and government creates prosperity & jobs.

l. that capital punishment is evil while abortion on demand at any point in pregnancy is good.

m. that gender roles are artificial but being homosexual is natural.

n. that guns in the hands of law-abiding citizens are more of a threat to your safety than nuclear weapon technology in the hands of Chinese communists.

o. that government knows how to raise your children better than you do.

p. that Al Gore invented the internet.

Virtually anyone can be a democrat. Just quit thinking; and then, vote that way.

Al Gore Reasons.

So you just accept at face value statements and assertions given out by
CNN and newspapers as verifiable fact? If so, that makes you among the
most gullible souls on the planet.

I have not, in half a century of electioneering watching seen so much
absolute spin in favor of the left-liberal candidate as has been very
clearly present in this election canpaign. No surprise- the news media
is admittedly over 90% Liberal-Democrat. "Free" it is not.
What is laid out on a Democratic website is not to be taken as gospel
except by those who already believe.

It beats accepting at face value statements and assertions by anonymous email and Usenet spams - which is the origin of the thread here. Since the news sites also have things like video clips of the interviews, there's some additional verification. News agencies *have* passed along misquotes, but at least we have some idea who the author is, and whether they're subject to any kind of accountability for falsehood.

> If so, that makes you among the most gullible souls on the planet.

You'd rather believe anonymous spams? And you call *me* gullible?

Get a service manual for it and go through the transmitter adjustment steps. You'll find that these radios are not always set up at the factory to the exact settings that the manual calls for. They tend to set them up like cookies, in that some come out bigger and some come out smaller.

364. Democrats caught bribing the homeless!

Dem Cig Lady Major DNC, Gore Donor

Wisconsin voters shouldn't inhale.

By Stephen F. Hayes, a writer living in Washington, D.C.

It's a long way from Park Avenue to Wells Street.

But Connie Milstein, who last November held a $25,000 per couple fundraiser for Al Gore in her Park Avenue condominium, found herself among Milwaukee's homeless yesterday, at the Milwaukee Rescue Mission on Wells. Milstein said she was "brought in" to help get out the vote in the crucial state of Wisconsin. And yesterday, she was one of several Democrats with ties to the Gore campaign caught on tape by WISN-TV in Milwaukee, distributing cigarettes to homeless men staying temporarily at the Milwaukee Rescue Mission.

"We've been pretty busy," said Milstein, interviewed on local Milwaukee television, with a chuckle. "Going to the local shelters."

The tape shows the campaign workers standing outside a green SUV, distributing packs of cigarettes from large white plastic bags. Residents of the mission say they took the cigarettes after Gore campaign staffers drove them to Milwaukee's city hall in order to cast absentee ballots for the presidential race in this state where polls show the race dead even.

Milstein's last-minute activities on behalf of the Gore campaign raised eyebrows yesterday, as Wisconsin law is clear that any gift with a value over $1 constitutes bribery.

According FEC reports, it appears as though Milstein was also "busy" with the Gore campaign long before she came to Wisconsin: A Constance Milstein from New York City has contributed more than $600,000 to the Democratic National Committee and Democratic candidates this election cycle. A second Constance Milstein, who lists her hometown as South Hampton, New York, has also given generously to Democrats. And Milstein herself ï¿½ whose family is worth an estimated $5 billion, according to published reports ï¿½ said yesterday she serves as "Chair of the Democratic National Committee's Major Supporters Committee."

"That is a group that I just found out about today," said DNC chairman Joe Andrews, in a conference call with reporters today. And despite Milstein's generosity to Democrats, Andrew insists

she is not a major DNC donor. "She is not a 'heavy hitter' in our Democratic organization," said Andrew.

But last November, Milstein hosted a $25,000 per couple fundraiser in her Park Avenue couple for Gore. That fundraiser, combined with another that day in New York City, was estimated to have raised approximately $1.3 million of the DNC, according to an Associated Press story at the time. It's fair to ask what, exactly, it takes to be a "heavy hitter" with the DNC.

Though he wasn't familiar with the DNC committee Milstein heads and he was unaware of Milstein's activities on their behalf, Andrew says he is able to say with confidence that Milstein had not engaged in any similar activities before. "She was acting on her own," said Andrew. "And these attempts by Republicans to connect this to the DNC and Gore campaign are frankly silly."

But moments after she was caught on videotape distributing the cigarettes, Milstein had a different story for the local television reporter. "I am here representing the Gore and Lieberman campaign and I was asked to get out the vote in Wisconsin," she said.

Milstein today contradicted that characterization of her work, saying in a statement late today that she acted alone. The videotape, however, very clearly shows several people distributing cigarettes from the white bags.

And Pat Vandenburgh, executive director of the Milwaukee Rescue Mission, said in an interview today that "seven campaign workers" were in the lobby of the shelter trying to convince the residents to vote. "It was very evident what they were doing," said Vandenburgh.

Vandenburgh said the employee told them that partisan campaigning was not permitting inside the shelter. The Gore campaign workers then gathered outside to continue their efforts. "They were just sort of loitering in front of the building, and he had to shoo them away from there, too," said Vandenburgh.

"At first the guys weren't overly anxious to go [with the campaign workers]," said Vandenburgh. "But then they began holding up packs of cigarettes." Five of the shelter's residents then followed the campaign workers outside and listened to their proposals.

Asked if the homeless men were persuaded to vote after the offer of the cigarettes, Vandenburgh said, "That's what they told us."

If the Gore campaign's only interest was to get these homeless men to the polls, those efforts were unnecessary. "The Mission does that on its own," said Vandenburgh, explaining that each election cycle the shelter takes steps to notify its residents of

their rights to vote, and even accompanies them to the polls to prove residency.

Overwhelmed by the facts, Andrew and DNC general counsel Joe Sandler gave the "everyone-does-it" defense a try.

"This situation in Wisconsin is a joke compared to the serious and systematic efforts by Republicans to intimidate minority voters across the country," said Sandler. But producing evidence of this "systematic" effort proved difficult. That, of course, didn't stop the Democratic leaders from making the charges.

Though the story probably comes too late to do much national damage, it is getting big play in Wisconsin, which accounts for 11 electoral votes. It will likely be on the 6 and 10 o'clock newscasts on the four major Milwaukee networks, and reporters from throughout the state are following the story carefully.

"Tobacco hooks and eventually kills hundreds of thousands of people, and we shouldn't wait another day until we strengthen protections against it," said Gore last March, after the Supreme Court ruled the FDA can't regulate tobacco.

Another day comes tomorrow, and if Wisconsin goes for Bush, Gore's campaign, ironically, may be killed by tobacco.

You could look at the output of anything you've gotten "not too bad" reports from, and check it on an oscilloscope and use that as a sort of "benchmark" for the output of any other stuff you try before plugging it into the radio. It's all trial and error, Ed, and there will be many different setups with endless combinations of audio gear that will give good results. You might want to take a ride out to Natick and check out the Guitar Center's pro audio department, or maybe the one in Boston...

http://www.guitarcenter.com/cgi-bin/locationZC.cgi

They have all sorts of stuff for taking mic levels up to line levels, but building your own would be more in the spirit of ham radio, eh? There's one circuit on the am website:

http://www.thebizlink.com/am/tech/htm/micamp.htm

I also do audio recording here at home as a hobby, and have picked up various pieces of gear over the years, so I had a lot of stuff lying around for this sort of thing.

Using the subwoofer section might end up being overkill on the low end, but HEY, y'never know what might sound good until you try it!

I've spent many hours sampling my output into a dummy load with all sorts of different audio trials on this and other radios. Lately, I've had a Grundig YB400 with a set of headphones sitting in a handy spot for this kind of thing.

There's a bunch of people that get on 50.400 AM most weekend mornings from around 6am to as late as 9am. They're from all over central and eastern Mass, so it's likely that someone will be able to copy you coming out of Cohasset (if your address is good in the callbook), as long as you're horizontally polarized. You'll probably hear the guys on the Cape as well, but I think they tend to be real early in the morning. There's also some activity on 144.425 AM evenings around 7 to 8pm with pretty much the same people, also horizontally polarized.

Hello Jim:

My advise to you is make sure you connect you grounding system to the main electrical service panel ground as per the National Electrical Code. In addition, use multiple points (several ground rods) all connected in series with your station ground which ultimately connects to your electrical service panel ground as well. My QTH is subject to lightning hits (Ive lost computers, tv's, well pumps, electric g-door openers and the like) and this is the only system Ive found that minimizes damage. Of course, nothing can stop damage from a direct lightning hit however one can try to prevent the resulting damage. Also try visiting www.polyphaser.com and look up the essay on "Multiple Point Grounds".

I hope this helps.

Well, Jeff... I did a crash course on audio amps/Mics/EQ's, last night... I am working on something today...

Gonna use an Op Amp thet I found in the latest issue of Hints & Kinks mounted inside the EQ. Then adjust the levels w/ the Fader knob...

I guess I can build a combiner for the Subwoofer & Front audio in some way, just for kicks...

Oh, THat's what I bought that Osillyscoper for? I guess this would be a good way to learn how to use it...

As for 6 Meter operation... I get on the Yankee SSB net 9:30AM sundays. I have had about 300 contacts around the country so far w/ the Full Wave loop on the truck. I was going to have my full power amp in the truck, this weekend. Had a Bibliography... Oh Appendectomy... No heavy lifting for a while. I have 4 LARGE Gel Cell batteries from a forklift to power the amp. Time for a seperate alternator....

Thanks for all of the advice on Audio...

Message-ID: <8u96orhbj1@nnrp1.deja.com>
Source record: 100447

With the advent of Cabrillo and ARRL automated log checking, it is suddenly tempting to *not* turn away attempted dupes. Rather than consuming time (and busting rhythm on a run) to argue with someone, why not just accept the Q and move on to the next caller?

In fact there might be some arguments (borrowing from DX philosophy) for WFWL.

Maybe you really didn't work them the first time because --

1 -they worked an unheard shadow-station, not you.

You end up "NIL" for the first contact and lose the Q, but get credit for the Q you thought was a dupe. The net is zero points, vs. a net loss if you chased them away.

2 -you worked someone else and busted a similar call.

You lose the first contact with "someone else" but get points for the second contact. Same net as scenario 1.

Or maybe they worked you, but busted your call, and it really *is* a dupe. You get credit for the first contact, and no subtraction for the dupe, which nets you positive points.

Maybe I'm overlooking something, but:

-- If I refuse a dupe, I could lose some points, and might screw up my run because the queue evaporates.
-- If I work a dupe, I won't lose points, and can potentially 'cover' a previous error on my part.

That particular amplifier should never "draw" more than 75 amps at any time, more like 50 in a real world situation. This is assuming the proper drive is used and not exceeded.

:Judge leaked DUI to hide naked truth
: Revealed Bush indiscretion secretly to conceal own streaking incident
: by Paul Sperry
: ---
:
: WASHINGTON -- Long before he was William Childs the Portland,
: Maine, probate judge who anonymously leaked George W. Bush's
: DUI conviction, he was Billy Childs the streaker who ran
: "bare-assed naked" through a Catholic girls' school.
:
: In 1974 -- two years before Bush was pulled over for drunk
: driving in Kennebunkport, Maine -- Childs was involved in his
: own youthful indiscretion just up the coast. He and another
: young Portland man donned ski masks, sneakers and ties -- and
: nothing else -- and streaked through the Catherine McAuley High
: School cafeteria during lunch hour.
:
: A Portland Press Herald photographer got an anonymous tip about
: the prank and snapped an award-winning shot of Childs and buddy
: Paul Doughty in the act. The photo, which even hit the London
: papers -- sans names -- before finding a home in a Chicago
: museum photo display, shows Childs running past a shocked
: schoolgirl, face buried in hands.
:
: Last week, Childs, a Democrat elected two years ago to the
: Portland bench, tipped off local Democrat gadfly Tom Connolly
: to the story of Bush's misdemeanor. Connolly, in turn, tipped
: off the press.
:
: Childs didn't alert the press himself because he didn't want to
: relive his indecent-exposure incident, a former classmate says.
: Locals back then identified Childs as one of the streakers and
: he's been trying to put the incident, well, behind him ever
: since.
:
: "I'm quite sure that's why he passed it along to someone else to
: reveal to the press," Mark Norton told WorldNetDaily in an
: exclusive interview. He and Childs were seniors at Cheverus
: High School, an all-boys Jesuit school in Portland, at the time
: of Childs' streaking incident.
:

: When Childs ran for probate judge, he made oblique reference to
: the incident when asked by local press about embarrassing
: things in his past. "He said he wasn't proud of something he
: did years ago," Norton said.
:
: Childs also runs a law practice specializing in drunk-driving
: cases, or OUIs (operating under the influence) as they say in
: Maine.
:
: "A lot of people around town don't know about it (his
: streaking)," Norton said. "It's not something he really wants
: to advertise to new clients."
:
: Another long-time local, Mike Solomon, who hosts an area radio
: talk show, remembers Childs "running bare-assed naked through
: the school with just a tie on." He agrees that Childs didn't
: want to thrust himself -- and his own embarrassing past -- in
: the national spotlight.
:
: "That's why he passed the story off to Connolly," Solomon said.
: "He couldn't chance being exposed all over again."
:
: Childs replaced his late father, Dana Childs, on the Portland
: probate bench.
:
: "Childs comes from a long line of Democrats. His politics date
:back to the (Sen. Edmund) Muskie era," Solomon said. "He and Connolly are part
:of the Democrat machine in Maine."
:
: Connolly, a liberal lawyer-activist recognized by his beat-up
: cap, is considered by many locals to be more than just
: idiosyncratic.
:
: "He's ready for one of those coats with the long sleeves -- you
: know, the kind that wrap all the way around," Norton said.

There is an old saying that if you point a finger at othes,
you point four at yourself.

You don't actually believe that, do you? It is my understanding that
such records are merely no longer public per court order, but are on file
and available to certain other government agencies. I'm thinking of those
background investigation forms that ask applicants to disclose prior arrests
or convictions regardless of whether they have been sealed or expunged.

For those of you who do not know, Michigan was trying
to make even hams get a special state license in order
to have ham gear.

Plymouth man wins fight for his HAM-radio rights
Volunteers critical in emergencies,many agree

By Sheri Hall / The Detroit News

LIVONIA -- Bill Johnston campaigned this fall for a civil right
that most people don't use: the right to communicate over a HAM radio.

The Plymouth resident monitors bad weather and disasters in his
spare time. He then relays the information to the National Weather
Service or police agencies with his HAM radio.

A bill proposed last month would have required radio-users that
pick up police frequencies -- including HAM radio owners -- to buy a
state-issued permit to carry the radio in a car, or face up to a year
in jail. HAM radio operators must already purchase a license from the
federal government.

"We're all volunteers, and some of us wouldn't be able to afford
another permit," Johnston said. "We feared that the pool of people who
help during an emergency would go down because they were afraid of the
penalties."

Johnston organized Livonia's Amateur Radio Club to lobby against
the law, and in the process won the praise of meteorologists and
emergency management officials who depend on volunteer communicators
in emergencies.

"I must have e-mailed 900 people in southeast Michigan about this
law," Johnston said.

The sponsor of the bill, State Rep. Mike Kowall, R-White Lake,
heard the radio-enthusiasts pleas and agreed to withdraw the bill.

"We wouldn't want to punish people who were obeying the law," he
said. "I'm trying to protect the police and the public, but I don't
want to curtail civil rights in the process."

Kowall said he wrote the bill to prevent criminals from using
radios to escape police.

"The Oakland County Sheriff's Department came to me because they've
been having a lot of problems," he said. "They'd respond to a breaking

and entering, and the perpetrators have been gone before they got there."

Now he's agreed to sit down with HAM radio operators to draft a new bill that punishes only criminals, and not all radio users.

"I think we'll elongate the sentence for anyone caught using a scanner while committing a crime," he said.

Meteorologists and emergency management officials praise Kowall for responding to the Livonia club's campaign. They say the radio volunteers are essential in situations that require a quick response.

"Spotters do quite a bit of public service," said meteorologist Darin Figurskey of the National Weather Service. "Without them, we're not going to know for real what's happening on the ground."

Radar tools identify storm systems, but do not tell meteorologists details about weather conditions, Figurskey said. So the National Weather Service uses the volunteer spotters to relay information to a key station in each county.

The county operators compile reports, then contact a volunteer radio operator at the National Weather Center in White Lake, who notifies the meteorologists of ground conditions.

"These first-hand reports allow us to clarify warnings, decrease the frequency of false alarms and describe storm damage," Figurskey said.

Besides reporting weather problems, HAM radio spotters help police departments communicate during disasters such as plane crashes.

The Livonia Amateur Radio Club is part of the city's emergency-management plan. Members attend training sessions with police officers and firefighters, and keep radio equipment in the basement of the police station for emergency situations.

"They're very active and dedicated to helping communities in a time of need," said Alden Sawyer, Livonia's director of emergency management.

He called in club members to staff police stations on New Year's Eve to monitor problems with the Y2K computer glitch.

Radio enthusiasts say they enjoy dedicating time to the public and helping out in a pinch.

"This is my way of giving back," Johnston said. "It's something I enjoy, and it's a benefit to society."

You can reach Sheri Hall at (734) 354-4047 or at shall@detnews.com.

Livonia Amateur Radio Club
What: An organization dedicated to improving emergency

communication.
Founded: In the 1970s.
Membership: About 45 HAM radio owners.
Meetings: Monthly get-togethers at the Livonia Civic Library to discuss radio issues, learn how to identify bad weather and plan for disaster response.
Public service: Volunteer on Livonia's emergency response team, identify weather conditions for the National Weather Service.
Information: Contact President Bill Johnston at (734) 207-7777 or e-mail bj6957@n8hqg.mi.org.

Police seize scanners tuned in to their pagers
Two city men face several charges after house search

Conal Mullen, Journal Staff Writer
The Edmonton Journal

City police looking for handguns Wednesday found computerized scanning equipment.

It was being used to monitor transmissions from electronic pagers, including those used by the police.

The discovery was made about 6:45 p.m. Wednesday when officers executed a search warrant at a house near 122nd Avenue and 127th Street, said Annette Bidniak, police information officer.

She said they seized a loaded .22-calibre handgun and a dismantled handgun.

She said investigators also seized what they believe to be a couple of grams of methamphetamine, or speed, $16,780 in cash, a Rolex watch and an old city police badge.

She said police also seized five computers with a total of 10 hard drives.

Bidniak said police noticed a program on one of the computer screens that appeared to be monitoring paging transmissions as they occurred.

The program was monitoring several pager frequencies, including those used by police, Bidniak said.

Peter Shokal, 56, of Edmonton, has been charged with possession of an illegal firearm, unsafe storage of ammunition, possessing the proceeds of crime, possession of a narcotic for the purpose of trafficking and two counts of possession of stolen property under $5,000.

Derek Nicolas Campbell, 26, of Edmonton, has been charged with possession of an illegal firearm and unsafe storage of a firearm.

I think it's generally been agreed by most big time operators that
working the dupes, while possibly personally annoying, is the best
result from a CBA point of view (cost/benefit analysis). I gleaned that
from much discussion on the cq-contest reflector and on our local
contest club (SMC) reflector, and considerable personal experience.

The reasons you cited are excellent. We've all thought we worked someone
we actually didn't, and working them the second time concludes the deal.

Technology Advice You Can Trust

Today in News | The Week in News

Your Cell Phone Can Help Find You

Overseas, they're already implementing mobile tracking that will give you location-specific resources.

Rick Perera, IDG News Service
Thursday, November 02, 2000

Jaan Jagomagi sends a brief Short Message Service (SMS) on his mobile phone. A few seconds later, a map appears on the phone's display. It pinpoints his current location, in the center of the Estonian capital city, Tallinn. It's hard to make out details of the map on the small LCD display, but the point is clear: the wireless provider knows exactly where Jagomagi is.

"Location-based" services using that knowledge are on the way, whether you're in Estonia or your own backyard. Using your mobile phone, you'll be able to request lists of nearby hotels, restaurants, or service stations. And it doesn't matter where you are: the results automatically will be based on your current location.

Jagomagi's company, AS Regio, has developed software for this type of Mobile Positioning System (MPS) service. Together with mobile carrier AS Eesti Mobiiltelefon (Estonian Mobile Telephone, or EMT), Regio is launching in November what the companies say is the world's first such commercially available service.

Such capabilities are drawing greater interest as mobile phone and PDA functions blur. For example, service providers envision shooting you, a known aficionado of Chinese food, an e-mail alert via your mobile device letting you know about the highly-rated restaurant just a block away. Of course, the value of Global Positioning System (GPS) capabilities in map software is evident. (See "Map Your Palm for an Urban Safari" and "Palm Helps You Do New York.")

But Who's Watching You Move?
Other uses for the new MPS services include tracking a vehicle's location for fleet management, car anti-theft devices that can find a stolen vehicle, and a map plotter to help two mobile phone users find each other, Jagomagi says.

EMT development and technology director Tonu Grunberg says the company has contracted with the Estonian Rescue Board to pinpoint the location of mobile phone users who dial the 112 emergency number. Estonia is the first country to implement such a technology, he says.

"The accuracy is not very good in rural areas -- 300 to 500 meters -- but in city areas it's quite exact because there are so many base stations," he says.

The technology also has potential uses for law enforcement. Already, Estonian officials have used MPS to locate criminal suspects, says Linnar Viik, IT adviser to the country's prime minister.

"We have had a couple of cases of criminal investigations where a court has admitted it [as evidence] for tracking a mobile phone," Viik says. "In one gun-trading case, a person was located in [the city of] Tartu because he made a mobile call."

Asked if such tracking technology raises potential human rights concerns, Viik says legal safeguards are in place to prevent its abuse. "Not the police, not even the secret service have the right to track. They have to go to a court to get a one-time permission to go to the telephone company" and request location data.

Grunberg also says his company has implemented strict security measures, similar to those in place for online banking. "Only people who want to can be tracked. It's up to each person to decide," he says. That's an issue that's quickly moving from theory to reality for users of mobile devices. (See "Service Offers to Beam Coupons to Your PDA.")

396. Amateur Radio News For Palm Users

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-07 00:00:00 UTC
From: Jeff Davis <n9avg@indy.net>
Message-ID: <k7XN5.17870$3S.561759@nntp3.onemain.com>
Source record: 100474

Visit http://www.callingcq.org and subscribe to the new AvantGO channel, CALLING CQ.

Each time you sync your Palm OS or WinCE device you'll receive the most comprehensive news and information for amateur radio enthusiasts via your handheld device.

Add this channel to your AvantGO list and give it a try. Drop me a note and let me know how it works for you. I would especially appreciate any problem reports during this testing period.

:Edmonton is in Alberta CANADA. Tell me why I care.

There is a growing attitude that anyone who has radios
is dangerous. The US is using Canada to test laws.

:> Saturday 4 November 2000
:>
:> Police seize scanners tuned in to their pagers
:> Two city men face several charges after house search
:>
:>
:> Conal Mullen, Journal Staff Writer
:> The Edmonton Journal
:>
:>
:> City police looking for handguns Wednesday found computerized scanning
:> equipment.
:>
:> It was being used to monitor transmissions from electronic pagers,
:> including those used by the police.
:>
:> The discovery was made about 6:45 p.m. Wednesday when officers
:> executed a search warrant at a house near 122nd Avenue and 127th
:> Street, said Annette Bidniak, police information officer.
:>
:> She said they seized a loaded .22-calibre handgun and a dismantled
:> handgun.
:>
:> She said investigators also seized what they believe to be a couple of
:> grams of methamphetamine, or speed, $16,780 in cash, a Rolex watch and
:> an old city police badge.
:>
:> She said police also seized five computers with a total of 10 hard
:> drives.
:>
:> Bidniak said police noticed a program on one of the computer screens
:> that appeared to be monitoring paging transmissions as they occurred.
:>
:> The program was monitoring several pager frequencies, including those
:> used by police, Bidniak said.
:>
:> Peter Shokal, 56, of Edmonton, has been charged with possession of an
:> illegal firearm, unsafe storage of ammunition, possessing the proceeds
:> of crime, possession of a narcotic for the purpose of trafficking and

:> two counts of possession of stolen property under $5,000.
:>
:> Derek Nicolas Campbell, 26, of Edmonton, has been charged with
:> possession of an illegal firearm and unsafe storage of a firearm.

Well, based on my extensive first hand observation of DUI arrestees, it appears that it cuts fairly proportionately across socioeconomic class and race. DUI, it seems, is an equal opportunity crime. If you've found differently, I suggest that you take a good hard look at the operations of your local law enforcement agency.
Also, rednecks around here tend to be staunchly republican.
Furthermore, as a college professor I've found that a majority of today's college kids are actually moderately conservative and republican, which is also a national trend, and these are often more "mouthy" than the liberal ones.
Pardon me for saying so, but this particular post appears to reflect nothing more than the usual bundle of ignorant stereotypes, half-truths and ill-informed suppositions reflexively wielded by gratuitous bashers on both the left and the right. But I'd be happy to admit my error if you can show me that there is some realistic basis for your opinion.

Thanks. I stand corrected. I was unaware that any state actually did
that. It certainly isn't the norm, and, of course, many of these records
will survive, at least in part, in various national criminal databases and
elsewhere. What state are we referring to?

I hope anybody, who's ordered a Mosley Antenna,
is not expecting fast delivery because, it's not happening.
I ordered a Mini-33 (HF tri-bander) back in June
2000. It's now November and after repeated calls,
I still have yet, to receive it. They just keep "putting
me off". They have gone so far as to give me a UPS
tracking number and a week later, UPS still hasn't
received it. I'm not saying their product is poor, JUST
their PR and the time it takes to receive the product,
STINKS.
Now you've been informed...

1. Turn radio off and disconnect from all power.

2. Place Ohmmeter in LOWEST scale.

3. Measure for DC short from negative (Black) wire of radio to
any pin of mic plug on radio.

4. When you find a 0 (zero) ohm point, that is common.

5. Hook radio back up. Turn on.

6. Take a jumper wire from the ground pin on socket to anyone you wantj
If noise comes out of spkr thats the rx line. If it keys its the
PTT line.

7. While watching the output wattmeter key radio and watch for a upward
kick on meter. Thats the audio line for microphone tx.

8. On the microphone itself you will find the common in it by placing
your ohm meter on a wire and seeing what happens when you key the
button. The audio (mic hot) will be the shielded wire. The shield
may be ground all by itself, or it may be necessary to ground it
also to the common wire of the mic switch.

No John said it like this "CQ 75, CQ 75, CQ AM Phone ONLY...No kids, no
lids, no WA's, no WB's , No Space cadets please".

And just to piss some of you off, he was my HERO.

How am I doing Fred?

: Thanks. I stand corrected. I was unaware that any state actually did
:that. It certainly isn't the norm, and, of course, many of these records
:will survive, at least in part, in various national criminal databases and
:elsewhere. What state are we referring to?
:

:> It depends on the state. In my state these records are destroyed.
:

Indiana, here is the law:
http://www.state.in.us/legislative/ic/code/title35/ar38/ch5.html

IC 35-38-5
Chapter 5. Expungement of Arrest Records

IC 35-38-5-1
Sec. 1. (a) Whenever:
(1) an individual is arrested but no criminal charges are
filed against the individual; or
(2) all criminal charges filed against an individual are
dropped because:
(A) of a mistaken identity;
(B) no offense was in fact committed; or
(C) there was an absence of probable cause;
the individual may petition the court for expungement of the records
related to the arrest.
(b) A petition for expungement of records must be verified and
filed in the court in which the charges were filed, or if no criminal
charges were filed, in a court with criminal jurisdiction in the
county where the arrest occurred. The petition must set forth:
(1) the date of the arrest;
(2) the charge;
(3) the law enforcement agency employing the arresting
officer;
(4) any other known identifying information, such as the name
of the arresting officer, case number, or court cause number;
(5) the date of the petitioner's birth; and
(6) the petitioner's Social Security number.
(c) A copy of the petition shall be served on the law enforcement
agency and the state central repository for records.
(d) Upon receipt of a petition for expungement, the law
enforcement agency shall notify the court of the name and address of
each agency to which any records related to the arrest were forwarded.

The clerk shall immediately send a copy of the petition to each of those agencies. Any agency desiring to oppose the expungement shall file a notice of opposition with the court setting forth reasons for resisting the expungement along with any sworn statements from individuals who represent the agency that explain the reasons for resisting the expungement within thirty (30) days after the petition is filed. A copy of the notice of opposition and copies of any sworn statements shall be served on the petitioner in accordance with the Rules of Trial Procedure. The court shall:
(1) summarily grant the petition;
(2) set the matter for hearing; or
(3) summarily deny the petition, if the court determines that:
(A) the petition is insufficient; or
(B) based on information contained in sworn statements submitted by individuals who represent an agency, the petitioner is not entitled to an expungement of records.
(e) If a notice of opposition is filed and the court does not summarily grant or summarily deny the petition, the court shall set the matter for a hearing.
(f) After a hearing is held under this section, the petition shall be granted unless the court finds:
---
(1) the conditions in subsection (a) have not been met;
(2) the individual has a record of arrests other than minor traffic offenses; or
(3) additional criminal charges are pending against the individual.
As added by P.L.311-1983, SEC.3. Amended by P.L.295-1989, SEC.1; P.L.159-1994, SEC.1.

IC 35-38-5-2
Sec. 2. If the petition for expungement is granted, the law enforcement agency shall within thirty (30) days of receipt of the court order, deliver to the individual or destroy all fingerprints, photographs, or arrest records in their possession.
As added by P.L.311-1983, SEC.3.

IC 35-38-5-3
Sec. 3. Whenever the petition of an individual under section 1 of this chapter is granted, no information concerning the arrest may be placed or retained in any state central repository for criminal history information or in any other alphabetically arranged criminal history information system maintained by a local, regional, or statewide law enforcement agency. However, this chapter does not require any change or alteration in any record (such as a police blotter entry) made at the time of the arrest or in the record of any court in which the criminal charges were filed.
As added by P.L.311-1983, SEC.3.

IC 35-38-5-4
Sec. 4. If a person whose records are expunged brings an action

that might be defended with the contents of such records, the defendant is presumed to have a complete defense to such an action. In order for the plaintiff to recover, he must show that the contents of the expunged records would not exonerate the defendant. The plaintiff may be required to state under oath whether he had records in the criminal justice system and whether those records were expunged. If the plaintiff denies the existence of the records, the defendant may prove their existence in any manner compatible with the law of evidence.
As added by P.L.311-1983, SEC.3.

IC 35-38-5-5
Sec. 5. (a) This section does not apply to a request to a law enforcement agency for the release or inspection of a limited criminal history to a noncriminal justice organization or individual whenever the subject of the request is described in IC 5-2-5-5(a)(8) or IC 5-2-5-5(a)(12).
(b) A person may petition the state police department to limit access to his limited criminal history to criminal justice agencies if more than fifteen (15) years have elapsed since the date the person was discharged from probation, imprisonment, or parole (whichever is later) for the last conviction for a crime.
(c) When a petition is filed under subsection (b), the state police department shall not release limited criminal history to noncriminal justice agencies under IC 5-2-5-5.
As added by P.L.311-1983, SEC.3. Amended by P.L.56-1998, SEC.18; P.L.10-1999, SEC.3.

IC 35-38-5-6
Sec. 6. A law enforcement officer who violates this chapter commits a Class B misdemeanor.
As added by P.L.311-1983, SEC.3.

: to re-coat and renew these pads?

There are both the pad and trace renewal pens available at electronics
parts stores. Chemtronics "Circuitworks" makes both a silver-bearing ink
for trace repair and a rubber keypad repair kit. Check it out at URL:
http://www.chemtronics.com/ and follow the links "Products"
"USA/Canadian Products" then to "Circuitworks" for all sorts of
PC repair solutions. A little expensive unless you're in the
service business, but a very effective and permanent repair.

426. Older RCI2950 RX problem

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-07 00:00:00 UTC
From: n2ogm@aol.com
Message-ID: <3a08772a.2657004@netnews.worldnet.att.net>
Source record: 100504

I have an RCI2950 about 11 years old that seems to have gone deaf. It will respond to very strong signals from a signal generator and I can trace the signal through the RX sections, but not sure what levels should be in various stages. The unit is also quite noisy with and without an antenna connected. The TX is right on the money into a dummy load, power output level, audio quality/ level, and frequency all correct. It will still hold stored frequencies without power applied so I assume the internal battery is good. I've been the only owner and have done no modifications to the radio. It has always worked well in the past and never needed service. Anyone else ever run into this? Thanks.

Chris N2OGM

Would like to trade one Yaesu FT 920 HF + 5-MHZ All Mode Transceiver for
One Yaesu FT 847 All Mode Transceiver.

FT 920 - HF + 6M;100w;AF-DSP;Auto Antenna Tuner; 127 memories;FET RF
Amp;Digital Voice Recorder; Dual Display;Dual VFO;Keyer,MH 31 Hand Mic;
Manual;orignal cartons/packing.

The unit is in new condition. Used for 4 years replaced with Mark V.

I live in Washington state. I don't really want to ship this radio unless I
have no choice. I am open to driving a few hundred miles to swap.

Please respond direct to w7mic@msn.com
Mike w7mic.

Hello Gang

For anyone who is interested, I will be on PSK31 mode at 50.290 USB starting 0100 UTC.
That's 8PM Eastern for those like me who get befuddled by the time change.
Will start out pointing SE from EN81 <Toledo, OH> and move around looking for sigs.

Hope to hear you there!

QSY to 160m and 30m; I don't believe you'd see any changes on those bands. To do well on 160, one has to have expertise in low band antennas, patience, and lots of property; the exam-free licensees probably wouldn't migrate to there. If 30m is kept voice-free, it would still remain a refuge from the masses, too.

You're out of line, Steve. Dan is one of the most even handed people I know. He survived the "kill CW" Luddites that whined and screamed for almost a year here, and his point was aimed at them, not you. Frankly, I think the "HEY WAIT A MINUTE, I THINK I'M OFFENDED" attitude is doing more harm to society in general than anything Dan might have said.

> (and yes I am interested in cw.)

Glad to hear it. That's what Dan and a lot of other people are hoping to hear from newer hams.

I have to complete Syntor X radio's with 32 ch scan heads. I recieved one from a local municipality and another at a hamfest. I connected these to a power supply (connected cable to radio first, then applied power). I can recieve fine, but when I try to transmit I get nothing. I've swapped parts on the two radios and I still can't get either of them to transmit.

Is there any tricks to getting these to transmit? I have them connected to a 50amp Astron power supply, so power should not be a problem. I used a voltmeter and confirmed that the drawer units are getting power.

Thanks,
Peter Gogas, W1AGG

As with everyone here, I too would like to see my
candiate win this Presedential election, but, wanted
even greater is this:

1. One wins the popular vote
2. One wins the electoral vote
3. The losing party challenging the electoral / popular
vote's constitutionality of it all and having it go before
the US supreme court to determine if it is indeed
constitutional.

This would show me and the world just how great
this nation and our people can be when we are
divided on issues affecting all of our lives.

This election will someday include the words,
"at the turn of the century 2000" and I'm hoping
our great, great grandchildren will discuss this
election as the greatest ever.

May the best man win.

Florida law requires a recount when the margin of votes is less than a certain level; one half of one percent, or something like that. It's automatic, no one has to do anything to trigger it.

Currently the margin seems to be about 1800 votes, out of nearly 6 million cast, you do the math.

If you were in this position, what would you do?

What should be troubling to anyone is that there were 17,327 voters in Florida, and 442,169 voters in the U.S. dumb enough to vote for Pat Buchanan.

Since the process is part of the core constitution, and not an amendment, it seems unlikely the Court would rule it unconstitutional. I think the only way it can be changed is by constitutional amendment, and Congress has been loathe to address the issue even though it crops up about every 4 years.

Every following element of this statute fails if there is a conviction.
It is my understanding there was a guilty plea (a conviction), a fine,
and a loss of driving priveleges. Therefore, neither element 1 nor
element 2 could be met, and in Indiana, the record could not be
expunged.

Yes, but if Bush wins Florida, we are at a point in history
we may never again see.

If he does win and I believe he will, the DNC can try for the
House vote on the election. Again, I believe Bush will win,
BUT, it will be up to the DNC again to challenge the electoral
vote and the House vote as unconstiutional.
I do not believe the US Supreme Court will see it as unconstiutional
and will rule it constitutional.

My point here is simple. We may be at a crossroad in US history
and to not walk down that road would result in the loss of a very
valuable chapter begging to be added to our history books.

I don't believe Bush will lose anything if he wins Florida. I
believe history will be lost if the DNC does not follow through
for the sake of history and not as sore losers because Bush
will not lose by either the house vote or the decistion of the
US Supreme Court.

I would love to see it done and to show all Americans and the
world just how good our system works.

Yes I saw that also. And I have had the SAME problem for a while now.
Mine is a 32inch and only a few years old. I have a 20inch job in the
bedroom. 1982 model...NO NOISE at all. Hmmmm.

I tried shielding the TV with tin foil inside. Bypassed the power cord
with .01 caps. Installed Ferit blocks and wound cord. That is the
only thing that helped at all. But not much.

The only thing that works is to turn it off and unplug in. I also
would appreciate any help on this.

Although it blew up a couple months back....I'm in NO HURRY to fix it.

I use a MFJ Noise canceling signal enhancer that can and does null out
the crap.

Wrong! The state law in FL dictates that there be a re-count. This
law was inacted LONG before BUSH AND GORE started running for
President. Hey, don't let the facts get in the way of partisonship
politics!

But surely intelligent adults could *try* distinguishing whether their articles are primarily about radio, or primarily about politics? Yes, there are articles that are fundamentally about the effect of politics on radio and belong in a radio newsgroup - but that's not true for most of the Bush vs. Gore stuff I've seen in the last month.

Yes, that is true. However, if you would have been awake last night, you would have seen that Gore conceeded to Bush long after it was decided that a mandated recount would be required. It was only later, when the numbers got a little tighter, that Gore changed his mind to wait for the recount.

Yes, that is true that FL requires a recount. However, if you would have been awake last night, you would have seen that Gore conceeded to Bush long after it was decided that a mandated recount would be required. It was only later, when the numbers got a even tighter, that Gore changed his mind to wait for the recount.

So, yes, Gore didn't personally challenge the FL vote tallies, but he didn't have to challenge it since the recount was automatic. However, he has challenged the Bush win based on that disputed vote tallie (why else would he change his mind after conceeding).

> no mandate... [snip]

First of all, Richard, there is no so-called "mandate" needed. If Bush wins, he is the President of the United States, with all of the power and authority that involves. And none of that power, or authority, is attenuated by how many votes he recieved.

Second, there is no such thing as a "god squad agenda." The "agenda" you refer to is actually the "political views" of many millions of Americans who happen to call themselves a Republican, regardless of their religious affilation (or lack thereof).

And finally, Gore should have won this election easily. He is the VP in a period of a good economy, with a massive effort over the last few years to stack the vote with a massive number of new minority immigrates. Yet, in the end, he appears to be losing. Prehaps attempts by Democrats to dismiss the political views of Republicans, and Republican themselves, with silly "god squad" nonsense is exactly what cost Democrats this election.

I was up last night and I did watch it...It appears that you didn't.
Gore did conceed but not before the numbers dictated an automatic
recount. As you accurately pointed out, "It was only later, when the
numbers got a even tighter..." As I understand it FL law says that a
recount will occur when the vote is within 1/2 of one percent. The
vote got to about 1/3 of one percent. It was AFTER it became appearant
that the automatic re-count kicked in that Gore withdrew his
condession. You should have had a little more coffee to keep you alert.

You are now admitting that you were incorrect. You originally said
Gore challanged the tally. You are NOW saying the opposite! Make up
your mind!

GORE CHALLENGED NOTHING! He simply withdrew his concession. That was
the proper thing to do! FL was NOT prepared to finalize its election
results.

Since you disagree with me when I said LRod was correct, let's look at what LRod said:

LRod writes: "Since the process is part of the core constitution, and not an
amendment, it seems unlikely the Court would rule it unconstitutional. I think the only way it can be changed is by constitutional amendment, and Congress has been loathe to address the issue even though it crops up about every 4 years."

Now please pick-out what part of LRod's statement that is incorrect. Please be specific.

You seem bound and determined to try and pick a fight with me. You have absolutely no way of knowing whether I was awake last night or not. In any event, it is utterly immaterial to this thread, since a "concession" is cosmetic only, and does not have the force of law.

More importantly, my post was in response to a comment that suggested that it "appeared" that there was going to be a request for a recount, and I, if you will read the above paragraph, stated that Florida law requires it automatically in this instance and that a "request" is redundant.

> ...you would have seen that Gore conceeded to Bush long after it was
> decided that a mandated recount would be required.

Immaterial.

> It was only later, when the numbers got a little tighter, that Gore
> changed his mind to wait for the recount.

Immaterial.

Net result: your post was (as is usually the case) an utter waste of time. May I suggest you go into RO (that's Read Only) mode whenever you read my stuff.

Now I know you like to have the last word, so if you find it impossible to stay in RO mode, go ahead and make some comment. I'm done with you in this thread.

Duuuuuu, lets see now....The previous boss ridiculed the military and
said he loathed it. He made high ranking General officers into busboys
at White House gatherings.

Was insulted IN MASS by Vietnam Veterans at the Memorial. He put on
a Show at Normandy that a child could see through. He deployed US
COMBAT troops to dangerous area's of the world to act as police and
meals on wheels. And because the Navy couldn't afford to float all it
needed the US Cole was blasted by a terrorist in a known terrorist
port. Etc. Etc.

All this while Gore was hanging around with his head in his hands.
I would say they will likely be for Bush.

Ain't the 1st ammendment wonderful guys and gals??

I don't completely follow you. The constitution makes no provision for
electing a president
by popular vote. The popular vote is really meaningless. In order to
become president you
must be elected by the states, by their electors. The only time the House
of Representatives
would even enter the equation is if no candidate received a majority of the
electoral votes.
With only two candidates receiving electoral votes, that means it would have
to be 269-269.
The DNC certainly has nothing to do with it...

> I do not believe the US Supreme Court will see it as unconstiutional

>Now, if enough people chipped in and built their own private road... a sort
of cooperative or private turnpike..

I ran into one of those in the Poconos, PA. They had a toll booth at each
end and collected 25ï¿½ from each car. My first impression was that that was
illegal but apparently it's not.

Why don't you let the CANADIANS worry about what their civil liberties entail and how their laws are enforced in Canada; and confine your worries to domestic U.S. legal issues. They don't have to follow your ideas of what our Fourth Amendment provides. I'd ask that they do the same where a search and seizure issue in the U.S. were concerned.

Unless you can provide us with a verifiable example of where the
United States government is utilizing the Canadian government to "test'
(whatever that means) laws, this will have to be regarded as one of the more
abysmally ignorant remarks recently made in this news group.

Particularly since there are a number of radio receivers that Canadians
can buy new that would be illegal in the USA, while I don't know of any
receivers that are legal in the USA but not Canada. Just who has the
more restrictive laws?

Sorry, but my wife and I both remember it very differently. It was somewhere around one in the morning when most of the networks were already saying that a recount would probably be required (the vote was already that close - less than a one percent difference).

A little after two, the networks declared Bush the winner with 96.5 percent of the votes counted and about a 17,000 vote difference (which was under the amount needed for an automatic recount).

About a half hour later, Gore called Bush to conceed At that time, the vote count difference was less then 6,000 votes (which was again under the amount needed for an automatic recount).

Gore then withdrew that concession about an hour after that.

No, but are you suggesting that politics never be discussed in these ham radio newsgroups, or is it just politics that your disagree with?

Look, nobody is forcing you to read this thread. There are plenty of other threads in this newsgroup that discuss ham radio topics. If you didn't want to read about this subject, you were free to scroll right on past and talk about ham radio in those other threads to your heart's content.

Instead, you stopped on this thread, clicked on messages in this thread, read the messages in this thread, and then replied to one of those messages. All of these things were something you yourself decided to do. And now you want to complain about what you decided to do.

If you don't want to read about politics in this newsgroup, then make a decision to not read messages about politics and stick to that decision. If you can't stick to that decision, then don't complain to me about your lack of control when it comes to the decisions in your life. :-)

I don't know how this applies to that type of situation (or even if the law is similar there) but in order for a sign (say a stop sign) on private property in my old hometown to be legally enforceable it must have a city decal on it. Not sure about the process to get said decal, but there was a mechanism and some sort of legal precedent in place.

Glad you mentioned that, Jim. Actually, I have seen the ballots in question on the television a few times. Pat's name is sandwitched between Gore and Bush on the form (staggered left and right on the form, with circles going down the middle to punch for each candidate).

The thing that immediately struck me was the fact that there is no reason to assume that any more of Gore's voters made a mistake on the form than Pat's voters or Bush's voters. In other words, the claim by the Democrats that it was primarily Gore's voters that made a mistake on the form seems to suggest that they think Gore's voters are more mistake prone than the other two groups.

Actually, to be perfectly honest, my first thought was to wonder how anyone could have made a mistake on that form. There are large arrows (larger than the candidates name) in each name block pointing to the circle that is supposed to be punched for that named candidate. My wife and I have only seen the form flashed on the television screen for a few seconds and we were both able to easily figure it out (and we didn't have minutes in a voting booth to study it).

No, I think this whole voting form thing is a little silly. Yes, Pat did well in that area, but he has always done better in some areas than others (based on the makeup of voters in specific areas). And there is nothing to suggest that his vote count in this geographical area was out

of line with other vote counts he received in other pockets of the country.

The Democrat who designed that ballot should have realized that the
average Democrat can't read. :-) They published that ballot far ahead
of time, as they are required to do, and nobody complained.

Perhaps that's true on average. On the other hand, Canada doesn't
have any laws making it illegal to sell radios that happen to be able
to listen to certain frequencies in the 800 to 900 MHz band. (See - this
article *does* have something to do with radio).

>Canadians are, by and large, fine people. But just ask any of them how
>much they love their government, and you'll get an earfull!

That's certainly true. And, from what I read on Usenet at least,
you'd get about the same response from most Americans about their
government. At least Canadians have more political parties to
complain about.

It makes much more sense for the police to switch to encrypted communications, or at least something more difficult to receive than FM voice and standard pager data protocols. And, in fact, that seems to be happening.

And if you are waiting for any of the God Squad agenda to be enacted, don't stand on one leg.
Bush has no mandate, the Senate may well be 50-50 so more attention will center on Jesse Helms and Strom Thurmond's pulse rates than anything else (both NC and SC have Democrats for governors) and the House poobahs behind the comic-opera impeachment lost their lunch.
When Alan Greenspan informs the Congress they can have a tax cut if they don't mind 12% home mortgages that idea will go down the old crapper.

It will be about May before Congress finds the men's room.

I guess Canada likes the idea of the police busting into someone's
house and conducting a fishing expedition, too.

The "useful idiots" allways act as cheerleaders for the police state
until what comes around goes around.

The ends DON'T justify the means.

If I'm not mistaken (I might be), I believe that this was tried in one of the western states (Arizona?) a decade or two ago. The idea didn't fly with officials who declared that state speed limit laws applied to this private road as well, since it was for public transit and not for sport (race car) purposes. I vaguely recall this, can anybody verify?

507. Anyone solved the RCA TV power supply noise problem?

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-08 00:00:00 UTC
From: Floyd Sense <sentek@sprintmail.com>
Message-ID: <vsdO5.31800$Pw6.2460177@newsread1.prod.itd.earthlink.net>
Source record: 100533

I've been hunting down a white noise problem that raises the background noise level on 20 and 17 meters to S7 or so. An item that appeared in Technical Correspondence of the December QST mentioned a noise problem from the switching power supply in an RCA TV. I unplugged my 4 week old RCA and sure enough that is the source of the problem. I've been able to reduce the noise somewhat by putting split ferrite cores on the AC cord and a couple of other interconnect cables on the TV - it seems that most of the noise is being radiated by the AC cord. The cores I used are advertised as being effective above 30 MHz, and I wonder if a different permeability core might be more effective. Anyway, has anyone else tackled this problem and resolved it? The guy who wrote the letter to QST was unable to get any resolution from RCA service. There appears to be no shielding whatever on the TV power supply, so the problem might not be fixable. Any ideas?

I think the cops should be glad to know that they have a "regular
audience"
around here scaaners are fairly popular ,and its a good way to get to
know what is going on it town.

We have sunk to a new low in the USA if they are afraid of us
listeneing in.
Actually, it really promotes public respect for the cops when one comes
to learn
of all the crap, and baby-sittting, and stupidness they have to put up
with each day.

Domestics, speeders, baggy pants- earing kids dealing drugs, nut cases,
escapees, people driving off
without paying for gas, cows on the loose in the road, neighboors having
conflict, etc
Same sh_t each day. Weekends are the real fun times, especially when
some unprononuncable
gets pulled over with an international driver license!

Chris,

I am working on an RCI2950 that has been hit with reverse voltage (it
is not my radio).

Do you have a schematic you could e-mail me as an e-mail attachement?
This would save me haveing to buy a service manual.
Then if I get it fixed I could make some Receiver measurements.

Thanks in advance, my friend.

Very 73,

George V73GT

PS. If it has protection diodes in the front end or an FET you could
check those. Also make sure that there is enough injection from the LO
into the mixer.

I can also be reached at v73gt@yahoo.com

In a mobile installation, one of these other leads would go to the ignition circuit, so that the radio will only work if the vehicle's motor is running (or the key is turned to the aux position). There's sometimes a monitor switch on the "hang-up box" and these radios can also determine if the mic is still hung on the box - and won't transmit if it is.

Peter, you do have a syntor X radio as they did come with 32 channel
scan heads you must
have the switched power leads not connected to the power supply as it
takes more than hooking
up the 10-12 gauge red wire to get the radio working it does have a
switched power leads
made of 16-18 gauge wire with a fuse or fuses on them look for a orange
and green wire
that maybe near the control head end of main harness and double check
for power hook-up
be sure they are loose for power as I can't remember on the X's the
color of switched
wires going of memory here but there is switched power leads that do
need to have 12vdc +
applied to have radio RX and TX.

That's what the Democrats are counting on, why do you think they court every form of low-life in the country, get them all reliant upon liberal entitlement programs, then tell them the money stops unless their guy gets elected. Then they round them all up and pay them to go down and vote for their candidates come election time. Hell, one wealthy Democrat was caught in Florida trying to bribe the homeless to go and vote for Gore by offering them cigarettes and booze- but of course this barely made a blip on the media screens. Typical...

After all, if we didn't let the "dumb-$hit democrats" vote, they would loose over half of their voter base...

Dwight,

I have to agree with you. I saw the ballot on CNBC long enough to study it, and while it <<could>> be confusing, it still could be deciphered with just a little study. I don't think that if I had been voting in Fla, it would've flummoxed me. I ain't so smart, but it would seem that Mr. Average Citizen could figure it out.

Now we have outsiders rushing down to Fla to "help" when they should keep out and mind their own beeswax (as my daughter used to say). Seems to me the ones raising a stink are the ones who only will be satisfied if the recount goes "their" way.

Dan,

I have to agree with most of what you say below. For that reason, and my own ties to the military, I would have to at least HOPE active duty people wouldn't go for Gore. To be sure, I am a conservative voter, but contrary to what left winger would say, it came about because of what I SAW during my 53 years on earth! I don't necessarily vote Republican tickets, but generally, it is because of the way I have seen things happen that I often do.

1. We got in the heat of Viet Nam under Johnson. It was actually under Isenhour that we started sending "advisors". I have the utmost respect for John Kennedy, and I think that, if he'd had a second term, Viet Nam would taken a different course. That's my own opinion.

2. Nixon (I think) was the one who ordered the bombing of the North and the mining of Haiphong harbor. Was he crooked? He went down in flames, however.

3. When the Cambodians captured the Mayaguez (sic), President Ford did not blink; he sent the Marines and the Navy to recapture it. I sat up til the wee hours listening to the reports. Comparing that to the capture of the USS Pueblo under Johnson, I could not help but conclude, at my young age of 18 (1968, wasn't it) that Johnson was afraid of his own shadow!

4. When Carter was in, he canceled several defense plans as well as certain aircraft. As our military shrank, quality suffered, the Iranians felt they could get away with occupying our embassy and holding our diplomatic staff hostage. He sent a "rescue" mission of undermaintained equipment, undertrained people which ended up an embarrassing failure in the desert. For the first time in my life, I saw 20% mortgages and unheard of inflation.

4. Under Reagan, I saw mortgages come down to reasonable levels, I was able to purchase my first home, and inflation was tamed. I watched as his administration re-armed and re-equipped the military so that such fiascos as in the Iranian desert wouldn't happen. I watched him go toe-to-toe with the Russian Bear and refuse to be intimidated by the communist bloc. While our deficit DID rise, the utlimate effect as regards the Russians was, we outspent them into oblivion, wrecking their ability to keep up in the arms race. The "Iron Curtain" came down after Mr. Reagan said on TV, "Mr Gorbachev, tear down that WALL!". Sure, it wasn't all his doing, but we DID witness these things and a pride in America that hadn't been seen in many years. What good would Johnson's "Great Society" be if we were defeated and had no country to defend any-

more?

5. Again, under Bush Sr, we found ourselves at war, which was prosecuted with efficiency and concluded as rapidly as possible along with our allies. The objective was identified, the means assembled, the mandate was clear. The war was prosecuted and concluded rapidly. Thanks to the groundwork laid by his predecessor, our military was more than adequate, possessed of the latest technology, the morale and will to win was high both within the ranks and at home. None of this wheedling, hem-haw hesitation so present during previous democratic administrations.

6. Finally, we've had Clinton for 8 years, undoubtedly the most left-leaning(?) and unprincipled presidents in history. He visited the Soviet Union as a young man, never served in the military, had a history of moral indescretions going back many years. He championed the open acceptance of homosexuals within the ranks of the services, and had to backpedal on that. It, at least in part, caused the "early" retirement of senior generals who successfully led Desert Storm. Military morale and readiness have suffered due to his so-called "leadership". Constant assaults on personal rights and freedoms continue unabated in favor of "redistribution of wealth"--a tenet of socialists--thru taxes and legislation designed to remove guns from the law-abiding citizenry completely clueless to the fact that criminals will STILL have guns because laws don't have much effect on crime---it just sounds good in rhetoric and looks good on paper.

Finally, we have Mr. Gore, who would continue these policies, and perhaps, would attempt to move ever closer to BIG government, MORE redistribution of wealth, restrictive regulations on corporations that reduce their ability to generate capital, and more "giveaway" programs (Like Johnson) that don't work, but buy a lot of votes from people who want something for nothing rather than working to produce their OWN success. Socialists, like Clinton/Gore believe that all the answers lie in centralized control of business, government, and the lives of individuals because they believe that, in spite of the miserable failures of socialism in the past, THEY are the ones who are so superior, so gifted, so anointed that THEY are the ones to control, almost believing themselves cloaked in the Devine Right of Kings. They believe that THEY can make socialism work.

NO system, no president, no congress is perfect. But the least hint of socialistic principles scares me to death. I do NOT want BIG government in my life. I do NOT want my hard-earned paycheck "redistributed" thru taxes to someone who buys steak for their dog with food stamps. I do NOT want, nor will I willingly give up my firearms to, socialistic ideals.

That's why I have my fingers crossed that Gore is defeated. That is what I believe, they're my own opinions, and you can trash them all you like!

73 All,

Jerry

The VHF ground stations in the US are at Wallops Island VA, White Sands NM,
and Dryden CA (near Edwards Air Force Base).

519. Florida Voters Crying "UNFAIR!"

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-09 00:00:00 UTC
From: Anonymous <anonymous@anonymous.anonymous>
Message-ID: <3a0b6108_4@anonymous>
Source record: 100290

Golleee....whine, cry, whine! "I punched two slots on my ballot instead of one and I wanna do it over."
Garsh! Last Tuesday I punched in the wrong number on my lottery ticket by mistake. It's not fair! I want to do it over so I can get some of the lottery money!

If these dimwits punched two slots, they should have corrected it BEFORE they dropped the card in the locked box. How stupid is this?? How many of these voters are Democrats? It shows a lot of stupidity. 4 years ago the same county did this times 15,000, but since Clinton was leading they didn't care then. Throw the votes out and be done with it. Maybe next time these idiots will learn their lesson.

It is OK when this works for the Democrats but they cry when it goes the other way. The law says to toss these illegal ballots out and while Democrats are used to voting twice they are not smart enough to figure out not to do it on the same ballot.

It seems probable to me that almost all of those protesters actually
managed to figure out the ballot and vote for Gore and now are just
blowing smoke.

Actually, unless it has changed in the last ten years or so, Int. Driver's Licenses are not valid (at least in Okla., where I live) I am a former police/911 dispatcher and at the time I was on the job, IDLs were not acceptable. The driver's home country OLN was (usually) acceptable, but a IDL by itself would result in a ticket and possible vehicle impound. This is a university town, and we saw a lot of foreign licenses, so each officer and dispatcher had a list of acceptable/not-acceptable licenses. The so-called "International" Driver's Licenses are generally accepted in Europe and (maybe) South America, to the best of my knowledge (which, I admit, may be out of date).

Heck, even Americans can get IDL's, what fun since the State DMV can't
suspend or revoke the license....

How about we all just monitor the Frequency and then when we hear something we post it instead of arguing about when the best time to listen is. You listen when you can!

It is only useful to listen when the station is both above your horizon and
visible to one of the wellknown groundstations. When it isn't, it simply
won't transmit.

I can hear the station before it becomes visible to the Soviet stations,
and I can hear them switch on right at the moment when the groundstation
knows (from their orbit calculations) they become in range, and call them.

You're paranoid, LRod. Nobody is trying to pick a fight with you.
And I simply don't see how an innocent comment about your sleep status
last night would cause you to think otherwise.

> Net result: your post was (as is
> usually the case) an utter waste of
> time. May I suggest you go into RO
> (that's Read Only) mode whenever you
> read my stuff.

Sir, exactly because I don't want to make any of this personal, I
seldom pay that much attention to the name of the person I'm responding
to (unless I know the person - I've talked to them many times before).
Instead, I simply add my own opinion to the opinions I read in these
newsgroups. So, to be honest, I did not even remember who you were (or
that I have talked to your before) until you posted the comment below.

> Now I know you like to have the last
> word, so if you find it impossible
> to stay in RO mode, go ahead and
> make some comment. [snip]

And this is what reminded me of my past discussions with you. As I
recall, you have made this comment (about how I like to get the last
word) once or twice before. And on those occasions, I allowed you to
have the last word since it seemed to bother you so much that I might
have it instead. However, as you can clearly see, that is not going to
be the case forever.

Again, I'm not trying to pick a fight with you, nor am I trying to
single out your messages for comment. In fact, I don't even understand
how you would think that I trying to do either of those. This is an
open discussion area, my friend. Once you post a comment here, anybody,
and everybody, is free to respond to it.

And, whether you like it or not, that also happens to include me. If
you're not comfortable with my response, then you're totally free to

ignore it (just like I've ignored your comment about the last word before). However, if it is the concept of an open discussion that you're not comfortable with, then you're posting your comments in the wrong place.

He might enjoy a book titled "200 Meters and Down", published by:

ARRL
225 Main Street
Newington, CT 06111

It is a historical account of the early days of Amateur Radio, and
includes very interesting material about the "public service" roots of
the hobby, including radio support of the early-1900's polar
expeditions, etc.

Regards,

Hans

Somehow the media is overlooking the fact that this was how Clinton
made it in '92- because of Perot drawing 19 million votes from Bush Sr.

k0hb@my-deja.com has sent you this article from www.BushOnCrack.com

BALLOT BOX DISCOVERED IN FLORIDA CHURCH

By GYM JONES

MIAMI, FL • It was determined by state of Florida election officials that a ballot box discovered Wednesday morning in a local church by an employee was in fact full of supplies, and not uncounted votes as was initially surmised. "Many times election workers will store supplies such as signs, telephones, or pens in boxes designated as ballot boxes. These boxes are then picked up the day following the election," explained elections supervisor BJ Hsub.

During the day Wednesday, several other such boxes appeared across central and southern Florida, where the population leans Democrat. At a press conference, Jeb Bush, brother of George W. Bush, tried to ease voter concerns. "Once again, I would like to assure the American public that these boxes contain only supplies, and perhaps remnants of election workers lunches," he said. "All of the boxes that contain actual votes have either been accounted for, or hidden under my mattress along side my porno mags, or doused with gasoline and then ignited. In some cases, we have even taken the Gore ballots and launched them into space." Responding to questions that some Florida ballots were confusing and caused voters to mistakenly select Pat Buchanan instead of Gore, Jeb Bush replied, " Yes, that
was intentional." Bush also revealed a plan to create false absentee ballots with phony postmarks.

I remember an election where the ballot was crowded and confusing, and I later realized after discussing it with others, that I had voted a candidate contrary to my intentions. For some reason it never occurred to me to blame the opposition party nor the ballot makers. I just thought that I had made a mistake in interpreting what was in front of me. Silly me.

Seems like an appropriate time to rerun this:

HOT AIR

A woman in a hot air balloon realized she was lost. She lowered altitude and spotted a man below. She descended a bit more and shouted, "Excuse me, can you help me? I promised a friend I would meet him an hour ago, but I don't know where I am."

The man consulted his GPS and replied, "You're are in a hot air balloon approximately 30 feet above a ground elevation of 2346 feet above sea level. You are 31 degrees, 14.97 minutes north latitude and 100 degrees, 49.09 minutes west longitude."

"You must be a Republican," said the balloonist.
"I am," replied the man. "How did you know?"

"Well," answered the balloonist, "everything you told me is technically correct, but I have no idea what to make of your information, and the fact is I am still lost. Frankly, you've not been much help so far."

The man responded, "You must be a Democrat."
"I am," replied the balloonist, "but how did you know?"

"Well," said the man, "you don't know where you are or where you are going. You have risen to where you are due to a large quantity of hot air. You made a promise which you have no idea how to keep, and you

expect me to solve your problem. The fact is you are in exactly the same position you were in before we met just minutes ago, but now, it's somehow my fault."

Like this guy, another idiot who wants to blame someone/something else for his stupidity/laziness/inability to follow directions..

``It was virtually impossible to know who you voted for,'''' said Mark Hirsch, a 30-year-old business executive who voted for
Green Party candidate Ralph Nader.

Subject: $6 Deal=20

Date: 10-01-2000=20

Poster: Railsplitter

Message=20

A while back, I was browsing these newsgroups, just like you are now,=20

and came across an article similar to this that said you could make=20

thousands of CASH within weeks with only an initial investment of=20

$6.00 plus stamps! So I thought, "Yeah, right, this must be a scam!"=20

But like most of us I was curious and kept reading. It said that if=20

you send $1.00 to each of the 6 names and addresses listed in the=20

article, you could make thousands in a very short period of time. You=20

then place your own name and address at the bottom of the list at #6,=20

and post the article to at least 300 newsgroups. (There are about=20

32,000 of them out there and that's quite a large market pool). No=20

catch, that was it. Even though the investment was a measly $6, I had=20

three questions that needed to be answered before I could get involved=20

in this sort of thing.=20

1. IS THIS REALLY LEGAL?=20

I called a lawyer first. The lawyer was a little sceptical that I would=20

actually make any CASH but he said it WAS LEGAL if I wanted to try it.=20
I told him it sounded a lot like a chain letter but the details of the=20
system (SEE BELOW) actually made it a legitimate legal business.=20
2. IS OK WITH THE POST OFFICE OR IS IT MAIL FRAUD? I called them:=20
1-800-725-2161 and they confirmed THIS IS ABSOLUTELY LEGAL! (See 18,=20
h sections1302 NS 1341 of Postal Lottery Laws). This clarifies the=20
program of collecting names and addresses for a mailing list.=20
3. IS IT RIGHT? Well, everyone who sends me a buck has a good chance of=20
getting A LOT of CASH ... a much better chance than buying a lottery=20
ticket!!!=20
So, having these questions answered, I invested EXACTLY $7.92 ... six=20
$1.00 bills and six 32 cent postage stamps ... and boy am I glad I did!=20
Within 7 days, I started getting CASH in the mail! I was shocked! I=20
figured it would end soon and didn't give it another thought. But the=20
CASH continued coming in. In my first week I made between $20 to $30.=20
By the end of the second week I had a made a total of $1,000.00. In the=20
third week I had over $10,000.00 and it was still growing. This is now=20
my fourth week and I have made a total of just over $42,000 and it's=20
still coming in ..... It's certainly worth $6.00 and 6 stamps !!!=20
Also, make sure you print a copy of this article NOW, so you can get=20
the information off of it as you need it. I promise you that if you=20
follow the directions exactly, that you will start making more CASH=20
than you thought possible by doing something so easy!=20
Suggestion: Read this entire message carefully! (print it out or=20
download it.) Follow the simple directions and watch the CASH come in!=20
It's easy. It's legal. And your investment is only $6.00 (plus postage)=20
IMPORTANT: This is NOT a rip-off; it is NOT indecent; it is NOT=20
illegal; and it is virtually no risk - it really works!!!! If all of=20
the following instructions are adhered to, you will receive=20
extraordinary dividends.=20
PLEASE NOTE:=20

Please follow these directions EXACTLY, and $50,000 or more can be=20
yours in 20 to 60 days. This program remains successful because of the=20
honesty and integrity of the participants. Please continue its success=20
by carefully adhering to the instructions. You will now become part of=20
the Mail Order business. In this business your product is not solid and=20
tangible, it's a service. You are in the business of developing Mailing=20
Lists. Many large corporations are happy to pay big bucks for quality=20
lists. However, the CASH made from the mailing lists is secondary to=20
the income which is made from people like you and me asking to be=20
included in that list.=20
Here are the 4 easy steps to success:=20
STEP 1: Get 6 separate pieces of paper and write the following on each=20
piece of paper "PLEASE PUT ME ON YOUR MAILING LIST." Now get 6 US $1.00=20
bills and place ONE inside EACH of the 6 pieces of paper so the bill=20
will not be seen through the envelope (to prevent thievery). Place one=20
paper in each of the 6 envelopes and seal them. You should now have 6=20
sealed envelopes, each with a piece of paper stating the above phrase,=20
your name and address, and a $1.00 bill. What you are doing is creating=20
a service. THIS IS ABSOLUTELY LEGAL! You are requesting a legitimate=20
service and you are paying for it! Like most of us I was a little=20
skeptical and a little worried about the legal aspects of it all. So I
checked it out with the U.S. Post Office (1-800-725-2161) and they
confirmed that it is indeed legal! Mail the 6 envelopes to the
following addresses:
#1) M. Weber=20
801 Oaklands Dr=20
Round Rock, TX 78681=20
#2) S. Patti=20
1808 Ponderosa St.
Cocoa, Fl.,32926
#3) Gill=20

58 Moross

Mt. Clemens Mi. 48043=20

#4) Ryan Dick

7603 Canyon Dr.

Meridian, ID 83642

#5) Y.S.

2702 A Jenner Dr.

Baltimore, MD 21209

#6) D. Sims

905 Burning Bush Drive

Loganville, GA 30052

step 2: Now take the #1 name off the list that you see above, move the =
other=20

names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR Name as number =
6 on=20

the list.

STEP 3: Change anything you need to, but try to keep this article as=20

close to original as possible. Now, post your amended article to at=20

least 300 newsgroups. (I think there are close to 32,000 groups) All=20

you need is 300, but remember, the more you post, the more CASH you=20

make! This is perfectly legal! If you have any doubts, refer to 18=20

Sec. 1302 & 1341 of the Postal lottery laws. Keep a copy of these=20

steps for yourself and, whenever you need CASH, you can use it again,=20

and again.=20

PLEASE REMEMBER that this program remains successful because of the=20

honesty and integrity of the participants and by their carefully=20

adhering to the directions. Look at it this way. If you are a person=20

of integrity, the program will continue and the CASH that so many=20

others have received will come your way.=20

NOTE: You may want to retain every name and address sent to you,=20

either on a computer or hard copy and keep the notes people send you.=20

This VERIFIES that you are truly providing a service. (Also, it might=20
be a good idea to wrap the $1 bill in dark paper to reduce the risk of=20
mail theft.) So, as each post is downloaded and the directions=20
carefully followed, six members will be reimbursed for their=20
participation as a List Developer with one dollar each. Your name will=20
move up the list geometrically so that when your name reaches the #1=20
position you will be receiving thousands of CASH in CASH!!! What an=20
opportunity for only $6.00 ($1.00 for each of the first six people=20
listed above) Send it now, add your own name to the list and you're in=20
business!=20
---DIRECTIONS ----- FOR HOW TO POST TO NEWSGROUPS=20
Step 1) You do not need to re-type this entire letter to do your own=20
posting. Simply put your cursor at the beginning of this letter and=20
drag your cursor to the bottom of this letter, and select 'copy' from=20
the edit menu. This will copy the entire letter into the computer's=20
memory.=20
Step 2) Open a blank 'notepad' file and place your cursor at the top=20
of the blank page. From the 'edit' menu select 'paste'. This will paste=20
a copy of the letter into notepad so that you can add your name to the=20
list.=20
Step 3) Save your new notepad file as a .txt file. If you want to do=20
your postings in different settings, you'll always have this file to=20
go back to.=20
Step 4) Use Netscape or Internet explorer and try searching for=20
various newsgroups (on-line forums, message boards, chat sites,=20
discussions.)=20
Step 5) Visit these message boards and post this article as a new=20
message by highlighting the text of this letter and selecting paste=20
from the edit menu. Fill in the Subject, this will be the header=20
that everyone sees as they scroll through the list of postings in a=20
particular group, click the post message button.=20

You're done with your first one! Congratulations...THAT'S IT! All you=20
have to do is jump to different newsgroups and post away, after you=20
get the hang of it, it will take about 30 seconds for each newsgroup!=20
**REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE=20
MORE CASH YOU WILL MAKE!! BUT YOU HAVE TO POST A=20
minimum of 300**
That's it! You will begin receiving CASH from around the world within=20
days! You may eventually want to rent a P.O.Box due to the large=20
amount of mail you will receive. If you wish to stay anonymous, you=20
can invent a name to use, as long as the postman will deliver it.=20
JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.=20
Now the WHY part:=20
Out of 300 postings, say I receive only 7 replies (a very low example).=20
So then I made $7.00 with my name at #6 on the letter. Now, each of the=20
7 persons who just sent me $1.00 make the MINIMUM 300 postings, each=20
with my name at #5 and only 7 persons respond to each of the 7 original=20
7, that is another $49.00 for me, now those 49 each make 300 MINIMUM=20
posts with my name at #4 and only 7 replies each, I will bring in an=20
additional $343.00! Now, those 343 persons turn around and post the=20
MINIMUM 300 with my name at #3 and only receive 7 replies each, I will=20
make an additional $2401.00! OK, now here is the fun part, each of=20
those 2401 persons post a MINIMUM 300 letters with my name at #2 and=20
they each only receive 7 replies, that just made me $16,807.00!!!=20
Those 16807 persons will all deliver this message to 300 newsgroups=20
with my name at #1 and if still 7 persons per 300 Newsgroups react I=20
will receive $117,649.00! With an original investment of only $6.00!=20
And some stamps. AMAZING! When your name is no longer on the list, you=20
just take the latest posting in the newsgroups, and send out another=20
$6.00 to names on the list, putting your name at number 6 again. And=20
start posting again. The thing to remember is: do you realize that=20
thousands of people all over the world are joining the internet and=20

reading these articles everyday? JUST LIKE YOU are now!! So, can you=20
afford $6.00 and see if it really works?? I think so...=20
People have said, "what if the plan is played out and no one sends you=20
the CASH? So what! What are the chances of that happening when there=20
are tons of new honest users and new honest people who are joining the=20
internet and newsgroups everyday and are willing to give it a try?=20
Estimates are at 20,000 to 50,000 new users, every day, with thousands=20
of those joining the actual internet.=20
Remember, play FAIRLY and HONESTLY and this will really work.=20
** By the way, if you try to deceive people by posting the messages=20
with your name in the list and not sending the CASH to the rest of the=20
people already on the list, you will NOT get as much. Someone I talked=20
to knew someone who did that and he only made about $150.00, and that's=20
after seven or eight weeks! Then he sent the 6 $1.00 bills, people=20
added him to their lists, and in 4-5 weeks he had over $10k.=20
This is the fairest and most honest way I have ever seen to share the=20
wealth of the world without costing anything but our time!!! You also=20
may want to buy mailing and e-mail lists for future CASH. Make sure=20
you print this article out RIGHT NOW! Also, try to keep a list of every=20
one that sends you CASH and always keep an eye on the newsgroups to=20
make sure everyone is playing fairly. Remember, HONESTY IS THE BEST=20
POLICY. You don't need to cheat the basic idea to make the CASH!! GOOD=20
LUCK to all and please play fairly and reap the huge rewards from this,=20
which is tons of extra CASH.=20
Please remember to declare your extra income. Thanks once again...=20
"People have asked me if this is really legal. Well, it is! You are=20
using the Internet to advertise your business. What is that business?=20
You are creating a mailing list of people who are interested in home=20
based computer and online business and methods of generating income at=20
home. Remember, people send you a small fee to be added to your mailing=20
list. It is legal. what will you do with your list of thousands of=20

names?=20

That's up to you." So, build your mailing list, keep good accounts,=20

declare the income and pay your taxes. By doing this you prove your=20

business intentions. Keep an eye on the newsgroups and when the cash=20

has stopped coming (that means your name is no longer on the list),=20

you just take the latest posting at the newsgroups, send another $6.00=20

to the names stated on the list, make your corrections (put your name=20

at #6) and start posting again.=20

NOTES:=20

*1. In some countries, the export of the country's exchange is illegal.=20

But you can get the license to do this from the post office, explaining=20

the above statements (that you have an online business, etc. You may=20

have to pay an extra tax, but that's OK, the amount of the incoming=20

CASH is HUGE! And as I said, a few countries have that restriction.=20

*2. You may want to buy mailing and e-mail lists for future CASH. (Or=20

Database or Spreadsheet software.)=20

*3. If you're really not sure or still think this can't be for real,=20

please print a copy of this article and give it to someone who really=20

needs the CASH, and see what happens.=20

*4. You will start getting responses within 1-2 weeks, it depends.=20

ALSO REMEMBER=20

SEND YOUR $1 OUT TO EVERYONE ON THE LIST,=20

EVEN IF THEY ARE NOT FROM THE U.S.=20

WHAT ARE YOU WAITING FOR???=20

$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!$$$!!!=20

GOOD LUCK!!!=20

Date: 10-01-2000

Poster: Railsplitter

Message

A while back, I was browsing these newsgroups, just like you are now, =

and came across an article similar to this that said you could make =

thousands of CASH within weeks with only an initial investment of =

$6.00 plus stamps! So I thought, "Yeah, right, this must be a scam!" =

But like most of us I was curious and kept reading. It said that if =

you send $1.00 to each of the 6 names and addresses listed in the =

article, you could make thousands in a very short period of time. You =

then place your own name and address at the bottom of the list at #6, =

and post the article to at least 300 newsgroups. (There are about =

32,000 of them out there and that's quite a large market pool). No =

catch, that was it. Even though the investment was a measly $6, I had =

three questions that needed to be answered before I could get =
involved

in this sort of thing.

1. IS THIS REALLY LEGAL?

I called a lawyer first. The lawyer was a little sceptical that I =
would

actually make any CASH but he said it WAS LEGAL if I wanted to try =
it.

I told him it sounded a lot like a chain letter but the details of =
the

system (SEE BELOW) actually made it a legitimate legal business.

2. IS OK WITH THE POST OFFICE OR IS IT MAIL FRAUD? I called them: =

1-800-725-2161 and they confirmed THIS IS ABSOLUTELY LEGAL! (See 18, =

h sections1302 NS 1341 of Postal Lottery Laws). This clarifies the =

program of collecting names and addresses for a mailing list.

3. IS IT RIGHT? Well, everyone who sends me a buck has a good chance =
of

getting A LOT of CASH ... a much better chance than buying a lottery =

ticket!!!

So, having these questions answered, I invested EXACTLY $7.92 ... six =

$1.00 bills and six 32 cent postage stamps ... and boy am I glad I =
did!

Within 7 days, I started getting CASH in the mail! I was shocked! I =

figured it would end soon and didn't give it another thought. But the =

CASH continued coming in. In my first week I made between $20 to $30. =

By the end of the second week I had a made a total of $1,000.00. In =
the

third week I had over $10,000.00 and it was still growing. This is =
now

my fourth week and I have made a total of just over $42,000 and it's =

still coming in ..... It's certainly worth $6.00 and 6 stamps !!! =

Also, make sure you print a copy of this article NOW, so you can get =

the information off of it as you need it. I promise you that if you =

follow the directions exactly, that you will start making more CASH =

than you thought possible by doing something so easy!

Suggestion: Read this entire message carefully! (print it out or

download it.) Follow the simple directions and watch the CASH come =
in!

It's easy. It's legal. And your investment is only $6.00 (plus =
postage)

IMPORTANT: This is NOT a rip-off; it is NOT indecent; it is NOT

illegal; and it is virtually no risk - it really works!!!! If all of =

the following instructions are adhered to, you will receive

extraordinary dividends.

PLEASE NOTE:

Please follow these directions EXACTLY, and $50,000 or more can be =

yours in 20 to 60 days. This program remains successful because of =
the

honesty and integrity of the participants. Please continue its =
success

by carefully adhering to the instructions. You will now become part = of

the Mail Order business. In this business your product is not solid = and

tangible, it's a service. You are in the business of developing = Mailing

Lists. Many large corporations are happy to pay big bucks for quality =

lists. However, the CASH made from the mailing lists is secondary to =

the income which is made from people like you and me asking to be =

included in that list.

Here are the 4 easy steps to success:

STEP 1: Get 6 separate pieces of paper and write the following on = each

piece of paper "PLEASE PUT ME ON YOUR MAILING LIST." Now get 6 US = $1.00

bills and place ONE inside EACH of the 6 pieces of paper so the bill =

will not be seen through the envelope (to prevent thievery). Place = one

paper in each of the 6 envelopes and seal them. You should now have 6 =

sealed envelopes, each with a piece of paper stating the above = phrase,

your name and address, and a $1.00 bill. What you are doing is = creating

a service. THIS IS ABSOLUTELY LEGAL! You are requesting a legitimate =

service and you are paying for it! Like most of us I was a little =

skeptical and a little worried about the legal aspects of it all. So = I

checked it out with the U.S. Post Office (1-800-725-2161) and = they

confirmed that it is indeed legal! Mail the 6 envelopes to the

following addresses:

#1) M. Weber

801 Oaklands Dr

Round Rock, TX 78681

#2) S. Patti

1808 Ponderosa St.

Cocoa, Fl.,32926

#3) Gill

58 Moross

Mt. Clemens Mi. 48043

#4) Ryan Dick

7603 Canyon Dr.

Meridian, ID 83642

#5) Y.S.

2702 A Jenner Dr.

Baltimore, MD 21209

#6) D. Sims

905 Burning Bush Drive

Loganville, GA 30052

step 2: Now take the #1 name off the list that you see above, move = the other=20

names up (6 becomes 5, 5 becomes 4, etc...) and add YOUR Name as = number 6 on=20

the list.

STEP 3: Change anything you need to, but try to keep this article as =

close to original as possible. Now, post your amended article to at =

least 300 newsgroups. (I think there are close to 32,000 groups) All =

you need is 300, but remember, the more you post, the more CASH you =

make! This is perfectly legal! If you have any doubts, refer to 18 =

Sec. 1302 & 1341 of the Postal lottery laws. Keep a copy of these =

steps for yourself and, whenever you need CASH, you can use it again, =

and again.

PLEASE REMEMBER that this program remains successful because of the =

honesty and integrity of the participants and by their carefully

adhering to the directions. Look at it this way. If you are a person =

of integrity, the program will continue and the CASH that so many =

others have received will come your way.

NOTE: You may want to retain every name and address sent to you,

either on a computer or hard copy and keep the notes people send you. =

This VERIFIES that you are truly providing a service. (Also, it might =

be a good idea to wrap the $1 bill in dark paper to reduce the risk =
of

mail theft.) So, as each post is downloaded and the directions

carefully followed, six members will be reimbursed for their

participation as a List Developer with one dollar each. Your name =
will

move up the list geometrically so that when your name reaches the #1 =

position you will be receiving thousands of CASH in CASH!!! What an =

opportunity for only $6.00 ($1.00 for each of the first six people =

listed above) Send it now, add your own name to the list and you're =
in

business!

---DIRECTIONS ----- FOR HOW TO POST TO NEWSGROUPS

Step 1) You do not need to re-type this entire letter to do your own =

posting. Simply put your cursor at the beginning of this letter and =

drag your cursor to the bottom of this letter, and select 'copy' from =

the edit menu. This will copy the entire letter into the computer's =

memory.

Step 2) Open a blank 'notepad' file and place your cursor at the top =

of the blank page. From the 'edit' menu select 'paste'. This will =
paste

a copy of the letter into notepad so that you can add your name to =
the

list.

Step 3) Save your new notepad file as a .txt file. If you want to do =

your postings in different settings, you'll always have this file to =

go back to.

Step 4) Use Netscape or Internet explorer and try searching for

various newsgroups (on-line forums, message boards, chat sites,

discussions.)

Step 5) Visit these message boards and post this article as a new =

message by highlighting the text of this letter and selecting paste =

from the edit menu. Fill in the Subject, this will be the header

that everyone sees as they scroll through the list of postings in a =

particular group, click the post message button.

You're done with your first one! Congratulations...THAT'S IT! All you =

have to do is jump to different newsgroups and post away, after you =

get the hang of it, it will take about 30 seconds for each newsgroup! =

**REMEMBER, THE MORE NEWSGROUPS YOU POST IN, THE

MORE CASH YOU WILL MAKE!! BUT YOU HAVE TO POST A

minimum of 300**

That's it! You will begin receiving CASH from around the world within =

days! You may eventually want to rent a P.O.Box due to the large

amount of mail you will receive. If you wish to stay anonymous, you =

can invent a name to use, as long as the postman will deliver it. =

JUST MAKE SURE ALL THE ADDRESSES ARE CORRECT.

Now the WHY part:

Out of 300 postings, say I receive only 7 replies (a very low =
example).

So then I made $7.00 with my name at #6 on the letter. Now, each of =
the

7 persons who just sent me $1.00 make the MINIMUM 300 postings, each =

with my name at #5 and only 7 persons respond to each of the 7 =
original

7, that is another $49.00 for me, now those 49 each make 300 MINIMUM =

posts with my name at #4 and only 7 replies each, I will bring in an =

additional $343.00! Now, those 343 persons turn around and post the =

MINIMUM 300 with my name at #3 and only receive 7 replies each, I =
will

make an additional $2401.00! OK, now here is the fun part, each of =

those 2401 persons post a MINIMUM 300 letters with my name at #2 and =

they each only receive 7 replies, that just made me $16,807.00!!! =

Those 16807 persons will all deliver this message to 300 newsgroups =

with my name at #1 and if still 7 persons per 300 Newsgroups react I =

will receive $117,649.00! With an original investment of only $6.00! =

And some stamps. AMAZING! When your name is no longer on the list, =
you

just take the latest posting in the newsgroups, and send out another =

$6.00 to names on the list, putting your name at number 6 again. And =

start posting again. The thing to remember is: do you realize that =

thousands of people all over the world are joining the internet and =

reading these articles everyday? JUST LIKE YOU are now!! So, can you =

afford $6.00 and see if it really works?? I think so...

People have said, "what if the plan is played out and no one sends =
you

the CASH? So what! What are the chances of that happening when there =

are tons of new honest users and new honest people who are joining =
the

internet and newsgroups everyday and are willing to give it a try? =

Estimates are at 20,000 to 50,000 new users, every day, with =
thousands

of those joining the actual internet.

Remember, play FAIRLY and HONESTLY and this will really work.

** By the way, if you try to deceive people by posting the messages =

with your name in the list and not sending the CASH to the rest of =
the

people already on the list, you will NOT get as much. Someone I =
talked

to knew someone who did that and he only made about $150.00, and =
that's

after seven or eight weeks! Then he sent the 6 $1.00 bills, people =

added him to their lists, and in 4-5 weeks he had over $10k.

This is the fairest and most honest way I have ever seen to share the =

wealth of the world without costing anything but our time!!! You also =

Make a tool/site so that WAP celular phone can access dx-clusters on the
internet.
Or a script so at dx-spots are send out via internet to a celular phone via
SMS.

I do have a dx-cluster where you maybe can do some tests

My concern is that the likes of Jesse Jackson et all will stir up the ignorant to the point of civil unrest.

Grandma hasn't had a new TV set since the last Miami riots. Time to go shopping again...

I just finished listening to a Palm Beach voter go on for several minutes about how confusing the ballot was, after several minutes it turned out she had voted absentee in the Illinois election. The Black lady interviewing her moved on quickly without comment.

That is Jesse Jackson's mission in life. He has complained that many blacks could not vote because they were told the poles were closed. Well DUH! the poles close at 7pm local time and if you arrive after the poles close you can't vote, whether your black, white, or purple. Jackson is another one of the idiots we have to put up with.
It seems there are a few thousand inhabitants of Dade County Florida that seem to admit that they are two stupid to understand how to read a ballot and follow instructions. Given that Miami is in Dade county that is understandable, most can't even read or speak English.

Yeah I've looked at it...up close....until recently we had several
thousand troops at Ft. McClellan.....and what I saw was highly
motivated intelligent young people willing to do their duty and
protect, defend, and support the constitution of this country. Espirit
de Corps if you wish.

I have NO DOUBT they hate Bill Clinton. When one of their own dies,
they died a little too. I think it is a DISCRACE what Clinton and Gore
have done to the military men and women of this country.

There was this same type of ballot confusion problem in the 1996 election, guess which state? Florida! Guess which county? Dade! Illinois uses the same type ballot, I don't hear any rash of complaints from there that they could not understand how to mark the ballot. Look at the majority population of Dade county Florida and you have your answer. The ballot was approved by both Democrat and Republican officials.

Sort of stuck with ... blue on white, or white on blue.

A much more serious problem is the polarization of the display.
If you wear polaroid sunglasses, the display washes out. Seems
that Kenwood chose a different polarization from the norm.

Re-elections in certain Florida counties are like a group of people that bought lottery tickets and after the results were presented complained that the numbers they wanted to choose weren't the ones they chose.

Although the constitution doesn't prohibit it, stupid people shouldn't be permitted in the voting booths on election day and anyone that doesn't take the time to become an informed voter is a stupid voter and doesn't have reason to complain. An informed Florida Voter would have taken the initiative and obtained a sample ballot days before the election. They would have thoroughly reviewed the candidates and issues. The informed voter would have completed their sample ballot and would have taken it with them to their polling place. An informed intelligent voter would know who they voted for and why as they are leaving their polling place, and if an informed voter had made a mistake ballot they would have asked for a new ballot to complete. We can not permit stupid people to set a precedence of asking for re-elections when they're uncertain as to who or what they voted for. If we allow this, then any election in every state of this country would be open for that same sort of attack. The marks & holes made on an offical ballot mean something irregardless of whether the voter knew what he was doing or voted how he intended. Re-elections due to fraud or the death of a candidated are another matter and are acceptable.

Let's not put a Gorron in the White House.

Simple answer! The media is not part of Florida government. If people
would make a decision to vote or not vote by what CNN et. al. would
say, that is their fault. The problems with the ballots IS a Florida
government problem.

A Texas 3rd grade teacher printed that ballot from the internet, gave it to his class, and asked them to vote for Gore. Not one student got it wrong. The problem is not with the ballot. The problem is with some dumb-$hit democrats. Should we allow people who can't even read a ballot to pick our next president?

I was wondering if the Clintonistas would bomb another African aspirin factory. Looks like they only want to perform a political coup. Think Clinton will call out the Florida National Guard to put Gore in office?

There were 10k+ of them in that same county in 1996 when the county
went for Clinton. Why no objections to dumb-$hit voters then?

This reminds me of the Texas election that sent LBJ to the senate. Coke
Stevenson won the election by a slim margin. A recount was done in either
Jim Wells or Duval counties and LBJ picked up enough votes to win the
election, even more votes than there were registered voters in the county.
Someone reported that a lot of people had voted in alphabetical order.
Coke Stevenson, an ex-governer of Texas got the Texas Rangers together
for a morning raid on the court house. But they were too late. The
court house burned down the night before and LBJ went to the senate.
Like Gore and Clinton, LBJ was a democrat.

Some law enforcement agencies welcome the scanner listener's into their corner. But in some areas, the scanner listerners are treated worse than the common criminal.
Most of this anti-scanner garbage was started by the Cellular Phone Industry in the mid-1980's.
"W.W. Conkright" <wcnk@bellatlantic.net> wrote in message news:3A08E8C5.219F3BC5@bellatlantic.net...
I think the cops should be glad to know that they have a "regular audience" around here scaaners are fairly popular ,and its a good way to get to know what is going on it town.
We have sunk to a new low in the USA if they are afraid of us listeneing in.
Actually, it really promotes public respect for the cops when one comes to learn
of all the crap, and baby-sittting, and stupidness they have to put up with each day.
Domestics, speeders, baggy pants- earing kids dealing drugs, nut cases, escapees, people driving off
without paying for gas, cows on the loose in the road, neighboors having conflict, etc
Same sh_t each day. Weekends are the real fun times, especially when some unprononuncable
gets pulled over with an international driver license!

True, the "concession" is a matter of courtesy, it in no way carries any legal authority as to win or loss. Even if Gore "conceded" and it turns out later he carries Florida, he wins and will be the President Elect, even after conceding.

In Lexington Ky, or so the story goes, years ago Lane Allen Road was a
privite toll road.
Owned and operated by MR Allen. One fine day he jacked his rates, and
community was going to hang (as by the neck until dead) him, but where
convinced to let him leave town and never return.
Private Roads do exits. There is a "private" turnpike up in main. Of course
the police still patrol and give tickets. Been there, done that, and have the
reciept as a reminder. But, unlike most tickets, it did not cause my insurance
rates to go up.

This is only the beginning. Al Gore, the ultimate liar except for his boss and mentor Bill Clinton, said earlier today he would accept the results of the recount. Tonight, CNN reported that an entourage of lawyers is ready to challenge the results on other grounds if the recount finds Bush still the winner.

Wouldn't you have called also? It not like he's postponing a lunch date.

And there is also a problem in that the West Palm (I believe) presidentual voting form was rearanged (with the idea that it would be easier for the older population there to read) in such away that many people seemed to have voted for Pat B. thinking they were voting for Gore.

Pat got more than 8000 votes in just a few areas. A -much- higher percentage than the rest of the state voted for him.

There are also some/many forms with several holes puched out as people tried to correct their vote (rather than getting a new voting form).

I saw on the news just a few minutes (10PM Wend) ago that the lawyers have already gotten into the act. And of course several preachers have arrived from up North to "help" out.

I saw that: The candidates were arranged on the computer screen in two columns of boxes, each box appeared to be 4 inches lengthwise and 1 inch in height. Each box contained a candidate's name and party affiliation. These two columns of boxes occupied the entire computer screen, so the sizes may be actually bigger.

Al Gore's box is in the first column (left column) and Buchanan's is in the second column (right column) adjacent and slightly raised in offset approximately 1/8 of an inch. I also understand that the system displayed a confirmation prompt displaying user selection prior to recording vote result with another keystroke.

Out of six million votes, I'm sure thousands of other errors didn't favor Bush. It isn't going to be bulletproof; such is the nature of manual data entry.

> Pat got more than 8000 votes in just a few areas. A -much- higher
> percentage than the rest of the state voted for him.

Well, let's see where those higher than normal Pat-Votes came from. As I understand it, Pat carries a great deal of the Christians votes. Would dense pockets of retired middle class white people that tend to be sympathetic to the Christian Church exist in these areas in Florida where increases of Pat-Votes are recorded? Ya think? Go fig.

> There are also some/many forms with several holes puched out as people
> tried to correct their vote (rather than getting a new voting form).

Now I'm stumped. Lemme see if I got this straight; you're telling me that these potential Gore supporters were denied the weight of their vote because they tore holes in their ballot sheets (to correct an error) and actually expected the scantron machine, (which *they* feed) to actually tally their vote without an error?

Jeeeeez.....if that's the case, let's just go drag those braniacs back to the poll and give 'em a new ballot sheet so they can pick the new leader of the free world. Somebody's gotta do it. Might as well be *that* group of idiots.

Huh, I would not want to call this one before the vote is counted.
Have you taken a look at the military in the last couple of years?
Thanks to efforts by Clinton, the military today has a huge minority
population - a minority population that is more likely to vote for Gore.
In fact, minorities as a whole appear to be the majority in the
military today, so those absentee ballots may not so obviously favor
Bush in this political race.

Well, you're right. They did make the mistake of wanting to vote for Gore in the first place, didn't they? So I guess Democrats do know how mistake prone their voters are. :-)

Oh, that's mean. Don't worry about it Democrats, I have a feeling that I'll be in this newsgroup in a few months complaining about Bush. Both of them leave a lot to be desired (however, Gore leaves a lot more to be desired than Bush does).

Some of this might be true but I think you better look at the "globe" again. The Spratly Island group is in the South China Sea and the Hawaian Uslands are 4,000 miles to the East with the Mindanau Deep (24,000 feet) in the way plus the Phillipines and Tiawan, not that any of this has anything to do with Ham Radio except it costs you more to go buy radio parts at Tandy or elsewhere. :three times" with their mic.
:
:On the other hand, carrying a scanner tuned into the local (unencrypted)
:police channel is probably a job requirement for burglars here. Bad guys
:know the address of the place they have just broken into, and they can
:listen just like the law-abiding citizens and bail out when they hear their
:address called.
:

I have another post from Florida about how the news media
is referring to the encryption of police frequencies as "secret
police". The concern is that the police has sometime to hide.

Face it, how hard would it be for a group of cops to get a commo
tech to create a new talk group that none of the leadership has?
With encryption, no one could intercept it, not even dispatch
(therefore it could not be recorded).

As it is, police are using out of band CBs to coordinate less than
professional activities. It is not in the best interest of the
department nor the public.

Plus how do you coordinate with other departments, or even
other patrol areas? Scanners would allow inter agency monitoring.
We already have a situation in Indianapolis were the deputies
transporting prisoners do not have the bailiff's talk groups nor
IPD downtown. Therefore they can talk directly with either
department. And locally, we have the county ambulance service
not wanting the fire departments on their talk groups. That means
that there is no coordination, not even to talk an ambulance into
an accident scene.

In the end, I believe that you will need a court order to be allowed
to use encryption, and then with limits as to time and situation.

Such a "war" wouldn't last long; the Bush supporters have guns, all the
Gore supporters have is a stack of "Gun free and proud of it" and "Save
the rain forest" bumper stickers.

Mr Breneman,

Using the logic you just used, you could just as well ban newspapers. Would <<you>> want someone reading about your "arrest" after you robbed a bank? You could ban newscasts that cover police shootouts, or just ban TV altogether.

You are forgetting that intrinsic to government OF, BY, and FOR the people is their RIGHT to know! This is EXACTLY what the socialists are looking for, as well as our enemies. Since we STILL have the right to bear arms, the ones who would take your freedoms away can't very well just say, OK, you now have to give up your guns, newspapers, books AND scanners. They would be mowed down. But they CAN, using seemingly innocent attitudes like yours, use very small issues to build a found-ation for their hidden agenda. Using issues that sound good, public safety regulations, etc, they "condition" people to accept even more strictures on their freedoms. For example, I believe in seat belts. I've worn them since 1967. But it should NOT be a law that you have to wear them. It does sound good, so people lamely allow their state legis latures to pass laws restricting their right to decide for themselves. More conditioning. More foundation for the reduction of freedom to the public and more government control of the public.

An informed public is the police departments' best ally. Anytime police have something to fear from those it is charged to protect--that is, law abiding citizens---there is something wrong within the department and it's the OFFICERS who need to be changed, not the listening habits of the general public.

jeffreyh@Hawaii.Edu (Jeffrey Herman) writes:

>>This is an international newsgroup.

>No. This NG (rec.radio.amateur.misc) is *propagated* internationally.
>Period. It's not (nor was it ever) intended to be a dumping ground
>for non-U.S. topics. There are newsgroup hierarchies for uk.radio.*,
>aus.radio.*, et cetera. Peruse those groups if you're interested in
>non-U.S. articles.

These newsgroups are propagated and *contributed to* internationally.
They are for discussion of various radio topics wherever they happen.
There is NOTHING that suggests that rec.* groups should be in any way
specific to the USA.

There are *also* newsgroups specific to certain regions that may contain
stuff specific to those regions. If readers in the USA want a newsgroup
for USA-specific stuff, they could set up a usa.radio.* newsgroup. But
the rec.* groups are open to things happening anywhere.

Now, many international readers would be happy if USA members *would*
set up a country-specific newsgroup and take certain discussions there,
for example the USA presidential elections. But mostly we don't complain
about all the USA-specific content. It's the height of arrogance, though,
to suggest that USA content *belongs* here and non-USA content does not.
Radio-related news from Edmonton belongs here just as much as radio-related
news specific to the USA, particularly all the FCC stuff.

And don't use the "the USA started the Internet" excuse. Usenet was
originally relatively independent of the Internet, and was international
almost from the start. Even back when Usenet had only 30 sites, some
of those were outside the USA. Right from the beginning, most newsgroups
were international. I've been reading and posting to Usenet since 1981,
all of it from outside the USA.

Dave

PS: I see that Jeffrey "cleverly" set the Followup-to header so that
all followups would go to rec.radio.cb - not even one of the original
newsgroups. In other words, he wants anyone else's comments to not
be seen by anyone following the thread. I've reset the Newsgroups
to what they were.

Taxes cut? That would be nice. Do you have a mortgage? Wait until Bush
and his Congressional cronnies try to do away with your mortgage interest
deduction. The Regan era promised us tax cuts. Then they got rid of
creditcard interest deductions. Then they went for doing away with
mortgage interest deductions but it failed. Maybe this time it won't.
I hope I'm wrong.
Regards,

Vince

I sent an email to KLBJ and got the following reply:

"From Mary Matalin of Crossfire, who says the 19,000 ï¿½lostï¿½
votes are a myth. It seems that when a ballot is double-punched, the
voter can immediately ask for a new ballot and the old incorrect ballot
goes into a pile. Many, if not most, of the 19,000 are of this type.
This would square with what happens in Texas. If we mark the ballot
wrong, we get a new ballot and start over, but we keep the old ballot
for the records to make sure the correct number of voters and ballots
balance."

I'll bet the Democrats found this out to be true today and that's why
they backed off on the chest-beating and lawsuit threats.

You should have spelled 'cronnies' as Cronies. Credit card interest can best be done away with by PAYING for your purchases with cash. The interest is YOUR fault!
Gore, on the other hand, voted to raise taxes on Social Security...something the poor and middle class could ill afford. Social Security should be tax free. Did he care? NO! Gore also voted to raise the retirement age from 65 to 66 and 67 years of age. Does he care? NO! Gore will not let the poor send their kids to private schools, but his kids all attended exclusive, private schools. Does he care about you? NO!

I'd say better an EX drinker in the White House than a hardened pot smoker in the same place.

Hillary must be looking with amusement at Gore's dying throes. She, like the rest of the country, realizes that Gore is making himself and his team look like a bunch of immature school kids. She knows that this will ruin Gore's chances for a run at the presidency four years hence, she knows that Gore is ruining himself politically, and that only leaves the future presidential door that much wider for her!
If Gore were smart, he'd cut his losses, admit defeat BEFORE further investigations divulge yet more Democrat ballot box stuffing in other states, act like a man and live to fight another day. He could make himself look almost credible, but he won't.

When it all sorts out in the wash, no election in any state is actually
complete before about Dec 1, the margin of victory may well be less than the
screw-up if any. So what? The only real casualty will be punch-card voting
that should have had a stake driven thru its heart years ago.

Much like a good fight with one's spouse, at some point you have to recognize the reality that you must continue to live with the person; you settle it and move on.

Whatever green weenie Gore or Bush might have gotten, it pales next to the 1960 election where Kennedy thru the Daley machine in Chicago literally stole Illinois and gave us (burp) Camelot. Richard Nixon - intelligent, honorable in his own way, and more than likely insane by some standards, ordered his troops to accept the result and back off. He had enough confidence in his own ability to come back which in fact he did but he also had enough reverence for the office not to get involved in a cat fight.

With that example in mind, it is time for both campaigns to end the campaign and send the lawyers back to the swamps. Accept the results as finally tallied and move on. This does not make the interregnum any easier; it is hard to name a Cabinet, etc. when it is still unclear if you have the right to do so. Tuffshitski. Next to dealing with the new Congress, child's play.

And when the electors vote in December, that's it. The first member of the House zoo that says anything other than Hail to the Chief when the electors votes are read (I believe they are secret until then) gets a full frontal nuclear dope slap from his party's leadership.

Then pity the poor bastard that 'wins'.

Dick McCollum N0BK

I don't recall Reagan getting a blow job in the office on company time
and then lying about it under oath.

Newer twist: Using the above scenario, Gore wins. Lieberman resigns as
VP and assumes his senate seat. Gore appoints Jesse Jackson as VP. The
Democrats control the Senate.

Dwight Stewart (stewartx@sccoast.net) wrote:
: James Rosenthal wrote:
: > There are also some/many forms with several holes puched out as people
: > tried to correct their vote (rather than getting a new voting form).

: Glad you mentioned that, Jim. Actually, I have seen the ballots in
: question on the television a few times. Pat's name is sandwitched
: between Gore and Bush on the form (staggered left and right on the form,
: with circles going down the middle to punch for each candidate).

Since this whole thing has come up, I've heard that other states did away
with the punch card form long ago because of voter confusion.

: The thing that immediately struck me was the fact that there is no
: reason to assume that any more of Gore's voters made a mistake on the
: form than Pat's voters or Bush's voters. In other words, the claim by
: the Democrats that it was primarily Gore's voters that made a mistake on
: the form seems to suggest that they think Gore's voters are more mistake
: prone than the other two groups.

Only thing is that Bush's name and the hole you use to vote for him is at
the very TOP of the page. Hard to make a mistake with that.

You probably have seen Pat's response on TV where he doubted that many
people voted for Gore and then realized they made a mistake and then voted
for him. :) (And it appears that there are 19,000 double votes!
Although the numbers change every time there is another newscast.)

: Actually, to be perfectly honest, my first thought was to wonder how
: anyone could have made a mistake on that form. There are large arrows
: (larger than the candidates name) in each name block pointing to the
: circle that is supposed to be punched for that named candidate.

Good thing Pogo wasn't on the ballet!

: My wife
: and I have only seen the form flashed on the television screen for a few
: seconds and we were both able to easily figure it out (and we didn't
: have minutes in a voting booth to study it).

The form in our county (Broward) had all the names lined up on the left
side of the page. I was very careful to make sure that I didn't end up
voting for one of the many other parties even though Gore was the
selection down the page.

: No, I think this whole voting form thing is a little silly. Yes, Pat
: did well in that area, but he has always done better in some areas than
: others (based on the makeup of voters in specific areas). And there is
: nothing to suggest that his vote count in this geographical area was out
: of line with other vote counts he received in other pockets of the country.

The percentage in Palm Beach county was -much- higher than the Fla or
national average.

Pat said that he did NO campaining South of Orlando (that's more than 1/2
way up the state) and didn't expect to get many votes from the southern
part of the state. Seems that he had an operation and stopped campaining
quite awhile ago.

: Dwight Stewart (W5NET)

I'd suggest that they take the Fla percentage average that Pat got in the
rest of Fla and -subtract- that amount from the 19000 votes and give the
rest of them to Gore! ;-)

Right now, the state is really waiting for the mail in votes to come in
and be counted to see if they change the outcome. Normally the mail in's
don't amount to enough to change an election, but in this case they could
since the difference is either;
a. 360.
b. 1200 :)

allsafe (Nuh-uhh!@INVALID.com) wrote:
: From: James Rosenthal <z005381b@bc.seflin.org>
[snip]

: I saw that: The candidates were arranged on the computer screen in two
: columns of boxes, each box appeared to be 4 inches lengthwise and 1 inch in
: height. Each box contained a candidate's name and party affiliation.
: These two columns of boxes occupied the entire computer screen, so the sizes
: may be actually bigger.

: Al Gore's box is in the first column (left column) and Buchanan's is in the
: second column (right column) adjacent and slightly raised in offset
: approximately 1/8 of an inch.

Bush was first on the left, Buchanan was first on the right, Gore was
second on the left etc.

In the past when they split the selections this way (it's called a
"buterfly" split) they arranged them by party. The problem is that there
were -10- different parties this time!

Each Candidate had a line above and below his name (and vice). The lower
line for Bush was the upper line for Gore etc. The upper line for Gore was
aligned with the hole to vote for Buchanan, the hole For Gore was lined
up with the lower line of Buchanan etc.

Many of the voters are OF's (which is what prompted the whole
rearangement) and they would probably get confused if there were only two
people to select from.

; I also understand that the system displayed
: a confirmation prompt displaying user selection prior to recording vote
: result with another keystroke.

Nope! You insert a paper voting card into the machine. You "vote" with a
little tool that has a wire sticking out of it that punches a hole in the
voting card corresponding with the hole that guides the tool.

When you are done "voting" you take the card out of the machine and put
it in a metal lock box. At that point you have officially VOTED.

: > Pat got more than 8000 votes in just a few areas. A -much- higher
: > percentage than the rest of the state voted for him.

: Well, let's see where those higher than normal Pat-Votes came from. As I
: understand it, Pat carries a great deal of the Christians votes. Would
: dense pockets of retired middle class white people that tend to be

: sympathetic to the Christian Church exist in these areas in Florida where
: increases of Pat-Votes are recorded? Ya think? Go fig.

By now you've probably seen Pat's response on TV

: > There are also some/many forms with several holes puched out as people
: > tried to correct their vote (rather than getting a new voting form).

: Now I'm stumped. Lemme see if I got this straight; you're telling me that
: these potential Gore supporters were denied the weight of their vote because
: they tore holes in their ballot sheets (to correct an error) and actually
: expected the scantron machine, (which *they* feed) to actually tally their
: vote without an error?

Even a guy who was a local Gore election person AND a voting station
helper (perfectly legal) made a mistake and voted for Buchanan... But he
asked for another form and corrected his mistake.

: Jeeeeez........if that's the case, let's just go drag those braniacs back to
: the poll and give 'em a new ballot sheet so they can pick the new leader of
: the free world. Somebody's gotta do it. Might as well be *that* group of
: idiots.

Does make you wonder.

: > I saw on the news just a few minutes (10PM Wend) ago that the lawyers have
: > already gotten into the act. And of course several preachers have arrived
: > from up North to "help" out.

: Lawyers. Great. just friggin' great!

A little way down, there is this part:

"Attorneys for the Gore campaign .... do not allege that the
Democratic election supervisor who designed the disputed ballot,
Theresa LePore, intended to harm voters."

Several reports have mentioned that it was designed by a Democrat
worker, but this is the first time that I have seen her named.

:
: Web maps pinpoint crime activity
:Chicago police take the lead in getting data to community
:
:By Kevin Davis, Special for USA TODAY
:
:CHICAGO ï¿½ With a few clicks of a mouse, Sandy Campbell can call up a

:computerized map of his neighborhood to see where the latest crime
:problems can be found.
:
:Chicago's site, "Citizen ICAM," can be accessed at
:www.ci.chi.il.us/CommunityPolicing.
:A recent check of the Chicago Police Department Web site showed a
:concentration of drug-related activity about two blocks from his
:house. In all, the map pinpointed 104 crimes ï¿½ from battery and
:prostitution to narcotics and telephone threats ï¿½ within a half-mile
:of Campbell's home during a week-long period.
:
:"In a flash, it will show you where things are happening," says
:Campbell, a member of his local Chicago Alternative Policing Strategy,
:known as CAPS. "Once you get this information, you can ask the police
:what they're doing to combat this. Are they beefing up patrols in the
:area?"
:
:Last month, Chicago police launched a Web site that allows the public
:instant access to crime information. Its designers say it is the most
:advanced crime information site for public use in the USA.
:
:"I'm really excited that we now have this available," says Campbell,
:62, a retired real estate broker who lives on the city's north side.
:"The whole idea is to identify problems and think of ways to
:cooperatively solve them. The police really do want citizens to be
:involved."
:
:Anyone with access to the Internet can call up the site, type in an
:address, intersection or police beat, and instantly get information
:dating back 90 days. The screen will display a map of up to a 1-mile
:radius of an address and show color-coded icons where crimes were
:committed. Reports are a week old.
:
:For those who want more information, crimes can be listed in a chart
:with their case numbers, block of occurrence and whether an arrest has
:been made. Specific addresses and names of victims are not included.
:
:Getting people involved
:
:Within days of its debut, the system was overloaded. In the first two
:weeks, police say, there were more than 210,000 hits on the site,
:causing the department to expand its computer server capacity. Police
:are hoping residents use the site for more than satisfying their
:curiosity.
:
:Sgt. Jonathan Lewin, coordinator of the police technology unit, helped
:develop the system to get more people involved in community policing.
:"It's something we've been talking about for a number of years," Lewin
:says. "This reflects our commitment to citizens to give them access to
:information. One of the things we've been talking about is getting

:more tools for citizens to help fight crime."
:
:Arthur Lurigio, chairman of the criminal justice department at Loyola
:University-Chicago, says this information can make a difference. "One
:of the tried and true methods of crime prevention is to avoid places
:where there is a lot of criminal activity such as robberies or sexual
:assaults," he says. "People can avoid these areas and lower their risk
:of victimization."
:
:Residents can also work with police to change those areas.
:
:"They can ask police to step up patrols, and they can step up their
:own activities, such as starting up their own crime-watch groups or
:citizen patrols, and it can get more people involved in community
:policing," Lurigio says.
:
:That's what Campbell is hoping for. "I believe the more people use
:this, the better attended our beat meetings will be because people
:will want to talk about what's going on."
:
:The Web site grew from an internal program available only to police,
:who used it for crime analysis. Now the public can work on a similar
:system. "Nobody provides this level of interaction with reports,
:updates and arrest information," Lewin says.
:
:Though that might be true, Chicago isn't the first city to make crime
:information available on the Internet. The U.S. Justice Department has
:been encouraging the development of such systems for both police and
:citizen use. Other departments, as well as some newspapers, have taken
:crime reporting to the Web in various forms:
:
:The New Orleans Police Department has a site that allows users to
:check monthly crime reports in specific districts. Users also can
:search for information on specific crimes.
:
:In Evansville, Ind., The Evansville Courier & Press, in cooperation
:with police, has a Web site that maps felonies throughout the city.
:
:The Red Bluff, Calif., Police Department has a site with monthly
:crime-analysis maps. Users can specify a crime, such as burglary or
:drunken driving, and view a map of the city showing where those
:offenses occurred.
:
:The Houston Police Department offers citizens access to monthly crime
:statistics on its Web site. The tables include the type of crime, the
:location and the date and time it occurred.
:
:A new openness
:
:This openness represents a shift in police departments, which

:traditionally have kept information to themselves.
:
:"The initiative to share it with the public is really something new,"
:says Robert Friedmann, chairman of the department of criminal justice
:at Georgia State University and an expert on community policing. "This
:is a promising development in law enforcement."
:
:Campbell says this openness also helps strengthen the relationship
:between police and the public. He says residents often blame police
:for problems and expect them to solve them. "What began as an
:adversarial relationship has settled into something more cooperative."
:
:Chicago police plan to improve their computer system in the coming
:months. The department soon will create a feature to allow parents to
:type in their address and see a map showing the safest route to
:school, as well as safe havens where children can go if they feel
:threatened or encounter a crime. The map will show little footprints
:for children to follow.
:
:Friedmann says that although the system has its merits, it can also be
:abused. Unscrupulous lenders or insurers, for example, could use the
:maps to "redline" ï¿½ refuse to provide service to certain areas. But
:"in all, I think the more information you give out to the public, to a
:point, is good," he says. "You get the message that the police
:department is open to the community."

:
: Web maps pinpoint crime activity
:Chicago police take the lead in getting data to community
:
:By Kevin Davis, Special for USA TODAY
:
:CHICAGO ï¿½ With a few clicks of a mouse, Sandy Campbell can call up a

:computerized map of his neighborhood to see where the latest crime
:problems can be found.
:
:Chicago's site, "Citizen ICAM," can be accessed at
:www.ci.chi.il.us/CommunityPolicing.
:A recent check of the Chicago Police Department Web site showed a
:concentration of drug-related activity about two blocks from his
:house. In all, the map pinpointed 104 crimes ï¿½ from battery and
:prostitution to narcotics and telephone threats ï¿½ within a half-mile
:of Campbell's home during a week-long period.
:
:"In a flash, it will show you where things are happening," says
:Campbell, a member of his local Chicago Alternative Policing Strategy,
:known as CAPS. "Once you get this information, you can ask the police
:what they're doing to combat this. Are they beefing up patrols in the
:area?"
:
:Last month, Chicago police launched a Web site that allows the public
:instant access to crime information. Its designers say it is the most
:advanced crime information site for public use in the USA.
:
:"I'm really excited that we now have this available," says Campbell,
:62, a retired real estate broker who lives on the city's north side.
:"The whole idea is to identify problems and think of ways to
:cooperatively solve them. The police really do want citizens to be
:involved."
:
:Anyone with access to the Internet can call up the site, type in an
:address, intersection or police beat, and instantly get information
:dating back 90 days. The screen will display a map of up to a 1-mile
:radius of an address and show color-coded icons where crimes were
:committed. Reports are a week old.
:
:For those who want more information, crimes can be listed in a chart
:with their case numbers, block of occurrence and whether an arrest has
:been made. Specific addresses and names of victims are not included.
:
:Getting people involved
:
:Within days of its debut, the system was overloaded. In the first two
:weeks, police say, there were more than 210,000 hits on the site,
:causing the department to expand its computer server capacity. Police
:are hoping residents use the site for more than satisfying their
:curiosity.
:
:Sgt. Jonathan Lewin, coordinator of the police technology unit, helped
:develop the system to get more people involved in community policing.
:"It's something we've been talking about for a number of years," Lewin
:says. "This reflects our commitment to citizens to give them access to
:information. One of the things we've been talking about is getting

:more tools for citizens to help fight crime."
:
:Arthur Lurigio, chairman of the criminal justice department at Loyola
:University-Chicago, says this information can make a difference. "One
:of the tried and true methods of crime prevention is to avoid places
:where there is a lot of criminal activity such as robberies or sexual
:assaults," he says. "People can avoid these areas and lower their risk
:of victimization."
:
:Residents can also work with police to change those areas.
:
:"They can ask police to step up patrols, and they can step up their
:own activities, such as starting up their own crime-watch groups or
:citizen patrols, and it can get more people involved in community
:policing," Lurigio says.
:
:That's what Campbell is hoping for. "I believe the more people use
:this, the better attended our beat meetings will be because people
:will want to talk about what's going on."
:
:The Web site grew from an internal program available only to police,
:who used it for crime analysis. Now the public can work on a similar
:system. "Nobody provides this level of interaction with reports,
:updates and arrest information," Lewin says.
:
:Though that might be true, Chicago isn't the first city to make crime
:information available on the Internet. The U.S. Justice Department has
:been encouraging the development of such systems for both police and
:citizen use. Other departments, as well as some newspapers, have taken
:crime reporting to the Web in various forms:
:
:The New Orleans Police Department has a site that allows users to
:check monthly crime reports in specific districts. Users also can
:search for information on specific crimes.
:
:In Evansville, Ind., The Evansville Courier & Press, in cooperation
:with police, has a Web site that maps felonies throughout the city.
:
:The Red Bluff, Calif., Police Department has a site with monthly
:crime-analysis maps. Users can specify a crime, such as burglary or
:drunken driving, and view a map of the city showing where those
:offenses occurred.
:
:The Houston Police Department offers citizens access to monthly crime
:statistics on its Web site. The tables include the type of crime, the
:location and the date and time it occurred.
:
:A new openness
:
:This openness represents a shift in police departments, which

:traditionally have kept information to themselves.
:
:"The initiative to share it with the public is really something new,"
:says Robert Friedmann, chairman of the department of criminal justice
:at Georgia State University and an expert on community policing. "This
:is a promising development in law enforcement."
:
:Campbell says this openness also helps strengthen the relationship
:between police and the public. He says residents often blame police
:for problems and expect them to solve them. "What began as an
:adversarial relationship has settled into something more cooperative."
:
:Chicago police plan to improve their computer system in the coming
:months. The department soon will create a feature to allow parents to
:type in their address and see a map showing the safest route to
:school, as well as safe havens where children can go if they feel
:threatened or encounter a crime. The map will show little footprints
:for children to follow.
:
:Friedmann says that although the system has its merits, it can also be
:abused. Unscrupulous lenders or insurers, for example, could use the
:maps to "redline" ï¿½ refuse to provide service to certain areas. But
:"in all, I think the more information you give out to the public, to a
:point, is good," he says. "You get the message that the police
:department is open to the community."

And the honest men are ??? You can tell a politician is lying because their lips move. This is a contest between two spoiled little rich kids on an extended power trip. Bush is an idiot who's daddy bought both him and his brother jeb a governorship. Bush has no clue as to the issues and does not want one. Gore has a problem with embellishing the extent of his involvement is most things. Gore at least has a good knowledge base of the issues. I did not want EITHER of the candidates - but I voted for the lesser of the two evils. I really wanted to cast my vote for Elizabeth Dole - a Republican, who was, IMHO, the best candidate for our country, but Daddy Bush's cash and influence bought him the republican ticket. The popular vote is for Gore by a quarter million margin, but our 18th century Electoral College institution, put in place by more spoiled rich men to insure that they can "adjust" the will of the people to fit their agendas may well put the second place (and rate) winner in the white house. May God watch over us and protect us, because we are sorely in a time of need.

:classified: UNCLASSIFIED
:
: While this has to do with LAPD,
: the same problems will show up
: here in Indiana, and even overseas.
:
:Police Say Radios Too Low-Tech
:By JACK LEONARD, Times Staff Writer
:
:
: But that was before sprawling office towers and parking
:structures started blocking radio waves. And before wireless
:phones--with their crystal clear reception--upped expectations for
:two-way communication, while at the same time stealing frequencies
:from radio users.
:
: Now, it seems, in this era of technological innovation, the
:crackling police radio is starting to show its age.
:
: Police and fire agencies across the country are using antiquated
:equipment developed in the 1950s and '60s that has failed in major
:emergencies, including the 1992 Los Angeles riots and 1993 Laguna
:Beach firestorm.
:
: That problem is prompting departments to spend hundreds of
:millions on cutting-edge radio networks, only to encounter many
:new--and sometimes dangerous--breakdowns.
:
: In one extreme case in Atlanta, a new police radio network failed
:to pick up an officer's call for help just moments before a
:rifle-wielding suspect wounded her and killed her partner. In
:Delaware, firefighters resorted to shouting out of windows because
:their $50-million communications system didn't work inside high-rise
:buildings.
:
: In Los Angeles, police use a 21-year-old network so out of date
:that manufacturers have stopped making parts for it. For years,
:cash-strapped technicians had to cannibalize parts from some hand-held
:radios to fix others. The problems reached a crisis during the 1992
:riots, when officers in the field faced a critical shortage of
:portable radios.

:
: The city is installing a new system.
:
: Orange County began rolling out an $80-million network earlier
:this year and experienced its own static--including several incidents
:that police insist put their safety at risk. This summer, Irvine
:officers complained that new radios failed to pick up critical
:information from dispatchers during an office building search for a
:murder suspect.
:
: "I think we've gone backward instead of forward," said Irvine
:Police Officer Jeff van der Sluys Veer. Some of his colleagues now
:rely on their own cellular phones and pagers, he said, "anything they
:can to maintain communications."
:
: The problem is part physics and part finances.
:
: The design of police radio systems makes it difficult for signals
:to penetrate the heavy steel and concrete of office buildings, parking
:garages, shopping malls and even hospitals. As these structures
:sprout, they present major obstacles for officers trying to keep in
:touch with each other.
:
: Wireless phones also operate with radio waves, but engineering
:experts say they often provide far better service than police radios
:because the telephone companies place more radio towers in highly
:developed areas. Local governments simply don't have the money to
:match that kind of coverage--even with state-of-the-art systems.
:
: The problems are being closely watched in cities across the
:nation. The Los Angeles County Sheriff's Department, which also is
:building a new radio system, has hired a consulting firm to study the
:problems elsewhere and make recommendations.
:
: The quality of radio service varies greatly--even among agencies
:purchasing the same type of advanced systems. San Diego's new network
:is similar to Orange County's, but officials there said they've
:experienced few problems and are generally happy with it.
:
: In dozens of cities, however, police and fire officials have
:faced signal failures in patrol areas and inside malls, hospitals and
:even their headquarters. In many cases, the breakdowns have fueled
:cost overruns and triggered complaints that new radios are putting
:lives at risk.
:
: "Our society has become such a technological monster that . . .
:public safety has just been overshadowed," said Alan Burton, an
:Oregon-based consultant on emergency communications.
:
: Police and fire departments were once leaders in communications

:technology. In the 1920s, Detroit police unveiled the country's first
:one-way car radio. The development was quickly followed by two-way
:police radios. And soon, officers came to view their radios as an
:indispensable part of their crime-fighting arsenal.
:
: Until the early 1990s, most police radios operated at frequencies
:that were 400 megahertz or less--the same frequencies used by the
:burgeoning wireless communications industry. The explosion of cell
:phones and other technology sparked a modern-day "land rush" for radio
:frequencies.
:
: Police and fire departments found themselves without space to add
:radio channels although their populations--and emergency call
:volumes--were rising. As calls flooded dispatch centers, officers had
:to wait in line to make a call--often delaying response times by
:crucial minutes.
:
: The answer was for police to switch to higher, less crowded
:frequencies. But as a growing number of agencies made the conversion
:over the last few years, the limitations with these frequencies have
:become apparent.
:
: The biggest complaint is that the radios don't always work in
:many big structures and throughout entire patrol districts. Experts
:say radio waves on higher frequencies cannot travel as far as those on
:the low frequencies previously used. To compensate, public safety
:agencies must add radio towers, which is often cost prohibitive.
:
: Additionally, the technology is vulnerable to interference from
:wireless phone transmissions. Technicians have discovered that some
:cellular phone sites reduce nearby police radios to little more than
:static.
:
: Fixing Problems Can Be Costly
: Orange County began upgrading its system after years of
:complaints about slow response times, particularly during the Laguna
:Beach firestorm. But the initially promising 800-megahertz system
:quickly drew concerns.
: In Tustin, for example, police couldn't hear dispatchers while
:inside their own headquarters until officials installed extra
:equipment to help. In an effort to improve coverage in buildings and
:reduce radio failures outside, technicians spent thousands of dollars
:adding equipment to the Tustin police building and boosted the
:strength of radio signals in Irvine.
: Worried county officials delayed expansion of the network for
:more than five months while technicians worked on the glitches. Other
:agencies are only just getting ready to join the system.
:
: Officials said they won't know the extent--or cost--of any
:additional improvements needed in Orange County until the entire

:system is up and running. Technicians hope it will be minimal, but
:other agencies such as police in Kansas City, Mo., and the Delaware
:State Police have placed the cost of patching holes in their new radio
:networks in the millions.
:
: Despite the recent fixes in Irvine and Tustin, police continue to
:report that radios sometimes produce garbled messages and don't work
:in some large buildings. Meanwhile, some officers say they worry that
:the snafus might presage the kinds of serious failures seen elsewhere.
:
: 'This is supposed to improve public safety," said Irvine Sgt. Dave
:Mihalik, "not make it harder."
:
: While no one has been hurt in Orange County, other agencies report
:more serious breakdowns.
:
: "Dead spots" are reported elsewhere, including Portland, Ore.,
:where a new 800-megahertz radio network was touted as state-of-the-art
:technology when it was installed in 1994.
:
: In July, the Oregon OSHA fined the city $3,600 after determining
:that the radio system was already overtaxed and that failures
:sometimes prevent police officers from calling for help.
:
: "Officers are disgusted," said Sgt. Lonn C. Sweeney, who filed the
:complaint. "I couldn't look my officers in the eye and send them out
:on the street."
:
: One horror story cited about the potential danger of radio
:failures occurred in Atlanta on Oct. 12, 1997. That evening, two
:patrol officers confronted a man accused of hitting his girlfriend.
:The suspect quickly became aggressive, and one of the
:officers--Patricia Cocciolone--later testified that she radioed for
:help. But the call was never heard.
:
: Moments later, the man emerged from his apartment with an assault
:rifle and unleashed a volley of shots. Cocciolone suffered wounds to
:her head, hip and hand. Her partner, Officer John Sowa, was killed.
:
: Though it's arguable whether the call could have saved the
:officers, the episode shocked colleagues and focused attention on the
:transmission dead spots, said Chip Warren, vice president of the
:International Brotherhood of Police Officers, which represents Atlanta
:officers.
:
: "This is putting officers' lives in danger," he said.
:
: Yet building a radio system that will cover every inch of a city
:at all times is virtually impossible, especially those with large
:buildings or hilly areas, according to radio technicians.

:
: "There are just places that radio waves won't go," said Pat
:Sturmon, a spokeswoman for Motorola Inc., which manufactures public
:safety radios. "If you have a budget, you can design anything you want
:it to do. But no system is perfect. There are always going to be dead
:spots in any system."
:
: In 1995, police officers and firefighters in Kansas City, Mo.,
:determined that their new, $18-million radio network failed in many
:areas of the city.
:
: Frustrations soon erupted. Firefighters said the radios were so
:unreliable inside hospitals, malls and large apartment complexes that
:some had stopped taking them on calls.
:
: One firefighter claimed his radio failed while he was in a burning
:building, forcing him to leap through a first-floor window to escape
:the flames.
:
: In another case, two police officers said their radios failed to
:work when they were each shot during a foot chase. One of the wounded
:officers had to run in circles just to find a spot where the radio
:would work so he could call for help, they said in court records.
:
: An independent review of Kansas City's communications system
:blamed weak signal strength for the problems and recommended adding
:antenna sites throughout the city. The cost to taxpayers to fix the
:problems: $10 million.
:
:
: Sheriff's Officials Learn From Others
:
: The seriousness is not lost on officials overseeing similar
:upgrades in Los Angeles.
:
: In addition to hiring a consultant, the Sheriff's Department is
:talking to officials in Irvine and elsewhere to better understand the
:shortcomings of their systems and how to get the best possible
:coverage.
:
: "We're going to look at what other people are doing," said
:Sheriff's Capt. Robert Sedita, who runs the department's
:communications and fleet management bureau. "People who have already
:gone through this have learned a lot."
:
: The goal is to prevent similar problems--but many experts doubt
:that is possible as wireless phone sites mushroom to meet the
:relentless demand for personal communications.
:
: And until engineers can build the "perfect" system, experts said,

:officers must continue to take into account the problems with coverage
:when using the radios. In some cases, that means requesting backup
:during even the most routine calls in areas where radio coverage is
:patchy.
:
: "I haven't been encouraged that there is going to be a lot of
:improvement," said Harlin McEwen, chairman of the International Assn.
:of Police Chiefs' communications and technology committee.
:
: "As [public safety] technology gets better, the rest of the world
:is not sitting still. . . . You give up old problems for new ones."
:
:* * *
:
:
: Static Over Police Radio
: Police officers using Orange County's new 800-megahertz
:radio system report that missed calls from dispatchers, garbled
:messages and dead spots in office buildings threaten safety
:and response times.
:* * *
: OLD SYSTEM: 400 MEGAHERTZ
: Longer wavelength travels better over hills and around buildings.
: Lower frequency travels twice as far as new system
:* * *
:NEW SYSTEM: 800 MEGAHERTZ
:Shorter wavelength delivers a clearer signal. But some agencies
:report the signal has difficulty penetrating buildings.
:Higher frequency needs extra towers to reach same distance
:covered by old system

No, son, freedom of speech is a precious thing but what you are doing is not considered protected speech under that wonderful clause... You, sir, are a spammer... And not a very smart one at that...

So go off and play with your G.I. Joe dolls while you feverishly finger your latest issue of SOF magazine... You're a comic book commando who couldn't buy the muddied ones a draft at the NCO club if you had a million dollars...

You're a phony, pure and simple... Or you could just post your DD Form 214 to prove otherwise...

Put up or shut up, yenni...

The "IDL" is a translation of your home DL. If you're an American overseas, your home state license is valid by itself in most Western European countries. The IDL is still handy to have, as a translation into multiple languages so the local cop has at least a chance of knowing what you're legal to drive... In other countries, the IDL is required - but so is you home license with it.

The reverse is also true. Someone from France visiting here, for example, does *not* need an IDL to be legal to drive in the States. But if that French person were pulled over in Montana, it sure would be nice to have that tanslation handy. If that foreign person *just* has an IDL, you aren't licensed, as far as our laws are concerned.

Funny this should come up now.

Our old radios weren't so hot. They were supposed to install repeaters, but being a nationwide agency who may travel hundreds, even thousands of miles away from our duty station, this wasn't much of a plan. Our radios would work with perhaps two or three other duty stations, and no more, since they each had their own codes and frequencies.

They were iffy enough that I bought and carry my own cell phone, and 90% of it's use is work related.

They demanded we turn in our radios so they can be reprogrammed. After we (I "forgot" to turn mine in, and I'm sticking to it:-)) turned them in, we were informed they would not be returned. We would get a "new" and "better" system.

One of our offices just got Nextel phones. I'm thinking "Hey, somebody got smart! A nationwide communication system that's already proven!" We were informed that we "may" not get the same exact thing.

I just caught a peek at our new radios. They look a lot more fancy than the old ones, but alas, they too need repeaters, and they are not compatible with our old system.

I'm waiting for either smoke signals or the tried and true can/string system.

Pagan

614. Major Solar Event

'Severe' solar storm zaps Earth
By LEE BOWMAN
Scripps Howard News Service
November 09, 2000

- The sun has welcomed the crew of the International Space Station Alpha to the neighborhood with one of the most powerful solar radiation storms in a quarter-century, but NASA officials say the men are in no danger.

The storm, rated "severe" on the government's space weather scales, produced radiation levels Wednesday and Thursday that could rise to more than the equivalent of 10 chest X-rays for passengers on jets flying nearer Earth's poles, and higher still for astronauts orbiting beyond Earth's protective atmosphere.

The event, which is expected to gradually subside over the weekend, could also adversely affect some satellite operations and will likely disrupt radio communication at high latitudes.

"This is a pretty dramatic event, with some very high fluxes at very high energies. It's what we'd call a 'hard' event in terms of these energy levels,'' said Joe Kunches, a senior forecaster at the Space Environment Center in Boulder, Colo., part of the National Oceanic and Atmospheric Administration.

Russian flight controllers for Alpha have asked station commander Bill Shepherd to set up a radiation-monitoring device inside Russian-built crew modules as a precaution.

Rob Navias, a spokesman for the National Aeronautics and Space Administration, said similar devices are used during each space shuttle mission and will sound an audible alarm if radiation reaches a preset level.

Were that to happen, the crew would move to the end of the Zvezda service module near where the Soyuz spacecraft is docked, since that part of the space station offers the most protection.

"Even if it reaches levels that would trigger that alarm, the flare would have no impact to crew health or crew safety," Navias said.

Kunches said only three other storms of this strength have been logged since instruments started recording space weather data in 1976. NASA records indicate that a space mission with a human crew was under way during only one of these storms, an October 1989 flight of the Space Shuttle Atlantis, which caused no ill effects for the crew.

The event, caused by a group of sunspots that are now near the sun's horizon, is expected to also increase geomagnetic activity and boost the visibility of the northern lights to high intensity, making them visible over much of the northern United States by Saturday.

Scientists expect only three storms of this strength to take place during each 11-year solar cycle. Another, slightly stronger storm, already erupted in July. The current cycle of solar activity is now near its peak.

SPACE WEATHER BULLETIN #00- 11
2000 November 09 at 12:20 a.m. MST (2000 November 09 0720 UT)

**** SEVERE SOLAR RADIATION STORM ****

A severe solar radiation storm began today, 8 November, at 4:50 p.m. MST (2350 UT), and has reached a level of S4 on the NOAA Space Weather Scales. The storm, which currently ranks as the fourth largest since 1976, is expected to peak over the course of the next several hours and then slowly diminish over the next three to four days.

This severe radiation storm could pose a hazard to the astronauts on the International Space Station as well as passengers on commercial airlines flying at high latitudes. The storm could also adversely effect the operation of satellites.

Yeah. Wait till they come and kick in your door and take your radios away Dave. Unfortunately when the police find out that your radio gear is as good or better than theirs they will find someway to get their feet in the door and shut you down. Then they will confiscate your whole house, kill your pets, and destroy the rest of your life. It has happened before and will continue to happen to people that are operating completely within the law. The govt is out of control even when it comes to little old scanners. God forbid you should actually be a licensed ham and actually have radios that transmit. Then you will also be labeled as a terrorist. The list goes on and on. I also find it appalling that they would label all scanner use as criminal with nothing other than finding one in some crooks car. Typical for the govt to stereotype things. So now your scanner is a burglary tool. And you just thought it was a scanner. Let us keep an eye on them fore they are definitely watching us. For a little story on what can happen.

IF you'd read up on the Founding Fathers you'd see that their opinion
of voters who don't bother to properly vote have no business voting in
the first place. In fact, originally only property owners were
considered to be eligible to vote.
I can't imagine any of them feeling too much sympathy for any voter who
misread his ballot, and especially a type of ballot that had been
repeatedly used, both there and elsewhere-INCLUDING Cook county IL.
Suddenly on a close election it becomes an "issue". Nonsense.

Most of the 19K who voted for two candidates went back and obtained
another ballot and indeed voted for the candidate they wanted to.
The great majority of those 19K ballots are just waste paper.

Actually, I think it may be time for a little civil unrest on the part of Republicans. Gore and the Democrats are working hard to steal this election away from Republicans, and so far there has been almost no response from rank and file Republicans. No disputes of Democratic wins around the country. No lawsuits. Indeed, as far as can be determined, not even a single demonstration is planned anywhere in the country.

Yet, every single day, the world is shown picture after picture of large demonstrations involving Democrats on television. And, every single day, the press is right there in the middle of those demonstrations airing interview after interview with those Democrats. At this point, I'm sure the entire world is convinced that the only people who really care about this election is the Democrats.

Republicans need to realise that, at times, the only way to get what you want in this country is to raise a little hell. Blacks in this country are fully aware of that. In fact, blacks in this country have raised so much hell over the years (demonstrations, burning buildings, and acts of violence) our government is at the point where it is afraid not to give blacks everything they want.

Even most whites in this country are willing to do almost anything to prevent more trouble by blacks. This includes an almost unlimited affirmative action program, massive financial aid to black communities, rights that are widely denied to whites, and a long list of other benefits designed to keep blacks happy. And, in addition, most whites accept, without resistence, the huge tax burden required to keep these massive benefits for blacks going.

No wonder Republicans in this country are treated like second class citizens. In spite of all the guns we own, and all the tough talk we like to throw around, when push comes to shove, we act like a bunch of whimps.

And we're doing it again in this election. Gore is going to be the next President of the United States. Why? Because we're going to sit on our ass and let him become the next President. If you really don't want to see that happen, then stand up and do something about it.

You can start by talking to other Republicans (on the internet, in your neighborhood, or whatever) about the need to do something. Feel free to use anything in this message during your conversations with those other Republicans (heck, feel free to use this very message).

Once you have agreed on the need to do something, the next step is to decide what you want to do. Perhaps you might want to set up a demonstration in your home town. Or perhaps you might want to raise hell with the press for showing so many interviews with Democrats. Or perhaps you have something else in mind. I can't tell you what to do. All I can do is urge you to do something. Anything is better than nothing.

Don't do it for Bush. Don't do it for the Republican party. Don't do it for the country. Do it for yourself, your family, and your future.

Not so fast. There are always *many* votes that are not counted till
well after election day, and this year is no exception. In fact there
will be even more. According to reports California alone has over a
million and a half. And the demographics of absentee voters frequently
do not follow the normal voter pattern. The majority are known to be
more mature, successful and conservative.
In 1996 there were over 6 million votes that were added to all totals
after the election day totals were reported, but since it was not close
the outcome of the presedential election was not affected. This time may
be a diffent story in several states, and those uncounted votes could
completely revamp all the "News" that we have been bombarded with.

The time has come to put a leash on the news media and insist that
they end their fraudulent election night activities and report only on
actual voting results, not conjecture and "exit polls" which tell
nothing useful, and at worst guide late Wwestern voters to jump onto
some tantalizing "bandwagon". I think that has beem made more than clear
enough dring this election.

This is really something! It should be obvious to anyone that communications privacy is a requirement for effective police work, and a great benefit in other kinds of public service communications. Would you like your name and condition being monitored by entertainment-oriented listeners when you're being treated by paramedics? How about if your house is on fire? I know that some people would like to get their thrills by listening in to a developing stake-out, a sting operation or a raid, but it's clear that this could also endanger the lives of the officers involved. As for monitoring the police bands in a "watchdog" mode -- this is of marginal value at best. Voyeuristic giggles and thrills just aren't worth the loss of privacy and security.

The current team has performed no EVA's since arrival on station.

However the lower voice you heard possibly was the ground control being heard in close proximty to the mike one of the team was using....? That's my best guess....I've heard that too...and assumed it was ground station via the ISS station's mike. If not that, perhaps it's the second Russian team member but I would ahve expected his voice to be the same level.

Again you are incorrect! The when a ballot is replaced because a
voter "goofed" the election official on the scene MUST account for
these ballots. the 19K ballots WERE ones sent through the system AS
VOTES and were "culled" because they had more than one hole punched.

Get your facts right.

I, for one, agree with Curt here, and if you think that having some citizens listening in on the Police will prevent/slow down/inhibit corrupt or illegal activity, then you've got to wonder why you pay a Police Chief.--- or have a Polcie Commission. Fact is, everyone knows that radio channels, phone channels, *and* MDT channels have been recorded for a long time, and it doesn't take a rocket scientist of a cop to figure out that if he/she wants to plan something illegal or in violation of department rules, they'll meet in person with their other cohorts. Or use their cell phones. Or "click three times" with their mic.

On the other hand, carrying a scanner tuned into the local (unencrypted) police channel is probably a job requirement for burglars here. Bad guys know the address of the place they have just broken into, and they can listen just like the law-abiding citizens and bail out when they hear their address called.

Yeah, that sort exists. Knowing what's going on in your home area allows you to keep your business yours, instead of "sharing" it with some hooligan.

Wait until you come home and find half your stuff missing, then discover that burglers have been working the area and you did not know it so you could finally put on that new lock, or fix the window they crawled through.

The ballot proceedure was discussed thouroughly on CNN and FOX NEWS.
Election officials were quoted to the fact that ballots that were
returned by the voters as incorrectly punched are to be retained and
documented and accounted for. A new ballot was issued but the old
ballot WAS retained.

Proof is where ? - Newsmax.com ? Gore only needs a few hundred votes that are rightfully his to win this election, so "most" doesn't get it.

>of the 19K who voted for two candidates went back and obtained
>another ballot

There was enough confusion and hell raised /during/ the election day that the election director issued a bulletin on how to use the ballot correctly.

>and indeed voted for the candidate they wanted to.

Perhaps you know more about it than that leftist / socialist / commie - Pat Buchanan ?

>The great majority of those 19K ballots are just waste paper.

USA TODAY - Fri 11/10/00 - page 2A - Column4

'Pat Buchanan said on NBC's Today Show that he believed most of the 3407 votes he got in Palm Beach County belonged to GORE and that people had voted for him (Buchanan) by mistake because of a confusing change in the design of the ballot paper. Add to that the 19,000 ballots invalidated because they were punched twice, and the outcome would be REVERSED, he said.

"Al Gore very probably won Florida and therefore won the nation and he won the presidency of the United States," Buchanan Said. "I don't know, for one, what exactly we ought to do about that."

was a >member.

That part is true except he was more than admin, he was a dick tator.

>The list rules, that all received and agreed to abide by when they signed
up, was that because it was a group >for all ages, profane language would
NOT be tolerated.

True.

> K1OIK had multiple warnings for his language,

Lie.

> and, finally sent a message to the group filled with profane language, and
with the final words from him were: >"Maybe THIS will give that
(*&&^^%()(*& a reason to throw me off". And, it is all in the archives.

True.

>I have no problem with Burt, nor his profanity.

Lie. he said in several Emails he was very much against profanity. I am too
except in extreme cases. N9GSU is an extreme case.

> I gave him several warnings, more than I would've given anyone else, and
on the last warning I told him if he >continuted I would not only
unsubscribe him, but would also report him to his Email providers TOS.

He gave ONE warning and NEVER ever mentioned reporting me to anyone
whatsoever.
There was no cause whatsoever to bring in my email provider as my postings
to the list did not involve my email provider, further profanity is allowed
under the TOS of the provider and finally it was an excessive response.
In all the time on the net I never met a more repugnant person than N9GSU,
he speaks as a man of God but he is lower than the snake in the grass .

The communication is fullduplex, the groundstation is on another frequency.
So even when you are close to it, you won't hear it when you are on
143.625. What you are hearing is the audio feedback.

Mike,

I had a similar problem with Cushcraft. It took almost 6 months to get a new base section for my 10 year old R7 HF vertical antenna. They apologized profusely and told me there was some sort of problem with the company that supplied their aluminum tubing.

What are us hams supposed to do? I have heard of an energy crisis due to events in the Middle East, but heaven forbid, what if there is truly an aluminum tubing crisis??? HIHI

One example would be the fact I used a profane word to you and you deemed that sufficent to attempt to have my email account cancelled causing me all kinds of havoc had you been successful. It was a response well out of proportion to the "sin." If you did not like the use of the single commonly used profane word in a ham radio message group you could have simply had me tossed from that group (which you did as well). Then you claim to be a caring kind considerate person. If you called me an asshole I am not such a little person to complain to anyone whatsoever. You have a right to your opinion.
The only difference between you and Hitler is the fact you do not have a country to abuse.

Well, Burt, as usual. you didn't tell the whole story, as a matter of fact,
less than HALF the story. For those that aren't familiar with what happened, I
was the list admin of a ham radio mailing list, of which Burt was a member.
The list rules, that all received and agreed to abide by when they signed up,
was that because it was a group for all ages, profane language would NOT be
tolerated. K1OIK had multiple warnings for his language, and, finally sent a
message to the group filled with profane language, and with the final words
from him were: "Maybe THIS will give that (*&&^^%()(*& a reason to throw me
off". And, it is all in the archives.

I have no problem with Burt, nor his profanity. I gave him several warnings,
more than I would've given anyone else, and on the last warning I told him if
he continuted I would not only unsubscribe him, but would also report him to
his Email providers TOS. He continued, and I held to my word, unlike Burt, who
gave his word as a "guest of the list" that he would always abide by the
rules.

The issue isn't his profane language, it's the issue of him continuing behavior
that he full well know was unacceptable after knowing and being warned of said
behavior's
consequences. But, when the consequences actually came, well, it was a
different story for him.

:>on scanners and ham gear. Activities like this will be used
:>to justify it.
:
:It makes much more sense for the police to switch to encrypted
:communications, or at least something more difficult to receive than
:FM voice and standard pager data protocols. And, in fact, that seems
:to be happening.

Actually that has led to a court fight in Florida. The cops did
encrypt their voice traffic. Now everyone is afraid that the cops
are hiding abusive activities. As it was, Bill Check was able to
show that the NYPD MDTs were being used to tell dirty jokes
and make racist comments about suspects.

I would expect that the police will be forced by the courts to
only encrypt with a court order (court supervision, and only
for a limited time) as it is now done with search warrants and
wire taps.

classified: UNCLASSIFIED

While this has to do with LAPD,
the same problems will show up
here in Indiana, and even overseas.

Police Say Radios Too Low-Tech
By JACK LEONARD, Times Staff Writer

But that was before sprawling office towers and parking structures started blocking radio waves. And before wireless phones--with their crystal clear reception--upped expectations for two-way communication, while at the same time stealing frequencies from radio users.

Now, it seems, in this era of technological innovation, the crackling police radio is starting to show its age.

Police and fire agencies across the country are using antiquated equipment developed in the 1950s and '60s that has failed in major emergencies, including the 1992 Los Angeles riots and 1993 Laguna Beach firestorm.

That problem is prompting departments to spend hundreds of millions on cutting-edge radio networks, only to encounter many new--and sometimes dangerous--breakdowns.

In one extreme case in Atlanta, a new police radio network failed to pick up an officer's call for help just moments before a rifle-wielding suspect wounded her and killed her partner. In Delaware, firefighters resorted to shouting out of windows because their $50-million communications system didn't work inside high-rise buildings.

In Los Angeles, police use a 21-year-old network so out of date that manufacturers have stopped making parts for it. For years, cash-strapped technicians had to cannibalize parts from some hand-held radios to fix others. The problems reached a crisis during the 1992 riots, when officers in the field faced a critical shortage of portable radios.

The city is installing a new system.

Orange County began rolling out an $80-million network earlier this year and experienced its own static--including several incidents

that police insist put their safety at risk. This summer, Irvine officers complained that new radios failed to pick up critical information from dispatchers during an office building search for a murder suspect.

"I think we've gone backward instead of forward," said Irvine Police Officer Jeff van der Sluys Veer. Some of his colleagues now rely on their own cellular phones and pagers, he said, "anything they can to maintain communications."

The problem is part physics and part finances.

The design of police radio systems makes it difficult for signals to penetrate the heavy steel and concrete of office buildings, parking garages, shopping malls and even hospitals. As these structures sprout, they present major obstacles for officers trying to keep in touch with each other.

Wireless phones also operate with radio waves, but engineering experts say they often provide far better service than police radios because the telephone companies place more radio towers in highly developed areas. Local governments simply don't have the money to match that kind of coverage--even with state-of-the-art systems.

The problems are being closely watched in cities across the nation. The Los Angeles County Sheriff's Department, which also is building a new radio system, has hired a consulting firm to study the problems elsewhere and make recommendations.

The quality of radio service varies greatly--even among agencies purchasing the same type of advanced systems. San Diego's new network is similar to Orange County's, but officials there said they've experienced few problems and are generally happy with it.

In dozens of cities, however, police and fire officials have faced signal failures in patrol areas and inside malls, hospitals and even their headquarters. In many cases, the breakdowns have fueled cost overruns and triggered complaints that new radios are putting lives at risk.

"Our society has become such a technological monster that . . . public safety has just been overshadowed," said Alan Burton, an Oregon-based consultant on emergency communications.

Police and fire departments were once leaders in communications technology. In the 1920s, Detroit police unveiled the country's first one-way car radio. The development was quickly followed by two-way police radios. And soon, officers came to view their radios as an indispensable part of their crime-fighting arsenal.

Until the early 1990s, most police radios operated at frequencies that were 400 megahertz or less--the same frequencies used by the burgeoning wireless communications industry. The explosion of cell

phones and other technology sparked a modern-day "land rush" for radio frequencies.

Police and fire departments found themselves without space to add radio channels although their populations--and emergency call volumes--were rising. As calls flooded dispatch centers, officers had to wait in line to make a call--often delaying response times by crucial minutes.

The answer was for police to switch to higher, less crowded frequencies. But as a growing number of agencies made the conversion over the last few years, the limitations with these frequencies have become apparent.

The biggest complaint is that the radios don't always work in many big structures and throughout entire patrol districts. Experts say radio waves on higher frequencies cannot travel as far as those on the low frequencies previously used. To compensate, public safety agencies must add radio towers, which is often cost prohibitive.

Additionally, the technology is vulnerable to interference from wireless phone transmissions. Technicians have discovered that some cellular phone sites reduce nearby police radios to little more than static.

Fixing Problems Can Be Costly
Orange County began upgrading its system after years of complaints about slow response times, particularly during the Laguna Beach firestorm. But the initially promising 800-megahertz system quickly drew concerns.
In Tustin, for example, police couldn't hear dispatchers while inside their own headquarters until officials installed extra equipment to help. In an effort to improve coverage in buildings and reduce radio failures outside, technicians spent thousands of dollars adding equipment to the Tustin police building and boosted the strength of radio signals in Irvine.
Worried county officials delayed expansion of the network for more than five months while technicians worked on the glitches. Other agencies are only just getting ready to join the system.

Officials said they won't know the extent--or cost--of any additional improvements needed in Orange County until the entire system is up and running. Technicians hope it will be minimal, but other agencies such as police in Kansas City, Mo., and the Delaware State Police have placed the cost of patching holes in their new radio networks in the millions.

Despite the recent fixes in Irvine and Tustin, police continue to report that radios sometimes produce garbled messages and don't work in some large buildings. Meanwhile, some officers say they worry that the snafus might presage the kinds of serious failures seen elsewhere.

'This is supposed to improve public safety," said Irvine Sgt. Dave Mihalik, "not make it harder."

While no one has been hurt in Orange County, other agencies report more serious breakdowns.

"Dead spots" are reported elsewhere, including Portland, Ore., where a new 800-megahertz radio network was touted as state-of-the-art technology when it was installed in 1994.

In July, the Oregon OSHA fined the city $3,600 after determining that the radio system was already overtaxed and that failures sometimes prevent police officers from calling for help.

"Officers are disgusted," said Sgt. Lonn C. Sweeney, who filed the complaint. "I couldn't look my officers in the eye and send them out on the street."

One horror story cited about the potential danger of radio failures occurred in Atlanta on Oct. 12, 1997. That evening, two patrol officers confronted a man accused of hitting his girlfriend. The suspect quickly became aggressive, and one of the officers--Patricia Cocciolone--later testified that she radioed for help. But the call was never heard.

Moments later, the man emerged from his apartment with an assault rifle and unleashed a volley of shots. Cocciolone suffered wounds to her head, hip and hand. Her partner, Officer John Sowa, was killed.

Though it's arguable whether the call could have saved the officers, the episode shocked colleagues and focused attention on the transmission dead spots, said Chip Warren, vice president of the International Brotherhood of Police Officers, which represents Atlanta officers.

"This is putting officers' lives in danger," he said.

Yet building a radio system that will cover every inch of a city at all times is virtually impossible, especially those with large buildings or hilly areas, according to radio technicians.

"There are just places that radio waves won't go," said Pat Sturmon, a spokeswoman for Motorola Inc., which manufactures public safety radios. "If you have a budget, you can design anything you want it to do. But no system is perfect. There are always going to be dead spots in any system."

In 1995, police officers and firefighters in Kansas City, Mo., determined that their new, $18-million radio network failed in many areas of the city.

Frustrations soon erupted. Firefighters said the radios were so unreliable inside hospitals, malls and large apartment complexes that some had stopped taking them on calls.

One firefighter claimed his radio failed while he was in a burning building, forcing him to leap through a first-floor window to escape the flames.

In another case, two police officers said their radios failed to work when they were each shot during a foot chase. One of the wounded officers had to run in circles just to find a spot where the radio would work so he could call for help, they said in court records.

An independent review of Kansas City's communications system blamed weak signal strength for the problems and recommended adding antenna sites throughout the city. The cost to taxpayers to fix the problems: $10 million.

Sheriff's Officials Learn From Others

The seriousness is not lost on officials overseeing similar upgrades in Los Angeles.

In addition to hiring a consultant, the Sheriff's Department is talking to officials in Irvine and elsewhere to better understand the shortcomings of their systems and how to get the best possible coverage.

"We're going to look at what other people are doing," said Sheriff's Capt. Robert Sedita, who runs the department's communications and fleet management bureau. "People who have already gone through this have learned a lot."

The goal is to prevent similar problems--but many experts doubt that is possible as wireless phone sites mushroom to meet the relentless demand for personal communications.

And until engineers can build the "perfect" system, experts said, officers must continue to take into account the problems with coverage when using the radios. In some cases, that means requesting backup during even the most routine calls in areas where radio coverage is patchy.

"I haven't been encouraged that there is going to be a lot of improvement," said Harlin McEwen, chairman of the International Assn. of Police Chiefs' communications and technology committee.

"As [public safety] technology gets better, the rest of the world is not sitting still. . . . You give up old problems for new ones."

* * *

Static Over Police Radio
Police officers using Orange County's new 800-megahertz radio system report that missed calls from dispatchers, garbled messages and dead spots in office buildings threaten safety and response times.
* * *
OLD SYSTEM: 400 MEGAHERTZ

Longer wavelength travels better over hills and around buildings.
Lower frequency travels twice as far as new system
* * *
NEW SYSTEM: 800 MEGAHERTZ
Shorter wavelength delivers a clearer signal. But some agencies
report the signal has difficulty penetrating buildings.
Higher frequency needs extra towers to reach same distance
covered by old system

I guess after 8 years of defining what "is" is, we could expect that Al Gore would try to redefine a ballot.

I watched while the republican showing a lot of class in MO. conceded the election to a dead guy, inspite of the most egregious violations in the voting process in St. Louis.

Gore is the same kid that whined in the playground, then took his ball and went home when he couldn't pitch, and in general has zero statesmanship. Neither he nor Clinton give one Damn about the country, the constitution, or the American public. I, Me, Mine... The Clinton/Gore mantra!

Thanks to Bob Reynolds for passing along a link that was floating
around on the Openness eGroups list. This article points out an
increased level of cooperation between the police and public
Web maps pinpoint crime activity

What we need to do now is print out copies and see that they get put
up on bulletin boards in every PD station across the country or at
least e-mailed to police chiefs for awareness. Then we need a national
campaign to further enforce this bond and perhaps coordinate with
neighborhoold watch programs by using scanners to aid citizens in
being that extra pair of eyes that law enforcement can use to their
advantage.

Such a plan, if effectively executed, would prove the importance of
scanner listeners which would hopefully cast our hobby in a more
favorable light. Just as amateur radio license holders are held in
high regard for the capacity they serve in times of emergency (which
usually exempts them from many laws), scanner listeners could hold a
similar rank for helping to police our communities and help apprehend
fleeing suspects.

From there we could only hope that this would create an awareness of
the importance of our efforts as hobbyists and prove to legislators,
based on actual cases, that we don't need more anti-monitoring laws
enacted because there is a group of invidividuals who are using
scanners for public safety

Web maps pinpoint crime activity
Chicago police take the lead in getting data to community

By Kevin Davis, Special for USA TODAY

CHICAGO ï¿½ With a few clicks of a mouse, Sandy Campbell can call up a
computerized map of his neighborhood to see where the latest crime
problems can be found.

Chicago's site, "Citizen ICAM," can be accessed at
www.ci.chi.il.us/CommunityPolicing.
A recent check of the Chicago Police Department Web site showed a

concentration of drug-related activity about two blocks from his house. In all, the map pinpointed 104 crimes ï¿½ from battery and prostitution to narcotics and telephone threats ï¿½ within a half-mile of Campbell's home during a week-long period.

"In a flash, it will show you where things are happening," says Campbell, a member of his local Chicago Alternative Policing Strategy, known as CAPS. "Once you get this information, you can ask the police what they're doing to combat this. Are they beefing up patrols in the area?"

Last month, Chicago police launched a Web site that allows the public instant access to crime information. Its designers say it is the most advanced crime information site for public use in the USA.

"I'm really excited that we now have this available," says Campbell, 62, a retired real estate broker who lives on the city's north side. "The whole idea is to identify problems and think of ways to cooperatively solve them. The police really do want citizens to be involved."

Anyone with access to the Internet can call up the site, type in an address, intersection or police beat, and instantly get information dating back 90 days. The screen will display a map of up to a 1-mile radius of an address and show color-coded icons where crimes were committed. Reports are a week old.

For those who want more information, crimes can be listed in a chart with their case numbers, block of occurrence and whether an arrest has been made. Specific addresses and names of victims are not included.

Getting people involved

Within days of its debut, the system was overloaded. In the first two weeks, police say, there were more than 210,000 hits on the site, causing the department to expand its computer server capacity. Police are hoping residents use the site for more than satisfying their curiosity.

Sgt. Jonathan Lewin, coordinator of the police technology unit, helped develop the system to get more people involved in community policing. "It's something we've been talking about for a number of years," Lewin says. "This reflects our commitment to citizens to give them access to information. One of the things we've been talking about is getting more tools for citizens to help fight crime."

Arthur Lurigio, chairman of the criminal justice department at Loyola University-Chicago, says this information can make a difference. "One of the tried and true methods of crime prevention is to avoid places where there is a lot of criminal activity such as robberies or sexual assaults," he says. "People can avoid these areas and lower their risk of victimization."

Residents can also work with police to change those areas.

"They can ask police to step up patrols, and they can step up their own activities, such as starting up their own crime-watch groups or citizen patrols, and it can get more people involved in community policing," Lurigio says.

That's what Campbell is hoping for. "I believe the more people use this, the better attended our beat meetings will be because people will want to talk about what's going on."

The Web site grew from an internal program available only to police, who used it for crime analysis. Now the public can work on a similar system. "Nobody provides this level of interaction with reports, updates and arrest information," Lewin says.

Though that might be true, Chicago isn't the first city to make crime information available on the Internet. The U.S. Justice Department has been encouraging the development of such systems for both police and citizen use. Other departments, as well as some newspapers, have taken crime reporting to the Web in various forms:

The New Orleans Police Department has a site that allows users to check monthly crime reports in specific districts. Users also can search for information on specific crimes.

In Evansville, Ind., The Evansville Courier & Press, in cooperation with police, has a Web site that maps felonies throughout the city.

The Red Bluff, Calif., Police Department has a site with monthly crime-analysis maps. Users can specify a crime, such as burglary or drunken driving, and view a map of the city showing where those offenses occurred.

The Houston Police Department offers citizens access to monthly crime statistics on its Web site. The tables include the type of crime, the location and the date and time it occurred.

A new openness

This openness represents a shift in police departments, which traditionally have kept information to themselves.

"The initiative to share it with the public is really something new," says Robert Friedmann, chairman of the department of criminal justice at Georgia State University and an expert on community policing. "This is a promising development in law enforcement."

Campbell says this openness also helps strengthen the relationship between police and the public. He says residents often blame police for problems and expect them to solve them. "What began as an adversarial relationship has settled into something more cooperative."

Chicago police plan to improve their computer system in the coming months. The department soon will create a feature to allow parents to

type in their address and see a map showing the safest route to school, as well as safe havens where children can go if they feel threatened or encounter a crime. The map will show little footprints for children to follow.

Friedmann says that although the system has its merits, it can also be abused. Unscrupulous lenders or insurers, for example, could use the maps to "redline" ï¿½ refuse to provide service to certain areas. But "in all, I think the more information you give out to the public, to a point, is good," he says. "You get the message that the police department is open to the community."

Heard the ISS clearly on Thursday 11/9 in Northern Ohio from 1937 to 1942 GMT. I heard Two different voices, one signal stronger than the other, both in Russian, seemingly in conversation. I wouldn't think that I could hear the groundstation from here. Does anyone know the locations of groundstations in the USA authorized to talk to ISS? Is it possible that I was hearing module-to-module communication on that frequency? Possibly was it an EVA event I was hearing?

I heard the same stuff at the same time (approximately) here in Connecticut. It was clear that they're running full duplex - you could hear the other guy (ground) in Russian but in the background - much lower. The mix was either audio - you could actually hear the microphone 'creak' at one point --- or there's just a little 'sidetone' built into the system.

---Steve

The point he was making is that some people don't take the time to figure out what they are doing. These idiots who claim they did not know they were voting for the wrong candidate should have taken their time and read the ballot carefully and if they had any questions they should have ask. As far as those who punched two holes and then placed them in the ballot box, well that is really stupid. Why did they not get a new ballot? They screw up because of their own stupidity and now they want to try and put the blame somewhere else. Now you have the Gore camp yelling and beating their chests that Gore won the majority of the votes and Bush should give up the Florida electoral votes and let Gore win. Well it doesn't work that way, the winner is decided by the number of electoral votes, not by the popular vote. Winning the popular vote only give you some bragging rights and nothing more.

I agree. I seriously wonder if that affected the vote in Florida. If you're a Republican, why vote when the press is already saying that your candidate has lost in that state?

Of course, the same could be said for California, Oregon, and Washington. Since the press was already calling a winner, why vote at all?

Are you from Missouri, TooMany? I'm still trying to figure out how they can legally allow a dead man to run for office, and then allow his wife (who did not run, debate, or even voice her own opinions) to assume that office after her dead husband wins. Have the residents of Missouri lost their minds?

Well, sir, I've lived the same 53 years and a couple more, and the
events I've experienced are at variance with the ones you describe.
History is also at variance with your experience.

> 1. We got in the heat of Viet Nam under Johnson.

Let's do it chronologically.

> It was actually under Isenhour that we started sending "advisors".

Yes, Eisenhower was the first to start our involvement in Vietnam.

> I have the utmost respect for John Kennedy, and I think that, if he'd
> had a second term, Viet Nam would taken a different course.

Well, we'll never know, but he increased the number of troops going to
Vietnam.

While it is true that the highest ramping up of involvement was under
Johnson, he was actually the 3rd in line of people that felt we somehow
needed to be over there.

> 2. Nixon (I think) was the one who ordered the bombing of the North
> and the mining of Haiphong harbor.

There was off and on bombing of North Vietnam over a considerable
period, and to intimate that Nixon was the first is incorrect and
misleading. Ever hear of Operation Rolling Thunder? 1965-1968. Off and
on bombing of North Vietnam.

> Was he crooked? He went down in flames, however.

A great Republican hero. Have you read any of the transcripts? Fits in
great with your "unprincipled" discussion below.

> 3. When the Cambodians captured the Mayaguez (sic), President Ford did
> not blink; he sent the Marines and the Navy to recapture it.

That was sometime after he pardoned Nixon, wasn't it?

> Comparing that to the capture of the USS Pueblo under Johnson, I could
> not help but conclude, at my young age of 18 (1968, wasn't it) that
> Johnson was afraid of his own shadow!

What an apples and oranges comparison. The Khmer Rouge was barely a credible force at the time, and since we had just been smoked out of Vietnam, Ford figured a little victory wouldn't hurt, much like Granada and Kuwait later.

The Koreans, on the other hand, were a force in a highly volatile area (which still is) with fairly high powered weaponry. Moreover, the incident represented a completely new tactic by an agressor nation.

It wasn't as though Johnson did nothing. A task force was dispatched to the Sea of Japan, and reservists were called up for possible action. In the end, there was little that could be done under the circumstances. See http://www.usspueblo.org for details.

There were 7 years experience gained between the incidents which accounts for some difference as well. One can hardly call the prosecution of either incident a testament to one political entity or another.

> 4. When Carter was in, he canceled several defense plans as well as
> certain aircraft. As our military shrank, quality suffered, the
> Iranians felt they could get away with occupying our embassy and
> holding our diplomatic staff hostage.

Trying to draw cause-and-effect conclusions from disparate events leads to non-sequitirs. The fact is that the Iranian revolutionaries were mad at us for supporting the Shah of Iran, whom had just been overthrown. When we refused to return him to them and certain death, they reacted by storming the embassy. It was not because they thought our military was weak.

> He sent a "rescue" mission of undermaintained equipment, undertrained
> people which ended up an embarrassing failure in the desert.

Yet at the time, most people were extremely pleased and proud that *something* had been done. The same traits you credit Ford with glowingly. It just had an unfortunate conclusion.

> For the first time in my life, I saw 20% mortgages and unheard of
> inflation.

No you didn't. If you saw a 20% mortgage rate at all, it was under Reagan. See

http://www.theunitedgroup.com/html/body_interest_rate_history.html

for a reminder. In fact, mortgage rates haven't been lower in the last 30 years than under Clinton, nor higher than under Reagan/Bush. And the conservatives call those the "glory years."

Also, the worst inflation in the last 30 years was under Nixon/Ford. I had an in-grade pay raise withheld during Nixon's term in his attempt to control it. Remember his wage/price freeze? I sure do. Remember "WIN," and the Whip Inflation Now buttons Ford had passed out?

> 4. Under Reagan, I saw mortgages come down to reasonable levels, I was
> able to purchase my first home, and inflation was tamed.

See above. I don't doubt you purchased a home, but your recollection of inflation and interest rates is faulty.

> I watched as his administration re-armed and re-equipped the military
> so that such fiascos as in the Iranian desert wouldn't happen.

Translation: billions of dollars of deficit spending and a national debt we're still trying to pay off.

> I watched him go toe-to-toe with the Russian Bear and refuse to be
> intimidated by the communist bloc.

Puhlease. Toe-to-toe. Reagan didn't accomplish in 8 years against the Soviets what Kennedy did in a few days in 1962.

> While our deficit DID rise, the utlimate effect as regards the
> Russians was, we outspent them into oblivion, wrecking their
> ability to keep up in the arms race.

Most respected economists will tell you that the centrally planned economy of the Soviet Union was doomed to failure from the beginning. While they certainly spent money they shouldn't have, saying our out-spending them was responsible for the collapse is like saying a boxer beat another one by punching him in the fist with his face harder than the other guy punched his fist.

> The "Iron Curtain" came down after Mr. Reagan said on TV, "Mr
> Gorbachev, tear down that WALL!".

Chronologically correct, but if I stand on the beach tomorrow and command the sun to come up, will I be able to claim credit when, in fact, it does? There's that cause-and-effect problem again.

> Sure, it wasn't all his doing, but we DID witness these things and a
> pride in America that hadn't been seen in many years.

Well, we sure witnessed them, but I don't recall any particular pride. I recall a collective sigh of relief that the boogie man the republicans had been tilting at for the previous 40 years was gone and we could get out from under our desks and on with our lives.

> What good would Johnson's "Great Society" be if we were defeated and
> had no country to defend any more?

What a confusing statement. As a conservative, you should abhor Johnson's Great Society as much as FDR's New Deal, and below you excoriate it.

> 5. Again, under Bush Sr, we found ourselves at war,

What an achievement. Facing a difficult re-election bid, he figured a successful "war" ought to help things out just like the "invasion of Granada" got his mentor, Ol' Sleepyhead, re-elected.

> The objective was identified,

Wow, Bush did that all by himself?

> ...the mandate was clear.

That's not my recollection at all. There is still considerable debate over whether we served any useful purpose there other than to keep our gas prices a little lower a little longer.

> The war was prosecuted and concluded rapidly.

Yes, the elephant usually does overwhelm the ant. All that nonsense about Hussein's "3rd largest standing army." About as impressive as the invasion of Granada.

> Thanks to the groundwork laid by his predecessor, our military was
> more than adequate, possessed of the latest technology, the morale and
> will to win was high both within the ranks and at home.

> None of this wheedling, hem-haw hesitation so present during previous
> democratic administrations.

So the military spending in the 60s to equip and prosecute the war in Vietnam was bad, but the same in the 80s was good just because one administration was Democratic and the other was republican?

> 6. Finally, we've had Clinton for 8 years, undoubtedly the most left-
> leaning(?)

Most political analysts point out that Clinton's success (and re-election) was due to his ability to work toward the center and build centrist coalitions. That means coalitions of both liberals and conservatives. That hardly meets the definition of "the most left leaning" president in history.

> and unprincipled presidents in history.

Is that more or less unprincipled than Nixon? Even conservatives have a hard time defending his attitudes and activities.

> He visited the Soviet Union as a young man,

The crime here is....?

> never served in the military,

I've looked all over the Constitution, and I see no requirement for military service as a pre-requisite to the Presidency or any other political office.

> had a history of moral indescretions going back many years.

Sorry, moral indiscretions isn't in the Constitution either, and you'd be well advised to reconsider that in any political discussion since there is more than enough moral failing to go around in both parties; to wit: Gingrich, Packwood, Livingstone, Burton, Hyde, Bush...

> He championed the open acceptance of homosexuals within the ranks of
> the services,

Ah, the "queers in foxholes" boogie man.

> and had to backpedal on that.

Responsive to public opinion? Is that a fault?

> It, at least in part, caused the "early" retirement of senior generals
> who successfully led Desert Storm.

Really? Name them.

> Military morale and readiness have suffered due to his so-called
> "leadership".

Every few years, regardless of administration, the spectre of military morale and readiness is hashed out in the press. It seems to happen most when there's no war to fight.

> Constant assaults on personal rights

Such as a woman's right to choose what happens to her body? Don't even bother to respond to that, since I've read your "christian essays" elsewhere, and not only do I know what your position is, I know it is pointless to discuss it, because we will never agree.

> and freedoms

Such as?

> continue unabated in favor of "redistribution of wealth"--a tenet of
> socialists--thru taxes and

I see plenty of conservatives calling for and voting for taxes. And by the way, remember "read my lips, no new taxes?" Who said that? Then what did he do?

> legislation designed to remove guns from the law-abiding citizenry

The one area that conservatives are correct about. However, after years of conservatives wringing their hands over phantom gun control initiatives, I can still buy a pistol, a rifle, a shotgun, and ammunition as readily as I did in 1969.

> completely clueless to the fact that criminals will STILL have guns
> because laws don't have much effect on crime---it just sounds good in
> rhetoric and looks good on paper.

Well, not clueless, but I agree in principle.

> Finally, we have Mr. Gore, who would continue these policies, and
> perhaps, would attempt to move ever closer to BIG government, MORE re-
> distribution of wealth, restrictive regulations on corporations that
> reduce their ability to generate capital,

That's a lot of speculation and a lot of fancy rhetoric that is more
designed to scare people than to represent actual fact.

> and more "giveaway" programs (Like Johnson) that don't work,

Wait a minute. Weren't you extolling the virtues of Johnson's Great
Society above as something worth defending?

> but buy a lot of votes from people who want something for nothing
> rather than working to produce their OWN success.

Ha, ha, ha. A conservative talking about buying votes. Ha, ha, ha.

> Socialists, like Clinton/Gore believe that all the answers lie in
> centralized control of business, government, and the lives of
> individuals

Socialists might, but Gore doesn't. I'm sure that you won't believe that
the government is smaller now than 8 years ago, but I worked in it, and
I can tell you it is. Gore pledged to do that, and he did.

> because they believe that, in spite of the miserable failures of
> socialism in the past,

While the Soviet Union failed, there are other governments with
significant social programs that we generally consider quite successful;
Canada and Great Britain come immediately to mind.

> THEY are the ones who are so superior, so gifted, so anointed that
> THEY are the ones to control, almost believing themselves cloaked in
> the Devine Right of Kings. They believe that THEY can make socialism
> work.

A lot of bombast there. Actually, I think that attitude applies to just
about all politicians about all types of political institutions.

> NO system, no president, no congress is perfect. But the least hint
> of socialistic principles scares me to death. I do NOT want BIG
> government in my life. I do NOT want my hard-earned paycheck
> "redistributed" thru taxes to someone who buys steak for their dog
> with food stamps. I do NOT want, nor will I willingly give up my
> firearms to, socialistic ideals.

Well, you basically only list two fears there, but government is in your
life, whether you want it or not. What you're really saying, is you
don't want any of your paycheck taxed, which isn't going to ever happen.

Cite the case of food stamps going for steaks for a dog.

> That is what I believe, they're my own opinions, and you can trash
> them all you like!

When my kids were 4 they were of the opinion there was a monster under their bed. Over the years I showed them the errors of their thinking, and eventually they realized there are no monsters under beds. No trashing was necessary. They were also bright enough to figure out hooey from their peers when they heard it.

Now, that is funny. And perhaps it explains the whole problem. Those people in Florida were supposed to vote twice and didn't know not to do it on the same ballot. When someone later told them, they realised thay had made a mistake and now want to do it over again.

Heard the ISS clearly in Northern Ohio on Thursday from 1937-1942 GMT.
I heard two voices, seemingly in conversation with each other, one
signal more distinct than the other. I wouldn't think that I could
hear the ground station from here- is it possible that they were
communicating from module to module over this frequency? Or, perhaps
there was an EVA going on? Since I don't speak Russian, I couldn't
follow the actual conversation. Does anyone know the location of
groundstations in the USA that are authorized to talk to ISS?

South Vietnam is the common name for the state of Vietnam set up by Bao Dai, with French backing, on July 1, 1949. At that time, a new capital was established in Saigon (now Ho Chi Minh City). The following year, the US officially recognized the Saigon government and Truman dispatched the "advisory group" mentioned above to assist it (as noted in a previous message, the correct year for the "advisory group" was 1950, not 1949).

The period you're referring to (events following the fall of the French fortress of Dien Bien Phu in North Vietnam on May 8, 1954) was the period of a Geneva Conference, truce, and agreement to partition the country temporarily along the 17th parallel, with a stipulation that elections for reunification be held in 1956.

LOL! We did not have that war pretty much won in 1972. In 1972, the North Vietnamese were routinely launching offensives into South Vietnam (the massive Quang Tri Offensive, for example). When we signed the peace accord with North Vietnam in January of 1973, there were over 145,000 North Vietnamese troops in South Vietnam (the peace accord specifically mentions those troops and contains language that allowed those troops to remain in South Vietnam after the cessation of hostilities).

But the number of votes for Pat in the disputed area is not at all out of line with the number of people who registered as a member of the Reform Party in the area. And, yes, the number of registered Reform Party voters in the area is higher than the Florida average and the national average.

Democratic Party leaders have recently discovered that fact and have now dropped the "accidental Pat vote" argument entirely (notice you haven't heard it from them in the last couple of days - now they're just saying that people may not have punched the holes fully, etc).

> Pat said that he did NO campaining
> South of Orlando [snip]

Look. Pat is mad as hell at the Republican Party - at this point I think he would say anything to hurt them.

When will the galloping paranoids explain just how the US conspirators can and have influenced the legal system of a competent, sovereign, and civilized nation such as Canada.

Canada is not a suburb, it is not a legal test bed, it is a fully functional independent (at times about as independent as a bowl of garlic) nation state which happens to share part of our political heritage.

If anything, Canada has less restrictive radio laws than the US. Simply asserting some sort of international conspiracy does not make it fact.

Really????
Try passing off an IDL as your only license in California. If you are a resident of California and have no CDL or a suspended or revoked CDL and you get you car towed and a nice little citation or a trip to jail.
I would be more than happy to debate this one.
Sure an IDL can't be suspended or revoked (no authority) but just let them prove you have lived in CA for more than 10 days and you must get a CDL or Cal ID card.

Honestly now.....
Where do you hear this shit?

The law...not the treaty says you better have a valid DL in your country of orgin for the IDL to be valid. For a US resident an IDL is useless and not honored. I have even seen folks that get a Mexican DL with a phony name get caught. Honestly...if you are in the state computer system than it's pretty easy task to make a ticket stick on this one. They pass IDL out like popcorn at Auto Club offices..
We have impound lots full of stories like this.

On which planet was this? US involvement in Viet Nam began in 1961.
Here in this dimension, Kennedy was in the White House by then. After
Kennedy was killed, LBJ turned it into a full-fledged war ("Hey, hey,
LBJ, how many kids did you kill today?"). Nixon ended our involvement,
and Ford sat there on his thumb when the NVA swept down for their final
push.

Thomas Edison describes in his patent application for the wireless telegraph in May of 1885 as follows;
For receiving signals I locate in said circuit between condensing surface and the ground a diaphragm sounder which is preferably one of my electro motograph telephone receivers.

The first wireless telegraph picked up the telegraph signals with a loud speaking telephone. De Forest patented his triode in 1907 twenty two years later. For his first radio he used an Edison loud speaking telephone.

Edison's Patent and an essay about wireless transmission can be seen on my site at www.geocities.com/starapex Click on the radio

Cheers
Ken McKenzie

Actually, it started even before that, Keith. Our involvement in Vietnam first started in 1949 when President Truman sent a "military assistance advisory group" to train South Vietnam troops to use American weapons. Eisenhower offered direct economic aid in 1954 and dispatched several hundred military advisors to Vietnam in 1955.

In 1958, direct conflict began when Vietcong attacked several U.S. military installations. Attacks on these installations increased in 1960 after North Vietnam said that it's goal was "to liberate South Vietnam from the ruling yoke of the U.S. imperialsists and their henchmen."

I didn't research it so I stand corrected. Then Florida will be under
strong pressure to certify before Electoral day. Other states which were
very close will also be watched very closely, since Bush could go over
the 270 withour Fla if some of them changed with the late count.
I'd imagine they are keeping a cloise eye on Daley Jr, what with the
memory of what his Pop pulled off in Cook Co, Il in '60. As you alluded,
he stole it by voting several cemerteries as subdivisions. And the more
times a box of ballots is recounted, the more opportunity to "lose"
Republican ballots....

Where would I be able to download a tracker program for the ISS.

I do not need a tracker that controls the antennas just a real simple tracking program that will tell me when the ISS is coming into range and for how long it will be in range. That kind of thing.

As well I know that you can listen to ISS, I think it is listen only, on 143.625, but are there any other frequencies that are available for communication with them??

Thanx. I am kind of new to the satellite communication thing so I do need a little help sometimes!

Nice revision of history, Dude. That's what todays Leftist Liberal
Democrat Press does best, and they do it so often.
Too bad that some of us are still around that recall the facts.
Kennedy won on the strength of a few ballot boxes that were carefully
stuffed in West Chicago with voter names taken from tombstones. And
there is much known of Lyndon Jonhson's involvement in "assuring" Demo
wins. And ANT recounting of VietNam that skips his heavey handed
involvement is lunacy, not even revised history. HE was the clown who
ruined every chance we ever had of settling that scrap with any hope of
a free society for the South.

Your version of history -whatever its source- is way beyond
incompetent, its totally fraudulant.

Uh . . .no. Viet Nam was still a French colony in 1949 (at least the
French thought so).

> Eisenhower offered direct economic aid in 1954

After Dien Bien Phu fell (and thus the whole "French Indochina" facade),
they were one of many third world countries which got our foreign aid.

> and dispatched several hundred military advisors to Vietnam in 1955.

Uh . . .no. There were something like 140 men assigned to MAG-VN
between 1954 - 1960. We had more "involvement" in Canada during the
same period.

There was one precinct that went 193-1 for Kennedy. The precinct had been
leveled by the Urban Renewal folks -- it was not possible to live in the
precinct nor any place to hold a vote.
I believe 'vote early, vote often' originated with Big Bill Thompson but it
fit 1960 Chitown real well.

At least thanks to the Electoral College, you have to steal one state at a
time. Without it, you either have Federal election supervision or
competitive dishonesty.

To all who served -- your nation thanks you.

BTW: Anytime is a good time to document your military service and include it in a genealogy report to your descendants.

After 6 decades I discovered my family had six Civil War vets, from Manassas to Petersburg. No one in my family passed this down. I found much of it on the internet genealogy sites. Your family heritage is important to some one in the future.

With the age of the computer, we can record photos, records, and family genealogy and capsulate them on CD-ROM - easy to pass to hundreds who follow us.

Some one in the future will care - let them know what you did.

I love it when conservatives talk about the liberal press. Robert McCormick rolls over in his grave every single time.

> Too bad that some of us are still around that recall the facts.
> Kennedy won on the strength of a few ballot boxes that were carefully
> stuffed in West Chicago with voter names taken from tombstones.

This statement proves that all you are doing is spouting conservative-speak by rote. Too bad you have no clue as to what you are talking about. West Chicago is a small town smack in the middle of DuPage County, probably the most conservative county in the entire country, and many miles removed from the influence of any Chicago pol.

See above...

>As well I know that you can listen to ISS, I think it is listen only, on
>143.625, but are there any other frequencies that are available for
>communication with them??

143.625 is the Russian ground control freq. DO NOT TRANSMIT there,
it's not a ham frequency.

"The initial station gear--already aboard the ISS--will be installed
temporarily in the Zarya Functional Cargo Block of the ISS and will
permit operation only on 2 meters--FM voice and packet. Tentative
operating frequencies are: Worldwide downlink for voice and packet,
145.80 MHz; worldwide packet uplink, 145.99 MHz; Region 1 (Europe)
voice uplink: 145.20 MHz; Region 2 and 3 voice uplink, 144.49 MHz. Yet
to be determined is the ARISS operating schedule, which will depend on
the crew's schedules. The ARISS Team eventually anticipates multiband,
multimode operations with the crew and regularly schedule expected to
be very busy with basic housekeeping duties to prepare for their
four-month-long mission, Marchant explained. "The crew has expressed a
high level of interest in beginning Amateur Radio operations early in
the mission," he said. Crew members may use their personal call signs
or one of the "club station" call signs issued for ISS use--NA1SS,
RZ3DZR, or DL0ISS. QSLs and SWL reports will be processed via the ARRL
or Radio Amateurs of Canada. The card design is being finalized, but
it should be ready for distribution early next year.
The Expedition 1 crew will work on UTC, with their day expected to
begin around 0800 UTC and end near 1900 UTC (with a possible "lunch
break" near 1200 UTC). The crew also is off from 1200 UTC on Saturday
until the end of the day on Sunday. "

as
our laws are concerned.***** (Emphasis added by me)

I always figured, myself, that any "driver's license" that was available at any AAA auto club office had to be a little suspect. And the couple of times I had to show a license to a European police officer, he wasn't interested in the IDL, just wanted to see my U.S. state-issued DL. And when I got a Norwegian DL (as a resident alien w/ work permit), all they wanted was a copy of my Okla. DL. They brushed aside my IDL. So I really doubt the tickets issued for "only" carrying a IDL were bad.

Mark

PS You should have seen the look on the Texas State Trooper's face when I showed him my Norwegian DL! I had just flown in from Stavanger, Norway on home leave to visit some family in Dallas, and was on my way to the corporate office in Houston. My Okla. DL had expired the previous month (while I was overseas) so I just pulled out my Norwegian DL. It took him about a half hour on the radio talking to his superior to decide that a US citizen residing overseas who was not part of the U.S. military could have and use a valid DL issued by a Western European country in place of a state-issued DL. Heck, I rented the car at DFW airport using it with no trouble!

Dick, I always appreciate your commentary, but I believe you are incorrect in this case. According to Article XII of the Constitution, "The person having the greatest Number of votes for President, shall be the President, if such number be a majority of the whole number of Electors appointed;"

The implication is clear, if the vote in a particular state has not been certified and electors appointed by the time the electoral vote is to be counted in Congress, then those electoral votes are lost. That, and the prospect of the future admission of additional states (this amendment was ratified in 1804) is why there is no specific number of electoral votes designated.

That thing we see on the TV screen every 4 years that says "270 electoral votes required to win" is an invention of the media and is based on the assumption there will be a full pallette of electors available to vote.

According to an article in this morning's paper, that language was felt necessary in the early days to prevent a state with an ax to grind to hold the election hostage.

Interestingly enough, as I read it, the House vote is one vote per state, i.e. 50 votes. " But in choosing the President, the votes shall be taken by states, the representation from each state having one vote;"

Actually, we had the war pretty much won in 1972. Then we turned our backs on the Vietnamese, who had believed our promise to provide support if they needed us.

Yes, Vietnam (by the way, Vietnam is one word, not two) was a French colony in 1949. But that still does not change the fact that President Truman sent a "military assistance advisory group" to train South Vietnam troops to use American weapons. However, I will correct one thing I said, it was in 1950 that Truman sent the advisory group, not 1949. Otherwise, everything else I said in the previous message is factual.

Pat got **DOUBLE** the number of votes in Palm Beach county in the 1996 Republican primary as he got in this year's general election. Whatever the reason, there's an abundant number of members of the Reform party in that county and their *official* membership is up 110% from last time. That same "out of proportion distribution" existed in 1996 when the Palm Beach County Reform party had less than 1/2 the members they have now.

Having had to park in the shadow of P-I for 51 months I know precisely where you mean. In STL you have the classic gerrymander -- the City should have one rep but in fact has two, one black and Dickie Gephart whose district at one point was 60 feet wide and ran from south STL out thru STL county and out into the Ozarks. If the election board is no better than when I lived there nothing would surprise me. Gephart is straight-arrow but he knows every crook in sight of the Arch. BTW unless they got the rest of it, some of PI is still standing; they blew up enough buildings to give the maintenance people a fighting chance not to mention the police.

At the time I lived in the City, they used machines so it should have pretty easy to get the crowds thru.

If this causes us to look at election procedures and practices, this fiasco might be worth it.

744. Amateur Radio Map of the World

Hello,

I recently came across an old map in my basement. It is titled, "Amateur Radio Map of the World." It was made by the American Radio Relay League, Inc., Newington, Connecticut, U.S.A. 06111, No. 12 in the A.R.R.L. Series entitled "The Radio Amateur's Library." It was made in 1967

It's approx. 40 inches by 32 inches. It includes radio zones over the map of the world. It's in fair shape, but it looks really cool.

I don't want to throw it out. So... first person to respond to this post that wants it... gets it. I only ask that you pay postage (I live in Brooklyn, NY) and packaging (it needs a long tube.)

Tim

Wrong. We got "put into" the Vietnam War under Eisenhower (and Nixon).

> For all of his other faults, Tricky Dick decided not to put the nation
> through the prolonged agony that Gore considers acceptable.

Wrong. See below.

http://www.salon.com/politics/feature/2000/11/10/nixon/print.html

The fallacy of Nixon's graceful exit

In 1960, the GOP candidate fought hard behind the scenes to make sure the election wasn't stolen from him -- just as Al Gore should do.

By Gerald Posner

Nov. 10, 2000 - One of the most oft-repeated myths in the aftermath of the current presidential election disputes is the claim that Vice President Al Gore should behave more like Richard Nixon, who is cited frequently for having graciously decided not to pursue legal remedies in response to possible voter fraud that might have cost him the 1960 election with John Kennedy. But the notion that Nixon graciously exited is just false.

The 1960 race was unquestionably close. Some states -- like California -- initially fell into Kennedy's electoral count, but were reversed almost two weeks later after absentee ballots were counted. But the core questions about the election centered on rumors of fraud, primarily in Illinois, where Democratic Mayor Richard Daley's powerful political machine controlled voter-heavy Chicago, and Texas, where vice presidential candidate Lyndon Johnson was a senator. Rumors of impropriety existed before the election. After the election, when Illinois went for Kennedy by fewer than 9,000 votes, and Texas by just over 40,000, Republicans cried foul.

Nixon was worried about how to challenge the vote and still not be branded in history as a "sore loser." Although he would later claim that President Eisenhower encouraged him to contest the election outcome, that was not true, as the outgoing president withdrew his

support for any challenge within a day of the vote. Yet, contrary to modern memory, Nixon and his Republican allies still mounted a massive vote challenge.

It is true that Nixon did quickly concede the election to Kennedy. And while he was careful not to put a public imprimatur on the concerted Republican effort to challenge the election results, he privately not only authorized it, but actively encouraged it.

A conservative journalist and close Nixon friend, Earl Mazo, of the New York Herald Tribune, launched a press frenzy over possible voter fraud. (He was later Nixon's official biographer.) And not only did Republican senators like Thruston Morton ask for recounts in 11 states just three days after the election, but Nixon aides Bob Finch and Len Hall personally did field checks of votes in almost a dozen states.

The Republicans obtained recounts, involved U.S. Attorneys and the FBI, and even impaneled grand juries in their quest to get a different election result. A slew of lawsuits were filed by Republicans, and unsuccessful appeals to state election commissions routinely followed. However, all their efforts failed to uncover any significant wrongdoing.

In Illinois, for instance, the final recount showed that Nixon's votes had been undercounted by 943 -- yet, in 40 percent of the rechecked precincts, it turned out that Nixon's vote had been overcounted. (Contrast this with Gore, whose vote total steadily climbed during the Florida recount.) Unhappy with those results, Republicans went to federal court, where their case was dismissed. They then appealed to the State Board of Elections, which also rejected their claims. It was not until Dec. 19 -- over a month after the election -- that the national Republican Party backed off its Illinois claims.

Similar results, and extended fights, took place in Texas and New Jersey among other states. In Hawaii, Republican efforts had the unintended result of reversing the state's electoral votes from Nixon to Kennedy.

Although Republicans continued to insist that Illinois and Texas had somehow figured out a way to cheat and still pass a recount, they never produced hard evidence of widespread impropriety. Yet, that was certainly not for lack of trying. For over a month, the Republican efforts were aggressive and widespread. That Nixon was clever enough to allow his aides and political friends to do the work on his behalf -- while officially seeming to remove himself from the fray -- should not let Americans have amnesia about what really happened in the wake of the 1960 vote.

If the current rallying cry of Republicans is that Al Gore should behave like Richard Nixon did in 1960, that is precisely what he is doing -- strongly making every effort to ensure that the final vote was fair and correct.

It seems like the crew in the station is not using headphones, but a
speaker. The groundstation probably uses headphones.

I'd be more than a little cautious about what one believes coming out
of Florida from ANY source at this point, and for some time to come. The
spinmeisters are up and running at full speed, tossing out any and all
sort of "data" that is not supportable by hard facts, which are almost
totally nonexistant, and thats the way it will be for some time to come.

Just how does a judge decide that 19,000 ballots were "mistakes" and
wbich 19,000 voters does he order eligible to revote? The idea is
preposterous. When a voter makes a mistake on a ballot and submits it as
his vote, the ballot is defective and that portion of it affected is
not subject to be added to the total for the candidate in question.
So has it always been, so was it when I screwed up on one, and so
should -must- it always be. Anything less only bastardizes the total
process. It they get to vote again, so do I.

Maybe its because most people can understand that infrastructure and
all that necessarily goes with it costs money, and "the people" are the
basic source of it. Roads, bridges and all the other government
functions etc don't pay for themselves, and I for one wouldn't care to
pay tribute to some regal individual who manipulated his way into
ownership of it all. At least, as long as we get to freely vote (even if
some of us can't read a ballot) the owners are us.

Wrong as usual - for fanatics. If the ballot isn't finished in Florida by the designated time, the electoral college shall still meet and vote the certified votes. There is NO requirement to have 270 electoral votes.

Thats pretty well how it is. I think after all the frenzy subsides
that's how it will play. It will be interesting to see how all the late
absentee counts affect states other than Florida. Odds should be
against making any real difference, although absentee voters tend to be
more mature, successful and conservative - and Republican.

Yep...then 'ALL' Floridians lose their vote, since the electoral college vote is held without Florida's participation. The Presidency still goes to the candidate with the highest total voted.

New twist---what if the Demos, seeing problems develop with getting Florida in the Gore column, then attempt to delay certification with litigation, with that very end in mind.....could it be they've already thought of that.....Gore is now ahead in electoral votes without Florida being in either column...

Interesting, HR.2346 and S.2767...

HR has passed and has been sent to the Senate. This legislation allows local and state governments to enforce FCC laws on CBers.

While I totally agree with the intent of the law, I find it really troubling that Barney Fife may show up at my doorstep telling me he is putting me in jail if I don't get out of my neighbors phone. As I sputter "I am a ham, not a CBer..." he replies, are you arguing with me about the law etc. etc.

The Dems wanted to can Thomas for a mythical pubic hair on an empty coke
bottle. Must be a 'style' thing. The suave way is a Clinton popout
wanger wave.

771. Daley A Paid Crook, Gore Hires Him..

Newsgroup: rec.radio.amateur.misc

Daley is not doing this for "the American people" as he so lies. He is doing this because he is being paid by the Gore camp to wrest this election away from Bush in any and all ways possible. Daley, son of the infamous Mayor Richard Daley (and renowned ballot box stuffer) of Chicago dirty politics fame, is
merely doing business as usual. The man is a paid crook.
Gore should divorce himself from this Charlatan if he had any sense.
Al Gore said it in his speeches....."You ain't seen nothing yet."
At least Gore got that part right.

This just in. Szdapig needs money. The fone bill is due, the car needs a window, the septik tank is running into the yard next door and they want to sue her. Sz is in truoble with the law and bill collectors are looking to get her.
Maybe we can get a hog roast going for SZ and all chip in to help. For detales call SZ at 1-800-YOU-RENT. SZ will suply the pig.
PS: bring a shoval and help dig a new septik becaus SZ has filled the one she has. Wear boots. the yard is full of it.

Well, I don't know about the legal aspects, but I do know that it doesn't make a lot of sense. I guess it is one of those things where you have to be there (MO) to get it.

This actually did happen.

Nixon, 1960.

Rampant vote fraud. Calls for recounts. Nixon said no and conceded to JFK, who promptly put us into the Viet Nam War.

For all of his other faults, Tricky Dick decided not to put the nation through the prolonged agony that Gore considers acceptable.

That alone proves that Gore is the wrong man for the job.

Your condescending attitude aside, No one objects to a fair recount. The recount conducted yesterday as stated by the election officials did not follow the law, but rather tried to devine the intent of the voter. In Texas there is one recount if triggered by a campaign or automatic period. Please don't distort the facts. This is no longer an issue of campaign rhetoric, but constitutional criticality. In other words time to knock off the bull and get behind a legal process no matter who it finds was elected. Partisanship at this point is a disservice to the process and our future.

Truth is, the present head of the Federal Reserve is a long time
Libertarian. I attended one of his lectures in the late 60s or
early 70s. The lecture was sponsered by Ayn Rand. The reason for
our present prosperity is that Clinton has been unable to get his
socialist economic policies pushed through a Republican Congress.
Clinton himself admitted that he raised taxes too much.

I'm just stating what happens here...and it happens all the time in this sleepy little border town called San Diego. Argue it all you want on usenet...try it in front of a judge and they will throw it out. Now if you want to be a test case...fine. Tell me when you will be in court and I will be happy to watch you plead your case. It's not up to me to provide your defense. A quick phone call to the DMV in ANY state should satisfy your hunger for the truth.

Me thinks you have never been thru the hoops on IDL's and you are just blabbing.

Tell me you are not a current US citizen...and I will eat my words in a second...short of that...you are shooting blanks.

> Presence) and subscribers in many places.

And if YOU could read headers, you would realize that the
NNTP-Posting-Host header reveals a great deal about the location of the
poster. ISPs typically contract with a national network provider such
as uunet to provide POPs, and those IP addresses are in a range which
belong to the network owner; not the ISP. Maybe if you study real hard,
you'll learn how to use utilities like traceroute and dig to identify
the physical location of a poster's POP.

In the meantime, keep your foot out of your mouth junior.

Supposition?

Sir, the trend under Carter, using the very link you provided was UP! I KNOW some mortgage rates hit at least 19% in 1980. The trend started DOWNWARD during Reagan and continued thru Bush, Sr. as well as in the Clinton admin. And the reason for that was, the foundation for lowering interest rates was laid DURING Reagan/Bush. DO you actually think that Clinton waved a "magic" wand and POOF! there were 7% interest rates? HA! Interest rates, unless there is some cataclysmic event, don't just suddenly change overnight. It takes time for economic policies to take effect. Your chart CLEARLY shows the trends under both Democratic and Republican admins. The only reason the lower rates have held is that, like Cecil said, Mr Clinton and president Hillary couldn't get their socialistic, anti-free enterprise, redistribute-the-wealth-to the-bums-who-won't-work CRAP past a Republican congress--THANK GOD!

Jeffery, I don't care what they call it in "the language." In the United States, we commonly use "Vietnam" as the English name for that country, just like we use the word "Germany" as the English name for "Deutschland." The word "Vietnam" is very rarely printed as two separate words today in this country.

Actually, to be fair to _ALL_ Americans, I think we have to have a hand recount of all ballots nation-wide. Its not fair to just recount a small area of the country where Democrats are heavily favored. All Americans, nation-wide, deserve the same consideration as the Palm Beach County voters. If they are going to get special treatment (priviledge) when it comes to the count of their ballots, then all Americans around this country should get the exact same special treatment.

And, anywhere there is a dispute, I think it should be settled in the courts. After all, prehaps judges are better suited to decide who should be the next President anyway. After all, they are not elected to office, so there is no political bias in their court rulings.

And I don't care if it takes ten years to get this job done - Bill Clinton can just stay in the White House as President until the matter is fully settled.

Actually, no. There were Americans (and other Allied ground and air forces) killed there during WWII.

A "combat death" includes a noncombatant caught in a crossfire between opposing forces, like that 12-year-old in Israel a couple of weeks ago. The phrase is merely a differentiation between death during battle and death by assasination, accident, suicide or murder.

> http://servercc.oakton.edu/~wittman/chronol.htm

According to this same overview, the American military buildup began in 1961.

GREENBERG is your trusted source? HAHAHAHAHAHAHAHAHAHAHAH

Okay, for the public schooled among you, Greenberg is an OPINION COLUMNIST, just as I am, and he writes based upon what he believes, upon his interpretation. This is not the same thing as a NEWS REPORTER, who (supposedly) writes just the facts.

Greenberg, BTW, writes for Slate, which is about as impartial as the Limbaugh Letter. His day job is with Columbia University, which also is home to such shining stars in the political arena as David Dinkins. The CU PoliSci Dept is known as "The Little Red Schoolhouse," and thus is not likely to be the source of any information about any Republican which is complete, accurate and impartial, any more than Oral Roberts U would be a place to hear good things about Satanism.

:Wrong as usual - for fanatics. If the ballot isn't finished in Florida by
:the designated time, the electoral college shall still meet and vote the
:certified votes. There is NO requirement to have 270 electoral votes.

True. Gore can win with a 262 to 247 as it is.

Either way, Gore would be a very weak president. The people
are split, the congress is split. We are in the beginnings of a
recession. And it looks like we will need to restart the draft just
to staff the military (people are just unwilling to be bribed into
service, plus the Left is starting to realize that the military is
skewed towards the right).

Just let Gore have it. He wants it badly. Hillary will challenge
him in the 2004 primary in order to weaken him, setting up her
2008 run.

Besides how many democrats really want to have to defend
him for the next four years?

You are the king of apples and oranges arguments. There is no comparison
that can be made between primary elections and general elections.
Particularly when the candidate in question ran on the republican ticket
in one and the reform party ticket in the other. The votes due to the
respective party infrastructure alone would dwarf any resulting from the
candidate's voter appeal.

> Whatever the reason, there's an abundant number of members of the
> Reform party in that county and their *official* membership is up 110%
> from last time.

The Reform party of 1996 is not the same Reform party of 2000. The
Reform party of 1996 got tons of new adherants as a result of Jesse
Ventura's association from the 1998 election. The cat fight in 2000
rendered the Reform party a completely different animal.

> That same "out of proportion distribution" existed in
> 1996 when the Palm Beach County Reform party had less than 1/2 the
> members they have now.

It wasn't just "out of proportion," it was off the chart.

On Saturday 11/11 from Northern Ohio, at 1248 GMT I heard an ISS crewman say a few words, then there was a few seconds of dead air, then instant static- sounded like they shut the transmitter off. As they passed over three orbits later, at 1738 GMT, the transmitter was still silent. One orbit after that, at 1913 GMT, I heard the signal come on, a voice said "Hallo- hallo- hallo-" then some ensuing chatter in Russian.

So what was this all about? A sleep period perhaps, or maybe transmitter maintenance?

Just for the record, I track satelites using SatSpy 3.03, I get element sets from the NASA Orbital Information Group at http://oig1.gsfc.nasa.gov/scripts/foxweb.exe/app01? and monitored the frequency on an Alinco DJX10 attached to a mobile mount 2M antenna.

I know, paranoia is very easy to come by today, but that stuff about
"two presidents" shows a basic lack of knowledge of our Constitutional
processes and why and how they got to be that way, convoluted as they
sometimes seem to be. The framers ofd the Constitution spent a lot of
time sifting through all the various scenarios and the result while a
bit unspecific leaves no potentiality uncovered. There are very clearly
defined remedies for this problem. If there is no clearly defined
elected president by Jan 20, then the Constitution clearly says that the
Speaker of the House of Representatives will occuby the office until
such time that the election results are clearly defined. There has never
been and will not be more than one president. Such stuff is nothing more
than more flame to the fire.
And my neck as about as red as any.

796. Re: Kantronics KAM Plus TNC

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-12 00:00:00 UTC

Hi, At the same question, Kantronics answer that : (be carreful it's a little bit long but i don't know if i can join a file here...)

73' Christophe - F1BDQ

Version 8.2 Firmware Update
Firmware Update Version 8.2 adds advanced digipeating capabilities for GPS/APRS operations by adding four new commands for digipeating--UIDIGI, UIFLOOD, UITRACE, and UIDWAIT--and adding UIGATE to control cross-band digipeating for the Kam Plus, Kam, KPC-9612 Plus and KPC-9612. See the GPS/APRS discussion below. In addition, 8.2 versions for the KPC-3 and KPC-9612 are upgraded so that their command sets are more like those for the KPC-3 Plus and KPC-9612 Plus. For example, MODEM mode has been added so you'll be able to copy the NWS EMWIN weather broadcasts. See description of EMWIN below.
If you've skipped over one or more of last year's upgrades for your TNC, don't be concerned; 8.2 firmware incorporates the major features of the previous upgrades. The Version 8.2 Firmware Upgrade Manual Addendum, shipped with the firmware, includes a full description of the new digipeater commands and commands modified or combined with other commands since the last update.
Since documentation is not included for previous updates, KPC-3 and KPC-9612 owners might wish to purchase our newly written KPC-3 Plus and KPC-9612 Plus manuals which incorporate material from previous updates and are a great reference source. These manuals contain over 280 pages of information, including 60 pages of operational information on the various VHF/UHF digital modes, an 80 page Command Reference, and an extensive index. The operational chapter includes sections on the following: the packet mode of operation, remote access to your TNC, the packet personal mailbox (PBBS), working with a full service BBS to forward messages, GPS interfacing, the KA-Node networking system, WEFAX (for KPC-3 and KPC-3 Plus), the NEW EMWIN mode, KISS mode (for TCP/IP operation), and DAMA mode (the European node system mode).
Since the Version 8.2 update is not available for KPC-2, KPC-4, or KPC-2400 owners (due to their limited memory space), this may be an ideal time to consider the purchase of a new KPC-3 Plus or KPC-9612 Plus. Advanced GPS/APRS Digipeating: Amateurs are using GPS receivers, a packet unit, and an FM transmitter to report the location of their vehicles or stations to others. Their broadcasts use one-way (unproto UI) packets, to report call sign, latitude and longitude. Packet stations hearing these broadcasts may display the positional information, often using map-based programs such as APRS. To extend the range of reporting, it has become common practice for the mobile stations to use digipeat paths containing generic digipeater

names, such as RELAY and WIDE. Using these names (aliases), there is no need to recall and enter specific call signs during a trip.
In response to requests from many GPS and APRS enthusiasts to more fully support "generically named" digipeater activities, we've added four digipeater commands to the 8.2 firmware, that provide alternative ways in which to digipeat using generic call signs. First, the UIDIGI command allows up to four additional digipeater aliases and supports a swap of MYCALL for the alias name during digipeating. Second, the UIFLOOD command adds the ability of the TNC to digipeat several times, frames that contain only one digipeater address, such as WIDE3-3. Here, the ssid (-3) is decremented each time the frame is digipeated and each TNC digipeats such a frame only once. UITRACE does the same but adds the digipeaters MYCALL address to each outgoing frame, creating a return-path record, a "trace."
For You Techies out there, here's a brief description of each new digipeating command:
UIDIGI ON [+|-] call1[,call2[,call3[call4]]]
Up to four call signs can be specified for special digipeater duty. If any of the UIDIGI calls appears in the to-be-digipeated field of a UI packet, and if MYCALL does not appear in the source field or any of the has-been-digipeated fields, the UIDIGI call in the to-be-digipeated field will be replaced by MYCALL with the H bit set and the packet will be digipeated.
UIFLOOD name, n, [ID|NOID] (n=0-255)
When a UI frame is received with a call in the to-be-digipeated field of the form name'x-y (e.g. WIDE'3-3), the ssid is decremented and the UI frame is digipeated without the H bit set if such a packet has not been "seen" for the last n seconds. If the optional ID parameter is set, the MYCALL is placed in an additional digipeater field with the H bit set.
UITRACE name ,n (n=0-255)
This command is similar to UIFLOOD except that the MYCALL is inserted as a has-been digipeated address. Thus digipeated frames grow in duration as they are digipeated several times.
UIDWAIT
When OFF, digipeaters retain first channel access. When ON, digipeaters must compete with normal packets for channel access (using PERSIST).
NWS EMWIN Broadcasts: The NWS Emergency Managers Weather Information Network (EMWIN) is a wireless, direct-to-computer information service that the National Weather Service (NWS) provides with help from the Federal Emergency Management Agency. The NWS feeds a constant stream of weather information (@ 1200,8,N,1), from around the world, to a satellite orbiting the Earth. Many cities are coming on line now to capture this stream and rebroadcast it on fixed VHF FM frequencies., usually just above the 2-meter amateur band, tunable with most rigs. With an FM receiver or scanner, a KPC-3, KPC-3 Plus, KPC-9612, KPC-9612 Plus, KAM Plus, or KAM with Enhancement Board, and PC with communications software, you can copy these broadcasts. The content of the broadcasts may be plain ASCII text (copyable with Pacterm - shipped with Kantronics TNCs) or graphics (copyable with "WeatherNode" software, stocked for sale by Kantronics).
To copy the broadcasts, simply cable together the equipment mentioned above, tune your VHF FM receiver to the local EMWIN frequency, set the KPC

interface command to MODEM, and follow the text on your PC screen.
Please be sure to select the right KPC model(s) for your update(s); the
EPROMS (firmware) are not interchangable.

FYI, regarding this whole issue of "voter confusion" , "butterfly ballots", disqualified ballots, etc. there is already Florida case law on this type of thing. The courts have held that a voter is personally responsible to execute their vote in a correct and precise manor as long as they have been given a reasonable opportunity to do so. The courts have also defined what a reasonable opportunity is:

Nelson v. Robinson, 301 So. 2d 508, 1974 Fla. App. LEXIS 8601 (1974) [ballot confusion]

"If a candidate appears on the ballot in such a position that he can be found by the voters upon a responsible study of the ballot, then such voters have been afforded a full, free and open opportunity to make their choice for or against that particular candidate; and the candidate himself has no constitutional right to a particular spot on the ballot which might make the voters' choice easier. His constitutional rights in the matter end when his name is placed on the ballot. Thereafter, the right is in the voters to have a fair and reasonable opportunity to find it; and as to this, it has been observed that the constitution intended that a voter search for the name of the candidate of his choice and to express his choice for that candidate without regard to others on the ballot. Furthermore, it assumes his ability to read and his intelligence to indicate his choice with the degree of care commensurate with the solemnity of the occasion."

(this case was a different Nelson :>)

This ballot was CLEARLY designed to favor Bush - Your diagram was simple - the ACTUAL Ballot had Bush on top, Buchanan second, SLIGHTLY OFFSET [1/8"] on the right with Gore listed under Bush. There were TWO HOLES IN THE GORE BOX - with one arrow pointing to the correct hole. This gives NO CHANCE to mistake where to mark for Jeb Bush's brother, and a SIGNIFICANT chance to confuse {thus favor Dubya} the voters and eliminate out a Democratic vote. IT is not even close to the butterfly ballot used in Ill BTW - that one had DOUBLE ROWS to prevent what occurred in Fla. Even though the argument was that a Democrat designed it - doesn't mean they couldn't be bribed into accepting it. Money talks and BIG BUSINESS - the ones who own and OPERATE the republican party - has everything to gain and little to lose with the attempt to muddy the waters. I watched Buchanan state on television that there "WAS NO WAY HE COULD HAVE GATHERED THAT MANY VOTES IN THAT COUNTY, IT WAS CLEARLY A MISTAKE."

Well, let's see... Recounting only in heavily democratic areas, by counters who are all Democrats, using a manual count process which is totally arbitrary with no rules or standards of interpretation to ensure fair and consistent application among districts, the increased human error factor, and the fact that selective recounts violates every voter's constitutional right (1st and 14th amendments) to an equal and uniform voting consideration.

And probably the biggest concern of all is the fact that Gore has hired the son of one of the biggest "vote fixer" and "ballot box stuffer" of all time to oversee this effort- I would voice a few objections myself...

The truth has already come out twice, but it isn't what you wanted to hear. What you want is the "Democrat spin truth". Kind of like "I never had relations with...", "They weren't fund raising breakfasts...", etc.

Nice move - trying to cut out my message and "spin" the rest - Gore would like the entire state vote recounted by hand - but has only elected to do the ones with the largest apparent errors. Bush is having a leather baby over this - He would have an entire cow over that one. This is why the Electoral college needs to be thrown out and replaced by the popular vote - But since Bush is down by a quarter million votes, I don't think he would agree, and since you seem to only parrot what the republican camp tells you, you probably agree as well. Learn to think for yourself - I AM ALL FOR A TOTAL HAND RECOUNT OF EVERY BALLOT IN THE USA SO THAT THE PRESIDENCY IS DECIDED ON THE TRUE COUNT - Let the independent or green party count them for all I care. This is not a "spin" it is the straight fact - period.

Why would a DEMOCRAT design the ballot thay way, kidoo? Guess the
Florida Democrats are just as stupid as the national Democrats seem to
think.

The next election in Milwauke, Wisconsin should prove to be very popular for smokers. It seems the local TV station caught on film a Democrat, Gore supporter passing out cigarettes to homeless folks in order to get them to vote for Gore.
I don't know about you, but I am very uncomfortable with the fact that somebody who lives under a bridge would be so taken advantage of, but that's a Democrat for you.

811. QCWA TELLS FCC TO END INCENTIVE LICENSING

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-12 00:00:00 UTC
From: radionews@aol.com
Message-ID: <20001112140508.25344.00000079@ng-fw1.aol.com>
Source record: 100054

PRESS RELEASE:
October 30, 2000

For further information: Gary Harrison, K0BC
QCWA President
k0bc@ipa.net

The Quarter Century Wireless Association, Inc. has filed a petition with the Federal Communications Commission requesting rulemaking action to amend Section 97.505(a) of the Commission's Rules for the Amateur Radio Service. This amendment would facilitate the restoration of those privileges withdrawn from Advanced and General Class operator licensees on November 22, 1968. The amended rule would do this by requiring administering volunteer examiners to give examination Element 4 credit to current Advanced and General Class licensees also holding an FCC-issued Advanced, General or Conditional Class operator license granted before November 22, 1968. By doing such, the person would become eligible for a Amateur Extra Class operator license, the privileges of which include those withdrawn on November 22, 1968.

On November 22, 1968 amateur operators holding Advanced, General and Conditional Class licenses lost significant operating privileges as a result of rules adopted by the FCC in implementing a system of incentive licensing. Every Advanced, General and Conditional Class operator was affected adversely. Within the instant of but a single tick of the clock, their privileges on the most popular amateur service bands were reduced drastically. To regain the privileges withdrawn, a licensee had to upgrade to Amateur Extra Class by traveling to an FCC office and passing difficult high-speed telegraphy and written examinations.

It is the QCWA view that no useful purpose is being served by continuing to deny the privileges withdrawn to those amateur operators who still suffer from that action. The single issue addressed in the petition is the need to restore to these operators the privileges they have not enjoyed for some 32 years. In sharp contrast with the compassionate "grandfathering" provisions recently adopted for the amateur service, the transition to incentive licensing imposed an injustice on all amateur operators holding an Advanced, General or Conditional Class operator license grant on November 22, 1968. It brought serious disruption to the amateur service and created ill will within the amateur service community. Although many, if not most, of the licensees affected have since upgraded to a higher operator class, there is a widespread belief within the amateur service community that the abrupt withdrawing of privileges was unjust to all Advanced, General and Conditional Class operator licensees of that era.

There remains today, at most, a few thousand amateur operators so affected who have not chosen to upgrade. Some do so as their statement in protest to having been affected so adversely. Clearly, these licensees lost significant privileges for which they had previously qualified by examination before FCC examiners. Moreover, for many years -- in some instances for many decades -- these licensees had been using those privileges at their amateur stations. Most certainly, they had proven conclusively their proficiency in operating an amateur station properly with those privileges. Then, in that instant of time, those very privileges were withdrawn.

As the organization whose purpose is to promote cooperation and friendship among amateur operators of at least 25 years of service, the QCWA seeks a prompt ending of the injustice being suffered by those within its constituency. The QCWA is committed to promoting interest in the amateur service and the advancement of the electronic art, making use of the reservoir of knowledge and experience among the nearly 10,000 members of the QCWA for the benefit of all amateur operators and the furtherance of the public welfare through amateur service communications.

73,
Gary Harrison, K0BC
QCWA President

[Newsline 1212 - November 3, 2000]

Closed Circuit Advisory

Newsline, c/o Andy Jarema-N6TCQ, P.O.Box 660937, Arcadia, California 91066

This is Newsline report number 1212, for release on Friday, November 3rd, 2000. The newscast follows.

The following is a QST

Manned ham radio heads to the International Space Station, the FCC says that illegal CB gear won't be available on Internet auction sites and hams in Poway, California get a very welcome surprise. All this and more on Newsline report number 1212 coming your way right now!!!

Ham Radio in Space: Ham Radio on the ISS

Manned ham radio is going back into space to stay. This, as the first permanent crew makes its way to Earth's newest outpost in space.

At 07:52 UTC on October 31st, the 120 foot high white, orange and gray Soyuz TM-31 rocket roared into the autumn sky from Launch Pad One at the Baikonur Conmodrome in Kazakhstan. It's destination the new International Space Station.

The Baikonur Conmodrome was very apropreate place to begin this new adventure. This is it was the same site from which Russian Cosmonaut Yuri Gagarin blasted off to become the first human in space some thirty-nine years ago.

But Gagarin did not have a shinny new scientific outpost in Earth orbit waiting his arrival. This crew does. And a ham station is already waiting for them on board. Wil Marchant, KC6ROL, is AMSAT North America ARISS Operations Manager and a spokesman for the Amateur Radio aspect of this first expedition to the ISS:

William Shepherd, KD5GSL, is the expedition commander. Yuri Gidzenko is the Soyuz vehicle commander. Sergei Krikalev, U5MIR, is the flight engineer. NASA Television plans extensive coverage.

The crew has expressed a high level of interest in beginning amateur radio operations early in their mission but it is may be several weeks before they can setup the amateur radio station. A possible start-up date is November 14th.

The crew may be using their own callsigns, KD5GSL and U5MIR or they may be using one of the three club station calls allocated to the ISS. These are DL0ISS, NA1SS or RZ3DZR. The AFSK AX.25 terrestrial packet rig will use the RZ3DZR call.

For more information please visit the ARISS website at:

http://ariss.gsfc.nasa.gov

for the latest information about frequencies and other operational issues.

I'm Wil Marchant, KC6ROL, reporting for Newsline.

All crew for the next five years will spend four months each on the ISS. When completed in 2005, the International Space Station will stand seven stories high, and be one of the brightest objects in the nighttime sky. It will play the most sophisticated manned ham station ever put in space.

(AMSAT, NASA, Newsline)

Enforcement: No more illegal amp sales on eBay

11 meter operators may moan, but finding an illegal power amplifier on the eBay internet auction site may soon be impossible. Rick Lindquist of the ARRL Audio News has the details:

The FCC says it has reached an agreement with the eBay auction site that's aimed at curtailing the sale of clearly illegal radio equipment.

FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth says eBay has agreed to cooperate in removing advertisements in which the item for sale "is clearly non-certified" under FCC rules. Hollingsworth said most of the equipment involved falls into the CB category, including illegal amplifiers.

Hollingsworth agreed to publicize the initiative at the urging of the ARRL Regulatory Information Branch's John Hennessee, N1KB."I've got a whole folder of people who have been complaining about this and will be delighted to know that the Commission is taking action," Hennessee said.

Hollingsworth said a review team within the Technical and Public Safety Division of the FCC Enforcement Bureau is screening eBay ads each week. He said the practice could be extended to other auction sites if the FCC learns of similar problems.

Hollingsworth credits complaints from the Amateur Radio community with getting the new system in place. "I've been collecting complaints for a year, but the amateur community really generated it," he said. Hollingsworth says he sees about 10 complaints a week about auction site radio gear advertisements sometimes several about the same ad. He cautions that complaints should be based on clear-cut FCC rules violations, such as attempts to sell illegal linear amplifiers.

Amateurs can send items to:

fccham@fcc.gov

And that's not all. Hollingsworth says that if necessary the FCC will monitor other Internet auction sites as well.

(ARRL)

Antenna Law: Poway, CA Hams may get special protection

Ham radio operators in the city of Poway, California may soon be allowed to install antennas taller than 35 feet. This as the result of a motion passed at a recent meeting of the Poway City Council where members directed city staff to come up with a new ordinance covering the rights of hams.

Antennas in Poway are currently covered by rules that regulate satellite dishes. The issue of a separate ordinance covering radio amateurs arose

recently after Gayle Olson, K6GO, said the city had asked her to reapply for a permit after a neighbor complained about the height of one of several antennas on her property.

Gary Kent, president of the Poway Amateur Radio Society, called the 35 foot limitation unreasonable. Kent and several other ham radio operators also reminded the council of the critical role they play during natural disasters.

Most of the members seemed to agree that Amateur Radion special protection. Councilman Bob Emery was quoted as being surprised that Poway did not already have some special accommodation for hams.

(K6GO, Poway ARC)

Technology: FCC says yes to FRS/GPS test radios

Family Radio Service radios equipped to transmit Global Positioning Information will soon be here. Jeff Clark, K8JAC, has the story of the latest twist in license free radio:

The FCC has granted part of a request from Garmin manufacturing. This for a waiver of the Part 95 Family Radio Service rules that will let the company make and market Family Radio Service transceivers capable of transmitting location information derived from the Global Positioning System on FRS channels.

The waiver is for a one-year trial period. The FCC says Garmin must include information in the radios instruction manual explaining that that the capability to transmit GPS derived location information is provided for personal and public safety purposes only. The instructions must also stress that no other use is authorized.

Current Family Radio Rules permit transmission only of FM voice communications and sub-audible signaling tones. The test radios must be designed to limit transmission of GPS derived location information data bursts. Also that the bursts being no longer than one second and not transmitted more often than one burst every 10 seconds.

The FCC declined to permit Garmin to manufacture units that can automatically poll other FRS units to determine their locations based on GPS-derived location data. Garmin is expected to appeal that denied portion of its request.

Garmin has not announced a date when these GPS equipped FRS radios will go on sale.

(Garmin)

Enforcement: Ex-WB6JAC pleads guilty & KV4FZ loses appeal

I'm Bill Pasternak, WA6ITF, with two late breaking stories. A former ham who refused to go off the air is headed to jail. This with word from the FCC that Richard Burton, the ex-WB6JAC, of Los Angeles, California has agreed to plead guilty to violations of Communications Act and accept a prison sentence. Sentencing will be in February.

In another enforcement matter, the United States Supreme Court has refused to hear a last ditch appeal from Herbert L. Schoenbohm regarding the FCC decision not to renew his KV4FZ license. At this point it seems certain that the government will soon order Schoenbohm off the air.

More details on both these stories next week.

(Newsline)

Enforcement: Traffic Report Ham loses license

An update to our stories a few weeks ago regarding Joseph E. Mattern, the now, former WW4WJD, of Orlando, Florida. Mattern is the ham who the FCC warned last summer to stop collecting traffic reports on local repeaters. Reports that he was allegedly supplying to his employer.

At the same time, the regulatory agency claimed that Matten had extensively used repeaters in his area to discuss business dealings regarding computer equipment. The FCC told Mattern to cease operating on repeaters where the repeater owners did not want him.

On September 20th the FCC again wrote to Mattern. This time he was told that he would have to re-take the Technician Plus Class Amateur Examination under the supervision of the Commission's Tampa office on or before October 30th. While Mattern did appeared for the re-examination on October 16th, he failed both the code and theory portions of the test. As a result, on October 26th Mattern's Amateur license was canceled and he was ordered off the air.

(FCC)

Enforcement: FCC raids Brooklyn, NY pirate broadcaster

The FCC has belatedly announced the closure of an unlicensed station in a Brooklyn, New York. Tagged was Vladimir Petit-Fere who is accused of broadcasting on 88.5 MHz and ignoring orders to cease and desist.

According to the FCC, before taking action, it had warned Petit-Fere several times that he was in violation of federal law and told to take his station off the air. The FCC says that he ignored the warnings. This left the agency no alternative other than to go in, detain him and confiscate his transmitting gear.

The Commission says that since January the agency has shut down forty-four pirate radio stations. It has also issued one major fine, participated in seven

court ordered seizures of radio transmitting apparatus and spearheaded the recent action in Brooklyn New York.

(FCC)

Enforcement: FCC raids Austin Pirate Broadcaster

FCC officials have also taken an unlicensed radio station off the air in Texas. This as the agency raids the studios of Radio One Austin operating without a license on 94.3 MHz in the FM broadcast band. The October 4th raid netted quite a bit of broadcast equipment including the station transmitter, audio equipment and even an old turntable used for playing records. Reportedly, one FCC agent climbed the stations forty foot tower to cut the transmission line and remove the stations antenna. No arrests were made during the raid. According to its own website, Radio One Austin plans to come back on the air.

(FCC)

The Law: W6OBB settles suit against WWCR

Retired radio show host Art Bell, W6OBB, has settled his defamation law suit against a radio station and another talk show host. Bell said that both had defamed him. Newsline's Don Wilbanks, KC5MFA, has what there are of the scant details:

You may recall that last year talk show host Art Bell, W6OBB, retired from broadcasting to pursue litigation against those he claimed had defamed him on the air. In his earlier May 1998 court filing, W6OBB charged that on December 9th, of 1997, one Ted Gunderson broadcast a radio show transmitted by WWCR. Bell said that during the course of that show a guest by the name of David Hinkson made statements that may have left the listening audience with the belief that Bell had been charged with child molestation.

These statements was false. In fact, Bell claimed that he would carry on his litigation until he was totally vindicated. And it now appears that he was successful.

In an October 20th posting to the Coast to Coast AM website, it was announced that having received an apology and retraction, Bell, agreed to a settlement. One that releases Gunderson and the radio station from the legal action. The rest of terms of the settlement were termed as confidential. The statement adds that Bell is now looking forward to putting this matter behind him and moving on with his life.

In New Orleans, I'm Don Wilbanks, KC5MFA, reporting for Newsline.

No word yet if Bell plans to return to broadcasting on a regular basis. His former show -- Coast to Coast AM is currently being hosted by Mike Siegel from

his home near Seattle, Washington.

(Coast to Coast AM)

Our History: K7UGA to ride the airwaves again

The famous K7UGA callsign formerly held by the late United States Senator Barry M. Goldwater has been re-issued to the Central Arizona DX Association. Association President Gary Capek, K8BN, says the club, which traded its N7KJ club station callsign for K7UGA plans to keep the callsign active.

Goldwaters former call came up for grabs this fall after the mandatory two-year waiting period following its cancellation. Barry Goldwater died May 29, 1998. The FCC granted the groups request for the call on Tuesday, October 24th.

(ARRL)

QCWA: Let's go sailing on a sea cruise

The Quarter Century Wireless is going to sea. Citing the need for a major shift in format and location, the QCWA Board of Directors has announced that the groups 2001 convention will last eight days and be held aboard the Holland America Lines ship the Westerdam. The convention cruise is being hosted by QCWA Chapter 162. The ship will depart from Fort Lauderdale, Florida on Saturday, October 5th with stops scheduled in Nassau, San Juan, the United States Virgin Islands and Half Moon Cay.

For more information on this unique hamfest on the water contact Larry Mc Clavy by e-mail to:

wa9jmo@wi.net

or visit the website at:

www.qcwa.org

(Badger Smoke Signals)

Netherlands: PC50R

A big radio related celebration in the netherlands is slated for early this winter. Q-News Graham Kemp, VK4BB, reports:

Special Events December. Netherlands PC50R.

December 15th the Radiocommunications Agency RDR of the Netherlands will celebrate the 50th Anniversary of former intercontenential radio receiving

station named Neara. At first the main goal of the station was to maintain communication with the Dutch colonies, Indonesia, New Guena, and the Netherlands Antilles.

Later on other long range communication purposes were added. Of course radio will be the magic word during the celebrations and Amateur Radio will be part of it.

Beside the weekend before the official celebrations on Saturday, Sunday, December 9 and 10, a special events station will be operated by employees of the radio agency. The callsign applied for, but not yet issued is PC50R. A prefix never before used in the Netherlands.

If you hear or work this very special station, please QSL as directed on the air.

(Q-News)

Ham Radio in Space: P3d ready and waiting

AMSAT Germany Executive Vice President Peter Gulzow, DB2OS, says that the Phase 3d ham satellite continues in a ready to fly but hold status. This, at the European Spaceport in Kourou, French Guiana.

Gulzow says that the launch window for the Ariane launch vehicle carrying Phase 3d will open on Tuesday, November 14th. Phase 3d is scheduled to be launched with three other satellites. These include the PAS 1 R communications satellite and two smaller birds.

(AMSAT-DL)

Happenings: Happy Birthday SOS

On the International front, the Times of London says that October 3rd was the 94th anniversary of the SOS international distress radio signal. According to a Times article, the SOS replaced the CQD distress call on the 3rd of October 1906 at the International Wireless Telegraphic Conference in Berlin.

The SOS was actually brought into use in 1908, but it's adoption by maritime stations was very slow. So slow in fact that at the time of the sinking of the Titanic on the 15th of April 1912, her radio operator, Harold Bride, used both the old 'CQ Distress' and the then newer SOS signals.

As an aside, the SOS combination of letters was chosen because the "di di dit, dah dah dah, di di dit" sound was easily recognizable. It was only later that the suggestion was made that it might stand for 'Save Our Souls'.

(G4NJH)

DX

In DX, look for Bhutan to be on the air this winter. This with word that 9M6US and K4VUD have paid all their fees and obtained airplane tickets in advance of their planned travel to Thimphu. They plan on arriving December 1st and departing about December 9th. K4VUD says that he has paid the extra fee for permission to run a full kilowatt on all bands. The two operators will have a tribander and wire antennas. K4VUD will operate SSB and CW while 9M6US plans to concentrate on RTTY. QSL requests for A52UD go to K4VUD. 9M6US will announce a separate QSL address at a later date.

(OPDX)

That Final Item: The Rescue of Flower Girl

And finally this week, word of a rather amazing ham radio rescue. This as a group of radio amateurs hiking near California's Lake Ramona save the life of one of mans best friends.

Newslines Tuck Miller, NZ6T has the details on a pup who should not have made a trip to the river:

On Sunday, October 22nd, several members of San Diego's Palomar Amateur Radio Club were approaching the lake when they noticed an old and very tired German Shepherd half trying to stand on the slick underwater muck while trying to tread water. As learned later, the dogs name was Flower Girl and by the time the group of hiking hams found her she was too tired to even put a paw on shore. And this is where amateur radio stepped in.

The hikers were split in two groups. After describing the situation to those on the west bank, two members of the east group waded into the water to help get Flower Girl out. A third person pulled from above. After what seemed an eternity, Flower was resting about 20 feet up the bank, receiving food and plenty of attention. But the problems had just begun.

Due to her advanced age Flower Girl suffers from hip dysphasia. Because of this, she could not walk on her hind legs without being in pain. Even if she could walk it would not be an easy trek It would take a skilled hiker 20 minutes to reach the north or south ends of the lake even without the added weight of a 100 pound dog.

But as luck would have it, the west bank hikers found Flower's owners and relayed the news back by ham radio. Flower's owners hiked to the scene and determined that the elderly dog would do best by swimming to a private access road where they could pick her up by truck. Rested, Flower got back in the water and followed her family, including their two other dogs, as they walked along the bank. The hams were released with shouts of thanks from Flower Girl's owners.

From San Diego, California, not far from a very happy pup named Flower Girl, I'm Tuck Miller, NZ6T reporting for Newsline.

Had the Palomar radio club hams not found her, there is a good chance that Flower Girl would not have survived.

Wrong. Our treaties bind the government in its relations with other nations. They generally have nothing to do with the police power as exercised upon citizens within the country. If you were correct, there would be no state driver licenses at all because they would be unconstitutional. However, that is patently untrue.

States are not obligated to honor federal treaties with foreign nations because the states are not constitutionally empowered to deal with foreign nations politically.

You will find no language in the IDL treaty that limits the power of any signatory nation (or its political subdivisions) to regulate driving within their borders or to require their citizens to have local licenses. The United States would not have ratified any such restrictions on its own sovereignty.

>Gore would
> like the entire state vote recounted by hand - but has only elected to do
> the ones with the largest apparent errors.

The largest apparrent errors in the Democratic districts. How about the 19 or 20 thousand votes thrown out in a heavily Republican district (Broward County if I remember correctly) ? If he were truly interested in getting a fair vote rather than stealing the election, he would have requested recounting in an equal number of both Republican and Democrat districts. Remember, it was Gore's people who specifically asked for the manual counts, and requested the manual counts in only those specific districts. Maybe it was just coincidence that they were all Democratic districts :>) .

> Bush is having a leather baby
> over this - He would have an entire cow over that one. This is why the
> Electoral college needs to be thrown out and replaced by the popular
vote -
> But since Bush is down by a quarter million votes, I don't think he would
> agree, and since you seem to only parrot what the republican camp tells
you,
> you probably agree as well. Learn to think for yourself -

The Republican camp has told me nothing. I have followed this election closely via CNN, Fox news, NBC, ABC, The New York Times, The Washington Post, and a few others. I have listened to all of the various positions and spins, and have formed my opinions based on a multitude of data from numerous different sources, but none of the info I considered was provided to me by any officials from the Republican party - in fact I never even received the usual pre-election mailers this year, I wonder if my mail carrier is a Democrat ?

>I AM ALL FOR A
> TOTAL HAND RECOUNT OF EVERY BALLOT IN THE USA SO THAT THE PRESIDENCY IS
> DECIDED ON THE TRUE COUNT -

The only problem with that is exactly the reason the country went to automated machine counts - manual counts were shown time and time again to be grossly polluted with human error, intentional manipulation, and

subjective interpretation. This is what Gore is hoping for since a total manual recount will give the liberals untold chances to rig the results. You can't bribe a machine, and none of the machines are affiliated with any particular political party.

> Let the independent or green party count them
> for all I care. This is not a "spin" it is the straight fact - period.
> ** SNIP of previously quoted posts **

But looking further, I think Gore's real goal and intent is to do whatever is necessary to delay the certification of the Florida count long enough so that it will be excluded from the electorial college vote, thereby throwing the election in his favor.

Regardless of the design of the ballot, the Florida courts have previously ruled on the issue of "voter confusion" and it boils down to personal responsibility and the assumption of a reasonable amount of intelligence necessary to exercise due diligence when casting a vote:

Nelson v. Robinson, 301 So. 2d 508, 1974 Fla. App. LEXIS 8601 (1974) [ballot confusion]

"If a candidate appears on the ballot in such a position that he can be found by the voters upon a responsible study of the ballot, then such voters have been afforded a full, free and open opportunity to make their choice for or against that particular candidate; and the candidate himself has no constitutional right to a particular spot on the ballot which might make the voters' choice easier. His constitutional rights in the matter end when his name is placed on the ballot. Thereafter, the right is in the voters to have a fair and reasonable opportunity to find it; and as to this, it has been observed that the constitution intended that a voter search for the name of the candidate of his choice and to express his choice for that candidate without regard to others on the ballot. Furthermore, it assumes his ability to read and his intelligence to indicate his choice with the degree of care commensurate with the solemnity of the occasion."

Well Skiddoo,

I don't know how old you are, but the only time I ever saw double-digit inflation was under Carter--a leftist, bleeding heart DemocRAT. Not until Reagan was I able to buy a house--when rates began to come down from 20% to single digits. I was a child in the '50s under Ike. The last Democratic president I was able to respect was John Kennedy--and I am sure people could find plenty wrong with him, too. The prosperity we have enjoyed started in the '80s, and, while Clinton would like to take credit for it, it is still a fact that the "rampant inflation" you spoke of took place under the most honest, but bumbling and clueless president we ever had when it comes to economic and foreign policy. I was THERE, I LIVED it. I SAW the idiocy of the leftists who believe that if only the US would just lay down its arms, the rest of the world would, too. We are now allowing our military to become under-funded and under-equipped, creating a situation where we could find ourselves in a war and be sorely pressed to re-arm quickly enough to prevent disaster. We have witnessed the most immoral, unprincipled president in history carry on sordid affairs, lie, slither, and cheat his way thru 8 years of a shameful presidency. Mr Gore may certainly not be as unprincipled a man as Clinton, but his liberal, leftist policies are the same. I cannot support him, either. The leftist ideal is tax and give away. Tax and give away. Do everything to shackle "big business" as you call it, when it is that very business that makes jobs. Government cannot "make" jobs. Sure, they can create "jobs", but since government makes no profit and generates no revenue from its own activities, such as business does, the money for those "jobs" comes out of the public pocket in the form of taxes. When you shackle business with more taxes, more regulations that hamper their ability to make a profit, guess what. You STILL pay for it in the form of higher prices for goods and services. Taxes, regulation, giveaways (welfare) are what leftists (socialists) like Clinton/Gore are all about. We need LESS government, not more. We need LESS taxes, not more, we need less government in our personal lives, not more. We need less regulation on the individual AND business, not more. We need a strong defense, not LESS so that those social programs that are essential can exist in the Land of the Free. We need more EFFICIENT government, not less. DemocRATS have NEVER given us that since John Kennedy. I pray that when all this brouhaha is over, we will not be saddled with more of the same. I am praying that Mr. Gore will, after all, go down to defeat. And that's what I think.

I guess you figure if you tell a lie often enough people will think it's
true.

As I stated in my response to your similar post in another thread, if
you saw a 20% mortgage rate at all, it was under Reagan. See

http://www.theunitedgroup.com/html/body_interest_rate_history.html

for a reminder. In fact, mortgage rates haven't been lower in the last
30 years than under Clinton, nor higher than under Reagan/Bush. And the
conservatives call those the "glory years."

Please take some responsibility for accurately reporting facts and not
supposition about what you think you'd like to remember.

Had you watched the Election folks "Divining" the will of the people you would understand. I have gone since Tuesday night with only catnaps, glued to both Fox and MSNBC.

They counted ballots for Gore if the CHAD had the slightest mark on it. We cannot have an election decided by fortune tellers. If we are, call in Miss Cleo she seems to be pretty accurate according to her commercials.

You don't have any part of it right. The 19K votes tossed were in Palm
Beach County, not Broward County, which tends to be Democratic, not
republican.

> If he were truly interested in getting a fair vote rather than
> stealing the election, he would have requested recounting in an equal

What a stupid statement. No one, not a Democrat or a republican would do
that. Besides, dubya is the one that wants to rush to judgement, even if
it's wrong.

> The Republican camp has told me nothing. I have followed this election

All this information and you still concluded that the 19K votes were in
Broward County and that it was a "heavily republican district?" You
should consider staying out of the debate with skills of deduction such
as you've demonstrated.

> The only problem with that is exactly the reason the country went to
> automated machine counts - manual counts were shown time and time
> again to be grossly polluted with human error, intentional
> manipulation, and subjective interpretation.

Not true, however you did state twice what the real reason was; time.
the machine counts, while less accurate, are much faster than hand
counting.

> This is what Gore is hoping for since a total manual recount will give
> the liberals untold chances to rig the results. You can't bribe a
> machine, and none of the machines are affiliated with any particular
> political party.

This is pure unadulterated conservative-speak. The manual count is done
in a completely bi-partisan manner with plenty of oversight. If the
Democrats were going to bribe anyone, who do you think it would be?

Certainly not another Democrat. It would have to be a republican. And if one of the republicans took the bribe you allege, would that make him better or worse than the Democrat?

> But looking further, I think Gore's real goal and intent is to do
> whatever is necessary to delay the certification of the Florida count
> long enough so that it will be excluded from the electorial college
> vote, thereby throwing the election in his favor.

What none of the macho bubbas seem to have a clue about is that irrespective of what goes on between the election and Friday the 17th, there is no certification of the Florida vote until then. Never was going to be. Friday the 17th was the earliest the Florida vote was going to be certified before the election started.

The initial recount, which was done automatically, by state law, without request from either campaign, is done. The manual recount will be done easily before Friday, so what is the problem?

dubya's group is the one that filed the federal lawsuit, how long do you think that will take to resolve?

Pray tell, what "stupid antics" has Gore been up to? Ask for a manual recount where all the conditions have been met to do so, similar to a process that can be done in Texas because of a law signed by dubya?

Can you tell the difference between Richard M. Daley, the mayor of Chicago, and James Daley, Gore's campaign representative? I didn't think so.

With facts like this, no wonder you're an anonymous coward.

824. Joe Mattern, WW4WJD...not the sharpest crayon in the box, is he?

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-12 00:00:00 UTC
From: toomanyradios@aol.com
Message-ID: <20001112160250.09232.00001501@nso-cg.aol.com>
Source record: 100067

Just saw this on Amateur Radio Newsline:

>>
Enforcement: Traffic Report Ham loses license

An update to our stories a few weeks ago regarding Joseph E. Mattern, the now, former WW4WJD, of Orlando, Florida. Mattern is the ham who the FCC warned last summer to stop collecting traffic reports on local repeaters. Reports that he was allegedly supplying to his employer. <<

Real smart. An obvious case of conducting business on amateur radio and using the service for personal gain.

>>At the same time, the regulatory agency claimed that Matten had extensively used repeaters in his area to discuss business dealings regarding computer equipment. The FCC told Mattern to cease operating on repeaters where the repeater owners did not want him. <<

Another no-brainer. If the repeater trustee doesn't want you on his repeater, stay off of it! It's his repeater, not yours.

Apparently, this guy didn't get the message:

>>On September 20th the FCC again wrote to Mattern. This time he was told that he would have to re-take the Technician Plus Class Amateur Examination under the
supervision of the Commission's Tampa office on or before October 30th. While Mattern did appeared for the re-examination on October 16th, he failed both the code and theory portions of the test. As a result, on October 26th Mattern's Amateur license was canceled and he was ordered off the air. <<

WHAT? He FAILED the Technician THEORY test? How can ANY existing ham FAIL this simple examination? The code test I can understand (most new hams learn only enough to pass the exam, then never use it again), but FAILING the TECHNICIAN THEORY exam?

I'm sure the local hams in the Orlando area are getting a good chuckle out of this one!

825. What microphone for SGC SG2000 Powertalk

I have a new SGC SG2000 Powertalk and the supplied microphone will barely drive the radio (50 watts PEP). I previously had an older SG2000 with the commercial head and it also suffered from low gain in the mic amp. I used a D104/TUG9 on this one and it worked very well. Since I let the d104 go with the radio I need to select another mic. Any other good choices for the SG2000?

If you have solved this problem with a SG2000 I would like to hear from you about the mic you chose

I don't believe that a change to 145.090 MHz could be correct. First of all, the 145.800 MHz allocation is pretty much reserved for space/satellite communication worldwide. Secondly, here in the U.S., 145.090 MHz is almost universally a packet BBS frequency. I'm not certain what it's allocated for overseas, but either way, NASA would probably check to see what the current designated usage is before changing the frequency.....

I have not attempted to hear them.

Well, the announced downlink is 145.800, but it's not active yet. You
can pick up the ISS on one of its operation frequencies of 143.625 NBFM
- mainly in Russian, but easily picked up with average equipment

The Texas law allows for ONE recount, not 3.4.5. or what ever. When asked today on MSNBC the former Dem Sec of State said that even if they get the hand count, and the absentee votes are in and Bush was still ahead they would seek further remedies.

In short they will not be happy until they get a count that gives them the win.

I am sure that is what anon. meant by "stupid antics"
"LRod" <lr0d@my-deja.com> wrote in message > Pray tell, what "stupid antics" has Gore been up to? Ask for a manual

Well, Mr. anonymous coward, does it bother you at all that Florida law provides for the certification of the election on Friday, the 17th?

Are you aware that this date was in place long before the election?

Do you realize you are asking a government official to circumvent the laws of the State of Florida for your own nefarious purposes?

Do you realize that were the Director of Elections to accede to your criminal request, all of the absentee ballots not yet received, and not required to be received until Friday, the 17th, would be invalid?

Are you a resident of the State of Florida?

The answer to all of these questions, of course, is NO. You have no idea of what you are talking about, but your macho bubba pea brain has gleaned some glimmer of misinformation from conservative internet blather and you have well and truly showed your ass and shot your foot.

You claim to want to "preserve our Constitution and protect the fair election..." yet you advocate sidestepping the very law you would invoke. You sound very un-American to me. That would make you a traitor and a subversive. Very illuminating.

I am a resident of Florida, and I resent your attempt at circumventing the laws of my state.

YES! Wisconsin law clearly states that anything over $1.00 in value is considered a BRIBE and is thus a FELONY!

Last I checked, cigarettes were going for between $3.00-$4.00 per pack.

But since it's Democrats who committed the crime, nothing is being done about it.

And how many recounts has the Gore campaign requested? One.

I know you macho bubbas think the automatic recount required by Florida law was a Gore request, but it wasn't. They've requested one recount in 4 counties.

Of course in dubya math that probably equals 4 recounts. I get it now.

>mistake? (Not holding my breath on this one, either.)

Incentive licensing has been around almost as long as ham radio itself. The idea of an IL structure was created in 1923. Back then the government developed the Extra First Class amateur license; to be awarded the ticket one had to be licensed for at least two years, take a test similar to the First Class exam of that period, copy 20 wpm, and have a clean record. Extras were then permitted to operate on a band that those with lessor grade licenses were forbidden to use. That band (200-220 meters) had originally been open to all hams.

Moreover, in 1959, the FCC asked hams, via a Notice of Inquiry, what incentives could be tacked on to the Extra Class license.

It was the FCC which first suggested incentive licensing, not the ARRL.

The Q Codes are a series of abbreviations which date from the days of Morse Code. Some of them are still in use in spoken and written communication.

Here are a few common examples.

QRM Interference, man made
QRN Noise, static
QRP Reduce power / low power
QTH Location
QSL Acknowledge receipt

There are aeronautical and marine abbreviations as well.

Hi Carl,
One thing that immediately comes to mind is some sort of interface that allows win 311 or 9x to talk directly to a kiss tnc. This would allow people easy access to the packet radio network quite simply using the standard tcp/ip protocols with the same platform that they use for everything else, no messing about. It would probably give packet radio the biggest "shot in the arm" it has had in the uk since "Winpak" reared it's head!!
It would be ideal if it could be gui with a nice framed interface giving protocol stats and ping and hop rrt's. Drag and drop packet radio, whatever next!
I do this already but I have to have a linux front end on another pc and that is a bit heavy going for a lot of people to set up as you can imagine!

Cheers Carl, I hope you like
the sound of it..Mark, g0usl

It's pretty obvious to anyone with half a brain that a hand count will increase the number of acceptable votes by a certain percentage, say one percent. Bush's 1/3 of the vote will be increased by 1% and Gore's 2/3 of the vote will be increased by 1% thus handing the election over to Gore *simply because* the hand count is being done in Democratic counties. If they hand counted the Republican counties, Bush would pick up votes. That the Bush forces didn't see this coming is beyond belief.

Unless the entire state of Florida is hand counted, Gore will have simply stolen the election by requesting hand counts ONLY in Democratic counties and Bush and his advisors were too dumb to see it coming. As a Libertarian, I find all this rather amusing.

I am sorry for putting this out on the server, but I could not find Burt's
E-Mail address.
I have been to your site Burt, and although some of the stories and cartoons
were funny, some of the other articles there were not so funny. If you are
telling me to butt out, 1)This is a public server 2) you should be arguing
amongst your selves.

:Spewing that sort of drivel its no wonder you remain anonymous.

There is a lot of fear out there. Plus many feel that the deck
is stacked against the common man. They trust a gun far
more than they do the courts or the legislatures which they
see under the control of the rich college boys.

While it is easy to point fingers at rednecks for such attitudes,
you can see the same feelings in the labor unions and even
within the black community.

I see by the morning news that Duval county which is solidly
Republican had 26,000 ballots disqualified for the same reason(s)-
too many holes punched or no recognizable hole detected by the counting
machine.
So I guess that Gore's people would rather just skip recounting Duval
county, then?

The only sensible way to settle the FLorida situation, that means a
solution that is truly a CORRECT solution, is to recount every county
which had *any significant number* of disqualified ballots,for whatever
reason. If there is any revote at all it must be done statewide in order
to be a fair and true election. Anything less would only fuel the
controversy.

Well.. I stopped reading this thread when it got to the US vs Canada bit. I just thought that it was quite resourceful of the little druggies to monitor pager freqs. Haha.. they should have had some sort of warning that would page them when their address comes up on a pager then proceeds to wipe the hard disks, Then they could page their very well trained dog to hide the guns and bury the drugs.
Perfect!
(but just a beeper pager for the dog cause of course he could not read)

So you're saying the report a few hours ago on MSNBC that separated the apples and oranges of that claim was a lie?

The Buchanan vote was so out of proportion to every distribution graph you can conceive that there is no possible conclusion that anyone but a macho bubba can draw but that they clearly weren't Buchanan's votes.

Think about it. Buchanan would rather slit his wrists than see another Democrat in office, but even HE says the votes are Gore's.

There was no "South Vietnam" in 1949. At that time, the entire country
was "French Indo-China." It wasn't until 1954, when the French lost
control of their colony and the country gained independence due to
a nationalist named Ho Chi Minh (Ho^` Chi' Minh), that the country was
divided in two -- North and South Viet Nam -- two words:
Vie^.t Na^'m, meaning "Land of the Viets." (I had two years of
Vietnamese language [Tie^'ng Vie^.t] and history.)

I was wondering if the Stlouis folks still are voting the Pruett-Igoe shanties they tore down ~25 years ago....that slum would sure hold a bunch of ghosts usable on ballots. Maybe thats why the had to hold the polls open till 10pm, to get them time to come out to vote..

Mark the appropriate circle to vote for your candidate:

George W. Bush ---------------------> O
Al Gore --------------\/-----------> O
Pat Buchanan ---------/\-----------> O
Ralph Nader ----------------------> O

Candidate #1 gets hole #1; no problem.
Candidate #2 gets hole #3; hole #2 goes elsewhere; problem.
This illustration is actually clearer than the real ballot.

Actually, this might be a slightly better drawing of the butterfly ballot actually used...

George W. Bush --> O -------------------------

------------------------- O <-- Pat Buchanan

Albert A. Gore Jr --> O ------------------------

------------------------ O <-- Ralph Nader

And So On... --> O -------------------------

As you can see, its not that hard to figure out - especially with the large arrows in each name block pointing to the right hole to punch for each person. And, in reality, the actual ballot is even easier to read than the above (better lines, better arrows, etc).

I was for many years a communications technician for
a large government agency. It was well understood that
our management would not back us up if lawsuits were
filed against us for aledged communications problems
resulting in some sort of public litigation.
While dispatchers were consistantly named in suits, radio
techs were not (yet). This was probably due ignorance of
radio systems by attorneys. Aside from dead spots, weak
signal conditions, skip and a whole lists of goofy radio problems,
technician induced testing, modification, maintenance and
installation, did and can bring on radio outages that could
become litigious.
Although the idea of technicians being sued was poo-pooed by
many techs, I and others considered the possibily real. Mainly
because of the contrary attitude of management. They didn't tell
the truth.
Most municipalities buy the best communications they can afford.
But in court, that's not enough. The municipality and any workers
involved in a case are liable. I would imagen some government
intities back up their people, but the one I worked for wouldn't.
So I quit, screw 'em.

The first American actually killed there was OSS Lt. Dewey in Saigon,
September 26, 1945, the month following Japan's surrender from WWII;
this was during the French rule and the early Viet Minh resistance.

President Eisenhower pledged support to Diem's government and military
forces on October 24, 1954.

The first American *combat* death in Vietnam occurred on July 8, 1959.

http://servercc.oakton.edu/~wittman/chronol.htm

> Here in this dimension, Kennedy was in the White House by then.

Notice that Kennedy was not even elected until over a year after that
American *combat* death.

Here in this dimension, see Eisenhower's own writings on the subject.

Monica Blowinsky weighed in this afternoon with her own version of the blue hairs of Florida who cannot read a simple ballot.
Monica, in all her wisdom stated, "These oldsters cannot read the ballots because they are legally blind. They should do what I did...use the "touch" method."
Monica went on to say that the voting system in Florida does not "suck" despite Daley's claims.
Monica closed the interview with the statement that, "If the Democrats want to see something that REALLY sucks, they should call me."
Clinton was mute on this topic, and chose instead to procure a properly humidified cigar from his stash. He did not inhale.

I'm beginning to wonder if that wasn't also the supposed motive behind
"Incentive Licensing" in the 60's. From 1952 to the mid-60's there was
no 20 wpm code test.
Back then, the majority were Generals, and prior to that, there was no
class lower than General. So I guess the ARRL will admit their
mistake? (Not holding my breath on this one, either.)

This is the latest version of the Drake TR-4 series of rigs. Includes the hard to find noise blanker. Also included is AC-4 power supply and MS-4 speaker. Front panels are beautiful. Transciever has a serial number above 44K, power supply above 60K. Tried it on 40 SSB, almost the only operating I do, and got good audio reports. $500 plus shipping via UPS. Cannot ship outside continental US. Thanks for reading the posting.

73s,

Evan

>IDL's are honored.
>
1==> Perhaps it is due to the fact that many Americans never travel to
a foreign country and don't realise how useful it can be to have an
IDL?

2==> Probably not as important as it once was, though. These days,
many countries will allow a tourist to drive on a valid foreign
license without the necessity to get an IDL.

In New South Wales, Australia, for example, an American can drive as
long has he has a valid US drivers license. Presumably this applies
to other Australian states also, although I haven't actually checked.

3==> We do drive on the left hand side of the road, though, and the
drivers position on vehicles is on the right hand side.

However, most American tourists seem to have no problem adapting to
this.

You are correct for the resident. If one is not a resident, yet
one lives in Kalifornia, one can use an IDL in lieu of the
residential license. The key is in not becoming a licensed
citizen. This is true for any State and is the way foreign
citizens and visitors drive "without a license".

886. Re: The "Confusing" Florida Ballot Argument??

I can't figure it out at all. I saw the ballots and looked pretty
straight forward to me. Big arrows. Big lines connecting arrows to
candidates. Duhhhhhhhh....Are they really that brain dead over there? I
think it's an overblown farce myself. If they screwed up, they should
have asked questions before casting the vote. They do have people there
to supply answers. It sure seemed ok before the election, and I get the
feeling there would have been no problems noted had Gore had the edge
instead of Bush. I'd also be willing to bet when the overseas ballots
come in, that will seal Gores fate anyway. I find it hard to believe
that the majority of the service people will vote Gore. Hand count?
Crap...Less accurate than the machine count, and ridiculous. They should
have finished the second machine recount, which put Bush ahead, "again
for the second time", and declared him the winner. No need for a hand
count, and much more likely to have mistakes anyway. Are they gonna redo

the hand count too? When will it all end??? I hope by January...MK

No, don't try to confuse me with misinformation because, unlike many Democrats, I have enough intellegence to see right through it. According to all reliable sources, the information "trout" posted is inaccurate. That is the facts.

> The same ones who while chastising
> the Democratic party for taking the
> issue to court, filed their lawsuit
> FIRST {snip]

That is facetious and you know it. There have been several lawsuits filed by various Democrats in Florida over the last week. Now, you may argue that these lawsuits were not filed directly by the Democratic Party itself, but the effect is exactly the same. In other words, the Party doesn't have to file lawsuits - fanatical local Democrats are doing it for them.

Therefore, I think the Republican Party should file lawsuits of their own in an attempt to stop all this nonsense. In fact, if I had any say in the matter, there would be a lot more.

Look, I understand what you're trying to say - it would be illegal for the clairman to immediately certify the election. Now, try to understand what I'm saying. It is not "illegal" to petition the chairman to do that. As I said, in the United States, it is perfectly legal to petition the government or to advocate a petition.

Why are republicans assholes ?

Let us see.

They don't want the courts involved in the
election in Florida so they go to a Federal
court to stop the count.

The Federal judge tells them to Fuck Off.

They convince the State official to force a
final count by 5pm to take away the voters
legitimate right to know the people's vote
and force the Democrats to have a state
judge give them an extension.

The extension is the only way to come to
an accurate conclusion.

The republican assholes don't want the
accurate conclusion. They don't care
about the people or their votes.

REPUBLICANS ARE INDEED ASSHOLES.

And I answered you. There have been 5 recounts. Since only one was automatic, the required state-wide recount, I thought you were smart enough to realise that the other four were requested by the Democrats.

> Your partisan rhetoric notwithstanding,
> your answers 2-5 are all the same recount.

However, obviously you're not. Each of those four (items 2 through 5 on my list) are the result of a specific, and separate, recount request by the Democrats. Therefore, they are each one a separate recount requested by the Gore campaign.

What about getting one of those stainless tool boxes for right behind the cab? There you could drill holes to your heart's content, the antenna would be right in the center, and when you trade, just remove the box for the new truck.

In article <3A0E4313.3E4ADBCC@sprynet.com>, Charles Fregeau <n5hsr@sprynet.com>
writes:

>I'm beginning to wonder if that wasn't also the supposed motive behind
>"Incentive Licensing" in the 60's. From 1952 to the mid-60's there was
>no 20 wpm code test.

Not true, Charles.

The 20 wpm code test was reintroduced in the restructuring of 1951, when the
old A, B and C licenses became Advanced, General and Conditional, respectively.
That restructure added the Novice, Technician and Extra classes, too.

Before 1951, all hams had all frequencies, but only Class A hams could use
'phone on the bands between 2 and 25 MHz. The 1951 changes required an Advanced
or Extra for those same voice privileges. And the 1951 restructuring raised the
bar - after Dec 31 1952, the FCC would issue no more new Advanceds. There was a
mad scramble to get an Advanced before the door closed - but in December 1952
the FCC abruptly reversed their position and granted all operating privileges
to all hams except Novices and Techs. No discussion, no NPRM, no explanation,
just a quick announcement and it was done. This change is what folks like W2OY
were so ticked off about.

No more new Advanceds were issued until 1967 - but the Extra was still there
several thousand were issued.

>Back then, the majority were Generals, and prior to that, there was no
>class lower than General.

In some ways the Class C/Conditional was "lower than General" because elements
taken by mail carried no credit towards an upgrade. But the operating
privileges were the same.

>So I guess the ARRL will admit their
>mistake? (Not holding my breath on this one, either.)

What "mistake"? Do you mean 1951 or 1968?

The Novice was intended as a "learner's permit" so that new hams could get
started without having to do 13 wpm & General theory all at once from day one.

The Technician was intended to attract technically minded folks to exploit the
upper frequencies, which were the hot item in 1951 due to TV and wartime radar
developments.

The Extra was intended to raise the level of technical knowledge and operating
skills.

The 1952 reversal was the FCC's idea. And btw, back in 1949 -1951 there were two lobbying groups, each claiming membership of several thousand hams (out of a total of ~90,000 US hams). One group wanted more phone privs and the other wanted tougher tests. Both groups disappeared shortly after the 1951 changes.

The 1968 changes were the result of more than 5 years of discussion. As Jeff noted, the whole thing started because the FCC (NOT the ARRL) wanted changes . The FCC was concerned about the perceived lack of technical knowledge among US hams. (Sputnik fever, perhaps?) The increased use of manufactured gear and the "appliance operator" attitude of some hams back then were cited as bad trends. All sorts of proposals went back and forth - the
>
The 2000 restructuring was the FCC's idea, too. In fact, it seems like the FCC had it all planned out three years ago.

If anybody made a mistake, it was the FCC.

>Then came the arrl restructuring proposal and they screwed us.

How did "they" do that, Vince?

The whole restructuring thig was the FCC's idea. The ARRL proposal was for four classes of license (matching the FCC NPRM), 0/5/12/12 wpm code testing, and BETTER written tests. This proposal was developed by the elected representatives of the ARRL membership - the Directors of the various divisions.There was wide difference of opinoin among them - some wanted no change and some wanted even more change. The ARRL leadership also encouraged all interested parties to send comments to the FCC.

Back when all of this was going on, I communicated my ideas to my Director. Also sent detailed comments to the FCC. Did you?

> Ed you'll

How will the problems Ed spoke of be cured by tougher tests? Enforcement is the issue - and since Riley's been on the case, there's been lots more of it. Of course there's a lot more enforcement needed - things like this don't change overnight.

According to Florida State Law, the ballot was illegal
because of its layout.

Check into it. The entry for Buchanan was not allowed
to be second on the ballot and in a different column.

The argument has been "confusing", but in reality,
Florida Law does not allow it to be laid out as it was.

It is in the statute.

jeffreyh@Hawaii.Edu (Jeffrey Herman) wrote:

> CNN just reported that Gore is asking for a Dade County recount.

Dade County has been one of the 4 counties where a hand recount has been requested from the very beginning; Dade, Broward, Palm Beach, Volusia.

Confusion may exist because many media outlets insist on giving Florida a "Miami" county, and there is none.

Sigh! Can you read? My question was, "how many recounts has the Gore campaign requested?" The very first answer you give me is "1. The required state-wide recount."

Your partisan rhetoric notwithstanding, your answers 2-5 are all the same recount. I was right the first time; dubya math.

So, by your definition, when they do begin that process, will they be
"manipulating the outcome of the election?"

Of course not. Get real.

You need to figure out what you're reading. This seems to be a
consistent failing of yours.

> In the United States, it is perfectly legal to petition the government
> or to advocate a petition.

Of course it is. Will you accept that it isn't legal to advocate an
illegal act?

> So the email petition you refer to is not illegal.

Try to keep up here; the email petition is asking the state elections
chairman to immediately (that's as of 12 Nov) certify the Florida
election. That was in plain text, did you read that? Are you following
so far?

Florida law provides for absentee ballots to be accepted with a postmark
up to election day, 7 Nov this year. Since you're not from Florida, you
may not know that. Are you with me still?

Because it is not possible for absentee ballots mailed on the 7th to be received on the 7th, Florida law provides for 10 days transit and sets the time by which they must arrive to be counted as (this year) 17 Nov. I know that was a little complicated, but if you have questions, I can help.

Now hang on because here is where you have to start using your brain; Since 17 Nov is the deadline for absentee ballots, the state waits until then to count the absentee ballots, add them to the other totals, and certify the election.

Whew! You must be exhausted. But there's one more step for you to take. Would you not agree that attempting to certify the election prior to the statutory date is illegal?

A rational, sane person certainly would, so I will naively assume that you do. I will conclude by asserting, as I did before, that a petition of any kind that advocates an illegal act is, by definition, illegal.

The crew has been granted the entire weekend off. ;-) SO who knows what it might have been. As far as I'm aware they had nothing scheduled with ground control for the whole weekend. I can't remember if they were supposed to have today off too or not...(Monday?)...seems like I heard that...but I don't clearly remember. This was the first long break they've had since arriving on station.

I got this info from watching NasaTV.

I have listened to 143.625 for a week now. That freq is a full duplex downlink. The uplink freq is a different freq and I am not sure what it is(should be 144.95). The chatter I hear sounds like a discussion and not just rag chew. I think its a full time downlink comm freq to their controllers. I hope to hear them talking English to the only American onboard sometime but so far only Russian. I assume the Russians are doing the controlling of the ISS at this point. They use the 143.625 alot and they are on it on every pass over the US so far this week.

Actually, the Florida courts have already heard this complaint, this whole ballot confusion issue is nothing more than the Democrat's effort to delay the finalization of the vote count long enough that Florida's electoral votes will not be counted, thereby stealing the election for Algore...

Nelson v. Robinson, 301 So. 2d 508, 1974 Fla. App. LEXIS 8601 (1974) [ballot confusion]

"If a candidate appears on the ballot in such a position that he can be found by the voters upon a responsible study of the ballot, then such voters have been afforded a full, free and open opportunity to make their choice for or against that particular candidate; and the candidate himself has no constitutional right to a particular spot on the ballot which might make the voters' choice easier. His constitutional rights in the matter end when his name is placed on the ballot. Thereafter, the right is in the voters to have a fair and reasonable opportunity to find it; and as to this, it has been observed that the constitution intended that a voter search for the name of the candidate of his choice and to express his choice for that candidate without regard to others on the ballot. Furthermore, it assumes his ability to read and his intelligence to indicate his choice with the degree of care commensurate with the solemnity of the occasion."

912. Kenwood TM-V7 question

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-13 00:00:00 UTC
From: Tim Moore <Tim@TM52.com>
Message-ID: <3A0FFE7D.6C9E0287@TM52.com>
Source record: 99947

I am wondering if someone can explain to me what Kenwood means with a Locked Band Repeat function. The TM-V7 has this feature along with cross band repeat. I understand cross band but I don't understand how it can repeat on the same VHF band. Can it receive on 147.00 and repeat out at 147.600??? This seems odd since it would certainly overload the second receiver in the radio. Any know?? No guesses please, I have enough of them.
Please email me as I may never find my way here again.

Sure is- one clearly of their own making. If 19,000 mistakes were made out of half a million votes, that is a quite small percentage. So we should just allow all those "mistakes" to vote again, just because they now say "Hey, I think I might have done it wrong!..."

>
> > and which 19,000 voters does he order eligible to revote?
>
> The voters who cast those ballots.

Oh...Just offer those who "believe I might have made a mistake" another ballot, then. Yeah, Right! Of course, none of them would be caught dead voing for algore twice, would they???

>
> > The idea is preposterous.
>
> Yet it has precedent.

There's not much that doesn't, given the number of lawyers who always get into everything. There is more precedent for NOT allowing it. Even Florida case law:

Nelson v. Robinson, 301 So. 2d 508, 1974 Fla. App. LEXIS 8601 (1974)
[ballot
confusion]

"If a candidate appears on the ballot in such a position that he can be found by the voters upon a responsible study of the ballot, then such voters
have been afforded a full, free and open opportunity to make their choice
for or against that particular candidate; and the candidate himself has no

You are missing something!

The IDL is not valid without your regular license. You need to have
both with you, you need to show both. So in Calif, you can show your
IDL, but must also show your Calf DL. You can't get by with just the
IDL. IDLs are only valid when accompanied by the regularly issued DL.

Comprende?

From: "Kenneth J. Ernandes" <n2wwd@mindspring.com>
Subject: [amsat-bb] Updated Phase 3D Orbital Data Estimates
Date: Sun, 12 Nov 2000 19:52:01 -0500

Below is the estimated State Vector and Keplerian Elements for
the AMSAT Phase 3D spacecraft. The vector data was computed from
Arianespace orbital parameters at the time Phase 3D is scheduled
to separate from the Ariane 5 upper stage. The Keplerian Elements
were computed, in turn, from the vector.

Vector format = 10107
Satellite Name: Phase 3D
Catalog Number: 93400
Epoch MET: 0.02983771991
0/00:42:57.979 MET
EFG E: 4321.19714449 km
F: 10857.07279003 km
G: -1323.50573459 km
Edot: -3.1484853319 km/s
Fdot: 5.7556066452 km/s
Gdot: -0.5488001613 km/s
ndot/2 (drag): 0.00000000771 rev/day^2
nddt/6: 0.00000E+00 rev/day^3
Bstar: 1.25668E-05 1/Earth Radii
Elset #: 1
Rev @ Epoch: 1.52588079822

Launch Window Opens: 2000-NOV-15 / 0107 UTC
Phase 3D separation: Launch + 0042:57.979

The following Keplerian elements were computed from this vector and
the scheduled date and time of the launch window opening. Updated
Keplerian elements will be computed from the vector, based on changes
to the scheduled or actual launch time.

Phase 3D
1 93400U 00320.07636550 .00000001 00000-0 12567-4 0 13
2 93400 6.5034 246.6469 7357988 175.9296 13.3886 2.02435417 17

Satellite: Phase 3D
Catalog number: 93400
Epoch time: 00320.07636550
Element set: 1
Inclination: 6.5034 deg
RA of node: 246.6469 deg

Eccentricity: 0.7357988
Arg of perigee: 175.9296 deg
Mean anomaly: 13.3886 deg
Mean motion: 2.02435417 rev/day
Decay rate: 7.71000e-09 rev/day^2
Epoch rev: 1
Checksum: 283

Note that "93400" is a temporary Catalog Number. A Permanent Catalog Number and International Designator will be assigned when Phase 3D is launched. The satellite name will also be updated with the next sequential "OSCAR" designator.

These Keplerian elements represent a pre-launch estimate of Phase 3D's initial orbit. The orbit will change significantly over the first year the spacecraft is on orbit. Updates will be provided for significant orbital changes.

The Phase 3D launch team will be publishing a similar set of Keplerian elements. The data provided by the launch team will be "osculating" parameters, compatible with AMSAT command station software. The osculating elements are the exact physical representation of the orbit as opposed to the "mean" parameters provided in this bulletin. I provide these mean elements as they are fully compatible with the NORAD SGP4/SDP4 orbit propagation algorithms. Tracking software that uses the NORAD propagators should use the "mean" Keplerian elements provided herein for the most accurate result. Tracking software using non-NORAD orbit propagation methods should use the "osculating" elements provided by the Phase 3D launch team.

[cut]

In the frequency file (stsplus.frq from 11 november 2000) for the
STSPLUS tracking software the uplink fq is stated to be 139,2080 with
the downlink fq 143,6250 for "ISS-VHF1". There are also a number of
other fq:s available for the ISS, but I don't know if they are used at
this time or not.

Characteristically, you would ignore the Liberal-generated turmoil that
was known widely as Watergate, which dragged on interminably, with all
sorts of economic effects. *Of course*, Nixon was to blame for a modest
interest rate increase, too! But of course Carter had nothing to do with
the fact that when he LEFT office rates were bunping 20%! We see.

You know that my statement is essentially correct, when a President
takes office he has no immediate control over the rate of interest. It
takes some time for his policies to be felt, and by the end of year
three it usually can be seen. Nixon was there well past one term, and it
is fair to say that his policies had an effect on rates at the end of
his first term. Of course, you will pick a nit wherever you can find
one, hey?
>
> I guess nothing good ever happens unless a republican is in the White

Not at all. I've clearly recognized Clinton's input into the present
economic boom, for instance. As it happens, that largely amounted to his
ability to resist the usual Liberal/Leftest tampering with the success
he was handed by the Bush administration.

> his inauguration?
>

Conveniently and typicallhy, you refuse to acknowledge that the primary reason for that spike in rates was tremendous spending (borrowing) to bring the military back to some resemblence of that which the country needed to counter the threats of the Communist bloc. Of course, it is very likely you don't believe there was ever any threat from that quarter nor from Communism at all, right? It just wouldn't be seemly to acknowledcge any such thing as a card carrying Liberal/Leftist.

> associate that with Clinton,

ANd you think thatClinton hasn't??? Wake up Rip Van Elrod. The total forces in all services are at the lowest in modern history, while the scope of threats has never been on a broader scale. We are relegated to the necessity of using places such as Aden for naval vessel refueling, with results such as the Cole debacale. And it was, from reports, one of many such attacks planned. We should never need to subject our navy to that sort of threat.

yet by your own statement the collapse of
> the Soviet Union has allowed some "stand down." For whom? Bush, only?

Yep, we destroyed numerous MInuman missile sites, they're now vacant lots. Our navy is a mere shell of its former capacity. SOME of that was indeed appropriate. Not nearly all. Of course, your Leftist buddies abroad wouldn't begin to pose any threat to our security, would they?

Didn't say that at all. Luckily there has remained some Conservative
Democrats in the Congress who know what is necessary to make the system
go. With all your Liberal/Leftist revisionism, its clear that if
unchecked the next generation will grow up just as ignorant as you did
feasting on nothing but Liberal/Leftist propaganda while enroute to a
degree in Political Science.

I love hearing
> conservatives say that. It's the signature of their lack of

Liberal/Leftist (n) empty headed, vacant eyed creature of the Left, who thinks he was born a Liberal when such a thing clearly is not possible, given that newborns are a blank sheet. Long on hot air and equally empty wildeyed promises. Short on common sense and reasoning power. Got where he is on the strength of lots of that hot air Finds technical explanations confusing and of no help, and blames it all on the conservatives. Usually is a terminal condition from which there is rarely a recovery.

Have a one-month-old 2001 Chev Silverado LT that I just don't want to drill holes in, nor do I want to put scratches in the clearcoat with a mag-mount.

Anyone have a favorite way of mounting a dual-band antenna (2M/440), maybe on the bed rails or in a stake pocket?

Thanks in advance for any bright ideas.

73, Hans, K0HB

Well, what I was afraid would happen happened. I understand your statement that the ballot, in its design, had the effect of favoring Bush. The macho bubbas have completely misinterpreted your comment.

I also believe that you weren't intimating that the Supervisor of Elections set about to "design" the ballot with that in mind. Of course the macho bubbas then leapt to the conclusion that she must have been bribed.

Every report I have heard indicates that she is a fair minded, conscientious individual who was merely trying to assist voters with larger type. That it had such unfortunate consequences was certainly not what she had in mind.

LRod

p.s. I tried to e-mail you at the address shown, but it bounced. Please e-mail me your address, if you wish. I wanted to clarify some comments from another forum.

Everyone is born a conservative. It takes maturity to be a Liberal.

macho bubba (n): a noisome creature, incapable of independent thought; fond of blind repetition of unproven allegations; exhibits propensity for bluster; extremely self-centered; unaware of history or the laws of economics; almost always of a conservative bent, although the reverse isn't necessarily true; mean spirited.

932. Cat Scan--BC895XLT interface for Macintosh

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-13 00:00:00 UTC
From: Joe Mastroianni <joe@adaptivesilicon.com>
Message-ID: <8upg6i$hjg@dispatch.concentric.net>
Source record: 99967

Abstract:

Cat Scan is currently Freeware:

Cat Scan is a librarian/ editor and control interface for the Uniden BC895XLT scanner. The interface implements the complete set of front panel controls and display. The librarian/editor allows for convienient on-screen channel editing. Channels may be organized, sorted, and manually moved from bank to bank using the Mac's drag and drop capabilities. Channels, Banks, and entire scanner memory dumps may be written to simple ASCII files for easy transfer and reuse.

Software State: Alpha

Target Hardware: PPC Mac. MacOS 8.5 or greater.

Documentation: Quick Start / User's Guide, Release Notes provided.

Availability: info-mac.org, e-mail to below (web site not up yet)

Contact: Joe Mastroianni <joe@killerowls.com> <joe@isthisthingon.com>

Can you elaborate on this? I've heard them once on
143.6250. It was very scratchy but understandable.
(except for the Russian thing) ;-)

Should we scan 144.900 and 145.800 too?

Just because the officer made a mistake is no reason to rely on the fallacy that an IDL means anything, without the license backing it up. You can fill up lots of threads in the newsgroups with stories from people who will tell you they "lucked out" when they did not have a license, were too young, were drunk, were on drugs, had a body in the trunk, were driving backwards at 30 mph, whatever.. It doesn't mean a thing, except that police officers have discretion, and often use it. (Of course, I don't advocate discretion when dealing with a body in the trunk!)

There is *no* database the Police Department can check on line if an officer calls in an IDL. It isn't a license, as we covered before, it is just a translation. It has a sequential number on it issued by (of all places) the American Automobile Association in Heathrow, Florida! It is not "on line" in any capacity, so what the officer did on the radio we do not know, but he certainly didn't call in the IDL.

If you've come from overseas and now have a US drivers license (from OK), I find it hard to believe that you "by mistake" handed the officer the IDL rather than your license, when you got pulled over. Shame on the officer for not catching it, but hey, they're human too...

> the IDL has a govt issue ID# kinda like a tax id i think.....

Nope. It's just a sequential number, issued by the AAA.

> and
> my OK driver license has a DL# but not my social on it...

So? You chose not to give a social security number when you got your OK
license...

> ..I hope this helps
> you all out.......and i have used my IDL lots of times for ID....

We're not talking here about what some people will accept as ID. Some people
will also accept library cards as ID.

rholling@fcc.gov

Sir:

I have noted the incursion of CBer's on 10 meters has escalated in recent weeks. We as amateurs are powerless to protect our interests as the interlopers are operating on AM and we are limited by bandplan to CW.

Is it possible that the FCC could suspend the bandplan for a 30 day period. This would allow amateurs to operate phone in the present CW portion of the band .

I realize this would cause some contention for a short period of time, however it would cause enough interference to the interlopers to run them to the other side of the 28Mhz wall.

We are hampered by abiding to regulations, where as those that do not are operating with impunity.

Fred Hambrecht W4JLE

936. AMSAT Phase 3D H.F. Launch Nets.

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-13 00:00:00 UTC

The launch is scheduled for 11/15/00 01:07UTC Tuesday evening U.S. time.

The Launch Information Net also will be carried by key HF stations, led by the Goddard Amateur Radio Club's WA3NAN (http://garc.gsfc.nasa.gov/www/retransmission/retrans_status.html). WA3NAN expects to be on the air an hour prior to launch and will re-transmit on its shuttle frequencies, 3.860, 7.185, 14.295, 21.395, and 147.45 MHz. W5RRR at the Johnson Space Center in Texas - or its alternates - will use 3.840, 7.279, and 14.282 MHz.

The Radio Club of Kourou FY5KE also has announced plans to broadcast the Phase 3D launch on 14.315 MHz in French "and probably in English."

Any indication of satellite coverage? Some repeaters have satellite downlinks
attached (for NASA feeds, etc.).

Please read the following URLs. The information Reed has supplied is not
correct as far as I'm aware.

143.625 is NOT a beacon frequency. It is the Russian Downlink from ISS to
the Russian Ground Control.

http://ariss.gsfc.nasa.gov/ExpeditionOne/

For Ham Radio Tentative Frequencies are:
Initial operations will only take place on the 2m band.

Here are the tentative frequencies for Expedition One operations: Worldwide
downlink for voice and packet: 145.80
Worldwide packet uplink: 145.99
Region 1 voice uplink: 145.20
Region 2 & 3 voice uplink: 144.49

Reed, please quote your source or correct your comments.

Tim

>both with you, you need to show both. So in Calif, you can show your
>IDL, but must also show your Calf DL. You can't get by with just the
>IDL. IDLs are only valid when accompanied by the regularly issued DL.

If you are a California resident, you must show your CDL, but if you're
a visitor, the IDL is ALL you need. The PD can still check you very
closely if they think you are a resident, and they can also give you a
VERY hard time if you're using one of the bogus IDLs you bought on
the Net, but a real IDL is valid and ALL you need if you're not a resident
of the state you're using it in.

He is confused between amateur radio and regular operations.

143.625 is the regular downlink (corresponding uplink is 139.208), you
may use it as a beacon when you are in a groundstation coverage area.

145.800 is the amateur radio downlink. Of course you may want to scan
uplinks for curiosity, but it is not really useful.

And you graduated from which law school?

Your argument is specious as it only applies to PAPER ballots.

My day was made watching The "Reverend" Jesse Jackson getting heckled as has his people in the past done to others.

Poor Jesse was so mad he left the rally and it's very small turnout. Once again the Democratic folks have used up a "house nigger" and are probably setting back laughing there butts off. The Dems have exploited African-Americans far more than any slave master.

i do not know if this will help you all out but....i currently live and reside in Oklahoma City,
I lived in Australia for two years Perth, Western Australia to be exact.....but in 1994 I traveled to Europe for 120 days to travel and work around Europe....now I had to go and get an International Drivers License...for Europe and I drove in Australia on my Oklahoma drivers license...but they did accept my IDL in Australia as well....(i know i had an accident) was hit from behind.....well i moved back to Oklahoma City in 1998 still have my current IDL and that is because i just pay the reinstatement fee every two years......and i got pulled over in Oklahoma City just about eight weeks ago and gave the officer my IDL by mistake and he called it in and i had no problems.....i did not realize what i had done until after he let me go with a warning ticket......but it does not have my social security number on it, nor does my regular driver license for that matter......the IDL has a govt issue ID# kinda like a tax id i think.....and my OK driver license has a DL# but not my social on it.....I hope this helps you all out.....and i have used my IDL lots of times for ID.....

Numerous posts on this subject (not necessarily by you) indicate some sentiment to the contrary.

> The recount conducted yesterday as stated by the election officials
> did not follow the law, but rather tried to devine the intent of the
> voter.

And when that shortcoming was discovered, they changed the procedure to one stipulated in 1990 and redid the canvass. To paraphrase the comment made by many regarding the approval of the infamous butterfly ballot, the procedure was agreed to by both parties in each instance.

> In Texas there is one recount if triggered by a campaign or automatic
> period.

It's useful to actually read the Texas code. For example, considerable sentiment expressed in the many discussions of late to the contrary, they specifically state that a manual count is preferred over a machine count, or if doing a machine recount it must be done with a corrected program from the original count.

> Please don't distort the facts.

You will find that I pretty much dwell on facts. It is to those that don't that I condescend.

> This is no longer an issue of campaign rhetoric, but constitutional
> criticality. In other words time to knock off the bull and get behind
> a legal process no matter who it finds was elected.

I agree. However, all the Gore campaign has done was within the law. For that they have suffered threats, ridicule, extreme partisan potshots, calls for illegal activities (note the e-mail petition solicited in usenet), etc.

> Partisanship at this point is a disservice to the process and our
> future.

I have kept my mouth shut about politics in the newsgroups for several years. I have had enough carpetbaggers wanting to come in my state and steal my vote and the vote of the people. I have had enough macho bubbas spouting bile that has zero basis in fact and is solely designed to incite. In short sir, you may expect a full plate of my partisanship for

some time to come.

In article <3A0F2C4D.EFFBE40D@cts.com>, markj@cts.com says...
SNIP!
I applied for an "international" drivers license about 5 years ago, I was to go to europe for several months, but the plan fell through, but, from what I remember:
In order for an "IDL" to be valid it must be used WITH a treaty signitor's (or however you say, a country that has signed and ratified the treaty) OL. For instance, since I was living in the state (or to be exact the Commonwealth of) Kentucky, USA, to have a valid "license" I would have to have both the IDL and a Kentucky Drviers/operators license. The IDL, by itself, granted no driving privalges.
Adn at elase in Kentucky, if the State of Kentucky every "kifted"/revoked yur OL, and, regardless of what other OL you mght use while in Ky, they would treat you like you had no license. I have heard many (and by "many" over 100 in 15+ years of listening to a police scanner), people being stopped for a routine traffic stop and, when they ran the SS they where in very deep doodoo.
OT, the funniest dispatch I ever herad was when the nailed a driver for a "caifornia stop" (failing to come to a complete stop).
They ran his SS and he had a warrent for "felony littering" from West (by God) Virginia. And dispatch lost it. They were laughing so hard they were crying. It took over 5 minutes for them to calm down to where they could be understood. The poor cop, thinking he had a "Very Bad Guy". pulled his gun and made the guy lay on the sidewalk. They decided that since Ky did not have a felony littering statute that they could not hold him. God, I bet he was glad to get out here.

First of all, your radio is not "for sale" its FA "for auction" and should be listed that way to avoid confusion. Some folks on the ng's get pretty testy when E-bay stuff gets listed for sale !!! Secondly, I looked at your posting on E-bay and you state that the radio (706 MKII) will transmit through 70cm? The MKII does not go up to 70 cm, only the 706 MKIIG does that. I guess my question is: are you auctioning a 706 MKII or a MKIIG?.

joxendi@bellsouth.net wrote:

> Sir, the trend under Carter, using the very link you provided was UP!

As was the trend from 1972 through 1976. So are you saying that the evil rising interest rates during those years were because of Nixon and Ford? I just want us to be consistent.

> I KNOW some mortgage rates hit at least 19% in 1980.

Admitting your error is the first step in the long, difficult road to recovery. You blasted the number 20 around in a loud, clear voice. In fact, I reject your claim of 19, unless you can cite some documentation to that effect.

> The trend started DOWNWARD during Reagan

From 16.63% to 10.32%. Very impressive. Double digit all the way.

> and continued thru Bush, Sr.

Double digit half the way.

> And the reason for that was, the foundation for lowering interest
> rates was laid DURING Reagan/Bush.

So let me see if I have this straight: you're saying that an 8 year foundation was laid so that Clinton could enjoy lower interest rates, but that Carter, in only 4 years was somehow responsible for doubling them, despite the "foundation laid" by Nixon and Ford?

> DO you actually think that Clinton waved a "magic" wand and POOF!
> there were 7% interest rates?

No, but apparently you do when you blame Carter for the double digit interest rates that lasted for more than 10 years of reagan/bush.

> The only reason the lower rates have held is that Mr Clinton couldn't
> get their socialistic, anti-free enterprise, redistribute-the-wealth-
> to-the-bums-who-won't-work CRAP past a Republican congress.

But since Clinton enjoyed a Democratic congress from 1993-1995 you would think he could have gotten some of that through if that had really been his agenda and not just some fear-mongering, anti-American crap you get off the internet, wouldn't you.

My original statement stands:

Please take some responsibility for accurately reporting facts and not supposition about what you think you'd like to remember.

>

So, Lrod, did you go through school before the science of Economics
was begun or did you just sleep through class? Let's take a look at the
data you refer us to.

First of all, no president sets interest rates upon assumption of
office nor doee he have any control whatever over them, at least for
anything like a short term. He can appoint the chairman of the Fed when
his term expires, and can offer fiscal policy which surely will affect
interest rates, but to say that any particular president is responsible
for interest rates during his tenure is usually an incorrect statement.
Lets look at your referred interest chart by year.

1972--Nixon is reelected to his second term, intrerest rates are 7.38%,
at least in part from his own fiscal policies during his first term.

By 1976, after the turmoil of Watergate and the end of the Vietnam War,
at the end of the Ford presidency rates had dropped back to 8.87%,
following a spike during the worst of that period to 9.05%

So Jimmie Carter took a rate of 8.85% into his term of office in Jan 1977, and exited four years later with interest rates sitting at 16.63%, the highest rate shown on the chart that you referred us all to. Some success!

By Reagen's inauguration, in Jan 82, rates had dropped slightly to 16.04%. By 1983 it was down to 13,24%, 1984 = 13.88%, 1985=12.43%, 1986 = 10.19%, 1987 = 10.21% and when Prsident Bush assumed office in Jan 1989, he found an interest rate of 10.32%.

REMEMBER, during Regean's term he spent huge sums of capital on building up a military that had been grossly neglected by Carter (like Clinton), which ultimately resulted in the collapse of the Soviet Union, allowing for some of the stand down since that time.
Blaming him for Carter's era of astounding rates is foolish at the least, and totally uninformed at best and a clearly defined look at your lack of knowledge of the subject, and indeed the political situation in total.

By the way-- Clinton, lucky as always, has been on the receiving end of large amounts of Republican success, which has carried on through both his terms. To his credit, he has been shrewd enough to NOT take certain actions which would have quickly foiled the whole setup and he knew it. Gotta say one thing for Slick- He knows success when he sees it, and he clearly saw it handed to him, and has been smart enough to NOT screw it up. Who can say the same about a Prez ALGORE? He's landed all over the landscape on each and every subject you can name. Who knows what he might or might not do? He doesn't know himself.

Yeah, I know exactly where West Chicago, IL is located. I've driven tghrough itg many times on Route 53 enroute my daughter's home in Naperville. That's why I said West Chicabo instead of West Chicago, IL. Daley has (and had) NO jurisdiction in West Chicago, Il. Of course you know that, and you know full what he did to the ballot boxes in West Chicago in 10=960, thus throwing the state to Kennedy, and stealing the election from Richard Nixon-who promptlhy conceded rather than start a nasty set-to such as we see going on at this time.

Trying, against all hope, to recover from the Johnson years where he insisted on personally approving *all* targets in the North, and on witholding the exact missions and support that could and WOULD have soon won the war for the South - ALL for purely selfish and political reasons.
I lucked out-they sent me to Germany. My brother was not so lucky, though he was lucky enough to come home, against long odds considering Johnson and his near-criminal mislealdership. NO leader should ever use his troops as political pawns, a fact that later presidents have taken closely to heart if you have been paying attention at all. Not likely, it is clear.

> > Your version of history -whatever its source- is way beyond

Jeff - Both you and John conveniently snipped out the part where I offered the explanation of how a democrat could have been working in the republican corner. Clever - Assuming that the rest of the NG readers didn't read it before.... Maybe if Dubya gets in I will get to hear you whine and complain when the first thing he did in office was wipe out the mortgage interest deduction while the republicans still have control of the house and senate - Regan tried to do it, but the Democratic houses resisted it. It favors the really rich ' cause they can pay off their mortgages, leaving the rest of us to (as usual) shoulder the extra tax burden. Rationalize this if you wish. I remember double digit mortgages in the 80's - Under a republican. That was when they voted to remove the interest deduction from all but the mortgages. Its no wonder churches refer to their congregation as flocks - and the politicians call us sheep - CAN YOU GUESS WHY ??

Well youngster - Look no farther than the 1980s - The Regan era - You remember when he removed the interest deduction from our taxes and almost got the mortgage deduction removed as well? Only the Democratic controlled houses prevented that. I have a tough time respecting any Kennedy - They are one of the leading crime families in the US. Got their start running liquor and ?? Jack had a numerous documented 'liaisons with hookers, and uncounted affairs while in the white house. He almost put us into a nuclear war due to his being angry because he was out of the loop in a couple of decisions and had a temper tantrum. Set up his brother Bobby as Attorney General and his first act was to try to wipe out all of the other crime families so the Kennedy's were the only game in town. I guess you give your respect to the wrong type of folks - but wait - you are a republican ! No wonder you don't need any facts to support your claim.....

Wrong Take a look at the electoral vote totals for 1960 vs today. It's popular to talk about "stealing" the election in 1960 by virtue of tombstone voting, but Illinois was not necessary to win the election. The electoral college total was a lot farther apart. Downstate Illinois had it's own (Republican) machine then, as well, and there were the same allegations about theft of votes down there. Every state was important then, to be sure, but not to the same degree that Florida is today.

Not me -- the condo here is paid for free and clear. Even if it
wasn't, I don't believe the IRS (i.e., taxpayers) should have
to fund anyone's mortgage interest. If you borrow other people's
money, then pay them then interest they're owed without begging
for a reimbursement from the taxpayers.

Get an education earning high grades, make a good showing at the
job interview, and you'll land a high-paying job. Then you too can
pay cash for everything and won't have to borrow other people's
money in the form of loans with the taxpayers funding the interst
that YOU should be paying.

I am trying to interface this program with my Kenwood TS440 radio and am not having much luck. I wonder if anyone has used this program with the kenwood 440 and if so can give me some advice. I have got the trial version and am wondering if it is very limited in what it can do before it is registered. I am able to get it to turn the RIT and XIT and the split on and off but nothing else is happening. The radio face plate reads off, although the little plug that indicates if you are connected or not shows up in green. I am not able to capture the contents of the radio or anything like that. When I try to change the port options I am unable to apply the changes. It looks like it might be a good program but if I can not put it through the paces I will never know how Good it really is. Thank you VE7IF

Dick Carroll <dixie@townsqr.com> wrote:

So, Dick, did you go through school before the science of History was begun or did you just sleep through class? Let's take a look at the data you, in turn, referred us to.

By the way, my major is political science, what's yours?

> First of all, no president sets interest rates upon assumption of
> office nor doee he have any control whatever over them, at least for
> anything like a short term.

Very good. We can agree on that. Let's see if you can keep the agreement.

> He can appoint the chairman of the Fed when his term expires, and can
> offer fiscal policy which surely will affect interest rates, but to
> say that any particular president is responsible for interest rates
> during his tenure is usually an incorrect statement.

So far so good.

> Lets look at your referred interest chart by year.
>
> 1972--Nixon is reelected to his second term, intrerest rates are
> 7.38%, at least in part from his own fiscal policies during his first
> term.

In fact, they hovered within .3% from April 1971, through June 1973. I found more data on the Freddie Mac page. A history whiz like you should have no problem finding it.

> By 1976, after the turmoil of Watergate and the end of the Vietnam
> War, at the end of the Ford presidency rates had dropped back to
> 8.87%, following a spike during the worst of that period to 9.05%

A "spike," as if it were some unexplained anomaly, of nearly 10% (9.98% in Oct 74); the dreaded double digit figure. How'd that happen? There's no Democratic president within 6 years in the past, and even a republican couldn't blame that one on a Democrat who hadn't been elected yet.

> So Jimmie Carter took a rate of 8.85% into his term of office in Jan
> 1977, and exited four years later with interest rates sitting at
> 6.63%, the highest rate shown on the chart that you referred us all
> to. Some success!

Ah, ha! Your resolve has begun to wither. I suspected as much. Somehow, we have gone from "nor doee [sic] he have any control whatever over them, at least for anything like a short term," and "but to say that any particular president is responsible for interest rates during his tenure is usually an incorrect statement," to "some success."

I guess nothing good ever happens unless a republican is in the White House, and nothing bad ever happens unless a Democrat is in the White House.

> By Reagen's inauguration, in Jan 82, rates had dropped slightly to
> 16.04%.

Here's that pesky dubya logic and the Dick Carroll school of history revision. Reagan's inauguration was in Jan 81, not 82, and at that time (81) the interest rate was 14.90%. The interest rate peaked at 18.45% in October of 1981.

> By 1983 it was down to 13,24%, 1984 = 13.88%, 1985=12.43%,
> 1986 = 10.19%, 1987 = 10.21% and when Prsident Bush assumed office in
> Jan 1989, he found an interest rate of 10.32%.

So, how are we going to do this, now that we have one of Reagan's "banner" years back into his fold? Do we credit him with "bringing down interest rates" from 18.49% to 10.32%, or was his performance a little less spectacular by only bringing it down from 14.90% which it was at his inauguration?

> REMEMBER, during Regean's term he spent huge sums of capital on
> building up a military...

My, yes he did. And we will be paying for it for decades more to come. Is this another republican success?

> ...that had been grossly neglected by Carter (like Clinton), which
> ultimately resulted in the collapse of the Soviet Union,

There is no reputable historian or economist that is willing to make a cause and effect claim such as this. It's a conservative fairy tale.

> allowing for some of the stand down since that time.

This is hilarious. Carter "neglected" the military, and you somehow associate that with Clinton, yet by your own statement the collapse of the Soviet Union has allowed some "stand down." For whom? Bush, only?

> Blaming him for Carter's era of astounding rates is foolish at the
> least, and totally uninformed at best and a clearly defined look at
> your lack of knowledge of the subject, and indeed the political
> situation in total.

Back at you kid. You guys like to have it both ways: republican good, Democrat bad. But you simply can't be consistent and say that some things are and some things aren't because of the actions of a particular person in like circumstances. I mean you said it yourself. More follows.

> By the way-- Clinton, lucky as always, has been on the receiving end
> of large amounts of Republican success, which has carried on through
> both his terms. To his credit, he has been shrewd enough to NOT take
> certain actions which would have quickly foiled the whole setup and he
> knew it.

So, let me see if I have it: Clinton is enjoying the success of republican initiatives, but Reagan did it on his own without the help of the Democratic congress. That's what you're saying? I love hearing conservatives say that. It's the signature of their lack of understanding of history and the political process.

> Who knows what he might or might not do? He doesn't know himself.

I had to go back and re-read that, because every observer I've seen describes that as dubya's chief shortcoming.

What's even funnier is I hear republicans up and down the landscape bemoaning what they are convinced Gore will do when elected president.

Why don't you macho bubbas get back to me when you have your stories straight.

LRod

Everyone is born a conservative. It takes maturity to be a Liberal.

macho bubba (n): a noisome creature, incapable of independent thought; fond of blind repetition of unproven allegations; exhibits propensity for bluster; extremely self-centered; unaware of history or the laws of economics; almost always of a conservative bent, although the reverse isn't necessarily true; mean spirited.

> process. It they get to vote again, so do I.

Then please tell the Republicans they must disavow the votes they got
from manual recounts of "defective" ballots in Seminole County, Florida
(a heavily Republican county), and also in New Mexico - where the result
moved the entire state from a narrow Gore win to a narrow Bush win.

It really isn't consistent to accept recounts in your own favor and then
claim your opponent is wrong to ask for recounts that might favor him.

> Whatever green weenie Gore or Bush might have gotten, it pales next
> to the 1960 election where Kennedy thru the Daley machine in Chicago
> literally stole Illinois and gave us (burp) Camelot.

No, sorry, you've been fed a false history. Kennedy had 50 electoral votes more than he needed to win. Illinois gave him only 27 votes. Even if Illinois had gone to Nixon, Kennedy would still have won.

(Also, despite what some are saying, Kennedy won the popular vote, too.)

http://www.nara.gov/fedreg/elctcoll/ec-boxsc.html

> Richard Nixon - intelligent, honorable in his own way, and more than
> likely insane by some standards, ordered his troops to accept the
> result and back off. He had enough confidence in his own ability to
> come back which in fact he did but he also had enough reverence for
> the office not to get involved in a cat fight.

This also is false history. The Republicans got recounts in *eleven* states, including Illinois - where it netted Nixon some 953 additional votes but still not enough to change the result; it turned out that in 40% of those precincts Nixon's votes had actually been *overcounted* the first time. And Hawaii, originally awarded to Nixon, turned out on recount to actually go to Kennedy, giving him 3 more electoral votes.

The Republicans (who held the White House at the time) also called in the FBI, went to federal court and election commissions, filing lawsuits to get better results. They failed. What little fraud there was ever substantiantion of (not much) wasn't enough to affect the results.

So Kennedy didn't "steal" the election. And Nixon *did* cat-fight it.

But he told it the other way around in his memoirs, and the same people who believed "I am not a crook" have helped spread his false history.

979. The "Confusing" Florida Ballot Argument??

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-13 05:49:50 UTC
From: Dwight Stewart <stewartx@sccoast.net>
Message-ID: <3A0F80CC.93E40546@sccoast.net>
Source record: 100024

For the last several days, I've been listening to people claim that
the ballot used in the Palm Beach area of Florida during the election
was confusing. One thing that I seldom see mentioned is how the
overwhelming majority of voters, including Democrats, managed to figure
out the ballot just fine. Remember that the disputed ballots are only a
tiny percent of the total number of ballots involved in those voting districts.

So here are the questions for anyone who claims the ballot was confusing...

1. If the ballot was that confusing, how did
the vast majority of voters figure it out?

2. If the vast majority of voters were able to
figure it out, why should we make special
arrangements (endless recounts, new election
poll, etc.) for the idiots who could not
figure it out?

I'm all ears. The "confusing ballot" is the core argument for these
endless recounts, and a possible new election poll in those districts,
so lets hear your defense of this argument. Or is this argument nothing
more than an excuse for Gore to manipulate the results so that he can
win this election?

> And how many recounts has the Gore
> campaign requested? One.

Nonsense. In addition to the original ballot count, there has been
five recounts...

1. The required state-wide recount (Wednesday).

2. A recount of the Palm Beach County ballots.

3. A recount of the 19,000 disputed ballots.

4. A hand recount of 4000 of the 19,000 ballots.

5. The current hand recount of all Palm Beach ballots.

> Of course in dubya math that probably
> equals 4 recounts. I get it now.

And, like the typical Democrat, you can't count beyond the first
finger on your hand. You have five fingers, LRod. There have been five recounts.

> extreme partisan potshots, calls for illegal
> activities (note the e-mail petition solicited
> in usenet), etc.

My friend, you need to figure out which country you're in. In the United States, it is perfectly legal to petition the government or to advocate a petition. So the email petition you refer to is not illegal. And you wonder why there is so much ridicule. And, of course, your comment about "threats" and "partisan potshots" is just as silly. You have not been threatened, and the "partisan potshots" are nothing more than the ligitimate arguments of those who oppose your position.

983. Cushcraft warning

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-14 00:00:00 UTC
From: plmills@attglobal.net
Message-ID: <3A11C2D3.A8A62890@attglobal.net>
Source record: 99735
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.equipment,rec.radio.amateur.misc

Hello to all,

First let me say that up until now I've been a happy camper
using Cushcraft products. However, I've just learned something
that may be of interest to anyone considering purchasing a
new Cushcraft antenna.

I recently bought an R-8 vertical. It was just damaged by
lightning and I e-mailed Cushcraft tech support regarding
parts availability....the answer was 2 sentences that suggested
I buy a new antenna and try to collect on insurance. Needless
to say, I was not happy with that so I wrote a letter to the
Cushcraft manager of amateur products. This gentleman was kind
enough to telephone me today. Essentially, the conversation
focused on the fact that the parts I needed would be so expensive
as to make buying a new antenna more practical. However, one
interesting fact did come to light. Parts for the R-8 vertical
had not been "priced" yet and were thus unavailable. Further,
Cushcraft does not "price" replacement parts until the product
has been out for 9 to 12 months. I'd suggest you keep this
in mind....if you drop your new R-8 or new whatever, you may
not be able to get parts for it for up to a year!!

thanks & 73,
Phil

Jim, if the CB rebels without a clue can use Antique Modulation, how about 850 shift FSK. Bracket the AM carrier and blast away.

While you are feeding the Hot Water 101 nine leaves of the tana plant, get a Model 28. Knowing you, you should have the stunt box playing King Cotton (Monty Python theme) in about an hour and a half.

If 143.625 is the downlink for Russian controllers -- what is the downlink for
American controllers??

Some one gave the link to a program called SatScape
i downloaded and installed it and it lists this info for the ISS:
Data for ISS (ZARYA)
(International Space Station)
Beacon: 628.000
Beacon: 632.000
Uplink: 139.208
Uplink: 121.750
Uplink: 231.000
Downlink: 143.625
Downlink: 130.167
Downlink: 247.000
Downlink: 463.000 & 436.000(TV)

Interesting?

Arianespace Flight 135 is Delayed 24 Hours
11/14/00
The launch of Arianespace Flight 135 has been postponed for one day following an
anomaly in the ground-based infrastructure at the Spaceport in French Guiana. This
anomaly, which affected the telemetry link with the PAS-1R satellite, occurred during the
final countdown on Nov. 14.

As a result, Flight 135 has been delayed for 24 hours. The launch window is as follows:

Kourou time: From 10:07 p.m. to 11:03 on November 15
GMT: From 1:07 a.m. to 2:03 a.m. on November 16
Paris time: From 2:07 a.m. to 3:03 a.m. on November 16
Washington, D.C. time: From 8:07 p.m. to 9:03 p.m. on November 15

Democrats have pitted us against one another by creating the myth of entitlement and victim hood, which the lazy, greedy, envious and mental midgets are eager to accept as an excuse for their lack of initiative, poor character, and total lack of honor. After all, why should anybody have to WORK for something?

Excellent comments, Curt. In fact, this deserves a separate thread so
is can be discussed in more detail (more people will see it). So, how
about reposting the entire thing in a new thread (new message, not a
reply), call it something like "The Purpose if the Electoral College,"
and let everyone add their comments. Don't forget to cross-post it to
the related newsgroups (see the "Gore's Will of the People Insult"
thread for a list of the newsgroups).

Gore is a LIAR.

Of course, the fact that Bush LIED about his arrest for drunk driving
DOESN'T
>make him a liar, right? Of course not, he plays by a different set of
rules

73 de Rick N9GSU

He didn't lie about it. He never TOLD anybody about it. This is much akin to
Gore lying about his rampant marijuana use...he never told anybody about it,
either. Hell, he had more than enough lies to go around as it was.
I suppose he didn't inhale, either?

Well, yes, I am. But, more importantly, I'm an American citizen that does not like to see the "Will of the People" thrown around like some kind of campaign slogan. The "true" will of the people rests in the laws of this land. And, according to those laws, Bush is the President Elect of the United States and Gore should start packing his bags to go home.

Ok take two hours maybe. Did you know that one of JPS music teachers was Jean Jaques Offenbach (or Awfulbach if you like). And you wonder why his marches sounded like that or why the US military marches faster than any other bunch on the planet?

JPS marches make good polkas, too. The Double Eagle Polka is a classic. Jak se mate?

>

> wait until ALL of the votes have been fairly counted, and will support
> which-ever one prevails.

Your idea of millions of other people exclude Republicans. Typical
Democrats, stuffing ballot boxes, buying votes and screaming racism when
these misdeeds are looked into.

Of course "fairness" to republicans mean only the
> rich and powerful. The rest only count at election time. Right now your
> "true" will of the people lies in the hands of a republican secretary of
> state that is feathering her nest if she gets dubya elected 'cause her job
> ends in two years.

Your idea of "fairness" lies in letting a few more questionable ballots by
"diesnfranchised" (call it homeless drunks whose votes were bought for a
beer) citizens further skew the returns. Your idea of the law of the land
means that your kind can distort, bend, subvert and contaminate these laws
of the land at will.
Al Gore is, quite simply, a Socialist. In 1998 Al Gore made over $173,000
and donated less than $300 to charity. He refused to fix a toilet seat in
one of his rental hovels until he was exposed on national TV and then it was
a Republican who offered to pay for the repairs. (granted...a political
move). Al Gore has his millions and he cares not one bit for you.

He is concerned about the will of the people because it is the people's votes he has a majority of. Bush does not have a majority of votes, only of the government's electoral people's votes.
Bush does not want the will of the people to matter or he will lose, unless you only count Florida and ignore the rest of the country's votes. Why do you even care? It will make absolutely no difference in our lives if Bush OR Gore is president! Everything will be just the same as it has been under Republican/Democrat rule so far... Higher taxes, more laws taking away our freedoms and rights. If George Washington and Thomas Jefferson were alive today, they would not vote for Bush OR Gore! They would have voted for Harry Browne.

Not only that but the hand counts were requested in heavily Democratic
counties, one with a 50/1 ratio. Say Bush got 100 votes and Gore got
5000 votes. Say hand counting increases votes by 5%. Bush picks up
5 votes and Gore picks up 250 votes. Does anybody but me smell a rat?

> As to discontinuing the Electoral College ...

Note that we would have exactly the same problem with the popular
vote. Nobody is sure to this day exactly which candidate won the
popular vote because all the popular votes have not been counted.
We may never know because some states have stopped counting.

The systematic error in punch card voting systems is an undercount of
votes. This is understood by anyone familiar with the technology. The
error is when a card does not end up completely punched. In some cases
this is no fault of the voter.

Your assertion that the manual recount would be biased is also
incorrect. The counting is done under the watchfull eyes of both
political parties.

> There will always be a statistical range of random error with any
> measurement technique, and humans are subject to both random and

> abberation would automatically produce a Gore presidency - which is why
> his campaign wants to continue the recounts.

Florida law is clear on the manual recount procedure. A one percent
sample of the county including at least 3 precincts is counted
manually. If the manual sample shows a change large enough to alter
the outcome of the election, the rest of the county is manually
recounted. There is no provision for recounts once the manual count is
complete.

In the Palm Beach case, the one percent sample resulted in a net gain
of 19 votes for Gore. With only 300 votes separating the candidates,
complete manual recount of Palm Beach County could obviously change the
results.

BTW - The transient statistics you are dismissing are called votes.

And who is taking away your right to expect anything? You have the right to expect somebody to knock on your door and give you a check for a million dollars. Doesn't mean it will happen. You also have the right to skip over, not read or killfile posts, posters or subjects you don't want to read.

Sometimes. In other contexts, POP is Point Of Presence. It means
the point at which your local loop meets your ISPs concentrator(s).
In other contexts, it means "Pater Oh Pater", and in still other
contexts, it means the sound of a stuffed shirt rapidly deflating.

A fair system treats every candidate equally. Only if they had one
standard for Gore and one for Bush it would be unfair.

> you'll learn how to use utilities like traceroute and dig to identify
> the physical location of a poster's POP.

Someday, if you study Real Hard and put in enough time working on
large networks and with large network providers, as I have, then you
might start to get a glimmer of just how very far ahead of you I am.

The original post located the headquarters of the registered owners
of two domain names, both of which are medium-large ISPs.

Try not to have such embarassing senior moments.

Article II, Section 2, paragraph 2, (powers of the President, to enter
into Treaties with the approval of 2/3 of the Senate)
and
Article II, Section 2, Paragraph 1 (Judicial power to rule on cases
arising under treaties)

address treaties entered into by the US.

Article I, which lists the powers of the legislature, gives them the
powers to pass laws to enforce such treaties, but does not list the
power to change, alter or ignore them.

Where did you go to school??? What Constitution are you

In the funky universe of the fleece-the-patriot lecture circuit, that
may be true. It may even be correct from an academic legal standpoint. You
might even be able to bamboozle your way past a county court judge.

But in the real world, you get arrested and your car goes to the pound
where it gets auctioned next month to someone with a "valid" ID.

Info like this is meaningless to the FCC without dates, times, and frequencies.

> We as amateurs are powerless to protect our interests as the
>interlopers are operating on AM and we are limited by bandplan to CW.

We can use data modes on the low end of 10 as well as CW. And both CW and most
data modes will work right through an AM or SSB signal if the receiving op uses
a sharp filter.

>Is it possible that the FCC could suspend the bandplan for a 30 day period.
>This would allow amateurs to operate phone in the present CW portion of the
>band .

Why not just operate CW or data in that subband? The use of 'phone would
encourage confrontations with the pirate stations.

>I realize this would cause some contention for a short period of time,
>however it would cause enough interference to the interlopers to run them to
>the other side of the 28Mhz wall.

And what happens after the 30 days is over?
>
>We are hampered by abiding to regulations, where as those that do not are
>operating with impunity.
>

Well i just want everyone to know i never claimed to be an attorney...but
it just happened in oklahoma city is all i live and reside in the oklahoma
city metro....(maybe the police officer had been drinking) hahahahaha....i
don't know but i do know he let me go.....so no ticket no trouble.....no how
do they check for a social security number if i do not have one ....because
I got rid of my social security number about two years ago.....i do pay
taxes (what i do not hide overseas) i'm self-employed...and i pay taxes
through a tax number for my small company but i do not pay any FICA or
Medicaid..and very little State or Federal.....before i post this everyone
will say how did i get rid of my social security number???? well a friend of
mine here in Oklahoma city is an Attorney and his little brother is a
CPA....they got ride of their SSN so I just did mine as well....we had to
file in federal court for a revocation of signature....and a refusal of
benefits for future use of any public means assistance.....now that was the
hard part but since i am a minority....1/4 cherokee i can still claim all of
my benefits under the provisions of being native americanonly if i needed to
but i really will never need any help from social security....i'm 28 and
will retire in 15 years when i am 43....my wife is Australian and she does
not quailfy for any public means assistance as well (that is one of the
aggreements for her permenant residencey) since we are self employeed and we
keep about 80% of our money overseas in private non-reporting countries we
get to keep about 92% of what we earn a year....and as long as we always
wire money in to ourselves under $10,000.00 a day....which anything over
that sends off flags in some law enforcement branch....we should be
fine....now the country where our accounts are in requires us to pay 1% of
our account standing a year....example if we had a million dollars we would
have to pay the country 1% or $10,000.00
a year.....just some statistics i found do realize the average american pays
36% of their yearly income in taxes.......
and over all when you add this number with all the other taxes you pay as
well the average american pays 55% of their yearly income in
Taxes.......(and they say shoplifters are criminal)hahahahaha
That's it hope i have been helpful......

Just one more thing sorry forgot to run my spell check and the 36% of yearly income is in income tax and the rest is on other taxes such as sells taxes and basic goods and services taxes.....i got those statistics out of Tycoon magazine last month.....it was in an article called "American Business Bailing out of America"....something else did you all realize that America has lost Intel the computer company.. They have moved all of there business to Costa Rica because they only pay 2% of yearly income in taxes there.....American businesses are being taxed out of there own country!...see ya hope this has been helpful!

You have to understand that the only reason Algore is so desperate to win this particular election is that he's been groomed all of his life to be President, and this is his LAST SHOT. If he loses this one, it's all over for him, and he knows it; he won't be able to run in 2004, as a certain female Senator-elect from New York State will steal the nomination from him without any problem.

How is it that a hand count of all of the chad hasnt been requested by
the Gorbies?
Shouldnt the chad count = the number of voters?
It started with O.J., rode the Oval B.J., and now, recounting the
recounting.
What is next?
Chicoms attack Florida per Commander in Chefs request?

None of this has anything to do with any of the types of radio in your
"Newsgroups:" header.

Regardless of the outcome, there is no "will of the people" in America.
Roughly half the people couldn't be bothered to vote, and of those who did
the vote is almost evenly split between the two top candidates. We'd all
be much better off if the politicians recognized this.

What I enjoy is looking at my watch every time one of these Democrats comes
out to see if they can go 15 seconds without mentioning the "will of the
people". Al Gore succeeded: He mentioned the word "people" about 15
seconds into his speech, and took another 7 seconds to talk about their
will. Warren Christopher in his speech on Saturday failed: it took him
just 11 seconds before he couldn't stop himself and blurted out "will of
the people!".

I voted Libertarian, so my will clearly isn't being expressed. :-)

What you should perhaps know is that Jeffie lives well in Hawaii off
the proceeds of his retirement from his government job and money
he inherited. His current part time employment is taxpayer funded at
the Hawaiian and US taxpayers' expense.

The most amusing point he raises is about higher education since he
dropped out of the PhD program at Hawaii. His highbrow employment
for the bulk of his career was quite blue collar and low paying.
Perhaps you have a rich relative and can emulate Jeffie's "work"
ethic upon said relative's passing.

Jeffie will whine, cry and deny but my contacts at UH are quite
reliable. The reason he is dumping on you and others is that the
stupid code debate is all but finished and he needs an outlet.

Gore is a LIAR. Put it this way, Bush is not great for sure but Gore was the VP during these good economic times & any normal person would have walked away with the election that was associated with it & besides he lost his home state which would have given him the election. That should tell us all something.

Jeez Dwight, don't confuse him with facts :o). I'da thot it obvious that the Republicans knew the judge'd throw their case out and did it just to set that precident - that federal courts have no jurisdiction over local election procedures - just to keep Gore from going there if he looses in state court.

Let me address each of your points. The FCC this past weekend has been broadcasting warnings on AM on 28.025. They are aware of the problem.

The use of data modes are not permitted in the areas being used by the CBers (Primarily truckers) on 28.025

After 30 days, the precedence has been set that future illegal use will be countered by amateurs.

You are correct, confrontation would exist and is the tool to move them out of the band.

1046. Looking for ppl w/ internet radio stations

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-14 00:00:00 UTC
From: Sleepy Adora <phoesho@home.com>
Message-ID: <3A1161C5.3AF77D78@home.com>
Source record: 99901

Hello everyone. Do you have an internet radio station? I'm looking for people with their own stations in which I can put on a big list I'm creating of IRS. It doesn't matter if you are using real player, winamp, or whatever. I've been in the IRS business for over a year now, I just want to give my listeners alternatives to my own station to listen to. So if you have a station and would like it added to my listing, feel free to message me! So far the list is really small, with only a handful of stations on it. It's at my stations site though, if you want to look.

http://zwap.to/csro/
Thanks!
Adora

WOW!! I did not know that! I think it's GREAT!! (if it really is the
FCC....)
>
> The use of data modes are not permitted in the areas being used by
the CBers
> (Primarily truckers) on 28.025

Not correct. The current US regs allow CW and RTTY/data from 28.000 to
28.300 MHz for all US hams with General, Advanced or Extra licenses. Of
course using RTTY or data that low in the band violates the voluntary
bandplan, but not FCC regs. Operating voice violates both the bandplan
and the regs unless the regs are changed.

The only CW-only ham subbands in the US are 50.0-50.1 and 144.0-144.1
MHz.
>
> After 30 days, the precedence has been set that future illegal use
will be
> countered by amateurs.

Only if the rules are changed again. FCC has shown that they are not
eager to change the amateur rules.
>
> You are correct, confrontation would exist and is the tool to move
them out
> of the band.

Is it? Consider how such confrontations would go: To remain legal,
amateurs would have to use their callsigns, which any illegal station
would know exactly who they are confronting, where they live, etc. But
the illegal stations are usually mobile and give no positive ID at all.
Who has the stronger position in such a confrontation?

Now imagine the entire lower end of 10 meters full of loud CW and data
signals spaced 1 kHz apart. The band would be perfectly usable by hams
running CW or data modes, but useless for illegals running SSB or AM.
And the illegals would have no idea who the legal stations were without
the necessary decoding gear and skills. Now who has the stronger

position?

The second option can be done right now without any FCC action at all.

If you have an SSB rig and a computer with soundcard, all you need to get on PSK31 is some simple patchcords and the free PSK31 software. CW is even easier....

I applaud the efforts to keep illegal stations out of the ham bands. But we must be careful not to do more harm than good.

One more post on a "off-topic" that might actually be "on-topic". Let me remind everyone that it was Al's wife Tipper who was trying to censor music several years ago. She wanted congress to pass a law banning certain types of music. Now, I happen to agree that the music being referred to was trash, but I don't think it's too much of a leap from banning certain types of music "for the public good" to banning certain types of radio receivers "for the public good". Ideally, the president would be a Libertarian, as they think the govt. needs to leave people alone instead of passing all these "Thall shalt not" laws, but at least the Republicans are a little better at leaving things alone. (Certain individual congressman are exceptions, I know)

I agree with your assessment that the bandplan is "voluntary", however recent pronouncements by Riley indicate that the FCC will consider a violation of the bandplan a violation of FCC regs.

1058. Intentional interference heard on 28.085, 28.225, and 28.235Mhz

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-14 00:00:00 UTC
From: toomanyradios@aol.com
Message-ID: <20001114143606.13029.00001647@nso-cs.aol.com>
Source record: 99913

This morning, I heard sound efffects being broadcast repeatedly on several low 28Mhz frequencies. Sounded like the noise made by creaky bed springs when kids are bouncing on the bed. Mode of transmission was FM and no ID was given. Obviously, this interference was being generated intentionally. Presumably to discourage out-of-band CB'ers who had encroached on 10 meters.

Guys, I know that interlopers are a large and growing problem, but this isn't the way to solve it. This sort of action is every bit as illegal as that of the outbanders with whom you take issue with. Furthermore, this only escalates the problem: it encourages the outbanders to use even greater power levels to overcome your interference, to move even further up into the 10 meter band to escape your interference, or both.

And he wants the votes in predominately Democratic counties
to be honored higher than any any other votes. What's wrong
with this picture? Why should a vote thrown out by a machine
in a Democratic county count for more than the vote thrown
out by a machine in a Republican county? Inquiring minds
want to know.

I do not believe being below a fool as the better. I sympathize with the Libertarian stance, however.

But on the good side, the SW bands up here seem to be clearing up... the BBC came though last night.

Good DX,

Adam

This will be my last post on this subject so when you get your last word in just know that.

I heard that same quote in my Impala with my shortwave set.. .so does that mean I can cross-post in alt.impala, alt.chevrolet, rec.GM, rec.(fill in the radio blank)?

What a poor excuse! Go to the political arena, man!

Oh, and now that I'm replying about this on my Macintosh, I can cross-post it in rec.Mac, rec.cablemodems, rec.federalwaywashington (where I live), and since I'm wearing Levis while I'm reading about this I can post in rec.fashion.... well you get the idea.

Please, radio topics.

Like I said, my last post on this, I promise.

Jeff is a modern-day Tory. I've had such go-arounds with him in the past. He thinks more of the laws and regulations themselves, than of the people those laws and regulations were (supposedly) meant to serve.

I've cross-posted his asinine words to some of the Libertarian newsgroups. I'm sure there will be some people there that will have some words for him.

Check different forums. Anything people do that anyone is doing that a sissybrat might disapprove of as "uncontrolled behavior" is under attack. Dirt bikes, hunting, fishing, Mountain bikes, flying, living or playing on boats, riding horses, etc. I have seen signs that hikers, the allies of the sissybrats in shutting down dirt bikes, atv's, horses, and mountain bikes are now coming under attack to keep them out of wild areas. Of course, you have read of tentative attacks on the internet.

Radio is an uncontrolled means of people talking to each other or getting uncontrolled news from distant areas. This is not permissible. You will be controlled. Resistance is futile. You will be assimulated. (er, sorry, I got a bit carried away.)

You better fight while the battle is in someone elses yard if you want to keep your freedom.

1070. A Ham's Night Before Christmas

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-14 00:00:00 UTC
From: garypearce@ipass.net
Message-ID: <3a14a6e9.3496793@news.rdu.bellsouth.net>
Source record: 99925

(published early for newsletter editor's December issues)

A Ham's Night Before Christmas

(Yet another corruption of Clement Clarke Moore's
classic Christmas tale, this time distorted by
Gary Pearce KN4AQ, Raleigh, NC, December 2, 1996.)

'Twas the night before Christmas,
And all through two-meters,
Not a signal was keying up
Any repeaters.

The antennas reached up
From the tower, quite high,
To catch the weak signals
That bounced from the sky.

The children, Tech-Pluses,
Took their HT's to bed,
And dreamed of the day
They'd be Extras, instead.

Mom put on her headphones,
I plugged in the key,
And we tuned 40 meters
For that rare ZK3.

When the meter was pegged
By a signal with power.
It smoked a small diode,
And, I swear, shook the tower.

Mom yanked off her phones,
And with all she could muster
Logged a spot of the signal
On the DX PacketCluster,

While I ran to the window
And peered up at the sky,
To see what could generate
RF that high.

It was way in the distance,
But the moon made it gleam -
A flying sleigh, with an
Eight element beam,

And a little old driver
who looked slightly mean.
So I thought for a moment,
That it might be Wayne Green.

But no, it was Santa,
The Santa of Hams.
On a mission, this Christmas,
To clean up the bands.

He circled the tower,
Then stopped in his track,
And he slid down the coax
Right into the shack.

While Mom and I hid
Behind stacks of CQ,
This Santa of hamming
Knew just what to do.

He cleared off the shack desk
Of paper and parts,
And filled out all my late QSLs
For a start.

He ran copper braid,
Took a steel rod and pounded
It into the earth, till
The station was grounded.

He tightened loose fittings,
Resoldered connections,
Cranked down modulation,
Installed lightning protection.

He neutralized tubes
In my linear amp...
(Never worked right before --
Now it works like a champ).

A new, low-pass filter
Cleaned up the TV.
He corrected the settings
In my TNC.

He repaired the computer
That would not compute,
And he backed up the hard drive
And got it to boot.

Then, he reached really deep
In the bag that he brought,
And he pulled out a big box.
A new rig? I thought!

A new Kenwood? An Icom?
A Yaesu, for me?!
(If he thought I'd been bad
it might be QRP!)

Yes! The Ultimate Station!
How could I deserve this?
Could it be all those hours
that I worked Public Service?

He hooked it all up
And in record time, quickly
Worked 100 countries,
All down on 160.

I should have been happy,
It was my call he sent.
But the cards and the postage
Will cost two month's rent!

He made final adjustments,
And left a card by the key:
"To Gary, from Santa Claus.
Seventy-Three."

Then he grabbed his HT,
Looked me straight in the eye,
Punched a code on the pad,
And was gone - no good bye.

I ran back to the station,
And the pile-up was big,
But a card from St. Nick
Would be worth my new rig.

Oh, too late, for his final
came over the air.
It was copied all over.
It was heard everywhere.

The Ham's Santa exclaimed
What a ham might expect,
"Merry Christmas to all,
And to all, good DX."

The answer is obvious, yes, that this person is concerned with freedom, not talking heads and campaign slogans. The will of the people has been sidestepped in the US for a long while now, and we are damned tired of it. The clinton/gore administration has been nothing productive, nay, utter sleaze, and I do not refer to billary's choice of concubines (who would waste energy *caring* about that?); I refer to what these "people" have done to our basic premise of FREEDOM, decency, honesty, fairness (yes, I *did* say "premise"). The plain fact is that we have had enough of this ABUSE; we are embarassed, as a nation, and individually. The people we *pay* to govern us have backstabbed us again and again. WE say enough. WE say out with the vermin; as it should be. This is PRECISELY what the 2nd Amendment is in place for, and anyone that wants to circumvent, abuse, and defile the legal statement of our natural rights has no place in a poaitoin of power........PERIOD.
Ah, that sure felt good. :)

Amen! I don't know who in the heck come up with this one thing in one conference were. I had the 3rd BBS in the US and I can assure you it wasn't the pioneers. In no other area of life, in a recreational setting, are we required to keep to a specific line of thought.

If we were subject to an invasion by a foreign nation, would we have to create rec.alt.underattack before we can comment on issues that affect all people in all conferences.

Under normal conditions those that object have a point. With the events that affect our lives unfolding minute by minute, to stick our heads in the sand and claim sanctity of a particular NG is crazy.

Agreed, but the bandplan is a dynamic thing set up by hams themselves,
while the subband is not. Which is a greater violation of the bandplan
- running PSK31 on 28.025, or running SSB there?

What the FCC is saying is that if interference to stations following
the bandplan results from stations not following it, and the
interferers don't move, they're in violation. An example is the guy who
set up an 2 meter AM (!) repeater, but used reversed split. The result
was interference to others who were using the bandplan split. Even when
told of the interference, he did not change his repeater.

--

Maybe I'd better fix up that old HW-101 and make some noise on the low
end of 10 meters...

Let me try to explain:

Cross-band repeat is exactly that!
You are repeating from VHF to UHF and vica-versa.

Locked-band repeat is when you select only one band to transmit on.
Example: Receive on 446.000 and repeat / transmit that audio on 146.520.
This mode works in only one direction. Therefore the term "locked band".

You cannot repeat from within the same band, it has to be from one band
to another.

On another note:
The TMV-7a has one of the worst intermod problems on the VHF receivetr
I've ever heard.
You might wan't to consider a Par Electronics pager interrmod cavity
($62.00). It's a passive device that connects to your cable like an swr
meter or wattmeter would. You do not have to supply power to it (as
with similiar models). It will pass both VHF and UHF frequencies with
very little loss (except between 151-154mhz.

Believe me, it saved my TMV-7a from a sure trip to the garbage dump.

Bullshit. Your freedom of speech ends where my rights begin. THAT is what
the founders intended when they wrote the Constitution.

I have a right to expect that rec.RADIO.SCANNER will be about scanner
radios, not the American presidential election recount in Florida.

Message-ID: <8uq3fj$t9f$1@nnrp1.deja.com>
Source record: 99854

I bought this htx242, was at radio shack store, noticed the cord on the mike was stretched so I knew it might be used. What I didn't know was that it was dead also. It could RX but not TX. The final was changed at one time and a 43pf cap was missing. The diagram shows the RX pin diode in the circuit the wrong way. So I went by the diagram. Big mistake, I got it to work for awhile. until I put it in high power. I get about 90 volts of rf at the output of the 50 watt pin diode but after that the voltage drops to almost nothing less that a volt.
Any help will be greatly appreciated. When my daughter gets her ticket I want to give this radio to her

> (except for the Russian thing) ;-)

If you monitor 143.625, at least you will know when the bird is
within range. Usually, the beacon frequency will not have voice
on it. The actual frequency that you can expect to hear people
on is 145.800 MHz. The frequency of 144.900 MHz is the frequency
people on the ground use to communicate to the space craft. Not
much sense listening on that one, because you will only hear ground
stations close to your location.

> Should we scan 144.900 and 145.800 too?

No, just 145.800 for the reason I stated above. By the way. I am no
expert, have not talked with the bird, just relaying info that was
told to me.

I have a 2000 Tahoe and had the same dilemma. My solution was an L bracket mounted between the hood and fender. There is sufficient clearance so as not to interfere with opening and closing the hood.You still have to drill three small holes on the inside of the fender but you'll never see them. Most ham stores carry these brackets and are available in NMO mounts.Not the best solution but it works pretty well and it's better than tearing up your new truck.

What about Roger Clinton on his arrest for selling cocain. While boasting that his Broth Bill is the Governor, he also made the comment that Bill Clinton's nick name was Hoover. He had the best nose to suck up all that coke. This is on video tape and has been widely circulated.
Also refer to Jennifer Flower's comments that Bill Clinton used cocain. And while we're at it, why would a former girlfriend of Bill Clinton be so afraid for her life that she had to publish a Clinton DEATH LIST in order to protect herself from possible attacks after her apartment was ransacked and her mother received phone calls threatening Jennifer.
And what about Al Gore's support from China and Russia. Seems that lots of money was illegally sent to Gore and Clinton for their 96 campaign. We now know that technology that was essential in our defense was transfered to the Chinese and that we are now under a threat from the nuclear arms of the Chinese.
I fail to understand how anyone can ignore these facts and still have any credability.

I hope you are happy in your dream world.
May the Demoncrat traitors(Clinon/Gore and the rest of the liberal communists) rot in hell.

with no good wishes---N8WGM

In article <8unm32$h16$1@news.hawaii.edu>, jeffreyh@Hawaii.Edu says...

I've seen some whacked out posts, but this one beats all.

>Not me -- the condo here is paid for free and clear. Even if it
>wasn't, I don't believe the IRS (i.e., taxpayers) should have
>to fund anyone's mortgage interest. If you borrow other people's
>money, then pay them then interest they're owed without begging
>for a reimbursement from the taxpayers.
>
>Get an education earning high grades, make a good showing at the
>job interview, and you'll land a high-paying job. Then you too can
>pay cash for everything and won't have to borrow other people's
>money in the form of loans with the taxpayers funding the interst
>that YOU should be paying.

I've got news for you, Jeffery. The money that I work for and am paid by my employer (and is confiscated from me before I even see it) does *NOT* repeat: *NOT* belong to the rest of the people who pay taxes. The mortgage deduction, or any other deduction for that matter, is a legal effort to get back some of what was taken from *me*. It does not belong to anyone else.

Taking this at face value (I wouldn't want to question the word of another
Okie), I can tell you that, given the current system capabilities of the
OLETS (Oklahoma Law Enforcement Teletype System), a check by name and date
of birth for a current valid Oklahoma driver's license takes , on average,
less than a minute. Checking states other than Oklahoma may take a couple
of minutes. The local dispatchers here enter the information into their
computer terminal as the officer radios it in and by the time the officer
has finished, the response is coming up on the screen. Or the officer in
question can utilize the MDT in his unit and not even have to radio the
dispatcher, the MDTs are tied into the OLETS network.

Oh, you're using something, No User. If Gore is so concerned about the "voter's ligitimate rights" or so concerned about an "accurate conclusion," then why isn't he asking for extensions and recounts nation-wide? In other words, why does his "concern" seem limited to just the voting districts that might help him win this election?

Dwight Stewart (W5NET)

If Gore is so concerned about the "will of the people," the "right" of voters to have their voices heard, or the "accuracy" of the vote, then why isn't he asking for extensions and recounts nation-wide? In other words, why is his "concern" limited to just the voting districts in Florida that might help him win this election?

Because of that, this condescending "will of the people" nonsence by Gore is nothing more than in insult to the American People - the "will of the people" is not a campaign slogan.

poss low pas filter/s blown ,also the early 706 had trouble with pwr lead
socket being close to some components on pcb, slightly later models had a
foam rubber pad installed[and poss componenets moved in this area] under pwr
lead socket on rear of radio, i know one person who lost components through
being knocked off pcb board via this area due to regular moving of power
lead,although this affected 2m receive and not hf.
have you been using a longwire and atu , and had power level set on high
whilst tuning up, thus putting 100w into very high swr internittently whilst
tuning atu.
i had this problem a few years ago,and that is what was wrong with mine,low
pass filters gone.
hope this helps. cheers ian m0bcg

Actually, we do not know this for a fact -- yet. As more absentee ballots are counted, the margin draws closer. Look at the additional states now considering recounts because the margin has become so small. Wait until the final count is in.

As an aside, as it pertains to the total popular vote, did you hear the news report today about the poll of 1000 Wisconsin college students, over 100 of whom voted more than once locally, and over 100 of whom voted by absentee ballots in two states?

With all do respect, ham radio is but a subset of the real world. Would you have us ignore what is going on in the world other than ham radio? I would ask you in what other recreational environment are you moderated in what subjects you may discuss. I have always found conferences an artificial delineation. When I go to the local pub and the bartender scurries up and down the bar "moderating conversations". I will probably pay closer attention to conference headers.

As a pioneer in on the BBS scene, I can assure you that the granddaddy Ward Christenson's CPM based BBS in Chicago, Bob Blue's Apple based BBS or my Commodore based BBS, never instituted such policies. It was the Johnny come lately users that brought this to the computer world

We are humans first, and computer users second, and as such from time to time other subjects will drift in here.

Aren't Cushcraft and support mutually exclusive terms?

Why shouldn't a competitor point out the shortcomings of a competitor by commenting on their competitor's public statement of fact???

Gee I suppose you also expect politicans to run a fair campaign!!!

Well worth a check. My 706 worked on some bands but not on others -
and it turned out to be one of the relays (that switch in and out the
low pass filters for each frequency range) that was permanently
energised due to a short circuited protection diode.

> WHAT IS THE LOCATION OF THE POMONA RADIO SWAP MEET THIS SAT . ...THANKS

At Cal Poly Pomona, just west of the I-10 and I-210/CA-57/CA-71 intersection.
Exit I-10 at Kellogg Drive. Proceed south, make first right, then first left.
Proceed down to third parking lot. The seller's lot is on the left; all
others, on the right.

Note: The first parking lot is also used for a swap meet, but that's not radio
equipment. Antiques are sold there.

Lets see,

Me an ammateur from Holland is looking into this kind of newsgroups to find
out more of the radiohobby we AL share.
But to my surprise I read al about the past elections....
We do have t.v. in this country and are realy blowing from our feets with
this kind of "news".
If you all dont mind than lets get back in to the hobby we share, and let
the politicians fight this out
Dont get me wrong, I understand the importance of the outcome verry much but
this is'nt the place to express your thoughts about them.

ammateur greetings from the Netherlands.

Have you ever read the history of the Khazarite Jews and their Hundreds of years old battles to destroy nations. You know the same people who were the moneychangers as discussed in the Bible. Same exact group of people who are the Khazarite Jewish Money Changers. They actually are not true Jews anyway but rather the spawn of Satan.

I agree with Chris, your pa transistors are probably okay at the moment if it is drawing 20A, but don't keep on transmitting otherwise they may expire!!.
As Chris said probably one or a number of the band switching relays in the o/p bpf have either gone o/cct or welded themselves shut, this would cause a serious mismatch to the o/p of the pa, which may cause the self oscillation, this would also account for the 'deaf' rx in certain band sections.
I've seen this sort of thing occur a number of times in 706's owned by cb'ers, where continously tx-ing out of band causes the bpf relays to expire, this can result in a repair bill almost as much as the 2nd hand value of the set (706mk1).
If you can identify the offending relays contact Icom-uk to order the spares 01227-741741, they may be kind enough to even supply you with a layout drawing of where to find the relays on the board.
Good luck.
Geoff.

Be sure to check out the newly alocated MURS CB band in the VHF
frequency range.
You are allowed 2 Watts and a choice of several VHF frequencies in
the 150 MHz range.
This is developing as we speak and is being opposed by Motorola.

So be sure to check the link below for updates.

I appreciate that, but when someone makes a completely off-topic post which
has absolutely nothing to do with radio at all, it's not needed here. Nor
is all the racist garbage which gets posted here. I didn't say that
shortwave radio has nothing to do with politics, it's just that this is a
radio forum & not a political one. I and probably most of the other readers
of this group are here to discuss radio, not politics.

Bush AND Gore should pack their bags and go home!

Why would anyone want another Republican or Democrat as President?! Are our taxes not high enough? Do we really need MORE laws telling us what we can not do and lose more of our few remaining rights? Do we need to piss off a few more countries by dropping bombs on them so that we as citizens have to be afraid to visit any country outside of our own because of "terrorists"? (no one ever bombs a Swiss embassy or airline as they keep their noses out of other countries affairs!)

We have seen over and over what the "Republicats" can do. Enough! There are 46 other 3rd party candidates to choose from! 5 of which are on most state ballots.

I know the Khazarite story. They did not become Jewish for about 800 years after the moneychangers and had more interest in preserving their nation than destroying anyone else's. You been back in the cough syrup again?

I have the same antenna, Gervais. This is the one I called about some years ago. The fellow was surly, a smart aleck, condescending, and by the time I got off the phone I was so mad, if I'd have been at his counter in person, I'd have snatched him over that counter and smacked him up against the wall! He was THAT bad! I just hung up. BTW, I have the antenna on the roof, guyed with rope, and I only use it as a receiving antenna for my standard 24 hr clock!

You failed to mention they were "Previously" lost in Democratic poll places.
Grow up and knock off all the sophomoric rhetoric. The election may still be
in process, but campaigning ended Nov 7th.

Have you also noted the failure to give us the popular vote count that the Gore people use as proof the American people want Gore. I suspect with the final counts his "popular" lead has diminished a lot.

I checked MSNBC's website and could not find it anywhere.

Then that particular half is more than welcome to emigrate out of the
US to some country with more "correct" political systems. I suggest
they go to Rawanda, South Africa, Italy, India, or even the UK..

Bon Voyage!

The rest of us will not miss you in the slightest.. and our election
system will keep on keeping on just fine..like it has for the past
200+ years.

Oh.. watch out for snipers and tanks in the new country of your choice
come election day.. its a typical hazard in many countries.

Actually, a candidate can still win the presidency with only the electoral votes of CA, NY, TX, FL, IL, PA, and MI, and a handful of other "minor" states thrown in. Hardly "most of the country". In fact, had (or is that should?) Al Gore have won (will win) FL, this is precisely what would have (will) happen. The "will of the people" does not matter, nor does some mythical "most of the country". The only thing that counts is electoral votes and the rules set forth by the constitution - something which does not necessarily correlate with either of the aforementioned items. Many people (including you) seem confused about this.

Bush supporters have the same right to request a manual recount. It
might not help them as much, because most of the heavily Republican
counties use a different voting system that is less susceptable to
undercounting votes.

The "Ballot confusion" was caused by the Dems having a telemarketing firm call the list of Dems and asking them if they were sure they voted for Gore "as it was easy to make a mistake because of the confusing ballot". This was done while the voting was still going on.

Two excellent subjects, Curt. As for the hand count, you're right. It is a subjective process that does not automatically insure a fair and accurate outcome. In fact, as you pointed out, since it introduces the possiblity of bias into the count, it actually decreases the chance of fairness and accuracy.

Furthermore, it is fundamentally impossible to fugure out the intent of the voter by looking at a card. For example, lets take the partually punched chad. The fact that is is partually punched does not automatically mean that the voter intended to vote for that candidate. Instead, the voter could have started to select a candidate, but changed his/her mind at the last second and decided to not select either candidate (many people decided not to vote for a candidate).

> As to discontinuing the Electoral College

> states. [snip]

There is another purpose for the electoral college system - it serves as a check on the American people. Our forefathers were very careful to insure that all core aspects of the government are balanced against some other stabilizing force.

For examples, congress requires a set number of votes to change the constitution, supreme court justice appointments require appointment by president and review by congress, the house has the senate, the senate has the house, the president has congress, and so on. No part of our government works without some type of check on its power.

To some limited degree, the electoral college system does the same thing when it comes to the American people's election of a president. Now, unlike the checks on the other aspects of government, our forefathers had more faith in the American people, so the check on their

power to elect a president is not so limited. But, our forefathers also insured it was not unlimited either.

Now, whether that was their intent or not is less clear, but that was the result.

I tried a year or two ago to get parts or even information about the matching box at the bottom of an R7 Cushcraft. Since I bought it used, it would never work on other than the two highest bands. Couldn't even get an SWR minimum anywhere else. I finally, in disassembling it in disgust heard a rattle in the box as I moved it and discovered a broken toroid in the matching box.

Over a couple of weeks after several attempts to contact their service department both by phone and by e-mail I finally received a phone call from a gentleman. The bottom line was that they would give me NO information about the broken toroid, would NOT sell me a toroid, could/would NOT test traps or other parts which which he said might be bad and they'd be glad to sell me the WHOLE MATCHING BOX for well over $100. They "used to" have a test rig to test traps but they moved it to "production" now and can't test traps.

Cushcraft used to be a very fine company to deal with and if one had a problem they'd go out of their way to help and even have sent me parts free for antennas out of warranty. Now they have a DEAL FOR YOU and it's going to cost you LOTS OF MONEY and you aren't likely to want to take advantage THEIR DEAL FOR YOU when you call with a problem.

I will NEVER AGAIN buy anything made by Cushcraft. They just plain don't care anymore about customer satisfaction or whether or not their products live up to their advertising hype.

And your rationalization for Dubyas lead of 1800 votes shrinking to 300 votes is ????? Lets see - if a republican manipulates the "will of the people, it's patriotic, and actual, but when the democrats contest it and find (so far) almost 1500 previously "lost" [conveniently., oops!, they are just good ole boys] then it is false and Gore is stealing the election from a manipulated jeb bush state. No arguing with an idiot - your replies amount to - oh yeah ?? says you!!!

Yep, I've noticed. I've also noticed that the press is not covering the demonstrations in Florida as well now that large numbers of Republicans have shown up. And I've also noticed that they are very selective when they pick which messages from their web sites to air on television shows (the Rebublican messages almost never make as strong an argument as messages from Democrats, even though I heard strong arguments almost every day from Republicans). And I also noticed they didn't give Bush the win in New Mexico when he was 50 votes ahead in that state (it was undecided at that point according to them), but they left Gore as the projected winner when he was only 50 votes ahead.

Yep, bias is rampant in the press - they're just too biased to see it, or admit it if they do see it.

Hi Pete

ah!! the old one's are the best

i know most folks think the 706 is a dog but that is taking it a bit too
far!!

it might make the case all glossy, but i suspect it won't correct the
underlying pathology

any ideas as to whats up?

Tom, I've listened to shortwave for almost twenty-five years. And, because of that, I know that a person has to be _REAL_ selective not to listen to anything political on a shortwave radio. In fact, the shortwave frequencies are filled with politics in one form or another - the radio programs from almost every country (BBC, VOA, etc) are little more than political propaganda broadcasts. Therefore, it is a little absurd to suggest that shortwave radio has nothing to do with politics, or that politics cannot be discussed in a shortwave radio newsgroup.

hi phil
when it comes to lighting damage it is cost effective to replace the
antenna due to EM damage that may not show up right away as for the
fact that cushcraft doesnt have replacement parts for a new antenna its
the same way with most things i know GM and ford are that way with a new
car try and find a replacement part for a new production model car till
its been on the market awhile
good luck
oh and this comes from someone who is still waiting ion cushcraft to
send replacement parts for a 10 year old ant its been 4-5 weeks

I have a real problem with this. Beyond the fact that it is fundamentally impossible to fugure out the intent of the voter by looking at a card, a dimple on the card especially reveals nothing about the voter's intent. For example, perhaps the voter simply placed the punch tool on the card, started to press down, but then changed his/her mind at the last second and decided to not select either candidate (many people decided not to vote for a candidate). However, if Dade starts counting dimples, that card is going to count as a vote for a particular candidate because there is now a dimple where the tool was placed on the card.

Yeah but what do you think about this election and it's effect on ham radio?

Will the change in government put in a new bunch at the FCC and we then can say goodbeye to Hollingsworthlessthannothing
and get some real enforcement on the jamming on 3950 and 14.313?

Will a new FCC commisioner throw out the persecution of KV4FZ and allow him back on the air?

And will a George Bush tax cut allow you to buy a new ham rig or will AL Gore spend your money in order to buy votes?
I'd prefer a new rig than let Gore buy votes and get himself into power.

You see, politics has an all encompassing
reach even in to ham radio. These issues are part of hamming and the election is part of ham radio, weather you like it or not.

Golly gosh, 23skiddo, you're just so smart! I wonder what would happend if they actually re-counted in some of the Republican areas. Do you think that they might actually find some more for Bush? Let's see, all of the counties that they've done re-counts in are run by democrats, they have predominantly democratic constituencies, and have democrats as election supervisors, hmmmm, it's a wonder that they found any votes for Gore in those areas. Give me a freaking' break!

hey ken welcome to the sunshine state there are several 2 meter repeaters in st.pete and the tampa bay area that is very popular here is a list
147.060+
146.970-
146.640-
147.105+
also there is a website that lists all the repeaters in florida sorted by area i will attach it here

http://florida-repeaters.org/dblist.htm

also if you get a good outside antenna up give me a shout on 146.520 simplex i am usually monitoring

So how does a simple, tiny majority reflect the 'will of the people'.
Taking it as such is just asking for a civil war.

Looking at the map of the US, most of the US is in favor of Bush.
You might argue that the most heavily urbanized areas with the most
people are for Gore, but then simple majority rule (one man, one vote)
was never the founding principle of the United States.

During the writing of the US constitution, many of the smaller states
were concerned that the larger states would ride roughshod over the
interests of the smaller states if voting was strictly according to
population. So the power of the majority was diluted by establishing
the Senate as a second legislative body with equal representation per
state. And since the electoral votes per state are set by the total
number of representatives there is a non-democratic component in the
election process. A candidate must be acceptable to most of the
country not merely the majority.

Lets see, Democrats hate tobacco companies as being evil but give away
cigarettes to buy votes...
Democrats don't like the outcome so lets keep counting until we get
the answer we want...
Democrats bring in a Daley to run a campaign when his father was as
crooked as they come, I know I know the son might be as pure as the
driven snow but still makes you wonder...
Democrats cant follow an arrow to find the hole and then blame
everyone else for their stupidity...

so which party is worse? it all depends on your point of view but....
WHAT THE HELL DOES HAVE TO DO WITH THIS NEWS GROUP?!!!!

Cushcraft said they were *discontinuing sales* of the older models, NOT
that they would no longer support them. Bencher has twisted the
notification to suit their fancy, painting a deceiving picture of their
competition. Pretty lowlife if you ask me!

in the simplest terms, the electoral college covers the widest(cross
section) of american society, not the greatest number of people.

we should consider ourselves lucky that we are not a true democracy. we
are a democratic republic.

if we were a true democracy, urban areas would win all elections, and subsequently likely starve to death, because the rural food growing areas would eventually rebell and withhold food.

Hi, Regina...

I have two of the TS-570DG rigs. I really like them and never have had any kind of trouble with them. I also have an Icom-746, a Yaesu Ft-890 and a few older rigs, but the only rig I use is the TS-570. I find it works great on CW (I operate 95 percent CW) but also does a great job on SSB. I have used it on RTTY and PSK and it performs very well. It is a bargain for the price they are going for these days. Go for it!!

Possibly OT, but here's a couple of thoughts.

I'm taking note of the opinions mentioned here, as I was intending to invest in a vertical. Both companies being mentioned in various posts, and especially the 'note' on the Butternut (Bencher), site has made me think again about business ethics and dealing with various companies. In fact, the knock on is that I've been looking to replace a Bencher key, which I had to claim for on insurance when it was stolen. I will probably not buy a Bencher, but then I was tending towards a different make anyway, so they probably would not count me as a 'lost sale'.

However, as to whether all this will really hurt Cushcraft and/or Bencher, I doubt it. There are more Amateurs who don't read this NG than do, and most of these companies have bigger business interests away from Amateur Radio than in. The numbers of Radio Amateurs, at least in the UK, is in decline. We're starting to become even more of a minority interest than we were a few years ago, and AR, despite what 'we' may like to think, doesn't carry much weight in the business world.

So, companies like Cushcraft and Bencher could well look at the postings here and think, perhaps privately, 'so what?'

Let's not over inflate our opinion of ourselves and our influence, eh?

Hey, some of that Junk *IS* mighty fine, as opposed to some other
brands of junk that isn't so fine.

That's not the way I see it. Informing prospective customers of your own product support policy as opposed to the competition is just good business. Maybe Cushcraft will be moved to actually support their own products better.

So far, so good.

But they completely distorted the Cushcraft statement.

Cushcraft states they have discontinued the SALE of certain old
antennas.

Cushcraft did not state that they would no longer SUPPORT existing
owners of those antennas.

The Bencher notice is outright fraud.

Hello,

Our hunting party has grown over the years and we have been required to spread out over about a 5-mile radius. I am looking for specifications for some two-way radios that would allow us to stay in communication with one another.

The terrain includes forests and moderate hills (at most 200 - 300 feet high). Would anybody have any specifications or product suggestions to allow me to accomplish this?

Thanks in advance!

Did you hear that the floor is full of chads where they are doing the
hand count? Wonder where all those chads came from? A little slight
of hand with a long fingernail can determine the next president of
the United States.

Me too! When there is no "None of the above" choice on the ballot then no
completely clean punch hole means the voter changed their mind and decided
to not vote for anyone for president. This is clearly the obvious intent of
the voter, despite the Democratic assertion that all questionable votes must
go to Gore.

Dear All,

I have a mk1 706 that has suddenly developed the following syndrome

Deaf between 8MHz and 15MHz all other Rx OK

No HF/6M TX except for a strange "RF" carrier on all modes with or without
any modulation

This "RF" carrier generates a >3 SWR even into a dummy load

Radio still drawing around 20A on TX at 100W setting into dummy load

VHF Rx/TX are fine

Any sensible comments on what is the matter (i.e. not.. it's buggered!!)

Blown finals?

Blown Transformer?

Cheers

Rob

How about you take a look through Amsat

Their main webpage is located @ http://www.amsat.org/

I also took a moment to find the area that they house the Linux software
that they do carry is located @
http://www.amsat.org/amsat/ftpsoft.html#linux

Just thought that I would give you a hand in locating the software that you
were looking for!

Hi Bob,
I don't know the model exactly, but it sounds like the P.A. is going
into self-oscillation, generating an RF carrier.
May be worth checking the frequency of this carrier and see if it bears
any relation to the frequency shown on the display.
With the SWR being high, a fault could lie in the P.A. output stage(s)
where it couples into the antenna switching and/or antenna socket.
Can't help with the other fault though.

I was wondering if one of the band-switch relays had gone FUBAR and that
might be causing this effect, i,e, the 8-15MHz Tx/Rx relay

>Even though they allow a president to be elected with a minority of
>the votes cast? How does this reflect the 'will of the people'.

Well, barely a majority of registered voters cast ballots, and registered voters are barely half of the people eligible to vote. So even if ALL the votes were cast for one candidate, it STILL wouldn't necessarily mean that the majority of people supported that candidate.

>I agree. Then we can all get on with laughing at your lame-duck

There are and were several better reasons to keep an electoral system if not a college from which no one seems to graduate.

1. Competitive fraud. Mayor Daley could and probably did steal Illinois for Kennedy. But that is all he could steal. Residents of Wisconsin, et al, could sleep soundly. An electoral system does not penalize those running honest elections.

2. It keeps state and local people in charge of a state and local problem. The alternative is a Federal election police for one, count em, one Federal office. And who watches the watchers?

We have four voting systems in the good old USA.

1. OCR (bubble readers) which work admirably. To the elderly, however, printing them in lite blue in small type is a challenge.
2. Make an X paper ballots, entirely appropriate where there is no need to automate.
3. Voting machines that for a number of reasons are no longer made.
4. Punch cards which work if someone cleans the chat first but are ancient technology prone to stupidity.

If nothing else, we may encourage some better technology and finally wipe out the junk.

Bought an R-7000 a couple of years ago at Hamvention in Dayton. Never could
get it to tune. No help from Cushy on that one either. It still don't
work. Been laying up in the attic in the original box for a year now.
Never again will I buy one of their products, after buying many of them over
the years. Terrible customer service and equally terrible attitude when you
try to get an answer from them.

10 meters was being invaded by unlicensed pirate stations more than 20
years ago. Before "Novice Enhancement", you needed at least a General
to work 10 meters at all. During sunspot downturns, 10 would get VERY
quiet.

Novices and Tech Pluses got 10 meter privileges in 1983 or so with the
intent that the band would be busier, thereby dissuading pirates. That
wasn't the only reason for Novice Enhancement, but it was one of them.

Yup. Or maybe some 811As.

The widespread violations by CBers and pirate stations is why we have the regulations about external RF power amplifiers that cover 24-35 MHz. (1978) It's not a new problem.

Which is why it won't happen. Remember too, any change in
the process MUST be done via a constitutional amendment
which requiresratification by 3/4 of the states. That means it
only takes 13 states to oppose the amendment to block it.
I can pretty much bank on at least that many states that
would oppose any change.

It is always the fault of the voter because the voter
should check his/her punched card ballot to be
sure they completely punched the hole. That is in
chapter one of Voting for Dummies.

>Your assertion that the manual recount would be biased is also
>incorrect. The counting is done under the watchfull eyes of both

Lack of knowledge ABOUT voting is insufficient cause to
make exception for that person. It should never be the
position of any election review person to have to try
and figure out the intent of the voter.

How often do people completely forget to vote for a
specific position or question until after they left
the polling place. Should those people be allowed
another chance?

No, my "will of the people" is to declare Bush the persident BECAUSE of what the actual total is. For the last seven days, the total has shown that Bush has won this election. And no amount of manipulation by Gore's people has been able to change those numbers so far.

Sure they are. Many NJ counties just cutover to fully
electronic machines in the last couple of years.
No levers, just push the button, see an electronic
X appear by the candidtes name and then push a
"completed" button to enter your completed vote.
No paper, no holes to punch, no mechanical levers.

And I would add that radio is quickly becomming the only outlet for conservative views in this country. Democrats control television (80-90% of those who work in television news vote Democrat). There has been an increase in ISP's restricting web sites that contain material that they deem not to be politically correct. Online services like AOL will boot you off in a heartbeat if you make too many waves (offend their liberal customers). So called "hate speech" legislation has only increased the censorship of conservative views even more than it was already censored.

So, in the end, we almost depend on radio to sink or swim. And that includes broadcast radio (SW, etc.) and the public communications radio services.

Exactly how are you going to get the other half of the voters to
the polling places? About 1/4 of the voters are determining who
will be president. Looks like it may actually boil down to a
thousand pregnant chads.

Nonsense. As a scanner owner, I have just as much of a "right" to access rec.radio.scanner as you do, and to post on any subject that I think is relevant to myself as a scanner owner and to other scanner owners. The only "right" you have after that is to simply not read the thread.

In other words, when it comes to a public arena (such as a public newsgroup), your "rights" don't supersede my rights.

Watch out! Gore may start demanding a recount of those times. :-)

You have just proved by your first statement that the manual recount
would be biased because manual recounts were only requested in highly
Democratic counties. If machine counting undercounts votes and if
the votes are manually recounted only in highly Democratic counties,
of course the manual recounts would be biased.

Cushcraft tech support and warranty is on better. Do not even think about a warranty claim cushcraft will run you around and do nothing until you file a legal claim, which most people will not do for a couple hundred dollar product..

As they point out on the above-referenced page... parts are
still available for every Butternut antenna model they've
ever made! Their customer service is excellent. I've had
an HF-6V for over 15 years, and on the rare occasions that
I've needed parts or advice, they have been there for me.
Based on everyone else's experiences with Cushcraft, looks
like they'll never get any of my money.

Bush did not lie about his arrest - he simply didn't say anything about it. Omission is not a lie, Rick. For example, I have not told you many things about myself, and you have not told me many things about yourself. But neither of us are lying to the other because of that. We both simply feel it is not in our best interest to disclose everything about ourself to the other.

Thanks for the effort to clarify that, Mark. Let me add that all of us (radio users) are effected, and are going to be effected, by what happens in Washington. All of us have had the government on our backs in one form or another recently. Ham radio users have Riley talking about how free speach does not apply to ham radio. Scanner laws are poping up everywhere. Gun owners have taken a big hit over the last few years. Conservative broadcast programs are slowly disappearing from the shortwave dial. And, if all this nonsense keeps up, we might all become more interested in survivalist skills (insert big smile here).

Even though I'm a Bush supporter at the moment, you won't get any argument with me on that, Steve. Both political parties have some serious damage control work ahead of them. This country is seriously divided and both parties have to address that. If they don't, the "people" will eventually find someone else.

The laws define the way we elect the president - using electoral vote.
And, until those laws change, I suspect the true "will of the people"
rests with the expectation that those laws be obeyed.

We need to take a hint from the malcontent left and start pledging votes
in the next election. Perhaps we can get a Libertarian candidate 5% of
the vote and kiskstart a very old Party.

It's a data mode, all right. Used to run it way back in the early '70s at
school (I went to EE school in the building where ENIAC was built). The ol'
Model 19 was really sweet.

> Bracket the AM carrier and blast away.

Now you have the idea. A bunch of us running CW, RTTY, PSK31, PACTOR, etc,
spaced 2-3 kHz apart will not bother each other at all if we use sharp filters.
But anyone trying to run AM will have to deal with at least 2-3 loud
unintelligible signals in the passband.
>
Fred has the right idea (drive them out by occupying the band) - it's the
implementation I disagree with, that's all.

And this is NOT a new problem. Know why Novices and Tech Pluses got 10 meter
privs back in the '80s?

1234. Amsat Phase 3D updated pre-launch keplerian element set.

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-15 01:45:25 UTC
From: vlfiscus@mcn.net
Message-ID: <t13qmj8asq9m07@news.supernews.com>
Source record: 99776
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.scanner

From: "Ken Ernandes" <n2wwd@mindspring.com>
Date: Tue, 14 Nov 2000 17:33:23 -0500

Below is the estimated State Vector and Keplerian Elements for
the AMSAT Phase 3D spacecraft. The vector data was computed from
Arianespace orbital parameters at the time Phase 3D is scheduled
to separate from the Ariane 5 upper stage. The Keplerian Elements
were computed, in turn, from the vector.

Vector format = 10107
Satellite Name: Phase 3D
Catalog Number: 93400
Epoch MET: 0.02983772000
0/00:42:57.979 MET
EFG E: 4321.19714449000 km
F: 10857.0727900300 km
G: -1323.5057345899 km
Edot: -3.1484853319000 km/s
Fdot: 5.75560664520000 km/s
Gdot: -0.5488001613000 km/s
ndot/2 (drag): 0.00000000771 rev/day^2
nddt/6: 0.00000E+00 rev/day^3
Bstar: 1.25668E-05 1/Earth Radii
Elset #: 1
Rev @ Epoch: 1.52588079822

Launch Window Opens: 2000-NOV-16 / 0107 UTC
Phase 3D separation: Launch + 0042:57.979

The following Keplerian elements were computed from this vector and
the scheduled date and time of the launch window opening. Updated
Keplerian elements will be computed from the vector, based on changes
to the scheduled or actual launch time.

Phase 3D
1 93400U 321.07636550 .00000001 00000-0 12567-4 0 14
2 93400 6.5034 247.6325 7357988 175.9296 13.3886 2.02435417 19

Satellite: Phase 3D
Catalog number: 93400
Epoch time: 321.07636550
Element set: 1
Inclination: 6.5034 deg
RA of node: 247.6325 deg
Eccentricity: 0.7357988

Arg of perigee: 175.9296 deg
Mean anomaly: 13.3886 deg
Mean motion: 2.02435417 rev/day
Decay rate: 7.71000e-09 rev/day^2
Epoch rev: 1
Checksum: 276

Note that "93400" is a temporary Catalog Number. A Permanent Catalog Number and International Designator will be assigned when Phase 3D is launched. The satellite name will also be updated with the next sequential "OSCAR" designator.

These Keplerian elements represent a pre-launch estimate of Phase 3D's initial orbit. The orbit will change significantly over the first year the spacecraft is on orbit. Updates will be provided for significant orbital changes.

Whatta shame. I had an old long-boom Cush 3-el 10/15 duobander at 80 ft. and it bored holes right thru any pileup in any dx contest back when with just an SB-200, the thing was just plain spooky, best pileup buster I ever used by far. But I had some problems with the original plastic standoff insulators they designed into supporting the driven element. Cush shipped me a whole bag of their improved versions along with a with a longwinded technical discussion and apologies. Took it down two years ago after thirtysome years up in the elements and it went back up about a year ago elsewhere and it's back cranking. Something good has gotten lost, shame.

Your "will of the people" is to declare Dubya the president REGARDLESS of what the actual total is. Typical republican - use parts of laws that are to their advantage and ignore the rest - using vague "its the will of the people" references. I, along with Millions of other people, am willing to wait until ALL of the votes have been fairly counted, and will support which-ever one prevails. Of course "fairness" to republicans mean only the rich and powerful. The rest only count at election time. Right now your "true" will of the people lies in the hands of a republican secretary of state that is feathering her nest if she gets dubya elected 'cause her job ends in two years.

Hi Tim,
I am a licensed Amateur Radio Operator and
would like to have the old "Amateur Radio Map of
the World". I will be willing to pay postage,
packing, etc. My address is Sam Kelly
1060 Grant Drive
Great Falls, Montana 59404
Let me know your costs and I will send you a
cashiers check for it.
Thank you, Sam Kelly

Each time the cards are man-handled, flexed, separated, stacked, rubber banded, unrubberbanded, tapped on the table, squared off, more chad conversions occur.
Hanging chad, swinging chad, pregnant chad, and all the other chads are created by handling.
Seems to me, that would render the ballot invalid.
Let em recount all they want, as long as they disqualify those ballots with extra holes punched each time they are recounted. Could possibly get to one remaining stout and sturdy ballot.

Folks,

The biggest problem that I have with the "hand count" is that (according to MSNBC this morning) it really comes down to an exercise of "interpretating" the ballots that were tossed out because of errors. Since this is a subjective process, its understandable why the Bush camp is concerned. It's not clear that this would be more "fair and accurate" than the previously performed machine count (and recount). There will always be a statistical range of random error with any measurement technique, and humans are subject to both random and systematic error (bias). The problem is that if one considered the undesirable situation of continuous recounting, it's likely that each candidate would turn up the winner during some percentage of the recounts. The way things are now, however, a transient statistical abberation would automatically produce a Gore presidency - which is why his campaign wants to continue the recounts.

As to discontinuing the Electoral College - This would be akin to making the country function primarily for the benefit of large urban population centers, and would disenfranchise less populated (but larger) states. In that scenario, a presidential candidate would only have to propose legislation that would benefit perhaps ten major cities in order to win the office. Rural and suburban concerns would be trampled and ignored using that model, which is why it's popular with a number of Democrats. It would be a mistake to think of this country as a single Federal unit with common goals - there is a reason why it's called the United States, not the United State.

I want to talk to my lawyer! I want to regurgitate the Democrat argument...and here is why.
Last weekend I punched some numbers on my weekly lotter ticket...at least I thunk I had. The next day I seen the winning numbers and realized that I had punched the wrong numbers on my lottury ticket because a telemarketer told me I may have messed up . I tried to punch the numbers, but the wrong chads were dislodged. It was not my fault and I only realized my error after I left the lottery office. I was too stupid to go back and punch another ticket to fix my mistakes. Now I want to go back and punch my lottery ticket again and get my winnings because I was disenfranchised. I am owed this because if the Democrats can do it, I can too!
You Republicans owe me special consideration because of my stupiddity! It weren't MY fault...I went to a publik school after all!
I am an eighth "social promotion" graduete...I wont my money or I will get Daley to sue.

big question?
is any of the software (thats so useful in windows) have a
linux equivalent? It would be nice to be able to have fft capabilities
in linux using the same hardware you find on a winblows box (and
space tracking would certanly be a plus as well).

thanks.

I think a little education in internet ancronyms is needed here..

POPx stands for Post Office Protocol with the x giving the version.
SMTP = Simple Mail transfer Protocol
NNTP: News Networked Transfer protocol.
TCP/IP= Terminal Control protocol/Internet protocol

There are litterally thousands more (look in the tcp port assignements
RFC).

>this is no fault of the voter.

I would assert that it is the fault of the voter. My town used those punch cards for years. Never did I fail to check the back of the card before turning it in to see that all the holes were completely clear. I knew that it was important that the holes be free to be counted, and made sure that they were. Actually, they always were, and never needed any help.

>Your assertion that the manual recount would be biased is also
>incorrect. The counting is done under the watchfull eyes of both
>political parties.

I heard that Dade is considering counting dimpled chads. If so, they need to check every ballot, and if they find a dimple in on place, and a complete hole in another, then they must consider that ballot double-voted and eliminate it. It's only fair to be consistant in interpreting dimples.

I was searching for some material on hamradio aprs yet i see this junk of politics on hamradio. I see we have here a bunch of nit wits that cant keep to the subject and should be going else ware like al.politics.vote ect.

If anyone here is into aprs let me know. Im working with a garmin gps III plus and byonics tiny track. I want to know is there a signal that comes out of the gps should it be a cirtain ac/dc signal ? if its digital have no scope to check it and only a high quality techtronics DMM.

Any ideas on what the signal is?

WHAT IS THE LOCATION OF THE POMONA RADIO SWAP MEET THIS SAT . ...THANKS
..JOE

1258. Any problems with the 570D/S

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-15 07:06:05 UTC
From: Regina Williams <regina.b.williams@worldnet.att.net>
Message-ID: <3A123639.7D27D6D2@worldnet.att.net>
Source record: 99800
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

I'm looking at buying a Kenwood 570D/S (I haven't decided yet) and I wanted
to know if there are any bad things to know about. I spent a little time at the
local HRO and the only possible problem I saw was a susceptibility to interference.
(I noticed a lot of birdies, but most of them went away when I unplugged the antenna)

Any feedback would be appreciated.

Thanks

Regina

<<Reposted to new thread by special request>>

Folks,

The biggest problem that I have with the current "hand count" is
that(according to MSNBC this morning) it really comes down to an
exercise of "interpretating" the ballots that were tossed out because of
errors. Since this is a subjective process, its understandable why the
Bush camp is concerned. It's not clear that this would be more "fairand
accurate" than the previously performed machine count (and recount).
There will always be a statistical range of random error with any
measurement technique, and humans are subject to both random and
systematic error (bias). The problem is that if one considered the
undesirable situation of continuous recounting, it's likely that each
candidate would turn up the winner during some percentage of the
recounts. The way things are now, however, a transient statistical
abberation would automatically produce a Gore presidency - which is why
his campaign wants to continue the recounts.

As to discontinuing the Electoral College - This would be akin to making
the country function primarily for the benefit of large urban population
centers, and would disenfranchise less populated (but larger) states.
In that scenario, a presidential candidate would only have to propose
legislation that would benefit perhaps ten major cities in order to win
the office. Rural and suburban concerns would be trampled and ignored
using that model, which is why it's popular with a number of Democrats.
It would be a mistake to think of this country as a single Federal unit
with common goals - there is a reason why it's called the United States,
not the United State.

> > They convince the State official to force a final count by 5pm to take away the
> > voters legitimate right to know the people's vote......

That is untrue! Florida law established that deadline, NOT the Atty Gnrl. Moreover the Fla Judge the 'crats asked to set it aside ruled that neither he nor she could do so *but* that the law did allow her to accept late counts if there were extenuating reasons (eg a hurricane). Accordingly, she asked the registrars of the counties contemplating recounts for their reasons in writing and rejected them because they were invalid! After all, there has already been a count, then a recount, and there is no reason to believe that a third count, by hand or otherwise, will yield more accurate results. In fact, the opposite is true.

> >
> > The extension is the only way to come to an accurate conclusion.

That is disingenuous - the more you count those kind of ballots the less reliable your results become! With 20/20 hindsight, we can argue that Democrats representing the counties in question should have switched to optically scanned ballots decades ago; but they did not and now it is too late! We are left with a bunch of fragile ballots that, when counted twice, gave Bush the win; but were damaged in the process.

The method is 1950's punch-card technology. Each ballot is "read" by poking mechanical fingers against every chad representing a choice and registering the choices with missing chads. Trouble is, these "fingers" dimple some chads and knock others loose. If a chad comes loose after the machine has recorded the vote there is no error *in that count* but there will be an error in every subsequent recount!! Thus the *first* count is always the most accurate that this outdated method can provide. No subsequent machine *or* manual recount can tell which chads were knocked loose by the machine vs those punched out by the voter!!!

My poor Rural Virginia county switched to optical character readers and pen-marked ballots over a decade ago. Why Palm Beach, etc, failed to do so escapes me. If they had, sturdy pen-marked ballots would be available for recount and Democrat claims would have some validity. But they did not so now there is NO way to determine what each voter intended ... and that's a fact!

Now, knowing that every recount is *perforce* less accurate than the first, who are the "assholes" demanding ever more *inaccurate* recounts of those damaged ballots, especially recounts that call dimples made by the machines votes??

Frankly, I don't care who wins but anybody who understands the mechanics of these machines and ballots can see that it is the Democrats showing us the donkey.

Excuse the rant but I'm tired of seeing these lies perpetuated on every NG I visit.

Since, statistically the rate of error is going to reflect the voting
rate (in other words there will be just as many rejects and
undercounts "for Bush" as there are "for Gore"), it doesn't much
matter in lop-sided races. It only becomes an issue when the race is
so close that a handful of votes can make the difference. Most races,
historically, are not that tightly contested.

>Who knows what the statistical error is in a punch-card
>election? Is it less than the amount needed to invoke an automatic
>recall? If not, we may have had many elections in which vote counts
>or electoral votes awarded did not represent the actual votes cast.

Some group did a study a few years ago indicating that as much as 10%
of the votes in a punch-card system are rejected as errors by the
counting machines. What's really needed here is better technology,
preferably universally applied.

>And then, there's the charges that punched cards from certain
>districts were willfully misplaced. Scary to think that that practice
>may have been going on for a while too. Do we need watchers to watch
>the watchers who watch the votes being counted?

Vote fraud has been common (on all sides) since voting was invented,
and has *always* existed in the US. Again, it generally doesn't make
much difference unless the race is tightly contested, so usually
nobody makes much of it.

-Matt

"At first glance, it may seem odd or even perverse to
suggest that statutory controls on the private ownership
of firearms are irrelevant to the problem of armed crime;
yet that is precisely what the evidence shows.

Armed crime and violent crime generally are products
of ethnic and social factors unrelated to the availability
of a particular type of weapon, and the number of

firearms required to satisfy the crime market is small. Experience shows that these weapons are supplied no matter what controls are instituted and in place at any given time."

Every election has been a farce. And the people who keep saying that
everyone's vote counts are retarded. How can one vote count when
thousands or more are not counted correctly?

How can one vote count when no one has ever won and election by one vote?

How can one vote count when Nader's over 2 MILLION votes don't even get
him ONE electoral college vote?

This will be the 4th time that the people voted for one candidate, and the
government elected another candidate.

Still think your vote counts? Then there is no hope for you!

What good are recounts if they come up different everytime? The fact that no two counts can come up the same means we need to address that concern before we even hold any more elections!

For this time, we need to have every state and city in the country recount all votes over and over and over again until you get at least two consecutive counts that are the same. If you can't do this, then no one can be declared president.

1273. MILITARY MEMBERS DID NOT GET ABSENTEE BALLOTS

A class action lawsuit is now in the offing on behalf of the hundreds, if not thousands, of military men and women who did not get absentee ballots. Some Florida military members state they were shipped out on missions the day before the election. Sound like a conspiracy? Read about it at http://www.newsmax.com/cgi-bin/printer_friendly.pl

Sounds like it is ok for Florida Dems. to vote two or three times, but it is unacceptable for our men and women who serve our country to vote even ONCE! Guess who stands to lose if the military folks get to vote?

This is an impossible requirement. Every time those cards are counted,
more chads fall out of the holes. You would eventually end up with one
valid card left.

It really makes me wonder why Al Gore, who is ahead in those counties like Palm Beach, is the one here insisting on a hand recount. Don't you think it should rather be the one who is behind in these counties who should be asking for a recount instead ? Common sense, isn't it?

The only logical reason that can be taken from this is that it's easier to increase the lead by manipulating the recount when you are overwhelmingly supported by the counties and their Board of Canvassers.

Something's really fishy about the Democrat's motivations in this process and I hope the American people can see how the system is being fooled, manipulated and abused with the use of legal gobbledygook and rhetorical sleight.

Oh, come on, James. This issue was resolved last week. Buchanan got more votes in those districts because he had more registered voters in those districts. And there is no conflict between the number who registered to vote for Buchanan and the actual number of votes received by Buchanan. Even the Democratic Party recognized this last week and has since dropped that argument. Why do you think you haven't heard it from them recently? The "Buchanan" argument is not valid.

Look fellow, your accusations of voter fraud by the Bush family is patently false. The districts contested by Gore are strong Democrat districts, with Democrats almost entirely running the election process there. Are you saying that these Democrats manipulated the elections in those districts so that a Republican can win? What did these Democrats do, change the voting machines so the count would favor Bush?

The Republican's 'will of the people" spin?? This is a phrase almost entirely used by Democrats, and Gore himself. In fact, in yesterday's afternoon press conference, Gore used that very phrase less than 45 seconds into his speach.

As far as the vote recount in the entire state, there is no ligitimate reason for a vote recount. The vote count process has worked in the state for many years, through both Democrat and Republican adminstrations.

So, according to you, the vote count in Republican districts were rigged to favor Bush, but the vote count in Democrat districts (ran by Democrats) were perfectly fair and honest. Do you really worship the Democrats that much?

And I appreciate that, Tom. However, I don't think it is off-topic. Again, all aspects of radio in this country is controlled by the government. Therefore, what happens in that government has, and will have, a direct effect on radio.

However, you are certainly free to disagree. And you are also free not to read this thread, or participate in it. But, on the other hand, don't turn around to complain when we freely choose to participate in this thread.

Thank you.

Look, I don't know what you're talking about when you mention "a guy is a homosexual," but as far as politics is concerned, at your ham license, Dennis. Notice that it has the name and seal of a government agency - an agency that is going to be effected by the outcome of this presidential election. Do remember, after all, that the president appoints the head of the FCC.

Kim, I cross posted this thread to those newsgroups because I'm also involved in those newsgroups. I read each of them at least once a week and post to them when I have the urge.

Since political discussions were already occuring in those newsgroups before I posted this thread, there was no reason for me not to add this thread to that discussion. And, as I have explained elsewhere, I feel the subject is related to radio in general (the FCC is a government agency), it is related to all of the newsgroups listed (even misc.survivalism if this process continues for too long).

Furthermore, AND THE MAIN POINT, if we adopt your suggestion above (deleting newsgroups except for the one you read the message in), how do you know the person you're responding is even going to see your response (he may have posted from one of those other newsgroups).

That's fine, Kim. Then this thread's subject does not relate to you
and you're free to ignore it. Remember, other then how it relates to
your own participation, not everything in these newsgroups must be
weighed against your experiences, or your value of the subject.

And Florida case law confirms any fault lies with the voter and not the
ballot:

Nelson v. Robinson, 301 So. 2d 508, 1974 Fla. App. LEXIS 8601 (1974) [ballot
confusion]

"If a candidate appears on the ballot in such a position that he can be
found by the voters upon a responsible study of the ballot, then such voters
have been afforded a full, free and open opportunity to make their choice
for or against that particular candidate; and the candidate himself has no
constitutional right to a particular spot on the ballot which might make the
voters' choice easier. His constitutional rights in the matter end when his
name is placed on the ballot. Thereafter, the right is in the voters to have
a fair and reasonable opportunity to find it; and as to this, it has been
observed that the constitution intended that a voter search for the name of
the candidate of his choice and to express his choice for that candidate
without regard to others on the ballot. Furthermore, it assumes his ability
to read and his intelligence to indicate his choice with the degree of care
commensurate with the solemnity of the occasion."

This is common case law, makes you wonder why all of Algore's fancy lawyers
and the news media conveniently overlook it...

> "will of the people spin" Who's giving who the break ??????

What "will of the people" spin ? The facts are:

Counties Won:

Bush - 2,434
Gore - 677

Land Mass of Counties Won:

Bush - 2,427,039 square miles
Gore - 580,134 square miles

Population of Counties Won:

Bush - 143 million
Gore - 127 million

It's clear that the vast majority of the country is for Bush, it's sad that
a small minority of a few liberal welfare states can affect an election to
such a great degree.

10-10 International was started back in the 60's. there was a scare
that we might loose the 10 mtr band like we did the 11 mtr band because
of lack of use. the group was premoted to spark more interest in 10
mtrs. there is at least a million cirtificates and awards (wall paper)
that can be had by working the ten-teners. to get a 10-10 number all
you have to do is work 10 10-10 stations and submit your logbook entrys
to the correct district mgr. or at least thats the way it wsed to
be.... once you get a 1010 number its yours for life. I received
mine back in the early 70's (9151) and quit chasing paper a long time
ago.(it got to be alot of work) I have one wall in the shack
completely covered with cirtificates. nice to look at but don't mean
much, hi... anyway, thats 10-10

1300. MMT 220/28S Transverter Question

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-16 00:00:00 UTC
From: Paul Knight <paul.knight@prairiecomm.com>
Message-ID: <8v0kcg$7qq$1@bob.news.rcn.net>
Source record: 99615
Cross-posted to: alt.ham-radio.vhf-uhf,rec.radio.amateur.equipment,rec.radio.amateur.misc

Hello! I just acquired an MMT 220 MHz transverter with the 28 MHz IF. It appears that with an IF radio of 28-30 MHz, the unit will cover 220-222 MHz. Is it possible to modify the unit by changing the 96 MHz crystal with a 97 MHz crystal, which would double to 194 MHz, to give 222-224 MHz coverage with a 28-30 MHz IF? Would any retuning be necessary? I hope I didn't just buy a paperweight! :^)

Any help would be greatly appreciated.

73,

Paul WD8KDY

Hi Bill -- 10-10 International fosters continuing use and activity of the 10 Meter Band in good and poor propagation times so as to preserve it for Amateur Radio use. They sponsor many contests and awards. I have heard that the 11 Meter band was lost and became the CB Band after Hams failed to use the band.

All about 10-10 International and how to apply for your own number at URL:

Bush realizes that corruption in the hand counting process will cost
him the election. Pregnant chads and dimples count for Gore. See how
easy it is to steal an election if objective ballot counting measures
are thrown away and subjective ballot counting methods are used?

Anyone who knows anything about sampling knows that selective
sampling is invalid.

The best do as the constitution requires. We are not a democracy, rule
by the mob, we are a representative constitutional democracy, rule by
ALL the people, even those who don't vote are expressing their "vote" as
negative.

> The US election system is retarded.

It's so advanced you don't understand it, and probably won't. Tell me
you know how and why it is the way it is.

> At least HALF of the citizens are smart enough to realize this and want nothing to do
> with it at all.

Citation please. Those that don't vote express their negative vote on
issues and candidates. I prefer it to living in a country where one is
required to vote, sometimes at the point of a gun.

I am merely stating that in order to satisfy both sides - a total recount would be in order - undercounts go hand in had with overcounts. I never said what you just implied - another republican spin - Gore offered that same offer - and dubya rejected it while hiding out at his ranch in Texas - too great of chance that he would lose. Bush did sign a bill in Texas that contained statements that hand counts were more accurate than machine counts. Now he is saying the opposite - Just like he stated he had no DUI's - until they showed him the proof - but that wasn't a lie. He is a politician, swaying in the political wind. You just seem to love to argue - regardless of the facts. You are very black and white. Republican = Yes, Democrat = No. Not realizing that there is a VERY large GREY area between the two. That is where we need to be.

hi adam
a G5RV dipole is a very picky antenna it has to be installed just so or it will
not tune properly and since your telephone line is so close to your antenna
thats why you have RFI the phone line is not a sheiled line and a auto tuner
will handle a 2.1 swr but not much higher
what i would suggest is since it sounds like you live on a very small lot is to
buy an HF vertical like the GAP or the butternut or the cushcraft R7 or R8 these
are all multiband HF verts and are ground mounted so you wouldnt need much for
ground radials
good luck

Maybe in poor taste, but when taken in light of the complaints here I doubt
that they are misleading.

I had planned on getting one of the "big" 40 through 10 multiband antennas.
The thing starts with three elements on 40 and covers all WARC bands, but I
think I'll try to find a different source for a "proven" antenna.

For VHF and UHF I've been using the C3i antennas and they have excellent
customer service.

Unless I'm mistaken, the entire 10 meter ham band is worldwide exclusive amateur - no other service shares any of it. So ANY nonamateur signals in that band must, by definition, either be unauthorized, or authorized by Part 15 or Part 95 rules. And the PArt 15 and Part 95 rules have verbiage that states something like "must not cause interference to other users, and must accept all interference from other users".

The only possible other exception is a nonamateur station with a legitimate emergency situation. I sincerely doubt that the truckers on 28.025 are there for that reason.

--

If we tolerate the intrusion of pirate stations into the ham bands, their numbers will increase until those bands become unusable by hams because of the pirates.

--

How should we handle such intrusions, Tom?

You can order copies of the manual, and the test charts for your tester
from A. G. Tannenbaum:

http://www.agtannenbaum.com/

Also check out the following two excellent Hickok pages:

http://www.0wned.org/~hstraub/hickok.htm
http://www.freivald.org/~padgett/hickok.htm

Also...in many states...the absentee ballots are not counted unless
the would/could make a change in the winner....if these votes were
counted the popular vote could be for bush....most of these are
military votes...and in past elections go nine to one for
republicans....sno

An unknown percentage of them have moved or died without being taken
off the rolls. (That's ignoring the intentional graveyard vote.)

Great points, Dwight. There is, of course, a silver lining in this cloud: If Mr. Bush does a credible job, if he is able to build a coalition (as his father was, of fond recent memory), then we can expect great things from the broader (non - partisan) Conservative movement in America. I am, however, a real pessimist (and my opinion is somewhat bolstered by Gore's attempted dirty tricks), and I have a strong feeling that the Liberals will do everything they can to obstruct progress. I am uncertain as to the extent of their success, because of the Republican majorities in both the House and Senate.

I am not posting this to discredit your experiences, I am mearly going to give you my recent very good experiences with Cushcraft. I bought a AR27013S 6m, 2m, 70cm Beam in September. I had a problem with high SWR. I called Cushcraft left a mesaage. they called back within 10 Minutes and after several calls back and forth found the problem to be my ignorance.

The problem has since reoccured and I thought ok, I will buy a new reddi match assymbly. I placed my order and explained the problem on their website form. Low and behold, they call me back and stated that they were sending me the new reddi match assymbly at no charge. Maybe it is just me, but I did not expect that from them.

I also bought an MA5B. I opened the package on a Monday, to find that one of the rubber boots that cover the end of the traps had a small pucture in it. I called them again Monday afternoon. I told them I wnated to put the antenna up the next weekend. Fed Ex arrived on Friday with the replacement

Maybe my expectations are low, but from my experiences I am pleased with my recent experiences with Cushcraft!

Awww shucks, Steve, don't be so hard on poor old Vice President Gore. We wouldn't want him to spend all of his tobacco money getting elected, would we?

I'd prefer him to spend all of his tobacco money (and all of his oil money) on a lawsuit about his fund-raising, etc. Then go to jail. And be cell mates with Komrade Klinton. Till hell freezes over.

Just my opinion .. I could be wrong.

(Or not.)

You have a valid complaint. However the title of this thread is
definitely completely political in nature, and the one of the beauties
of Usenet is that you can completely ignore such threads (or people)
that you don't wish to read. So just ignore them and enjoy the threads
that do discuss radio...

BTW did you know that you (and I) are cross posting to guns and
survival groups? I'll bet they don't want to talk about your radios...

Lets hope so. Our prosperity in the last 8 years was caused largely by
the deadlock in Congress. The Democrats couldn't get their high dollar
welfare agenda passed, and the Republicans couldn't break us with
excess military spending. The stock market loved it. Look for
continued prosperity no matter which President we have. This is one
place where we *don't* want them to all get along...

I think what's most interesting about this election crisis is that it's exposing errors in the vote-counting process that have always been there, but which are normally swept under the rug and ignored, or never brought to light, when one candidate has a clear electoral vote majority. Who knows what the statistical error is in a punch-card election? Is it less than the amount needed to invoke an automatic recall? If not, we may have had many elections in which vote counts or electoral votes awarded did not represent the actual votes cast.

And then, there's the charges that punched cards from certain districts were willfully misplaced. Scary to think that that practice may have been going on for a while too. Do we need watchers to watch the watchers who watch the votes being counted?

No where in the message you quoted does he mention anything about whether said transmissions are authorized or not, so your boilerplate response is a moot point.

What does that matter ? I wonder how many "found" votes Jeb's folks discovered for his brother in republican precincts?? If they had a total recount - dubya's total would probably shrink significantly. But that wouldn't be the "will of the people" now would it ????? Did you watch dubya stumble his way through his news conference tonight ? He was reading every word as if he didn't understand what he was saying, and AS USUAL, SAID NOTHING AT ALL. Another empty suit. He would be laughable if it wasn't so scary to think that he just may end up in the white house. We are going to go from being a Superpower to being a souperpower.The middle east diplomats would reduce him to whimpers in a red-hot NY second. Then he would have to hide out at his ranch like he is now. Who's running Texas?? The same folks that have been all his term - Big Business !!! Grow up ?? WAKE UP!!

or indeed those that don't fiddle as in my case!!

its only tx has been on 6M and 2M apart from my dad (a G3) who gives it the
odd run out on 40 when he comes to stay.

no 11m no mods and it has still cooked

so I'm looking at £300 eh?

anyone want a duff 706?

offers?

No one seems to get it. It is not about being a Republican or Democrat, I am independent and voted a split ticket in this election as in most. Unfortunately the system is supposed to work without getting the judicial branch involved and the hand recounts are rediculous.

Nixon conceeded in 1960 when there was obvious vote fraud in Cook County Ill. (much more populated by proportion of the total population then Broward and Palm Beach county are today). He could have, and was entitiled to challenge it but bowed out with grace and thus allowed the system to work.

You don't hear Bush demanding hand recounts in mainly Republican counties now do you. You also don't hear Bush demanding that someone look into the obvious voter fraud in St. Louis MO.

The electoral college is working. It was meant by our founding fathers to give small states with less than a population (like < .5%), such as DE, SD, ND and MT. more of a voice in deciding who our chief executive is. Without it, Florida, PA, NY, TX and CA would be deciding each election for us.

Gore is being a sore looser, it has ruined any chance of him ever holding political office again, he has pissed off the national Democratic leadership now.

Let the system work, perhaps Florida voters will take their votes more seriously next time and will look a bit harder at their ballotts rather than relying on some canvaser to fix their mistake or add votes to their tally.

Patrick Mason, an American who believes in the constitution and believes George W. Bush is our President.

I've started using RecAll to catch whatever I can. That's a voice-activated recording program for Windows. I leave the scanner on, set to 143.625, connected to the PC, with RecAll running. One hint, though -- disable the power down mode of your PC. I discovered that the sound card powers down, too, and nothing gets recorded. Duh.

Question for those who know: If I'm using a stock scanner, with either the rubber duck or a extendable antenna, am I better to place the antenna horizontally so it receives from "up there"? I'm thinking I should lay it along a north/south axis, so it will receive from the east to west horizon. Thoughts?

Gerry

Because anyone familiar with sampling theory and IBM punch cards knows
that the more those cards are handled the LESS accurate the count will
be. If the results were random, Bush would be getting the same number
of additional votes that Gore is. But EVERY TIME the ballots are recounted
Gore gets more votes. What's wrong with this picture? Why am I not surprised?

I won the Florida lottery! I'm now a multi-millionaire! Can you believe it? I'm bouncing off the walls here!
You see, my ticket doesn't have the exact winning numbers on it, but I meant to pick those winning numbers. The ticket was very confusing when I was filling it out and so I ended up with the wrong numbers on my card. But since I really meant to pick those other numbers, they're going to give me the money anyway!!!! They really shouldn't make those darn cards so hard to fill out!!! And even though I was confused, I didn't ask for help because no one would have helped me anyway. In fact, if the Florida State Lottery won't give me the money, I'll just sue.....

1355. FCC bungles again..restricts operating for Condo-residing hams

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-17 00:00:00 UTC
From: KC8JBO <kc8jbo@my-deja.com>

From the ARRL web page:

FCC Order Declines to Include CC&Rs in PRB-1

NEWINGTON, Nov 17, 2000--The FCC has denied an ARRL Petition for Reconsideration calling on the Commission to declare that PRB-1 applies to amateurs living in areas governed by CC&Rs or condominium regulations just as it does to hams regulated solely by local zoning laws. The FCC Order, released Wednesday, also seeks to "amplify" the definition of the oft-cited "reasonable accommodation" phrase in PRB-1 with respect to local land use and zoning.

"The Order provides some additional clarification on the extent of PRB-1 preemption, but it falls short of providing the relief that ARRL was seeking," said ARRL Executive Vice President David Sumner, K1ZZ. Because Deputy Wireless Telecommunications Bureau Chief Kathleen O'Brien Ham issued the November 13 Order under what's known as "delegated authority," the ARRL now is mulling whether to submit an application for review by the full Commission.

Ham was the same WTB staff member who denied the initial ARRL request on the subject a year ago. Sumner said the denial was "not particularly surprising at this point, especially when you're asking the same person to 'rethink' their original decision." The ARRL, he said, believes the issue is critically important and continues to gather additional information and plan on how to present its arguments more persuasively before the FCC.

In requesting that the FCC extend PRB-1 to restrictive covenants, the League said it wanted hams to be free to negotiate reasonable accommodation provisions with local homeowners' associations as they now may do with governmental land use regulators. This week's Order said the League failed to demonstrate any "significant change in the underlying rationale of the PRB-1 decision" that would necessitate revisiting the issue. "In the absence of such showing, we believe that the PRB-1 ruling correctly reflects the Commission's preemption policy in the amateur radio context," the FCC Order said.

The FCC Order said that even if the Commission does have authority to address CC&Rs within the context of Amateur Radio facilities, "this alone does not necessarily warrant revisiting the exclusion of CC&Rs from the Commission's limited preemption policy." The ARRL has argued that since PRB-1 was promulgated in 1985, the FCC has made it clear that it has Congressional authority to prohibit restrictive covenants that could keep property owners and even renters from installing

antennas to receive TV, satellite and similar signals. The same principle applies to Amateur Radio, the ARRL asserted.

The FCC Order says, however, that ham antennas are not like over-the-air reception device antennas, "which are very limited in size in residential areas." Regardless of the extent of the FCC's discretion with respect to CC&Rs generally, "we are not persuaded by ARRL's arguments that it is appropriate at this time to consider exercising such discretion with respect to amateur station antenna preemption," the Order said.

In its initial denial a year ago, the FCC said PRB-1 excludes restrictive covenants in private contracts as "outside the reach of our limited preemption," although it strongly encouraged associations of homeowners and private contracting parties to "follow the principle of reasonable accommodation" with respect to Amateur Radio.

The problem of restrictive covenants has been exacerbated in recent years as planned developments have drawn new residents from among the growing number of retired hams, who then learn they may not install a tower or outside antenna of any type. The League's Regulatory Information Branch reports that the topic of restrictive covenants and antennas is one of the most frequently raised by members contacting the ARRL for information.

The FCC Order also took the opportunity to clarify by example what PRB-1 means by "reasonable accommodation" in terms of amateur antennas. The Order says the FCC does not believe that zoning regulations providing for extreme or excessive prohibition of amateur communications "could be deemed to be a reasonable accommodation." As an example, the Order said, "we believe that a regulation that would restrict amateur communications using small dish antennas, antennas that do not present any safety or health hazard, or antennas that are similar to those normally permitted for viewing television" is not reasonable accommodation or minimum practicable regulation.

On the other hand, the Order said, communities wanting to "preserve residential areas as livable neighborhoods" would be free to adopt zoning that forbids antennas "commonly and universally associated with those that one finds in a factory area or an industrialized complex." The FCC conceded that while such rules could constrain amateur communications, "we do not view it as failing to provide reasonable accommodation to amateur communications."

The FCC Order also turned away the ARRL's request to provide greater definition via PRB-1 to protect amateurs from "prohibitive and excessive fees" that localities might impose. "Excessive costs associated with burdensome screening requirements are also often imposed by municipalities seeking a mechanism to preclude amateur antennas, notwithstanding the PRB-1 policy," the League had argued. Such costs "are the functional equivalent of a prohibition of amateur communications."

The FCC Order stuck to the earlier conclusion that the current standards for "reasonable accommodation and minimum practicable regulation" spelled out in PRB-1 "are sufficiently specific to cover any concerns related to unreasonable fees or onerous conditions." The FCC said that with these guidelines in place, "an amateur operator may apprise a zoning authority that a permit fee is too high, and therefore unreasonable, or that a condition is more than minimum regulation, and, therefore, impracticable to comply with."

The FCC also said that it continues to believe that it should "not specify precise height limitations below which a community may not regulate, given the varying circumstances that may occur."

The Order combined the FCC's response to the ARRL Petition for Reconsideration with its response to a similar filing from Barry N. Gorodetzer, N4IFE, and Kathy Conrad-Gorodetzer, KF4IDH, of Ft Lauderdale, Florida. In their petition, the Gorodetzers asserted that membership in a homeowners' association typically was mandatory, thus rendering moot any argument about "voluntarily entering into private agreements" with respect to CC&Rs.

A copy of the FCC Order is available from the ARRLWeb.

What's with the FCC? Shouldn't Hams who live in Condos be able to enjoy the hobby like those who rent, or own their own homes? Non-intrusive antennas like the Outbacker, for instance would go virutally undetected and really wouldn't harm the appearance of the condo property.

If that is true, ad I'm not sure it is, then I would think you'd be in favor
of hand-counting those ballots. That will prevent any further machine error
caused by anything, at least assuming it's under the watchful eyes of the
media and the parties involved.

It's pretty simple, actually...

They are? Doesn't look like it to me. In my area, "wireless cable" antennas are sprouting like mushrooms on rooftops in restricted subdivisions. Since these systems utilize microwave frequencies, the antennas must have a strict line-of-sight to the transmitter.

These receiving antennas are mounted on 20-40 foot telescoping masts, secured to the roof with tripods and multiple sets of guy wires. Doesn't look like they're very "limited in size" to me.

A monstrosity like this is permitted under the federal pre-emption...yet a simple 2m vertical or scanner antenna is not. Where is the FCC's justification for this?

The answer, of course, is $$$$$$$$$$. Broadcasters, satellite operators, and wireless cable operators all have big lobbying budgets. Ham operators and scanner enthusiasts do not.

Again, we have the best government that money can buy.

: > extreemly close (300 votes difference out of ~6 million votes cast)
: > election?

: Because anyone familiar with sampling theory

How accurate is that "theory" at 300/6,000,000 (.005)% ?

; and IBM punch cards knows
: that the more those cards are handled the LESS accurate the count will
: be. If the results were random,

Have you -seen- how they are handling the cards? It's not like they are
throwing them in a clothes drier. One county only counts the hanging chad
vote if it is HANGING on two corners or LESS.

; Bush would be getting the same number
: of additional votes that Gore is. But EVERY TIME the ballots are recounted
: Gore gets more votes. What's wrong with this picture?

Because the "EVERY TIME the ballots are recounted" are the **MACHINE**
recounts! Most of the really loose chad was probably wiped off after the
first machine count. The hand count has NOT been completed YET.

;Why am I not surprised?

You shouldn't be, because the hand counting is taking place in
predominantly Gore counties. You expect Gore's people to have a hand
count in Bush counties? That was Bush's job if he wanted it to happen.

: > I really think that all states ought to split their electorical votes

And don't forget about the Democrat county official who was caught with a voting machine in his private possession. At first he denied that he had it, then under questioning from the police finally admitted that it was in the trunk of his car. The police said there were no ballots found with the machine, my question is this:

The only use for a voting machine is to mark ballots, if there were no ballots found with the machine, where did they go? Most likely, they were already turned in at a friendly Democratic voting place during the election, or else they have been distributed to the various Democratic canvassers to add into all of the manual recounts...

And where is all of the news media concerning this, why is there no coverage of this incident, and where is the outcry for an investigation into this obvious attempt to help steal the election ?

If they voted for Gore, they DID vote for the wrong guy. :-) Just had
to say it.
I wonder why it is that these people didn't even realize they had voted
incorrectly until after they got home. I'd call these people unreliable
sources. No one can ever know how they actually marked their ballots.
Last I heard, there were 5000 signed affidavits of people who claim to
have accidentally voted for Buchanan in Palm Beach. Buchanan's Palm
Beach fund raiser had 1000 people in attendance.

Riiiight. And the (new) head of the FCC will drive to work, so we should
discuss cars here. And that license was printed on a laser printer, so we
should discuss printers here. And you have to sign your license before it's
valid, so let's talk pens......

10-10 International is a club organized to operate on the 10-meter band. To qualify for membership you need to (I think) work 10 members on 10 meters, send the details of the QSO's in to (someplace) including the "number" of each station you worked. They're on the web at http://listserv.lehigh.edu/lists/tenten-l/.

Chad no get counted in -this- election. :)
: --
: http://www.mindspring.com/~w6rca

I heard 78, and they had no idea -who- or what (political) race they came from. The presidential race was one of many-many pages of things we were voting on.

You know, I've even noticed chad on my machine punched computer printer paper. I wonder who's vote that is? ;)

The vote count today is the same as it was yesterday when the "final" vote counts were certified. Basically Florida is waiting for them to count and certify the overseas votes which are due to be opened tomorrow.

At the same time, several (large, in population) counties are trying to complete -the-one-and-only-complete- hand count of the votes for president. No way Palm Beach can count 600,000+ votes in one day.

Then the Republican election lady (who is still a Bush election person [can you say, "conflict of interest"]) at the state vote shack will -again- tell everyone her unbiased decision of whether or not she will -accept- a hand count that *BOTH* party's people have done.

Apparently, Sec. Baker doesn't even trust his own one half of the counters watching the other party's people watching his people, to do it correctly. The "I trust the American people....." bunch. :)

She has already released her considered decision today *before* anyone had even submitted any final hand counted votes. So I wonder what she will say when they actually do it? I also wonder what the Fla Supreme court will have to say about it when asked to pass judgement. :)

Why is it so hard for people to accept the fact that the election people (composed of *both* parties) are trying to get an accurate count out of an extreemly close (300 votes difference out of ~6 million votes cast) election? Maybe they ought to let Bush run the country for 2 years and Gore for 2.

I really think that all states ought to split their electorical votes based on the popular vote in the state and let it go at that. At least two

states -already- do that. That way the electorial college remains, but the popular vote is what does the job. As it is right now, 3 MILLION Fla voters will have their votes affectively thrown out once the dust settles.

You know, I wish you would post of name of some sort. I don't like calling you "fellow," and other such vague stuff. If you don't want your identity known, then just use you first name so we can put an ID of some kind on the person we're talking with.

Anyway, to understand why Bush did not seek a recount, you need to look at the demographics of the state of Florida. There are several large cities which tend to vote strongly for the Democrats, and a hurd of smaller districts that tend to vote slightly in favor of the Republicans. Unlike Gore, Bush votes in the state didn't come from a few, heavily Republican, districts. Instead, his votes came from a large number of districts with only a slight Republican vote majority.

Therefore, to offset the results of each one of those larger districts that tend to vote Democrat, Bush would have to demand a recount in a very large number of these smaller, slightly Republican, districts.

And, in fact, if we look at the exaggerated Gore votes in those larger districts (thanks to subjective interpretation of hanging chads, pregnant chads, and so on), there are not enough small, slightly Republican, districts in the entire state of Florida to offset those few large Gore districts.

> Bush did sign a bill in Texas that
> contained statements that hand counts
> were more accurate than machine counts.

No, the legislation does not say that. The purpose of that legislation was to extablish a consistent process for counting votes in Texas. The first, and primary, means of counting votes in that state is by machine. However, if there is a dispute of the accuracy of the machine vote, then a candidate can ask for a hand vote. And if there is a difference between the machine count and the hand count, the state will use the hand count sought by the candidate as the final count.

So, again, the legislation is not saying that one counting method is better than the other. If they were, they would be using hand counts instead of first using the machine count. Instead, the legislation simply says that this is the process to use in Texas.

However, having said that, I now have to ask what this has to do with Florida? The legislation in Texas sets a firm process for vote counting there, but has no bearing in the vote counting process in Florida. And there is no legislation in Florida that states that a hand count will be used as the final count when it disagrees with a machine count. And, in fact, the legislation in Florida seems to favor the machine count method.

Actually, with the exception of the ink pen, all of these have been discussed in this newsgroup before at one time or another. For example, we've discussed mobile radios, mobile antennas, installation in specific vehicles, mobile radio legislation, and so on.

And, as for the laser printer, you obviously missed the thread about two weeks ago where the person could not get his laser printer to work with some type of ham radio software. After several messages suggesting solutions, the thread turned to recommendations for more compatible laser printers. And there are other laser printer discussions that I remember (for example, one guy wanted to know if there was a wide carrage laser printer available so he could print his antenna designs).

And, finally, now that we've discussed the ink pen, even that has now been discussed here. ;-)

Don't fight it, Banjo. If you don't want to read about politics, filter out any messages that have the words, "Gore," "Bush," and "elections" in the subject. That alone will knock out about 90 percent of the messages.

What I don't understand is why other, non-military, people living overseas get this extension in the first place. As I understand it, the initial purpose of this extension was to give soldiers who were living in remote locations overseas, or serving in the field (possibly even in combat), extra time to receive the absentee ballots and to get then back to their home states.

If this is true, then why in the heck does some guy sitting at a cafe in Paris, Jerusalem, or Tokyo, deserve this same extension? Mail travels fairly quickly between the U.S. and these major cities.

If only it were that simple....

Most new "development" construction nowadays comes with CC&Rs as part of the package. Try to find a house (let alone a condo) built in the last 20-30 years that doesn't have a whole list of them.

The funny thing is, the origin of anti-antenna CC&Rs has nothing to do with aesthetics, safety or interference concerns. They were put there because of sweetheart deals between developers and cable TV providers. By effectively prohibiting outside antennas, they had a guaranteed cable TV market.

Look up article 8upheogdr1@iac5.navix.net from the originator of
this thread ("sent to Riley") and you'll see that this discussion
concerns the bootleggers on 10m. Everyone but you is responding with
10m in mind. A transmission on 10 is either amateur (authorized) or
non-amateur (unauthorized). If it's non-amateur, the FCC says it's
impossible to interfere with it; it's no different than QRN (that
means "noise").

Short of changing human nature, it's going to be pretty difficult
to eliminate them by us remaining silent. That fact that 10m can
appear so quiet at times is the main reason they've migrated to
there; no different from homeless folks inhabiting abandoned buildings.
But if the band if filled with happy hams making it difficult for
these homeless CBers to have a QSO, they'll surely go elsewhere.

But I'm curious about your "we don't want to transmit over them"
declaration. Who is this "we"? Did you take a vote? Did you utilize
a butterfly ballot? Was there any hanging chad?

>>On another note, I read the article below and thought of you.

I'm flattered that you think of me outside of this newsgroup; I
wish I could say the same.

>>Since you seem to >think more of laws than of the people that the
>>laws were meant to serve,

Part 97 of the CFRs is meant to serve the people; do I think more of
Part 97 than those people intentionally breaking federal communications
regulations on 10m? Unlike you, I certainly *do*. Lawbreakers are dirt.
Even the Lord wrote about what would happen to those who break federal
communications regs:

"Cursed is the ground because of you; in toil you shall eat of it
all the days of your life. Both thorns and thistles it shall grow
for you; and you shall eat the plants of the field; by the sweat

of your face you shall eat bread, till you return to the ground,
because from it you were taken; for you are dust, and to dust you
shall return." (Genesis 3-19)

See? I have God on my side.

I use what is called SURFboard SB3100 cable modem made by Motorola and
there is no signs of RF at all. I'm very well pleased. Good luck .

Cable modems transmit in the SW spectrum, but there should
be very minimal signal leakage. If any leakage is noticed,
your provider would want to know about itand repair it
because it indicates potential problems with your service.

Hello. I need some info on a motorola visar portable radio. What I need to know is whether or not you can add and delete channels from the scan list from a button on the radio, or if you have to select the channels you want to scan when you program the radio. Also, can you disable the scan function from a button on the radio, or does it get programmed into scan mode when you program the frequencies?

Any comments on how your visars have held up?

Thanks in advance
Adam (chip1@theramp.net)

Hello, All!

If your IF radio can go down to 27 MHz, you'd be better of buying a 65 MHz rock (all of the major crystal suppliers have the formula). This will allow 222-225 coverage.

Retuning is negligible, and generally takes less than five minutes. Net the rock, pump RF into the front end, and tune the LO and mixer stage for maximum smoke. You shouldn't need to adjust the RF or IF stages at all.

Cheers!

The chads are falling out of the cards like crazy - they are everywhere.
There have been reports of individuals slipping some of the dual punched
cards into the middle of a Gore stack. When you hold them up to the light,
you can't see the Buchanan holes in the center of the stack. The corruption
allowed and caused by human counting is certainly worse than any properly
operating machine. One counter was caught with a hole punch in his pocket.

What a sore spot this must be for Liberals!!! Their Hero, Al Gore lost by a hair breadth despite their voter panicked fraud attempts to put Al in the White House at all costs.
Good old plastic-faced Gore is still trying to foist the idea of "what the American people want."
This is a lie.
Al Gore cares not what you or I want, but with the help of Crook Bill Daley, he works toward what only HE wants.
They have an agenda for which they're fighting tooth and nail. We are not a part of their agenda.
Ask yourself why? Gore cares NOT one whit for you or me....he wants to sit upon the throne of power and he will stop at nothing to get it.
Al Gore is dangerous to the future of the United States. He is a Socialist.

Plubius

Back in my St. Louis days the regular 28.6 local Prevert net met, leading the nation to greater heights of preversion, on what sure seemed to be a dead band. We got broken into by two guys from Arkansas. As it developed, these two a) had no callsigns, and b) having bought the crystals they had every intention of using them. So for lack of anything better to do, we held a minor ceremony and assigned them WB5LID and WB5QLF.

A lot of the people on 10 meters do not have a clue they are even there. The way the rigs are modded, the legal 40 are kicked up in 450 kHz steps so that the 27.185 Channel 19 "up two" is guess what, 28.085.

It is hard to deal militarily with yoyos wanting to die and it is difficult in the radio biz to deal with misled idiots. QRM is the normal state of affairs so our contribution is somewhat pointless. They just move to 28.535.

Don't ask me what to do when you have a mass escape at the looney bin.

NOTICE OF REVOCATION OF INDEPENDENCE

To the citizens of the United States of America,

In the light of your failure to elect a President of the USA and thus to govern yourselves, we hereby give notice of the revocation of your independence, effective today.

Her Sovereign Majesty Queen Elizabeth II will resume monarchial duties over all states, commonwealths and other territories. Except Utah, which she does not fancy. Your new prime minister (The rt. hon. Tony Blair, MP for the 97.85% of you who have until now been unaware that there is a world outside your borders) will appoint a minister for America without the need for further elections. Congress and the Senate will be disbanded. A questionnaire will be circulated next year to determine whether any of you noticed.

To aid in the transition to a British Crown Dependency, the following rules are introduced with immediate effect:

1. You should look up "revocation" in the Oxford English Dictionary. Then look up "aluminium". Check the pronunciation guide. You will be amazed at just how wrongly you have been pronouncing it. Generally, you should raise your vocabulary to acceptable levels. Look up "vocabulary". Using the same twenty-seven words interspersed with filler noises such as "like" and "you know" is an unacceptable and inefficient form of communication. Look up "interspersed".

2. There is no such thing as "US English". We will let Microsoft know on your behalf.

3. You should learn to distinguish the English and Australian accents. It really isn't that hard.

4. Hollywood will be required occasionally to cast English actors as the good guys.

5. You should relearn your original national anthem, "God Save The Queen", but only after fully carrying out task 1. We would not want you to get confused and give up half way through.

6. You should stop playing American "football". There is only one kind of football. What you refer to as American "football" is not a very good game. The 2.15% of you who are aware that there is a world outside your borders may have noticed that no one else plays "American" football. You will no longer be allowed to play it, and should instead

play proper football. Initially, it would be best if you played with the girls. It is a difficult game. Those of you brave enough will, in time, be allowed to play rugby (which is similar to American "football", but does not involve stopping for a rest every twenty seconds or wearing full kevlar body armour like nancies). We are hoping to get together at least a US rugby sevens side by 2005.

7. You should declare war on Quebec and France, using nuclear weapons if they give you any merde. The 98.85% of you who were not aware that there is a world outside your borders should count yourselves lucky. The Russians have never been the bad guys. "Merde" is French for "****".

8. July 4th is no longer a public holiday. November 8th will be a new national holiday, but only in England. It will be called "Indecisive Day".

9. All American cars are hereby banned. They are crap and it is for your own good. When we show you German cars, you will understand what we mean.

10. Please tell us who killed JFK. It's been driving us crazy.

Thank you for your cooperation.

duff 706 not quite for sale yet.

The very nice and helpful folks at ICOM uk have furnished the bits and the schematics, and from a bit of judicious multimetering it seems that it might be a couple or so of £3 relays and one or two x 11p transistors that are the problems rather than a whole £300+ back end.

Finals are ok..phew!!

so i'm going to get a big magnifiying glass, some beta blockers to steady my trembling hands and remove the ofending articles and replace

if this doesn't work then I'll be taking offers

Thanks again to Geoff, Virgil and the team at ICOM uk for their very prompt and helpful response, a good example of marvellous customer service

Florida state law (and most other states) says that absentee ballots must be mailed by (and postmarked by) election day. Does that not seem reasonable?

I don't know how the mail works where you live, but everywhere else mail postmarked one day does not get delivered that same day.

The ten days is to allow mail transit time from anywhere in the world the ballot might have been mailed from. How would you have it done? Force the absentees to vote 10 days before the end of the campaign?

LRod

Everyone is born a conservative. It takes maturity to be a Liberal.

macho bubba (n): a noisome creature, incapable of independent thought; fond of blind repetition of unproven allegations; exhibits propensity for bluster; extremely self-centered; unaware of history or the laws of economics; almost always of a conservative bent, although the reverse isn't necessarily true; mean spirited.

Dear Queen:

You've not been paying much attention in the last 20-25 years, have you? We lost our independence a long, long time ago.

We are just sheep to them.
Bill showed our kids (well not mine, they know better because I talk to my kids) that it's fine to have oral sex with someone who is not your wife, now Al is teaching them to keep counting until you win.
ThIs has nothing to do with the "will of the people" unless you count the retarded, the homeless, and all the non-citizens in Florida.

It's just a matter of time until they finally destroy this country, and the people will have to once again rise up and reclaim it.

Remember Ruby Ridge and Waco.

I'll answer that question when you show me where, in the above quoted material, that non-amateur transmissions or 10 meters are mentioned. For all I know, he could have been talking about some olde farht on 40 meters that's been licensed since Hiram himself, and who starts his daily chat with some other olde farhtz when someone else is on the frequency.

jack-booted thugs line snipped. Jack boots is like 'head them off at the pass'; no one has the slightest idea what it means.

Tom, the biggest single factor in the invasions is that modified radios and the yo-yos who blather on them are set up on channels, not frequency. It is very likely that most of the truckers that seem to be the center of attention think they are on Channel 19, two up and wouldn't know 28.085 if it ran over their toes on a tricycle. Having bought the gear, they plan to use it -- pretty much the same line you get when you get into your neighbor's stereo or his leaky cable modem gets into your radio gear.

So Riley sallying forth on 085 is certainly spectacular but just what sort of effect can he possibly expect? The urge for the 'private frequency' is just too blessed strong. Atlantic Magazine, I believe about April 2000, documented the same thing among Alaskan fishing communities. The Marine bands in that area are a first-class mess.

You cannot reverse 20+ years of non-attention overnite in any case but it sure seems the obvious place to start is the equipment and a few well-chosen crucifixions among both builders and users.

My, my. Seems that people who like their seats non-sticky or their bands clear need enforcement. When the inevitable happens, do we hear about jack-booted thugs then as well??

1419. Proposed Compromise - FL Ballot Recount

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-18 00:00:00 UTC
From: Dwight Stewart <stewartx@sccoast.net>
Message-ID: <3A16C8DF.D7E4BB51@sccoast.net>
Source record: 99580
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

There has been much discussion about the integrity of the ballot recounts in Florida. The concern centers around the fact that it is Democrats doing the recounts in districts which voted heavily for Gore (a Democrat). Many have wondered whether Democrats can honestly count the ballots, based on their own vague interpretations of the voter's intent, without introducing bias into that recount.

In addition to the actual workers doing the recount of the actual ballots, the Canvassing Boards in those districts are also controlled by Democrats. Members of the Canvassing Board make the final decision when it comes to disputed ballots. Many have wondered whether members of those Canvassing Boards can make decisions about disputed ballots without allowing their obvious pro-Democrat bias to effect that decision.

To resolve the concerns, reports are now coming out of a proposed compromise that would eliminate potential bias in the recount process. The compromise would remove all Democrats from the recount process and replace them with Republicans instead. Those Republicans would then handle the recounts in those mainly Democrat voting districts until the conclusion of the recount process.

Supporters of the compromise say that replacing Democrats with Republicans would eliminate any pro-Gore bias in the recount process, and will ensure that the true will of the people is made known during that process.

Initial response from both sides has been swift. Republicans responded by saying that the vote recount process it over, so there should be no further recounts at all. Democrats, on the other hand, rejected the proposal by saying that it would be patently unfair to allow members of only one political party to control the recount process in those voting districts.

Despite initial rejection by both parties, supporters of the compromise are urging other supporters to contact members of the press, and the Florida State Supreme Court, to make their views about the compromise known. Supporters said that if enough people make their will known, changes will be made to insure a fair and accurate recount of the Florida ballots.

Hi ....
I have a Kenwood TS-940 that I would like to change the AM modulator
circuit. It has the normal inferior unbalanced SSB circuit for AM transmit.
Does anyone have or know of any design's for a high performance low level
modulator ?? The new circuit would have to operate at 8.830mhz that's the
IF of the radio. All info would be appreciated

Thanks John, KI4NR

1429. Ham Radio in The Onion

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-18 04:24:02 UTC
From: "Louis Sica, Jr." <lsica@DONSENDMENODAMSPAMmediaone.net>
Message-ID: <CvnR5.6528$pw2.652970@typhoon.mn.mediaone.net>
Source record: 99553

This week's "The Onion" (an online politically satirical newspaper known for it's sharp political humor but also it's purposeful offensiveness and complete lack of taste) has mock reports on Bush and Gore Militias taking control of various parts of the United States. What's interesting about those articles (to us) is how it pretends to report that in a lot of these places all communications are cut off (radio, television, Internet) but ham radio still gets through.

Even though the web page and the articles may be found by many to be in bad taste, it's still interesting that even in the most cynical corners of pop culture, we're still considered to be the communications of last resort. When everything else goes down, count on the hams.

> a difference between the machine count and the hand count, the state
> will use the hand count sought by the candidate as the final count.

Very insightful post Dwight, your explanation about the demographics and Bush holding a slight lead over a vast area of Florida certainly explains Bush's imediate rejection of Gore's offer, and maybe Gore's ease and speed of offering that option (hand counting the whole state), perhaps knowing that Bush had no choice but to reject the compromise outright. Your interpretation casts light on that exchange.

However, I see a problem with this legislation that Bush signed....and I'm a current Bush supporter: This legislation that Bush signed, and you described, appears to support the allegation that Bush favored the idea of a hand-count in cases of election dispute, (which runs contrary to Bush legal efforts to stop a hand-count currently), ...and Bush signed legislation acknowledging that in cases of disputing counts between hand-counts and machine counts: Hand-counts win.

> So, again, the legislation is not saying that one counting method is
> better than the other. If they were, they would be using hand counts
> instead of first using the machine count. Instead, the legislation
> simply says that this is the process to use in Texas.

I'm just playing Devil's advocate here: A likely interpretation of that Texas ruling seems to indicate that when faced with two conflicting election counts between machine counts and a hand counts, the hand-count wins. By law. Isn't that evidence, in and of itself, that the Texas legislature choose what they felt as the *better* method? It may be based on intent, but Intent is a major componet of law. Isn't that exactly what Florida localities involved in this dispute contend?

> However, having said that, I now have to ask what this has to do with
> Florida? The legislation in Texas sets a firm process for vote counting
> there, but has no bearing in the vote counting process in Florida. And

> there is no legislation in Florida that states that a hand count will be
> used as the final count when it disagrees with a machine count. And, in
> fact, the legislation in Florida seems to favor the machine count method.

We would hope so, 'cause Bush surely can't make a case by holding up Texas
as an example.
We're gonna have a legal disconnect over *that* one.

Where did Jesse "Rent-A-Riot" Jackson disappear to so suddenly? Seems he showed his bug-eyed face in Florida and got booed by hundreds of Florida residents when he marched in the streets with his twenty or so supporters.
Do you suppose that he got the message that he was not wanted?
If there is a camera to be had, Jesse will be poking his homely face into it...the guy has no shame or pride.
Hey, Jesse...the Florida voters don't use Ebonics to punch the ballots.....go home!

I might add that 10-10 is instrumental in ensuring that activity
continues on 10 meters even during the low sunspot years; their
devotion to that band remains unshaken regardless of the sun's mood.

I am cleaning out the Shack. I am open to trades and offers.
Things I'm interested in (but not limited to): Shortwave radios, Scanners,
VHF SSB Gear, HF Gear.

Kenwood TS-520 HF Radio
Cobra 142GTL Base CB
HTX - 202 2m Handheld
Utica 650 6m AM tube rig w/ VFO
HR-2600 10m Rig (Need alignment)
Antronn 99 10m/11m Vertical (w/ Ground Plane Elements)
Diamond X-300 2m/440 Dual Band Vertical (w/ Ground Plane Elements)
Moonraker 10m/11m 4 element Quagi (Switchable from horizontal to vertical
polarization)
Astron 70 Amp Metered Power Supply
Astron 25 Amp Metered Power Supply
Mirage 2m 160w Amplifier
Texas Star 500 10m/11m Amplifier four-transistor Amp (Needs Work)
120 watts Home- Built 10m/11m two-transistor Amp
Radio Shack Pro-64 Handheld Scanner
Bearcat 760xlt mobile
Turner Plus 3B Desk Mic
Turner Plus SuperSidekick
Kenwood MC-50 Desk Mic
PDC-700 Power Scanner 10m/11m (SWR,Mod,Power)
NDS TA-27 RF Pre-Amp w/ Variable Gain
Citizens Band Field Strength Meter
Regency HX 650 Scanner (Crystal Type)
R-390A/URR Military HF Receiver (GREAT! Condition)
RG-8,RG-8, and more RG-8

This is the Radio Equipment I am parting with:) All Equipment is in great
shape. If anything here interests you let
me know.

>>dean -- UH is a 10-campus system).

>I think it's great that just one sentence of my words can stir you to such
>extreme levels of paranoia.

Oh, I feel absolutely no paranoia. I'm more concerned about your view
of the 10m bootleggers. To which camp do you belong? Have QSOs that
might fall on top of them, or Tom's leave-them-alone-they-might-go-away?

>Threatening phone calls? Mail?

Yeah. Knock it off. AOL has been notified of your stalking and threatening
behavior.

>However, I do take issue with your use of taxpayer-funded, public university
>Internet access to post your off-topic biblical quotes in this forum.

The topic is abuse of the 10-meter band; it's entirely on-topic in this
forum. I will continue to intersperse Biblical quotes in this and future
radio discussions now that I know it interests you; read John 3:15.

>Since your employer is also the provider of your Internet access which is being
>used for this purpose, I do believe the Dean (a/k/a your supervisor) has the
>right to be informed as to what goes on here.

And once again, the university will recognize and affirm the right of
free speech, using any university media. News.hawaii.edu carries
almost every newsgroup in existence, and fills my news file with each
and everyone of them.

Now, let's see what really set you off:

Short of changing human nature, it's going to be pretty difficult
to eliminate them by us remaining silent. That fact that 10m can
appear so quiet at times is the main reason they've migrated to
there; no different from homeless folks inhabiting abandoned buildings.
But if the band if filled with happy hams making it difficult for
these homeless CBers to have a QSO, they'll surely go elsewhere.

Remember, the FCC has stated that "it's impossible to interfere
with unauthorized transmissions." Thus, transmitting on top of
the bootleggers will not be considered as intentional interference

by the FCC.

There are nine election officials, of which, one is a Republican. The fact remains that since Gore's hired statisticians (reported in NY Times) have told him that he will not win they (the democrat election officials and gore) NOW want to change the standards mid stream and count these dimpled ballots. Hell in one county they are ALREADY counting the dimpled ballots and then REPLaCING them with NEW ballots that have never been touched by a voter.
It's obvious there is cheating, double standards, bias, and a concerted effort to steal the election fronm Bush.

A Thanksgiving message from Lloyd Davies.

Hello.

I hope this message finds you well. This week, In the UNited States, we celebrate a holiday called Thanksgiving. It's one of my favorite times of the year. I do enjoy a nice Thanksgiving dinner with the family, but I also like to reflect on things that are my inner being, things that make me what I am.

I do not get much of a kick about Christmas anymore, since we have no proof Christ was born on Dec 25, and also Dec 25 falls on a sun god holiday (Thanks Prophet Stair)

I am thankful for the GENESIS COMMUNICATIONS NETWORK . I enjoy the information put out by Alex Jones, Bo Gritz, Joyce Riely, etc. They provide information that no other source would give you. Information regarding UN takeovers, Martial Law, etc.

I am thankful for Prophet Ralph G. Stair. He is a true Prophet of God. His voice can be heard all over the world!

I am thankful for Kevin Strom and the National Alliance. I have learned about my white roots and feel better for knowing it.

I am thankful to Bill Laterbach and DWM Communications. Without the Tiny-tenna, I could not hear all these wonderful stations!

I am thankful to THE GREAT LIBERTY NET! They have helped learn even more things. They help me keep informed and what to do about it.

I am THANKFUL I was Born WHITE! Not a black, not a Jew, or someone with homosexaul tendicies.

But most of all, I am thankful for Shortwave Radio! Without it, I would never learn of my white roots, or what is really happening in our nation! I would have never been freed from the mind-control effects of TV, Hollywood, etc.

What are you thankful for???

1449. (Help) Trans Oceanic 1000-D

Newsgroup: rec.radio.amateur.misc
Date: 2000-11-19 00:00:00 UTC
From: revdavek@webtv.net
Message-ID: <15127-3A188748-62@storefull-227.iap.bryant.webtv.net>
Source record: 99346

I need help with an old Trans Oceanic model 1000 chassis # 9ct40z2

It seems the pin that is the "+" is grounded. I checked this with my meter and there is continuity to ground. I opened the set up and removed it from the cabinet to have a look around and see nothing that might have smoked. Can anyone please help me out as to what next to look for. With 12 volts to the radio all you get is a very slight crackle when you hook power to it from the speaker.

I also found a cap 12 mfd electrolytic was shorted to ground. I took this out of line and now have some Hum but still no sound or volume control. Also, the output transistors seem to get very hot.

Thanks,
Dave.

> the small percentage difference in
> votes.

Bush decided not to have a recount because a recount had already been done. There was the initial count Tuesday, which Bush won. There was a recount of all ballots state-wide on Wednesday, which Bush also won. At that point, this recount nonsense should have been over (which is why Bush didn't ask for more).

But Gore, on the other hand, continued to ask for more recounts. He asked for another recount of 19,000 disputed ballots in the Palm Beach area (the butterfly ballot nonsense), and Bush was still the winner. He then asked for a hand recount of those 19,000 ballots, and Bush was still the winner. Then Gore asked for a hand recount of 4,000 ballots in still another county, and Bush was still the winner.

And, now, in spite of all those other recounts, Gore is asking for still another recount - a hand recount of all ballots in Florida districts which tended to vote for the Democrats. And now, if that recount still shows that Bush is the winner, there are hints from some Democrats of even more recounts in still other districts, or possibly even in the whole state.

This endless recount nonsence has to end. At this point, there is no ligitimate reason to continue the recounts. In fact, the only reason to continue the recounts is to manipulate the election so Gore can steal the presidency.

> What about the thousands of
> disenfranchised Demo. citizens
> who decided not to vote after the
> networks declared that Bush had
> won Florida before the Florida
> polls closed?

James, that is absolutely wrong. The major networks declared "GORE" the winner in Florida early Tuesday evening, long before the polls had closed. They did not declare Bush the winner until 2:18 am on Wednesday morning, many hours after the polls were closed (and more than 96 percent of the ballots had been counted).

In the districts that Gore asked to be recounted. Again, it is Democrats doing the actual counting in those districts. There are observers from each political party, but they are not involved in the actual count - they observe the count, not actually do the count. And those observers are also not directly involved in the decision making process of the Canvassing Boards, which are Democrats in those specific districts. And, in case you forgot, it is those very members of the Canvassing Boards which actually make the decision on each disputed ballot.

> > After all, it would eliminate any
> > Democrat bias in the recount.
>
> And substitute republican bias.

So, you're willing to admit that there might be some bias if only one political party is involved. And, to avoid possible Republican bias in the recount, you're willing to accept possible bias on the part of Democrats. And that obvious possible bias is what you, and Gore, calls a fair and accurate recount of the votes.

> watching EVERY ballot counted.

As I told LRod and Kim, it is Democrats doing the actual counting in those districts. There are observers from each political party, but they are not involved in the actual count - they observe the count, not actually do the count. According to the rules I saw, those observers are not allowed to actually touch the ballots, nor are they allowed to interfere with the Democrats who are actually counting the ballots.

And, far more importantly, those observers are also not directly involved in the decision making process of the Canvassing Boards, which are Democrats in those specific districts. And, in case you forgot, it is the members of the Canvassing Boards who actually make the decision on each disputed ballot (not the counters or the observers).

> and machine counts: Hand-counts win.

No, you missed the key point of the legislation. If the candidate
asks for a hand recount, then if there is a difference between the
machine count and the hand count, the state will use the hand count
SOUGHT BY THE CANDIDATE as the final count. It's not saying that the
hand count is more accurate, only that the state will go with the hand
count in an effort to end the conflict with the candidate. Remember,
the goal of the legislation is to bring an end to the conflict, and the election.

But that does not change my argument, LRod. As I understand it, the initial purpose of this extension was to give soldiers who were living in remote locations overseas, or serving in the field (possibly even in combat), extra time to receive the absentee ballots and to get then back to their home states.

So again, if this is true, then why in the heck does some guy sitting at a cafe in Paris, Jerusalem, or Tokyo, deserve this same extension?

So, to answer your question above specifically - yes, if the person chooses to live overseas, then it is his responsibility to get the ballot back to the states on time, even if that means that he has to do it 10 days before the end of the campaign. The soldier overseas did not choose to be in those remote locations, so deserves an extension. The guy who just prefers french coffee does not.

So, what is wrong with the proposal, LRod? You obviously think it is okay to allow only one political party to count the ballots in Florida. So, why can't Republicans be that one political party? After all, it would eliminate any Democrat bias in the recount.

I stand corrected.

> You obviously think it is okay to allow only one political party to
> count the ballots in Florida.

Cite where that is the case.

> So, why can't Republicans be that one political party?

Cite where there is only one party of any denomination that is doing the
counting.

> After all, it would eliminate any Democrat bias in the recount.

And substitute republican bias.

LRod

Everyone is born a conservative. It takes maturity to be a Liberal.

macho bubba (n): a noisome creature, incapable of independent thought;
fond of blind repetition of unproven allegations; exhibits propensity
for bluster; extremely self-centered; unaware of history or the laws of
economics; almost always of a conservative bent, although the reverse
isn't necessarily true; mean spirited.

Thats right, James. According to those reports on tv, it is Democrats doing the actual count, with Republicans looking on (republicans do not touch the ballots). And, in case of a disputed ballot, it is turned over to a member of the Canvassing Board for final determination. The members of those Canvassing Board are Democrats, with no Republicans involved in that final determination process.

And, yes, there are reporters looking on from remote locations around the room, but they are not allowed to approach the actual counters to see what they are doing with each ballot, nor are they allowed to watch the Canvassing Board decision on each ballot.

There was once a medical student specializing in pathology who truly wanted to excel in his studies. Without fail, he would daily visit the school's path lab following his classes to do extra work. One evening he uncovered a cadaver only to notice a cork plugging it's rectum. Curious, he removed the cork only to hear, "CQ contest , I just can't wait to call CQ contest ..." Startled, he replaced the cork.

Curiosity soon got the best of him and he once again removed the cork. Again he heard the tune, "CQ contest , I just can't wait to call CQ contest ..." He could stand it no more. He replaced the cork, covered the cadaver and raced upstairs to his professor's office. He persuaded the man to Accompany him back to the lab. Once there, the student again uncovered the cadaver and displayed the corked rectum.

The professor looked unfazed. When the student removed the cork, the same soundemanated, "CQ contest , I just..." The professor looked bored and started to walk away. The student was aghast at this
casual response. He said to the professor, "Don't you find this amazing?" The professor replied, "Not really, almost any asshole can call "CQ Contest"

Here is the list of stressors, along with their relative weights, from Drs. Thomas H. Holmes and Richard H. Rahe, psychiatrists at the University of Washington Medical School. K1OIK made certain additions:

Event Relative Rating
Talk to an attractive female direct 200
Wife is ovulating and wants
to conceive a child during a contest 200*
Talk to a female on the air 103
Forced to sell rig 102
Theft of rig 101
Death of spouse 100
Ham takes a bath or shower 100
Antenna falls 100
Linear amp blows finals in contest 100*
Contest weekend, propagation sucks 100*
Try to fix own rig 99
Change in call sign 99
Spouse walks into ham shack 99
Trouble with rig 87
Divorce 73
Receiving a packet message 69
Outstanding ham achievement 67
Marital separation 65
Jail term 63
Death of close family member 63
Sending a packet message 54
Personal injury or illness 53
Listening to a repeater 52
Marriage 50
Wife goes into labor during a contest.
(Extramarital affair hams don't do sex) 50 *
Fired at work 47
Marital reconciliation 45
Retirement 45
Change in health of family member 44
Pregnancy 40
Sex difficulties (all hams have this) 39
Gain of new family member 39
Eyeball "QSO" 34
Change in financial state 38
Death of close friend 37
Change to different line of work 36
Change in number of arguments w/ spouse 35

Change in number of QSOs 33
Mortgage over $10,000 (!) 31
Foreclosure of mortgage or loan 30
Change in responsibilities at work 29
Son or daughter leaving home 29
Trouble with in-laws 29
Outstanding personal achievement 28
Wife (spouse) begins or stops work 26
Begin or end school 26
Change in living conditions 25
Revision of personal habits 24
Trouble with boss 23
Change in work hours or conditions 20
Change in residence 20
Change in schools 20
Change in recreation 19
Change in church activities 19
Change in social activities 18
Mortgage or loan less than $10,000 17
Change in sleeping habits 16
Change in # of family get-togethers 15
Change in code speed 15
Change in eating habits 15
Vacation 13
Christmas 12
Minor violations of the law 11
Receiving a QSL card 09
Ham's child dies 07
Death of a ham friend 01 (all hams are dead anyway)

*Contributions by
Tom - N8ECW

WHY MEN ARE BETTER THAN HAMS

1) They can go all night doing something worthwhile.

2) Their rubber ducky works but the ham's part doesn't.

3) They are ALWAYS communicative in a real way.

4) If they get boring you can always hit the belly button.

5) They have no problem with "Frequency."

6) They are alive.

7) You don't want to "squelch" them.

8) They can be "reprogrammed" to act human

9) A ham will tell you all men's secrets that they never experianced
for themselves

10) Their "transmitters" are never empty.

What is all this I see on packet about gun control? Are we to have the big guns controlled? Are they working too much DX? Will the Brady bill affect the DX contests? I see where multiple transmitter DX stations are being regulated OUT (no more assault stations). I see where some communities are offereing $5O to 1OO for a gun (is a gun like a DX-40 or a QRP transmitter?). Those trying to control guns think they operate bands I never heard of (.22, .45 and a real strange band 30-30). Have the ARRL and N.R.A. gotten together promote big guns?

I guess hams do need big guns because from what I hear their "XYLs" are always complaining about pee shooters.

Yes, they were reported as foolish ravings.

LRod

Everyone is born a conservative. It takes maturity to be a Liberal.

macho bubba (n): a noisome creature, incapable of independent thought;
fond of blind repetition of unproven allegations; exhibits propensity
for bluster; extremely self-centered; unaware of history or the laws of
economics; almost always of a conservative bent, although the reverse
isn't necessarily true; mean spirited.

Apparently there are a few honest Democrats. :-) Bush is picking up
votes in Broward County while Bush holes are being taped up by Palm
Beach County.

The U.S. is quite properly called a representative democracy.

... Erich

It's not a democracy because some citizens are prohibited from
voting.

hi mike
welcome to 6 meters
the band is called the magic band cause its very tough to predict when it opens
and to where but normally it opens mid day or early afternoons
the freqs to listen to is 50.125 and 50.110 and also listen below 50.100 for the
CW beacons it will help let you know when the band is open
as for the icom FM board for that 551D you might as well try to find a woman
who doesnt like shoes there out there but real hard to find
see icom made that as an option and back when that radio was made there was very
little activity on FM so not to many people bought them
so if you find one it most likely would be in a radio that the ham wouldnt want
to seperate
besides most of the activity on 6 meters is still on SSB anyways
good luck hope i helped
please email me if you need anyhting else

>*sigh*
>Time to talk to the Dean again...

I think it's great that my words can stir you to take such action
(make sure you also mention the threatening phone calls and mail
you've been sending to me; also make sure you contact the correct
dean -- UH is a 10-campus system). But this still doesn't resolve
the 10-meter problem. The dean won't be able to help in that regard;
what are your suggestions?
